

MEGHA FLOWERS PVT LTD  
FRAGRANCE UNLIMITED

## Day to Day Care of Cut Flowers

### Tips for Wholesaler

#### Receipts

- \* Check the name, quantity, quality, price and water supply (if any) the products.

#### Storage

- \* Make sure that the temperature is constant during storage and transport. The ideal temperature is around 5 degree C.
- \* Keep the storage time as short as possible.
- \* Always apply the 'First in, First out' principle.
- \* Pack the products carefully to prevent damage during transport or by frost.
- \* Prevent contact with ethylene gas (exhaust fumes, fruit).
- \* if possible, avoid extra handling.
- \* When dispatched dry in a box, flowers should be carefully fastened and flower buds should be protected to prevent damage.
- \* In extreme cold cover the trolley with clingfilm, but make sure there a sufficient flow of air.

#### Transport

- \* For outgoing goods, check the number, quality, packaging and amount of water ( no more than 5 cm).
- \* Always transport in water.
- \* Transport the products at a temperature of 2-5 degree C.
- \* Keep the transport time as short as possible.
- \* Do not transport flowers together with vegetables and fruit. if this is unavoidable, make sure that there is adequate ventilation to dispose of ethylene fumes.
- \*\* Orchids and Anthurium must be transported at a temperature of at least 15 degree C.

#### EXPLANATION OF THE SYMBOLS

 This shows The availability of a product by quarter i.e. jan - march.

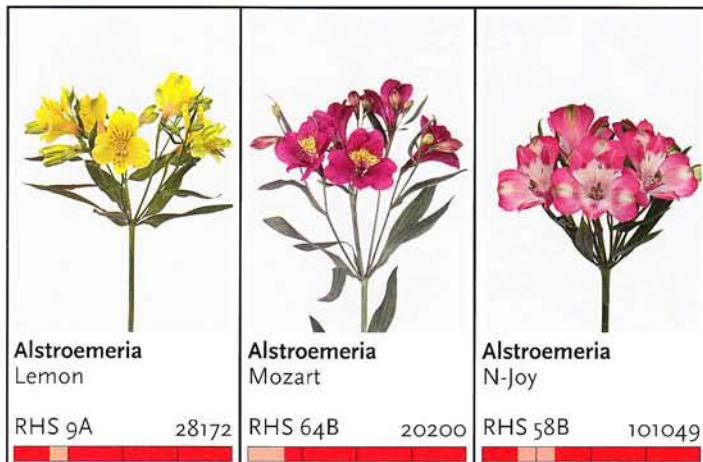

Red = easily available

Pink = Moderately available

White: unavailable /rarely available

6351= VBN product code. This code is used for identifying and ordering flowers, pot plants and garden plants at the auctions/ by traders at the auction.
