### UNITED KINGDOM NATIONAL LISTS OF VARIETIES OF AGRICULTURAL PLANT SPECIES

#### OFFICIAL NOTICE BY THE NATIONAL AUTHORITIES IN THE UNITED KINGDOM

1. The United Kingdom National Lists were last published in the February 2019 Special Edition of the Plant Varieties and Seeds Gazette and amendments to these lists have been published in the subsequent monthly editions.
2. The National Authorities have now reprinted the National Lists containing the amendments which have been made up to and including those made on 30 June 2019. You will note that we have used the same procedure as last year and only show the Maintainer and UK Agent's code against each variety. The name and address for each code are given in the address list at the back of the publication. In showing the UK Agent the National Authorities refer only to the Agent as shown in the application and have no knowledge of the commercial activities of such persons. For ease of reference the species prescribed in the Schedule to the Seeds (National Lists of Varieties) Regulations 2001 (as amended) are listed in the order in which they appear in the Common Catalogue and are numbered accordingly.

#### MARKETING

3. Attention is again drawn to the fact that it is an offence, subject to certain exceptions, to sell, hold with a view to sale or offer for sale or any disposal, supply or transfer of seed to a third party seed of a plant variety (a) unless and until the name of the variety is included in the appropriate United Kingdom National List or the EC Common Catalogue of varieties of agricultural plant species or (b) under a name other than that which is given in a National List or the Common Catalogue for that variety. The principal exceptions are sales etc, in connection with exports of seeds to countries outside the EU area and contractual arrangements for multiplication and tests and trials. Other exceptions are where authorisations have been granted under the seed marketing regulations to market appropriate quantities of unlisted agricultural varieties for tests and trials, to market uncertified seed of unlisted vegetable varieties for the purpose of gaining knowledge from practical experience during cultivation or to market small quantities of uncertified seed either listed or unlisted of agricultural or vegetable varieties. It should be noted, however, that the relevant marketing regulations concerning seeds of fodder plants prescribe the species to which the "commercial seed" category applies and in which it is therefore permissible to sell by species name only and without reference to variety. However, once a variety name is mentioned in connection with the commercial seed category, whether by supplier's label or otherwise, the provisions of the National Lists Regulations regarding the use of that name appropriate to the variety will apply. The kinds of seed to which the commercial seed category applies are as follows:-

##### Grasses

Annual Meadowgrass

##### Legumes

Hungarian Vetch  
Sainfoin

##### Oil & Fibre Plants

Black Mustard

4. Any variety which has been deleted from the Lists but for which the National Authorities have allowed a period for the disposal of seed stocks which have been produced or were in the course of production when the variety was deleted from the List are indicated below the appropriate List. In each case the date of the expiry of the period permitted by the National Authorities is included. It would be an offence to market the seed after those dates.

#### DATE OF ENTRY TO THE NATIONAL LISTS

5. In the case of varieties added to the National Lists since 1 July 1973 the dates of entry have been indicated. Against certain dates the symbol \* appears. This indicates that the variety was entered on the original National Lists with the dagger symbol and that this symbol was removed on the date quoted.

Where no dates are given, the date of entry is assumed to be 1 July 1973.

## MAINTENANCE OF VARIETIES ON THE NATIONAL LISTS

6. The maintainers of varieties entered on the National Lists are reminded of their responsibilities under the provisions of Regulation 7 of the Seeds (National Lists of Varieties) Regulations 2001(as amended). They are asked to check the information provided in this Gazette and inform the Animal and Plant Health Agency (APHA), Eastbrook, Shaftesbury Road, Cambridge CB2 8DR, of any amendments which should be made to the National Lists and, where applicable, to the Common Catalogue. **The maintainers are also requested to notify APHA of any varieties which are no longer being maintained.**

## COMMON CATALOGUE

7. The last Complete edition of the EC Common Catalogue of varieties of agricultural plant species was published on 11 January 2019 (37th edition) taking into account all amendments up to 29 October 2018.

## NATIONAL LISTS OF FODDER PLANT SPECIES

8. Ploidy is indicated in the column headed classification by the letter “D” (Diploid) or “T” (Tetraploid).

## ENQUIRIES

9. If anyone is in any doubt about the status of a variety or has any query in connection with the National Lists or the EC Common Catalogue, they should contact the Animal and Plant Health Agency at the address given in paragraph 6 or telephone NL/PBR Team Manager, Rob Warlow 02080 265930. Enquiries relating to specific crops should be made to the appropriate contact listed below:-

### OFFICIAL NOTICE BY THE NATIONAL AUTHORITIES IN THE UNITED KINGDOM

#### UNITED KINGDOM NATIONAL LISTS OF VEGETABLE VARIETIES

1. Revised United Kingdom National Lists of Vegetable Varieties were last published in the February 2019 Special Edition of the Plant Varieties and Seeds Gazette and amendments to these Lists have been published in the subsequent monthly editions.

2. The Agriculture Departments now publish the Lists which with effect from 1 July 2019 are the definitive UK National Lists of varieties of vegetable plant species. These include all amendments up to and including 30 June 2019.

3. The varieties are listed in species order and this follows the numbering order of the EC Common Catalogue of Varieties of Vegetable Species. The lists of species are divided into two parts, List A and List B, as follows:-

List A denotes the varieties of which seed may be certified either as “basic” or “certified seed” or controlled as “standard seed”,

List B denotes the varieties of which seed may be controlled only as “standard seed”.

4. Included against each variety name are references to the maintainer or maintainers of the variety. Also included are traditional synonyms which have been accepted in the United Kingdom and, where appropriate, the main name as shown in the EC Common Catalogue of Varieties of Vegetable Species in order to provide an easy cross reference to the Catalogue. The synonyms are shown immediately below the variety name preceded by a dash.

5. Appendix A lists “maintenance” names. These are not part of the National Lists and must not be used by themselves in advertising or dealings in seeds. They should be used in conjunction with the appropriate listed varietal names provided that the varietal name always precedes the “approved maintenance” and the latter is given no greater prominence than the varietal name. Varieties with maintenance names are identified in the main list with the symbol @.

6. In the case of varieties added to the National Lists since 1 January 1973 the dates of addition have been shown. Against certain varieties the symbol \* appears. This indicated the variety was entered on the original National List provisionally and that the entry became substantive only on the date shown.

7. Attention is again drawn to the fact that it is an offence, subject to certain exceptions, under the Seeds (National Lists of Varieties) Regulations 2001 (as amended) for any person to sell, hold with a view to sale or offer for sale or any disposal, supply or transfer of seed to a third party seed of a variety of a prescribed species unless that variety is included in the UK National List or the EC Common Catalogue; the principal exceptions are sales etc. in connection with exports of seed to countries outside the EC area and contractual arrangements for multiplication. Other exceptions are where authorisations have been granted under the seed marketing regulations to market appropriate quantities of unlisted vegetable varieties for the purpose of gaining knowledge from practical experience during cultivation or to market small quantities of uncertified seed either listed or unlisted of agricultural or vegetable varieties. It is also an offence under those Regulations to offer or expose for sale or sell seed of a variety of a prescribed species except under the name given in the National List or EC Common Catalogue, and to advertise seed of a variety of a prescribed species until the naming procedures laid down in the Regulations have been completed and except under the name which the National Authorities have approved.

8. Any variety which has been deleted from the Lists but for which the National Authorities have allowed a period for the disposal of seed stocks which have been produced or were in the course of production when the variety was deleted from the List are indicated below the appropriate List. In each case the date of the expiry of the period permitted by the National Authorities is included. It is an offence to market the seed after those dates.

9. (H) denotes that the variety is a Hybrid
