Our plant list gives an indication of varieties usually grown on the nursery. Some may be in small numbers and not always produced each year. If you are looking for a particular plant then do not hesitate to ring or e-mail before visiting.

Nursery open March-September, Thursday-Saturday, 10-4.30

Achillea 'Salmon Beauty'	Flat heads of creamy pink flowers fading to a lighter shade with age. Well drained soil. Full sun. H70cm x S70cm.
Achillea 'Terracotta'	Flat heads of orange flowers in summer. Well drained soil. Full sun. H70cm x S70cm.
Achillea 'Walther Funke'	Flat heads of orange red flower in mid summer. Any good well drained soil. Sun. H70cm.
Achillea millefolium 'The Beacon'	Flat heads of deep red flowers in summer. Well drained soil. Full sun. H70cm x S70cm.
Aconitum carmichaelii 'Spatlese'	Erect tuberous perennial. Divided deep green leaves with tall spikes of hooded light blue flowers in Autumn. Fertile well drained soil. Sun to part shade. H160cm.
Ageratina altissima 'Chocolate'	Formerly Eupatorium. Maroon brown leaves with white flowers in summer. Part shade. Any good reasonably moist soil. Height 120cm.
Ajuga reptans 'Black Scallop'	Bold dark purple foliage with blue flowers spring to early summer. Good ground cover for any partly shady position. Height 25cm.
Ajuga reptans 'Catlin's Giant'	Exceptionally large bronze-purple leaves and large dark blue flower spikes in spring to summer. Excellent ground cover for shade. Any soil. Part shade. H15cm x S90cm.
Alchemilla erythropoda	Clump forming, ground cover with green yellow flowers on red tinged stems in summer. Sun to part shade. Any good soil. H 20cm.
Alchemilla mollis	Clump forming, ground cover with pale green, rounded, crinkle edged leaves. Small sprays of bright greenish yellow flowers in summer. Sun to part shade. Any good soil. H50cm x S50cm.
Aloysia citrodora	Lemon Verbena. Lemon scented leaves used in teas, ices etc. Full sun. Well drained soil. Half hardy. So keep frost free in winter.
Anaphalis triplinervis AGM	Clumps of soft grey leaves covered in 'everlasting' white flowers from early summer. Well drained fertile soil. Full sun. H40cm x S60cm.
Anemone altaica	A creeping rhizomatous woodland <i>Anemone</i> . Toothed dark green leaves with solitary white flowers veined inside with blue or violet. Moist well-drained humus rich soil. Part shade. H20cm x S30cm.

Anemone canadensis	A vigorous woodland species. Divided leaves with branching stems holding stary white flowers in early summer. Well drained good soil. Sun to part shade. H60cm x S30cm.
Anemone cylindrica	Tiny star like white flowers in summer. Well drained humus rich soil. Sun to part shade. H60cm x S30cm.
Anemone demissa	Deeply divided leaves with branched stems of white, blue or purple flowers in summer. Well drained humus rich soil. Sun to part shade. H30cm x S20cm.
Anemone drummondii	Creamy white flowers in early summer. Well drained soil. Full sun to part shade. H20cm.
Anemone hupehensis 'Hadspen Abundance'	AGM. Rich reddish pink flowers in late summer. Spreads slowly using suckering shoots. Moist but well drained fertile soil. Sun to part shade. H 90cm x S40cm.
Anemone xhybrida 'Andrea Atkinson'	Single white flowers in late summer. Any good soil in sun or part-shade. Height 70cm.
Anemone xh. 'Richard Ahrens'	Semi-double deep pink flowers late summer to early autumn. Any good soil in sun or part-shade. Height 100cm.
Anemone leveillei	White star like flowers with blue backs in spring. Moist soil. Part shade. H45cm x S50cm.
Anemone lithophila	Alpine anemone from North America. White flowers in summer. Well drained soil. Sun to part shade. H10-25cm.
Anemone multifida	Vigorous rhizomatous species with finely lobed leaves. Stems holding many upright creamy yellow in summer. Well drained humus rich soil. Sun to part shade. H 30cm x S15cm.
Anemone multifida 'Rubra'	Finely lobed leaves producing stems with many upright red flowers in summer. Well drained humus rich soil. Sun to part shade. H30cm x S15cm.
Anemone nemorosa	Tiny white flowers held above divided foliage in spring. Any good soil. Part shade. H15cm x S30cm.
Anemone nemorosa 'Alba Plena'	Double white flowered spring anemone. Any good soil. Part shade. H15cm.
Anemone nemorosa 'Blue Eyes'	Double white flowers with a blue eye in spring. Any good soil. Part shade. H15cm.
Anemone nemorosa 'Blue Form'	Light blue flowers in spring. Any good soil. Part shade. H15cm.
Anemone nemorosa 'Royal Blue'	Rich sky blue flowers in spring. Any good soil. Part shade. H20cm.

Anemone nemorosa 'Vestal' AGM	Delicate double white flowers in spring. Any good soil. Part shade. H 20cm.
Anemone nemorosa 'Virescens'	Unusual form in which instead of petals the flower is made up of tight green leaves. The flowers last for up to 8 weeks. Moist soil. Part shade to shade. H15cm.
Anemone nemorosa 'Robinsoniana'	Large lilac flowers held above divided foliage in spring. Any good soil. Part shade. H20cm x S30cm.
Anemone palmata	Palest yellow flowers in late spring. Any good soil. Part shade. H20cm.
Anemone rivularis	White flowers in early summer. Any good soil. Sun to part shade. H50cm
Anemone rupicola	Large white flowers held above divided foliage in summer. Any good soil. Part shade. H20cm x S15cm.
Anemone sylvestris	Divided leaves with solitary nodding pure white flowers in spring followed by woolly white seed heads later in the year. Well drained humus rich soil. Sun to part shade. H50cm x S50cm.
Anemone tomentosa	Vigorous plant with pale pink flowers in late summer. Any good soil. Sun to part shade. H up to 100cm.
Anemone virginiana	Tall upright stems bearing greenish white flowers in early to mid summer, followed by thimble-like seed heads. Well drained humus rich soil. Sun or part shade. H90cm.
Anemone x hybrida	Soft pink flowers held above lobed dark green leaves in late summer. Spreads using suckering shoots. Moist but well drained soil. Sun to shade. H100cm.
Anemone x hybrida 'Honorine Jobert'	AGM. Large white flowers held high above lobed dark green leaves in late summer. Spreads using suckering shoots. Moist but well drained fertile soil. Sun to part shade. H 150cm x S60cm.
Anemone x hybrida 'Konigin Charlotte'	Semi-double purple-pink flowers held above lobed dark green leaves in late summer. Spreads using suckering shoots. Moist but well drained fertile soil. Sun to part shade. H1.5m x S60cm.
Anemone x hybrida 'Pamina'	Semi-double rose-red flowers held above lobed dark green leaves in late summer. Spreads using suckering shoots. Moist but well drained fertile soil. Sun to part shade. H 150cm x S60cm.
Anemonopsis macrophylla	Delicate nodding lilac flowers in summer borne on slender stems. Excellent plant for shady moist spots. Moist but well drained soil. Shade to part shade. H60cmxS50cm.

Anthriscus sylvestris 'Ravenswing'	Finely divided purple-brown leaves with umbels of tiny white flowers in late spring to summer. Well-drained soil. Sun to part shade. H1m x S30cm.
Aquilegia canadensis 'Corbett'	Delicate light yellow flowers over deep green lobed foliage. Any good soil. Sun to part shade. H30cm.
Aquilegia canadensis 'Pink Lanterns'	Delicate pink nodding flowers with straw coloured corolla in late spring. Any good soil. Sun/part-shade. Height 20-30cm.
Aquilegia canadensis 'Little Lanterns'	A wonderful plant. Delicate foliage with brilliant red spurred flowers with reflexed petals. Any good soil. Sun to part shade. H25cm x S25cm.
Aquilegia chrysantha 'Denver Gold'	Large long spurred yellow flowers over grey green foliage. Any good soil. Dappled to part shade. H 60-90cm.
Aquilegia chrysantha 'Yellow Queen'	Golden yellow long spurred blooms over grey green lobed foliage. Well drained soil. Full sun. H80cm.
Aquilegia clematiflora	Double flowers in mixed colours in early summer. Any good soil. Sun to part shade. H60cm x S40cm.
Aquilegia flabellata 'Cameo White'	One of the smallest dwarf columbines. Ideal for pot or rock garden. Good silver-green foliage with white flowers in late spring. Well drained good soil. Sun/part-shade. Height 10-15cm.
Aquilegia flabellata 'Nana Alba'	Blue-green leaves with nodding white flowers in early summer. Moist but well drained soil. Part shade. H15cm x S15cm.
Aquilegia flabellata var pumilla f. alba 'White Angel'	Dwarf aquilegia with wax white flowers in early summer. Any good soil. Sun to part shade. H20cm x S15cm.
Aquilegia flabellata var. pumila 'Selection'	Dwarf plant with bright blue white tipped flowers in early summer. Any good soil. Sun to part shade. H20cm x S15cm.
Aquilegia viridiflora	Unusual green flowers with reddish-brown corolla. Any good well drained soil. Sun to part shade. H40cm x S30cm.
Aquilegia vulgaris 'Clematiflora hybrids'	Attractive spurless blooms in shades of purple, blue and white above rounded lobed leaves. Fertile well drained soil. Sun to part shade. H60cm.
Aster novi belgii 'Lady in Blue'	Rich blue semi double flowers in late summer. Any good soil. Sun to light shade. H25cm.

Aster 'Little Carlow' AGM	A mass of strong lavender blue flowers in late summer. Any good fertile soil. Full sun to part shade. H80cm.
Aster amellus 'King George'	Violet blue daisy like flowers in late summer to autumn. Mildew resistant. Any good soil. Sun. H60cm.
Aster amellus 'Rosa Erfullung'	Clear pink daisy like flowers in late summer to autumn. Mildew resistant. Any good soil. Sun. H60cm.
Aster amellus 'Rudolf Goethe'	Lavender blue daisy like flowers in late summer to autumn. Any good soil. Sun. H50cm x S40cm.
Aster amellus 'Violet Queen'	Excellent old variety with rich violet flowers in late summer to early autumn. Any good soil. Sun. H40cm.
Aster novae-angliae 'Andenken an Alma Potschke'	Large cerise pink flowers in late summer to autumn. Any good soil in sun to part-shade. Height 105cm.
Aster novae-angliae 'Harrington's Pink'	Light pink daisy flowers in late summer. Any good fertile soil. Full sun to part shade. H 120cm.
Aster novae-angliae 'Lachsglut'	A mass of vibrant hot pink daisy flowers in late summer. Any good fertile soil. Sun to part shade. H120cm.
Aster novae-angliae 'Pink Parfait'	A mass of soft pink daisy flowers in late summer. Any good fertile soil. Sun to part shade. H120cm
Aster novae-angliae 'Purple Cloud'	Soft purple blue daisy flowers in late summer. Any good fertile soil. Sun to part shade. H170cm.
Aster novae-angliae 'Septemberrubin'	Lovely purple red flowers in late summer. Abundant flowering. Any good fertile soil. Sun to part shade. H160cm x S50cm.
Aster novi-belgii	Clump forming species bearing many violet daisy like flower heads in late summer. Good fertile soil. Sun to part shade. H1.2m x S90cm.
Aster novi-belgii (dwarf) 'Heinz Richard'	Free flowering dwarf variety. Large pink flowers in late summer. Any good soil. Sun to light shade. H30cm.
Aster novi-belgii 'Lady in Blue'	Dwarf aster with rich blue semi-double flowers in late summer. Good fertile soil. Sun to part shade. H25cm.
Aster novi-belgii 'Rosenquartz'	Double light pink flowers in Sept and Oct. Well drained soil. Full sun. H90cm.

Aster radula	Narrow foliage with large violet daisy like flowers in autumn. Good fertile soil. Sun to part shade. H60cm x S30cm.
Aster x frikartii 'Monch'	One of the best Asters for a long display. A strong, upright freely branching plant with clear lavender-blue flower heads in late summer. Well-drained open fertile soil. Sun to part shade. H90cm x S40cm.
Aster xf. 'Wunder von Stafa' AGM	Bright lavender blue flowers in late summer. Sun, well drained soil. Height 70cm.
Astilboides tabularis	Architectural plant with large scalloped leaves and scented white flowers in mid summer. Moist soil. Part shade. Ht 140cm. Very unusual.
Astrantia m. 'Gill Richardson Gp'	Fine selection with deep crimson flowers in early summer. Moisture retentive soils in sun or part-shade. Height 80cm.
Astrantia major 'Shaggy'	Clump forming plant with lobed toothed leaves. Large greeny-white pincushion flowers in summer. Fertile soil. Sun to part shade. H90cm x S45cm.
Astrantia 'Roma'	Soft pink, long lasting flowers in summer. Fertile, moist soil. Full sun to part shade. Probably the best of the astrantias. H 60cm.
Bergenia 'Bressingham White'	Robust thick deep green leaves with freely produced pure white flowers in mid to late spring. Humus rich moist but well drained soil. Full sun to part shade. H35cm x S60cm.
Bergenia cordifolia 'Winterglut'	Robust thick deep green leaves turning a stunning shade of red in autumn. Pink flowers in spring. Humus rich moist but well drained soil. Full sun to part shade. H60cm x S75cm.
Bergenia 'Eden's Dark Margin'	Best of all bergenias for winter foliage. Big shiny red flushed leaves. Deep pink flowers in spring. Any good soil. Sun to part shade. H 35cm.
Bergenia 'Wintermachen'	Spoon shaped leaves with pink-red flowers in early summer. Humus rich moist but well drained soil. Full sun to part shade. H30cm x S50cm.
Boykinia aconitifolia	Attractive rounded lobed leaves with loose heads of small creamy white flowers in summer. Neutral cool, moist humus rich soil. Part shade. H60cm x S30cm.
Boykinia jamesii	Native to Rocky Mountains. Best for alpine house or shady rock garden. Small purple-violet flowers in early summer with heuchera like leaves. Well drained gritty soil. Height 20cm.

Bronze fennel (Foeniculum vulgare 'Purpureum')	Large clumps of purple feathery foliage. Decorative in a border. Leaves and seeds both have culinary uses. Any good soil. Full sun but will take some shade. H180cm.
Brunnera macrophylla	AGM. Rhizomatous slowly spreading species. Deep green heart shaped leaves with loose panicles of bright blue forget-me-not like flowers in spring. Fertile moist but well drained soil. Part shade. H50cm x S60cm.
Brunnera macrophylla – pink flowered form	Large green heart shaped leaves. Light pink forget-me-not flowers in spring. Any good soil. Full to part shade. H50 x S60cm.
Brunnera macrophylla 'Betty Bowring'	Pure white flowers over heart shaped foliage in spring. Any good soil. Full to part shade. H30cm x S60cm.
Brunnera macrophylla 'Looking Glass'	Dramatic leaves silvered all over. Bright blue forget-me-not flowers in spring. Any good soil. Full to part shade. H50 x S60.
Brunnera macrophylla 'Mr. Morse'	Large silvered heart shaped leaves. White forget-me-not flowers in spring. Any good soil. Full to part shade. H50 x S60.
Brunnera macrophylla 'Dawsons White'	A fine foliage plant with deep green heart shaped leaves with wide white leaf margins. Loose bright blue forget-me-not like flowers in spring. Fertile moist but well drained soil. Part shade. H50cm x S60cm.
Brunnera macrophylla 'Hadspen Cream' AGM	A fine foliage plant with deep green heart shaped leaves with cream margins narrower than those of 'Dawson's White'. Loose panicles of bright blue forget-me-not like flowers in spring. Fertile moist but well drained soil. Part shade. H50cm x S60cm.
Brunnera macrophylla 'Jack Frost'	A recently introduced cultivar. Magnificent silvery heart shaped leaves with bright blue forget-me-not like flowers in spring. Fertile moist but well drained soil. Part shade. H50cm x S60cm.
Caltha palustris	Marsh Marigold. A must for an area of moist soil or bog garden. Rounded, deep yellow buttercup like flowers in spring over shiny dark green foliage. Moist soil. Full sun. H30cm x S50cm.

Caltha palustris 'Alba'	Long flowering pure white form of our native Marsh Marigold. Not so conspicuous but well worth growing with its white cup shaped flowers in spring. Moist soil. Full sun. H30cm x S50cm.
Camassia leichtlinii 'Alba'	Tall spikes of creamy white flowers in May. Fertile humus rich soil. Sun to part shade. H90cm.
Camassia leichtlinii 'Caerulea'	Tall spikes of deep blue flowers in May. Fertile humus rich soil. Sun to part shade. H90cm.
Campanula glomerata 'Alba'	White flower spikes rising above creeping foliage in summer. Fertile moist but well drained soil. Sun to part shade. H40cm x S60cm.
Campanula glomerata 'Caroline'	Clusters of lilac pink flowers in early summer. Any good soil. Sun or part shade. H 50cm.
Campanula glomerata 'Superba' AGM	Clusters of bright violet flowers in early summer. Any good soil. Sun or part shade. Height 75cm.
Campanula lactiflora 'Loddon Anna'	Spikes of soft lilac pink flowers in summer. Moist but well drained soil. Full sun to part shade. H1.5m x S0.6m.
Campanula lactiflora 'Pouffe'	Compact plant covered in light blue flowers over a tight mound of foliage all summer. Moist but well drained soil. Sun or part shade. H30cm
Campanula latiloba	A fabulous species forming a mass of rosettes, which throw up stiff stems covered with stalkless cup shaped lavender-blue flowers. Any good soil. Sun to part shade. H90cm x S50cm.
Cardamine glanduligera	A choice woodlander with green serrated leaves which unfurl in spring. At the same time there are intense purple pink flowers. Any good soil. Shade to part shade. H12cm x S15cm
Cardamine pentaphyllos	Pretty spring plant with deep purple blue flowers in March and April. Humus rich soil. Part shade. H30-45cm.
Cardamine quinquefolia	Shade lover with a profusion of purple pink flowers in spring. Any good soil. Full to part shade. H15cm.
Centaurea hypoleuca 'John Coutts'	Pinky mauve flowers in summer. Any well drained soil. Full sun. H60cm. Bee friendly.
Centaurea montana 'Alba'	Spreading perennial carrying in early summer many star shaped white flowers. Good garden plant. Thrives in any soil.

<i>Centaurea montana</i> 'Carnea'	Full sun. H50cmxS60cm. Perennial Cornflower. Pale pink flowers in early summer. Sun or part-shade. Well drained soils. Height 45cm.
<i>Centranthus ruber</i> 'Albus'	Branching heads of small star-shaped pure white flowers from late Spring to Autumn. Thrives in any soil. Sun. H60cm x S45cm.
<i>Centranthus ruber</i> 'Pretty Betsy'	Light red flowers in early summer. Any good well drained soil. Sun to part shade. H60cm x S30cm
<i>Centranthus ruber</i> var. <i>coccinea</i>	Red flowers in early summer. Any good well drained soil. Sun to part shade. H60cm x S30cm
<i>Chaerophyllum hirsutum</i> 'Roseum'	Lilac-pink form of cow parsley. Highly dissected leaves with umbels of lilac-pink flowers in spring to summer. Good fertile soil. Sun to part shade. H60cm x S30cm.
<i>Chastophyllum oppositifolium</i>	Mat forming evergreen succulent with golden yellow flowers in summer. Well drained soil. Sun to part shade. H15cm.
<i>Chastophyllum oppositifolium</i> 'Jim's Pride'	Variegated form of mat forming evergreen succulent with golden yellow flowers in summer. Well drained soil. Sun to part shade. H15cm.
<i>Cirsium heterophyllum</i>	Spreading softly spiny leaves with mauve thistle shaped flower heads borne on long branching stems. Moist well drained soil. Full sun. H 120cm.
<i>Cirsium rivulare</i> 'Atropurpureum'	Spreading dark green softly spiny leaves with deep crimson thistle shaped flower heads borne on long branching stems. Moist well drained soil. Full sun. H1.2m x S60cm.
<i>Cistus purpureus</i>	Shrub with rich pink flowers in summer. Any soil. Full sun. H1.5m x S2m
<i>Codonopsis cardiophylla</i>	Twining herbaceous perennial flowering in summer. Nodding pale blue flowers, with intricate markings inside. Moist but well drained soil. Sun to part shade. H60cm.
<i>Codonopsis clematidea</i>	Twining herbaceous climber producing nodding bell shaped pale blue flowers in late summer. Humus rich moist but well drained soil. Sun to part shade. H1.5m.
<i>Codonopsis forrestii</i>	Twining herbaceous climber producing open star shaped sky blue flowers in late summer. Humus rich moist but well drained soil. Sun to part shade. H2m.
<i>Codonopsis gracilis</i>	Twining herbaceous climber producing elongated tubular flowers in late summer. Humus rich moist but well drained soil. Sun to part shade. H2m.

Codonopsis grey-wilsonii	Twining herbaceous climber producing stunning blue flowers in summer. Humus rich moist but well drained soil. Sun to part shade. H2m.
Codonopsis lanceolata	Twining herbaceous climber producing bell shaped greenish white flowers veined purple in late summer. Humus rich moist but well drained soil. Sun to part shade. H90cm.
Codonopsis mollis	Twining herbaceous climber producing long blue bell shaped flowers in late summer. Humus rich moist but well drained soil. Sun to part shade. H1m.
Codonopsis ovata	Pale blue bell shaped flowers in summer on scrambling plant. Moist but well drained soil. Dappled shade. H40cmxS40cm.
Codonopsis pilosula	Twining climber bearing pale yellow to pale green bell shaped flowers in summer. Humus rich moist but well drained soil. Dappled shade. H1.7m
Codonopsis rotundifolius angustifolia	Twining climber bearing pale blue bell shaped flowers with red centres in summer. Humus rich moist but well drained soil. Dappled shade. H2m.
Codonopsis ussuriensis	Twining climber bearing dark violet blue flowers in summer. Humus rich moist but well drained soil. Dappled shade. H75cm.
Convallaria majalis	Lily of the valley. Lovely scented white flowers in spring. Any good soil. Part to full shade. H20cm x S30cm.
Convallaria majalis 'Albostrata'	Rare lily of the valley with scented white flowers in May -June over broad green leaves striped golden yellow. Any good soil. Shade to part shade. H20-30cm.
Convallaria majalis rosea	Rare lily of the valley with pale pink scented flowers in May- June. Any good soil. Shade to part shade. H 15cm.
Cortusa matthiola 'Alba'	Crinkled leaves producing pendent white bell shaped flowers in late spring and early summer. Humus rich moist but well drained soil. Part shade. H30cm x S15cm.
Cortusa matthiola var pekinensis	Crinkled leaves producing pendent magenta bell shaped flowers in late spring and early summer. Humus rich moist but well drained soil. Part shade. H30cm x S15cm.
Corydalis 'Craigton Blue'	Vigorous new hybrid. Intense sky blue flowers above pale green foliage in early summer. Humus rich but well well drained soil. Part shade. Height 40cm.
Corydalis flexuosa 'China Blue'	Delicate fern like foliage with sky blue flowers in spring. Summer dormant. Cool shady position. Humus rich soil. Height30cm.

Corydalis flexuosa 'Pere David'	Summer dormant spreading species with delicate light green leaves and bright blue slender flowers in spring. Moist fertile soil. Part shade. H30cm x S20cm.
Corydalis flexuosa 'Purple Leaf'	Delicate green foliage infused purple. Blue, purple tubular flowers in spring to early summer. Moist fertile soil. Part shade. H25cm x S20cm.
Corydalis 'Kingfisher'	Exceptionally long flowering, with intense blue flowers from early summer to autumn. Humus rich soil. Shade to part shade. H30cm.
Corydalis ochroleuca	Evergreen delicate grey green leaflets with creamy white from late spring to summer. Fertile well drained soil. Sun to part shade. H30cm x S30cm.
Corydalis solida 'G P Baker'	Rich red tubular flowers over feathery foliage in spring. Moist but well drained soil. Part to full shade. H20cm.
Corydalis solida ssp. Solida 'Beth Evans'	Pale pink tubular flowers over feathery foliage in spring. Moist but well drained soil. Part to full shade. H20cm.
Corydalis solida 'Purple Beauty'	Purple tubular flowers over feathery foliage in spring. Any good soil. Part to full shade. H20cm.
Corydalis 'Spinners'	Vigorous hybrid between C.elata and C.flexuosa. Clear blue long lasting flowers top delicate ferny foliage in late spring and early summer. Moist fertile soil. Part shade. H30cm x S30cm.
Corydalis taliensis	Masses of drooping stems of pale purple flowers above delicate ferny foliage. Any good soil. Part shade. H35cm.
Crocsmia xc. 'George Davison'	Masses of soft yellow flowers in late summer. Sun. Well drained soils. Height 60cm.
Crocsmia 'Lucifer'	Paprika red flowers in late summer. Any good soil. Full sun to part shade. H100cm.
Crocsmia 'Severn Sunrise'	Long pointed leaves bearing salmon pink to red tubular flowers on arching spikes in late summer. Humus rich moist but well drained soil. Sun to part shade. H90cm x S30cm.
Cyclamen coum	Heart shaped marked leaves producing pink to carmine red flowers in winter to early spring. Fertile well drained soil. Part shade. H8cm x S10cm.

Cyclamen coum 'Album'	Delightful woodland plant. Pure white flowers in early spring. Dies down in summer. Humus rich soils. Height 10cm.
Cyclamen coum 'Silver Leaf'	Heart shaped silver marked leaves producing pink to carmine red flowers in winter to early spring. Fertile well drained soil. Part shade. H8cm x S10cm.
Cyclamen hederifolium 'Rosenteppich'	Heart shaped marked leaves producing pink to red flowers in autumn. Fertile well drained soil. Part shade. H8cm x S10cm.
Dactylorhiza x foliosa	Hardy orchid. Strong purple flowers in early summer. Good border perennial. Humus rich soil. Sun to part shade. H30cm.
Dianthus 'Mrs. Sinkins'	Scented ragged double white flowers in summer. Well drained soil. Full sun. H40cm.
Dicentra formosa alba	Delicate white flowers for weeks above fern like green foliage. Spring to early summer. Good humus rich soil. Part to full shade. H30cm.
Dicentra formosa 'Bacchanal'	Delightful heart shaped crimson flowers in early summer above finely divided grey-green foliage. Shade. Good humus rich soil. Height 35cm.
Dicentra 'Ivory Hearts'	White flowers over ferny foliage in early summer. Good fertile soil. Sun to part shade. H30cm.
Dicentra 'Langtrees'	Almost blue ferny leaves with small cream and pink flowers in spring. Shade. Good humus rich soil.
Dicentra spectabilis	Bleeding heart. Bright pink and white heart shaped flowers dangling off arching stems in early summer. Delicate green divided foliage. Moist humus rich soil. Part shade. H60cm x S50cm.
Dicentra spectabilis 'Alba'	Pure white form of bleeding heart. Pure white heart shaped flowers dangling off arching stems. Delicate green divided foliage. Moist humus rich soil. Part shade. H60cm x S50cm.
Dodecatheon meadia f. album	Delicate nodding pure white flowers in spring. Humus rich soil. Part shade. H40cm.
Dodecatheon meadia 'Goliath'	Shooting star. Large flowering form with lilac-rose flowers in late spring. Humus rich soil in shade. Height 70cm.

Dodecatheon meadia 'Red Colours'	Delicate nodding flowers in shades of red in spring. Humus rich soil. Part shade. H40cm.
Dodecatheon tetandrum (jeffreyi)	Shooting star. Reflexed fragrant blooms in shades of red, lavender and white appear in mid to late spring. Any good soil in sun or part shade. Height 30cm.
Echinacea pallida	Coneflower with narrow drooping pale rose pink petals in late summer. Good well drained soil. Sun. H30cm.
Echinacea pallida 'Hula Dancer'	Coneflower with narrow drooping white tinged pink petals in late summer. Good well drained soil. Sun. H80cm x S40cm.
Echinacea paradoxa	Yellow coneflower. Rich yellow flowers in late summer. Good well drained soil. Sun. H80cm x S45cm.
Echinacea purpurea	Rose purple daisy like flowers in late summer. Good well drained soil. Sun. H100cm x S50cm.
Echinacea purpurea 'Happy Star'	White flowers with a golden disc in late summer to autumn. Vigorous, long lived form. Good well drained soil. Sun. H100cm x S50cm.
Echinacea purpurea 'Alba'	Dark green leafy foliage producing branching stems bearing large white daisy like flowers with an orange brown centre. Humus rich well drained soil. Full sun. H1.2m x S50cm.
Echinacea purpurea 'Rubinstern'	Soft pink purple daisy like flowers with golden brown centres in late summer. Humus rich well drained soil. Full sun. H1m x S50cm.
Echinacea purpurea 'Vintage Wine'	Long lasting deepest pink flowers with big brown centres in late summer to autumn. Any good soil. Full sun. H90cm x S55cm.
Epimedium 'Akebono'	Plentiful white flushed pink flowers in spring. Humus rich soil. Part shade. H25cm.
Epimedium grandiflorum 'Lilafee'	Violet purple spider like flowers over red tinted foliage in spring. Humus rich soil. Part shade. H25cm x S40cm.
Epimedium grandiflorum 'Rose Queen'	Dark bronze young heart shaped leaves with spider like deep rose pink flowers in spring. Humus rich soil. Part shade. H45cm x S60cm.

Epimedium acuminatum	Large long spurred purple and mauve flowers in spring. Humus rich soil. Shade. Best in a sheltered spot. H40cm
Epimedium fargesii	Delicate purple and white spider like flowers over heart shaped foliage in spring. Moist but well drained soil. Part shade. H45cm x S60cm.
Epimedium grandiflorum	Pink or white and lilac flowers over bronze tinted foliage in spring. Humus rich soil. Shade. H40cm.
Epimedium grandiflorum 'Lilac seedling'	Delicate lilac flowers over bronze tinted foliage in spring. Humus rich soil. Shade. H30cm.
Epimedium grandiflorum 'Red Beauty'	Deciduous ,red flowers emerging with new growth in early spring. Reddish-bronze foliage colours green as matures. Good, humus rich soil, in part shade. Height 18-30cm.
Epimedium leptorhizum	An attractive species producing long-spurred large white to lilac-pink flowers in spring. Handsome new coppery foliage. Any good humus rich soil in part-shade.
Epimedium perralchicum 'Frohnleiten'	Bronze flushed heart shaped leaves producing spider like yellow flowers on wiry stems in spring. Moist but well drained soil. Part shade. H40cm x S60cm.
Epimedium 'Pink Elf'	A hybrid between E. brevicornu and E. pubescens. Delicate pink flowers in spring and again in late summer. Moist but well drained soil. Part shade. H40cm.
Epimedium pubigerum	Evergreen. Delicate creamy white flowers in spring. Any good soil in part-shade. Height 35cm.
Epimedium stellulatum 'Wudang Star'	Spider like white flowers with yellow stamens over heart shaped foliage in spring. Moist but well drained soil. Part shade. H35cm x S50cm.
Epimedium x rubrum	Crimson flowers over bronze foliage in spring. Vigorous plant. Any good soil. Shade. H25cm.
Epimedium x setosum	Small white flowers in spring over low evergreen foliage. Humus rich soil. Shade. H30cm.
Epimedium x versicolor 'Sulphureum'	Long spurred pale yellow flowers over heart shaped leaves in spring. Moist but well drained soil. Part shade. H45cm x S1m.
Epimedium x warleyense	Reliable old variety producing orange flowers in Spring. Any good soil. Will tolerate dry conditions. Full or part-shade. Height 30cm.

Epimedium x warleyense 'Orange Queen'	Vigorous epimedium with orange flowers in spring. Evergreen mottled leaves. Any good soil. Shade or part shade. Good for dry shade. H25cm.
Epimedium x youngianum 'Niveum'	Pure white flowers over heart shaped foliage in spring. Moist but well drained soil. Part shade. H45cm x S60cm.
Epimedium x youngianum 'Merlin'	Purple flushed young heart shaped leaves with dusky mauve spider like flowers in spring. Moist but well drained soil. Part shade. H30cm x S30cm.
Epimedium x youngianum 'Roseum'	Dusky pink to purple flower in mid to late spring. Moist but well drained humus rich soil in part shade. Height 30cm.
Eranthis cillicia	Winter Aconite. Large butter yellow flowers in February/March. Finely cut foliage with bronze tinge. Well drained soil in sun. Short.
Erigeron karvinskianus 'Blutenmeer'	Abundant yellow centred daisy like flowers opening white and fading to pink and purple in summer. Fertile well drained soil. Sun to part shade. H20cm . Seeds around.
Eryngium agavifolium	An architectural plant with large sword like strong green sharply toothed leaves. Large green thistle like flowers in late summer lasting well through the winter. Well-drained fertile soil. Full sun. H1.5m x S60cm.
Erysimum 'Apricot Twist'.	Perennial wallflower. Fragrant orange blooms from spring to early summer. Deadheading encourages further flowering. Any reasonable well drained soil in sun or part-shade. Height 60cm.
Erysimum 'Bowles' Mauve'	Perennial wallflower. Shrubby perennial producing mauve flowers from spring to summer. Well-drained soil. Full sun. H75cm x S60cm.
Erysimum 'Constant Cheer'	Perennial wallflower. Shrubby perennial producing dusky orange flowers from spring to summer. Well-drained soil. Full sun. H30cm x S60cm.
Erysimum 'Winter Orchid'	Scented perennial wallflower. Flowers open coppery orange fading to purple. Flowers from spring right through to the end of summer. Well-drained soil. Full sun. H30cm
Erythronium 'Kondo'	Woodland bulb. Soft yellow flowers in Spring. Humus rich soil. Part shade. 25cm.
Erythronium 'White Beauty'	Vigorous form with mottled leaves producing white nodding flowers in spring, Humus rich soil. Part shade. H30cm x S10cm.

Erythronium dens-canis	Mottled leaves producing rose pink nodding flowers in early spring. Humus rich soil. Part shade. H20cm x S10cm.
Erythronium dens-canis 'Pink Perfection'	Small pale pink flowers over mottled leaves in early spring. Moist but well drained soil. Part shade. H8cm.
Erythronium dens-canis 'Purple King'	Dog's tooth violet. Good form with strongly coloured pink flowers in Spring. Moist well drained soil in part-shade. Height 15cm.
Erythronium dens-canis 'Snowflake'	Dog's tooth violet. Good form with pure white flowers in Spring. Moist well drained soil in part-shade. Height 15cm.
Erythronium 'Pagoda'	Vigorous variety with mottled leaves producing many sulphur yellow nodding flowers in spring. Humus rich soil. Part shade. H35cm x S10cm.
Erythronium 'Spindlestone'	Good compact form of erythronium toulumnense. Bright yellow flowers in spring. Good humus rich soil in part shade. Height 25cm.
Erythronium tuolumnense	Dog's tooth violet with nodding yellow flowers in spring. Good humus rich soil in part shade. Height 10-20cm.
Eupatorium cannabinum	Pink flower heads in summer and early autumn. Good humus rich soil. Full sun part shade. H150cm.
Eupatorium fistulosum 'Atropurpureum'	Statuesque plant with burgundy coloured flowers in late summer. Moist but well drained soil. Sun to part shade. H200cm.
Eupatorium fistulosum 'Ivory Towers'	Statuesque plant with ivory white flowers in late summer. Moist but well drained soil. Sun to part shade. H200cm.
Euphorbia amygdaloides var. robbiae	Lime green flowers over dark green glossy foliage in early summer. Well drained soil. Part to full shade. Will form good groundcover in deep shade. H60cm
Euphorbia griffithii 'Dixter'	Dark green lance shaped leaves veined red. Deep brick coloured flowers in summer. Moist but well drained soil. Full sun to part shade. H60cm.
Euphorbia griffithii 'Fireglow'	Glowing red foliage with brick red flowers in summer. Moist but well drained soil. Sun to part shade. H60cm.
Euphorbia myrsinites AGM	Thick silver green pointed leaves with greenish yellow flowers in late spring. Sprawling habit good for a rockery or pot. Well drained soil. Full sun. H15cm x S30cm.
Euphorbia polychroma	Rounded bushy plant with heads of

Euphorbia schillingii	bright yellow flowers over mid green leaves in spring. Any well drained soil. Full sun to part shade. H50cm X S50cm. Dark green lanceolata leaves with light veining producing greenish yellow flowers in summer. Moist humus rich soil. Part shade. H1m x S30cm.
Euphorbia sikkimensis	Bright pink young shoots producing dark green red marked leaves with greenish yellow flowers in summer. Moist humus rich soil. Part shade. H1.2m x 45cm.
Exochorda x macrantha 'The Bride' AGM	Compact deciduous shrub covered in delicate white flowers in April and May. Well drained soil. Full sun to part shade. H 2m
Forsythia suspensa 'Nymans'	Soft yellow flowered form of the well known shrub. Flowers in spring. Any good soil. Full sun. H 3m.
Fritillaria acmopetala	Pale green, bell shaped flowers tinged purple in spring. Well drained soil. Full sun. H30cm.
Fritillaria meleagris	The snake's head fritillary. The one to naturalise in damp meadows. Delicate nodding chequered flowers in spring. Soil that is moist in spring. H30cm.
Fritillaria michailowskyi AGM	Deep purple bell shaped flowers, with yellow tips to the petals. May-June. Well drained soil. Full sun. Ideal for a pot or trough. H20cm.
Fritillaria persica 'Ivory Bells'	A spike of beautiful creamy green flowers on a tall strong stem. April – May. Well drained soil. Full sun to part shade. H 1m.
Fritillaria uva vulpis	Purple grey edged yellow flowers in spring. Any good well drained soil. Sun. H25cm.
Galanthus elwesii	Similar to the common snowdrop but larger and earlier flowering. Builds up quickly. Any good soil. Part shade. H17cm.
Galanthus elwesii 'Cedric's Prolific'	Exceptional large single snowdrop, from stock originally grown in the garden of Sir Cedric Morris at Benton. Broad grey green leaves support stems up to 40cm.
Galanthus ? Atkinsii	Superb large snowdrop propagated from a clump found in our garden, possibly Atkinsii. Any good soil. Part shade. H20cm.
Galanthus 'Dionysus'	Early flowering Greatorex double. 15cm. Ideal conditions are cool and moist in spring with adequate light but drier and shadier in summer.

Galanthus 'Hippolyta'	Beautifully formed Greatorex double. Short, but perfectly formed.
Galanthus 'James Backhouse'	Good large flowered early snowdrop. Aberrant form of Galanthus 'Atkinsii' with which it is often confused, but still one of the best.
Galanthus 'Jaquenetta'	Greatorex double with well rounded outer petals and almost entirely green inner segments. H 18cm.
Galanthus 'Lady Elphinstone'	Variant of G.nivalis 'Flore Pleno' with yellow markings
Galanthus 'Magnet'	Large open flowers on long pedicels. Height 18cm. Ideal conditions are cool and moist in spring with adequate light but drier and shadier in summer.
Galanthus nivalis	Native snowdrop. Grown in Cumbria. Any good soil. Good for naturalising in any situation.
Galanthus nivalis 'Pusey Green Tips'	Double flower with a splash of green on the outer segment.
Galanthus plicatus	Broad leaved, late flowering species. Ideal conditions are cool and moist in spring with adequate light but drier and shadier in summer.
Galanthus plicatus 'Augustus'	Attractive globular flower with dimpled petals. H 15cm. . Ideal conditions are cool and moist in spring with adequate light but drier and shadier in summer.
Galanthus 'Sam Arnott'	Robust hybrid with globular scented blooms in February. Height 20cm. Ideal conditions are cool and moist in spring with adequate light but drier and shadier in summer.
Galanthus 'Straffan'	Old and reliable cultivar. Late flowering
Galtonia candicans	Strap shaped leaves with spikes of up to 30 pendant white flowers in late summer. Moist but well drained soil. Full sun. Good in a pot. H 1m.
Galtonia viridiflora	Strap shaped leaves with spikes of nodding pale green flowers in late summer. Moist but well drained soil. Full sun. H1m. Good in a pot. Frost tender.
Gentiana asclepiadea	Willow gentian. Gentian blue tubular flowers in late summer to early autumn. Moist but well drained soil. Full to part shade. H90cm x S45cm.

Gentiana asclepiadea 'Alba'	White flowered form of the willow gentian. Long arching stems of narrow leaves producing tubular white flowers in early autumn. Moist but well drained soil. Full to part shade. H90cm x S45cm.
Gentiana asclepiadea 'Pink Swallow'	A pink form of the willow gentian. Long arching stems of narrow rich green leaves producing tubular pale pink flowers with darker pink markings in early autumn. Light humus rich moist but well drained soil. Full to part shade. H90cm x S45cm.
Gentiana dinarica	Dark blue trumpet shaped flowers over a mat of shiny green leaves in autumn. Fertile moist but well drained soil. Full sun. H12cm x S10cm.
Gentiana septemfida var. 'Lago Select'	Stunning bright blue bell shaped flowers with white throats and darker stripes in late summer. Light humus rich moist but well drained soil. Best in sun. H20cm x S30cm.
Gentiana sino-orata AGM	Spectacular bright blue bell shaped flowers in autumn. Well drained, lime free soil. Shade to part shade. Good for a trough or pot. H8cm x S20cm.
Geranium 'Blue Blood'	Deepest blue flowers from May to July. Foliage turns orange before autumn. Any good soil. Sun to part shade. H35cm, part shade. H35cm.
Geranium 'Blue Sunrise'	Golden lobed leaves producing veined blue flowers in summer. Any good soil. Sun to part shade. H25cm x S30cm.
Geranium clarkei 'Kashmir Pink'	Produces a spreading mound of highly dissected lobed leaves with soft pink flowers all summer. Any good soil. Sun to shade. H45cm x S50cm.
Geranium clarkei 'Kashmir Purple'	Produces a spreading mound of highly dissected lobed leaves with lilac blue flowers veined with red. Any good soil. Sun to part shade. H45cm x S50cm.
Geranium himalayense 'Plenum' (Birch Double)	Charming double soft lilac flowers in summer. Moist but well drained soil. Sun to part shade. H30cm.
Geranium 'Joy'	Soft pink saucer shaped flowers over lobed foliage throughout summer. Any good soil. Sun to part shade. H25cm x S30cm.
Geranium macrorrhizum 'White Ness'	Semi evergreen. Pale green rounded leaves with pure white flowers from late spring to early summer. Any soil. Sun or shade. Good ground cover. Will grow in dry shade. H30cm x S60cm.

Geranium macrorrhizum 'Snow Sprite'	Creeping stems of strongly scented lobed leaves producing white flowers in early summer. Good ground cover for shade. Any good soil. Sun to full shade. H50cm x S60cm.
Geranium 'Orion' AGM	Strong plant with large dark blue flowers from early summer. Good autumn leaf colour. Any good soil. Fullsun to part shade. H70cm x S70cm
Geranium 'Patricia'	Large magenta flowers with a black eye throughout summer. Any good soil. Sun to part shade. H75cm x S60cm.
Geranium phaeum	Mourning Widow. Clump forming species with basal leaves marked purple-brown producing open white centred deep maroon flowers in late spring to early summer. Moist but well drained soil. Part to full shade. H70cm x S50cm.
Geranium phaeum 'Album'	Small nodding white flowers in late spring and early summer. . Vigorous and easy in any good soil from sun to shade. Good for dry shade.Height 80cm.
Geranium phaeum 'Lily Lovell'	Purple-mauve flowers from May to June. Vigorous and easy. Any good soil from sun to shade. Good for dry shade.Height 80cm.
Geranium phaeum –magenta flowered seedling	Magenta flowers in late spring and early summer. Distinct form that cropped up on our nursery. Vigorous and easy in any good soil from sun to shade. Good for dry shade.Height 80cm.
Geranium pratense 'Dark Reiter'	Intense lilac blue flowers over purple foliage throughout summer. Any good soil. Sun to light shade. H25cm x S25cm.
Geranium pratense 'Splish Splash'	White flowers with blue speckles and stripes in summer. Any good soil. Sun to light shade. H50cm x S30cm.
Geranium pratense 'Mrs Kendall Clark'	Clump forming divided leaves producing pearly grey flowers flushed with rose pink in early summer. Any good soil. Sun to part shade. H75cm x S60cm.
Geranium pratense 'Plenum Album'	Clump forming divided leaves producing double white flowers in early summer. Any good soil. Sun to part shade. H65cm x S30cm.
Geranium pratense 'Plenum Violaceum'	Clump forming divided leaves producing double rich violet-blue flowers darker blue in the centre in early summer. Any good soil. Sun to part shade.

Geranium psilostemon	Clump forming large divided leaves bearing loose stems of large saucer shaped bright magenta flowers with darker centres and veining in summer. Any good soil. Sun to part shade. H45cm x S1m.
Geranium pyrenaicum 'Bill Wallis'	Low growing trailing plant with small violet flowers throughout summer. Any good well drained soil. Sun to part shade. H25cm x S45cm.
Geranium renardii	Neat clumps of soft sage green velvety leaves. Opal white flowers with purple veins in Summer. Any soil. Full sun. H30cm x S30cm.
Geranium renardii 'Whiteknights'	Clump forming velvety grey-green leaves producing white flowers with pale lilac-blue background and darker veining. Any good soil. Sun to part shade. H1.2m x S60cm.
Geranium robustum	Fine silvery sprawling foliage producing bluish purple flowers in late spring. Any good soil. Sun to part shade.
Geranium 'Salome'	A trailing variety with branching stems of lobed leaves giving rise to loose purplish pink flowers veined deep purple and almost black styles and stigmas. Any good soil. Sun to part shade. H25cm x S55cm.
Geranium sylvaticum 'Album' AGM	Upright habit. Light green foliage with pure white flowers late spring to early summer. Any good soil. Sun or shade. H70cm.
Geranium sylvaticum 'Amy Doncaster'	Deep blue flowers with a white eye in spring and summer. Upright habit. Good for a shady border or woodland. Any good soil. Part to full shade. H70cm x S50cm.
Geranium wallichianum 'Buxton's Blue'	Compact and spreading toothed leaves giving rise to sky blue flowers with large veined white centres in summer. Any good soil. Sun to part shade.
Geranium x oxonianum 'Thurstonianum'	Vigorous plant with deep red purple star like flowers in summer. Good ground cover. Any good soil. Sun to part shade. H 60cm.
Geum 'Bell Bank'	Delightful semi double reddish pink flowers in late spring. Humus rich soil. Sun to part shade. H30cm x S 30cm.
Geum 'Cottage Apricot'	A clump forming plant with a rosette of scalloped leaves producing pendent bell shaped apricot flowers in late spring to midsummer. Humus rich moist soil. Sun to part shade. H30cm x S20cm.

Geum 'Beech House Apricot'	A clump forming plant with a rosette of scalloped leaves producing pendent bell shaped apricot flowers in late spring to midsummer. Humus rich moist soil. Sun to part shade. H30cm x S20cm.
Geum chiloense 'Blazing Sunset'	Semi-double scarlet flowers throughout the summer. Any good well drained soil. Sun to part shade. H60cm x S60cm.
Geum coccineum Borisii-Strain	Orange flowers in early summer. Any good soil. Sun to part shade. H40cm.
Geum 'Lady Stratheden'	Pinnate hairy leaves producing semi-double rich yellow flowers throughout the summer. Fertile well drained soil. Sun to part shade. H60cm x S60cm.
Geum 'Lemon Drops'	Low growing geum with single yellow green nodding flowers in May to June. Moist fertile soil. Full sun. H25cm.
Geum montanum	Spreading plant with dense pinnate dark green leaves producing single deep yellow cup shaped flowers in spring to early summer. Fertile well drained soil. Sun to part shade.
Geum 'Mrs Bradshaw'	Pinnate hairy leaves producing semi-double scarlet flowers throughout the summer. Fertile well drained soil. Sun to part shade. H60cm x S60cm.
Geum 'Princess Juliana'	Scalloped leaves producing pendent orange-yellow bell shaped flowers in summer. Fertile well drained soil. Sun to part shade.
Geum rivale 'Album'	Rosette of scalloped leaves producing pendent bell shaped pure white flowers in late spring to midsummer. Humus rich moist soil. Sun to part shade. H30cm x S20cm.
Geum rivale 'Leonards Variety'	Rosette of scalloped leaves producing pendent salmon pink bell shaped flowers in late spring to mid summer. Humus rich moist soil. Sun to part shade. H30cm x S20cm.
Gillenia trifoliata	Star like white flowers in early summer. Any good fertile soil. Dislikes too much lime. Sun to part shade. H100cm x S75cm.
Hacquetia epipactis	A good plant for shade, it produces its unusual green, yellow-eyed bracts in late winter and early spring. Any good soil. Shade to part shade. H7cm x S30cm
Helenium 'Moerheim Beauty' AGM	Beautiful bronze red daisy like flowers in mid to late summer. Any good soil. Sun to light shade. H100cm x S60cm.
Helenium 'Red Jewel'	Rich dusky pink flowers with maroon centres. Well drained soil. Full sun to part shade. H85cm.

Helenium 'Sahin's Early Flowerer' AGM	Deep red flowers streaked with orange and yellow over several months in late summer and autumn. Any good soil. Full sun. H 90 x S45cm
Helenium autumnale 'Rotgold-Hybrids'	Gold to rust coloured daisy-like flowers in autumn. Well drained soil .Full sun. H120cm.
Helianthus 'Lemon Queen'	Lovely soft yellow sunflower like flowers in late summer. Any good well drained soil. Sun. H200cm x S120cm.
Helleborus argutifolius	Handsome evergreen glaucous spiny leaves producing pendent pale green cup shaped flowers in late winter to early spring. Humus rich moist but well drained soil. Sun to part shade.
Helleborus dumetorum	Finely cut basal leaves producing green cup shaped flowers in spring. Any good soil. Sun to part shade. H45cm x S45cm.
Helleborus foetidus	Evergreen clump forming perennial with deeply divided dark green leaves and nodding pale green flowers in late winter. Any good soil. Shade to part shade. H45cmxS45cm.
Helleborus x ericsmithii	Large greeny pink and white flowers in Spring. Humus rich soil. Part shade. H25cm x S30cm.
Helleborus x hybridus 'Blue Metallic Lady'	Metallic purple blue flowers in Feb – April. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'Picotee Lady'	Pink veining to white petals edged in red. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'Pink Lady'	Pink and rose coloured flowers Feb -April. Humus rich soil. Part shade. H 35cm x S45cm
Helleborus x hybridus 'Pink Lady Spotted'	Pink flowers spotted red Feb-April. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'Red Lady'	Deep red coloured flowers Feb-April. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'White Lady'	Pure white flowers Feb – April. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'White Lady Spotted'	Pure white flowers almost covered in maroon speckling. Feb – April. Humus rich soil. Part shade. H 35cm x S 45cm.
Helleborus x hybridus 'Yellow Lady'	Soft yellow flowers Feb – April. Humus rich soil. Part shade. H 35cm x S 45cm.

Helleborus x hybridus 'Lady Series'	Clump forming perennial hybrids. Grown from seed in the 'Lady Series' All colours and markings. Humus rich soil. Part shade. H45cm x S45cm.
Hemerocallis 'Edge Ahead'	Day lily. Stunning pink flowers with raspberry throat in early summer. Any good soil. Sun to light shade. H60cm.
Hemerocallis 'Marion Vaughn' AGM	Fragrant, pale lemon-yellow flowers in summer. Any good soil. Sun or part-shade. Height 95cm.
Hemerocallis 'Morocco Red'	Straplike leaves producing star shaped dusky red flowers with a ginger throat in mid to late summer. Any soil. Sun to part shade. H60cm.
Hemerocallis 'Pretty Miss'	Light peach flowers with ruffled edge in summer. Any good soil. Sun or part-shade. Height 75cm.
Hemerocallis –orange flowered from garden	Name lost in the mists of time. Orange flowers. Any good soil. Sun to part shade. H 60cm.
Hemerocallis 'Staghorn Sumac'	Day lily. Bicoloured orange red flowers in mid summer. Any good soil. Sun to part shade. H75cm.
Hemerocallis 'Catherine Woodberry'	Long pointed leaves producing star shaped lavender pink flowers in mid to late summer. Fertile moist but well drained soil. Full sun. H60cm x S60cm.
Hepatica nobilis	Very desirable spring flowering delicate woodland perennial. Kidney shaped leaves with open white, pink or blue flowers in spring. Humus rich moist but well drained soil. Top dress with leaf mould or compost. Part shade. H10cm x S15cm.
Hepatica pyrenaica	Spring flowering delicate woodland perennial. Kidney shaped leaves with open pale pink flowers in spring. Humus rich moist but well drained soil. Top dress with leaf mould or compost. Part shade. H10cm x S15cm.
Hepatica transylvanica	Early flowering hepatica from south eastern europe with large blue flowers in Spring. Thrives in woodland conditions. Height 12cms.
Hepatica transylvanica 'Blue Jewel'	Good strong blue flowers arising in early Spring. Thrives in woodland conditions. Height 12cms.

Heuchera 'Lime Marmalade'	Lime green leaves with ruffled edges. Good front of border, or in a pot. Any good soil. Part shade, although will take more sun than most heuchera as long as midday sun is avoided. Strong grower. H40cm.
Heuchera sanguinea 'White Cloud'	Coral Bells. Attractive foliage with sprays of white blossom from June to August. Well drained soils in full sun or part shade. Height 60cm.
Heucherella 'Burnished Bronze'	Large cut leaves with a glossy burnished bronze hue. Soft pink flowers in early summer. Any good soil. Part shade. H55cm x S30cm.
Heucherella 'Kimono'	Dramatic silvery green foliage with darker veining producing pink flowers in early summer. Any good soil. Part shade. H55cm x S30cm.
Heucherella 'Quicksilver'	Purple silvery foliage with bronze veining producing large pale pink to white flowers in early summer. Any good soil. Part shade. H45cm x S25cm.
Horseradish (Armoracia rusticana)	Perennial herb. Either grow where you want it to be forever or in a large pot. Any good fertile soil. Full sun to part shade. Harvest roots in autumn.
Hosta 'Blue Angel'	Large hosta with blue green leaves. Flowers in summer are almost white. Any good soil. Shade to part shade. H90cm x S120cm.
Hosta 'Devon Green'	Forms dense hummocks of dark green leaves. Moist fertile soil. Full to part shade. H50cm.
Hosta 'Halcyon'	Blue grey heart shaped leaves with pale lilac flowers in summer. Fertile moist but well drained soil. Full to part shade. H 40cm x S 70cm.
Hosta 'Blue Wedgwood'	Rounded glaucous grey blue leaves with pale lavender blue bell shaped flowers in midsummer. Fertile moist but well drained soil. Full to part shade. H25cm x S55cm.
Hosta 'Fire and Ice'	Fine hosta with large twisted heart shaped leaves that are deep green at the margins, with palest cream centres. Lilac coloured flowers. Moist well drained soil. Full to part shade. H30cm x S30cm.
Hosta 'Gold Edger'	Heart shaped pale green-yellow leaves with pale lavender blue bell shaped flowers in summer. Fertile moist but well drained soil. Full to part shade. H30cm x S45cm.

Hosta 'Golden Tiara'	Heart shaped mid green leaves irregularly margined with yellow with purple bell shaped flowers in summer. Fertile moist but well drained soil. Full to part shade. H30cm x S50cm.
Hosta 'Hadspen Blue'	Heart shaped thick glaucous grey blue leaves with pale mauve bell shaped flowers in summer. Fertile moist but well drained soil. Full to part shade. H25cm x S60cm.
Hosta 'June'	Medium size. Blue leaves with lime splashed centre. One of the best. Fertile moist but well drained soil. Full to part shade. H30cm.
Hosta lancifolia	Produces a mound of narrow arching glossy dark green leaves with deep purple bell shaped flowers in summer. Fertile moist but well drained soil. Full to part shade. H45cm x S75cm.
Hosta sieboldii var. alba	Mid green lance shaped leaves producing pure white tubular flowers in summer. Fertile moist but well drained soil. Full to part shade. H30cm x S60cm.
Hosta 'Sum and Substance'	Heart shaped glossy yellow green leaves producing pale lilac bell shaped flowers in summer. Fertile moist but well drained soil. Full to part shade. H75cm x S1.2m.
Hosta 'Sun Power'	Heart shaped wavy yellow green leaves producing pale lavender blue to white flowers in summer. Fertile moist but well drained soil. Full to part shade. H60cm x S1m.
Humulus lupulus 'Aureus'	Herbaceous twining climber with toothed golden leaves. Greenish hop flowers in autumn. Any well drained soil. Sun or part shade. H to 6m.
Hydrangea arborescens 'Anabelle' AGM	Large round pure white flower heads in July to September. Fertile moist but well drained soil. Full sun to part shade. H300cm x S300cm.
Hydrangea macrophylla 'Mariesii Perfecta'	Flattened heads of pinkish mauve flowers in late summer. Moist but well drained humus rich soil. Full sun to pt shade. H90-120cm.
Hydrangea paniculata 'Limelight'	Deciduous shrub producing large lime green fading to cream flowers from July to Sept. Fertile moist but well drained soil. Full sun to part shade. H2.5m.
Hydrangea paniculata 'Unique' AGM	Large florets of creamy white flowers from July to Sept. Fertile moist but well drained soil. Full sun to part shade. H300cm x S300cm.

Hydrangea quercifolia	Oak leaf hydrangea with large cones of white flowers in late summer. Good autumn foliage. Any good soil in sun or part-shade. Height 2m.
Hydrangea quercifolia 'Snow Queen'	Oak leaf hydrangea with large cones of spectacular white flowers in late summer. Good autumn foliage. Any good soil in sun or part-shade. Height 2m.
Hydrangea veitchii	Large white flowered lacecap. Any good soil. Sun or part shade. Height 2m.
Iris 'Berkeley Gold' (Tall bearded)	Deep gold and butter yellow flowers in summer. Well drained soil. Full sun. H 1m
Iris bulleyana	Fine Asiatic species. Soft green erect foliage with violet-purple flowers in June. Moist but well drained soils in full sun or part shade. Height 60cm.
Iris danfordiae	Early flowering, with sweetly scented daffodil yellow flowers. Well drained soil. Full sun to part shade. H10cm xS10cm.
Iris douglasiana	Evergreen dark green leaves producing red-purple, blue, cream or white flowers in late spring to early summer. Fertile well drained soil. Sun to part shade.
Iris ensata (mixed colours)	Large open flowers over straplike foliage in summer. Moist soil. Sun to part shade. H90cm.
Iris ensata 'Moonlight Waves'	Large white flowers with a lime green centre in summer. Moist soil. Sun to part shade. H90cm.
Iris ensata 'Reveille'	Large pale lavender violet flowers with darker veins held above strap like foliage in summer. Moist soil. Sun to part shade. H90cm x S30cm.
Iris ensata 'Variegata'	Red purple flowers above cream and green variegated strap like foliage in summer. Moist but soil. Sun to part shade. H90cm x S30cm.
Iris ensata 'Wine Ruffles'	Large deep purple flowers held over strap like foliage in summer. Moist soil. Sun to part shade.
Iris foetidissima AGM	Shy pale lemon and purple flowers in late spring. Decorative orange seed heads in autumn. Useful as tolerates dry soil and shade. Height 60cm.
Iris foetidissima 'Variegata'	Cream and green striped leaves. Shy pale lemon and purple flowers in late spring. Decorative orange seed heads in autumn. Useful as tolerates dry soil and shade. Height 60cm.

Iris 'Frank Elder'	Late winter flowers are soft blue with a splash of yellow. Well drained soil. Full sun. H15cm.
Iris fulva	Lovely iris with terracotta coloured 6 petaled flowers in June. Damp soil. Full sun. H 90cm.
Iris graminea	Delicate violet flowers over clumps of grassy like leaves in early summer. Any good well drained soil. Sun. H40cm.
Iris histriodes 'George'	Rich purple flowers in early spring. Well drained soil. Full sun to part shade. H12cm.
Iris histriodes 'Lady Beatrix Stanley'	Beautiful rich blue flower with white flecks on the fall. One of the earliest to flower, withstanding all weathers. H12cm.
Iris histriodes 'Sheila Ann Germany'	Early flowering vigorous dwarf iris. Sky blue flowers. Very desirable. Well drained soil. Full sun. H12cm
Iris 'Holden Clough'	Soft yellow flowers heavily veined purple brown in summer. Unusual. Moist well drained soil. Sun to part shade. 80cm.
Iris 'Katharine Hodgkin'	Early flowering. A little beauty. Bluish green petals with soft yellow blotching. Well drained soil. Full sun to part shade. 15cm.
Iris latifolia 'Duchess of York'	Clear blue flowers in June to July. Not well known but good plant, easy to grow in damp soil. Sun to part shade. H 35-50cm.
Iris latifolia 'Isabella'	Pale purple flowers in June to July. Not well known but good plant, easy to grow in damp soil. Sun to part shade. H 35-50cm.
Iris latifolia 'King of the Blues'	Dark blue flowers in June to July. Not well known but good plant, easy to grow in damp soil. Sun to part shade. H35-50cm.
Iris latifolia 'Mansfield'	Deepest purple flowers in June and July. Not well known but good plant, easy to grow in damp soil. Sun to part shade. H35-50cm.
Iris latifolia 'Queen of the Blues'	Pale blue flowers with a white throat in June and July. Not well known but good plant, easy to grow in damp soil. Sun to part shade. H35-50cm.
Iris lazica	Lavender-blue flowers over fans of strap like foliage in early Spring. Humus rich soil. Part shade. H15cm.

Iris pseudacorus cream	The yellow flag iris but with cream flowers in early summer. Moist fertile soil. Sun to part shade.
Iris pseudacorus 'Variegata'	Yellow-cream variegated strap shaped pointed leaves producing yellow flowers in early summer. Moist fertile soil. Sun to part shade. H1.2m x S30cm.
Iris 'Rajah'(Tall bearded)	Velvet burgundy falls with butter yellow standards in summer. Well drained soil. Full sun. H 75cm.
Iris reticulata 'Cantab'	Early flowering with flax blue delicately scented flowers. Well drained soil. Full sun to part shade. H15cm
Iris reticulata 'Clairette'	Early flowering. Sky blue with deep purple falls and white striping. Well drained soil. Full sun to part shade. H10cm
Iris reticulata 'Natascha'	Early flowering. Ice blue flowers. Well drained soil. Full sun to part shade. 15cm. Desirable.
Iris reticulata 'Springtime'	Early flowering. Flowers violet blue tipped white. Well drained soil. Full sun to part shade. H15cm.
Iris reticulata 'Gordon'	Early flowering. Pale blue and violet flowers. Well drained soil. Full sun to part shade. H15cm.
Iris reticulata 'Harmony'	Early flowering. Sky blue with a white blotch. Well drained soil. Full sun to part shade. H15cm.
Iris reticulata 'J.S. Dijt'	Early flowering. Purple flowers with a golden yellow stripe. Well drained soil. Full sun to part shade. 15cm.
Iris reticulata 'Joyce'	Early flowering. Sky blue and yellow flowers. Well drained soil. Full sun to part shade. 15cm.
Iris reticulata 'Purple Gem'	Early flowering. Deep plum purple with lighter veining. Well drained soil. Full sun to part shade. 15cm.
Iris x robusta 'Gerald Darby'	Rhizomatous perennial with arching leaves and purplish stems bearing violet purple flowers with whitish falls. Moist humus rich soil. Full sun to part shade. H1-1.5m.
Iris setosa	Rich purple flowers in late spring to early summer. The falls have white centres and are veined with yellow. Fertile well drained soil. Sun to part shade. H90cm x S20cm.

Iris setosa ssp. Canadensis	Purple veined flowers in summer. Any good well drained soil. Sun. H30cm.
Iris sibirica 'Alba'	Pure white flowers held over strap like foliage in summer. Any good soil. Sun to part shade. H90cm.
Iris sibirica 'Caesar's Brother'	Deep violet flowers with speckled markings in summer. One of the best for intensity of colour. Fertile moist but well drained soil. Sun to part shade. H90cm x S60cm.
Iris sibirica 'Butter and Sugar'	Clump forming strap like leaves producing in spring white flowers with yellow falls, all veined greenish yellow. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Caesar'	Violet flowers over strap like foliage in summer. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Dreaming Yellow'	White and creamy yellow flowers over strap like foliage in summer. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Flight of Butterflies'	Small pale blue flowers with darker veining held over narrow grass like foliage in summer. Fertile moist but well drained soil. Sun to part shade.
Iris sibirica – good garden form.	Vigorous iris with lavender blue flowers in summer. Name lost ages ago. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Lavender Bounty'	Lavender pink flowers held over strap like foliage in summer. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Melton Red Flare'	Rich red-purple flowers held over strap like foliage in summer. Fertile well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Mountain Lake'	Deep blue broad flowers held over strap like foliage in Summer. Fertile moist but well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Papillon'	Pale blue flowers held over strap like foliage in summer. Fertile well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Shirley Pope'	Clump forming strap like leaves producing in summer stems with numerous dark red purple flowers and velvety falls with white patches. Any good well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Silver Edge'	Clump forming strap like leaves producing in summer stems with numerous large sky blue flowers edged with silver. Any good well drained soil. Sun to part shade. H90cm.

Iris sibirica 'Southcombe White'	White flowers held over strap like foliage in summer. Any good well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Sparkling Rose'	Clump forming strap like leaves producing in summer stems with numerous purple-pink flowers. Any good well drained soil. Sun to part shade. H90cm.
Iris sibirica 'Tropic Night'	Clump forming strap like leaves producing in summer stems with numerous purple-blue flowers. Any good well drained soil. Sun to part shade. H90cm.
Iris versicolor	Purple flowers in early summer. Freely flowering in moist fertile soil. Full sun. H80cm.
Iris versicolor 'Kermesina'	Rich claret flowers veined with white in early summer. Freely flowering in moist fertile soil. Full sun. H80cm.
Kirengeshoma palmata	Nodding pale yellow waxy flowers in late summer to autumn. Humus rich soil. Part shade. H1.2m.
Kniphofia 'John Benary'	Coral-red pokers at height of summer. Sun, well-drained soils. Height 75-90cm.
Kniphofia 'Toffee Nosed' AGM	Tawny orange flowers fading to cream. Sun, well-drained soils. Height 100cm.
Lamium maculatum 'Pink Pearls'	Pale pink flowers over silver striped foliage in summer. Any good soil. Sun to part shade. H20cm x S50cm.
Lamium maculatum 'White Nancy'	White flowers over silver foliage in summer. Any good soil. Sun to part shade. H20cm x S50cm.
Lamium orvala 'Album'	White flowers in late spring. Any good soil. Sun to part shade. H50cm x S30cm.
Lamprocapnos spectabilis 'Alba' AGM	Formerly Dicentra. 'White Bleeding heart'. Pure white lockets on arching stems in early summer. Part-shade. Moist humus rich soils. Height 60cm.
Lamprocapnos spectabilis	Formerly dicentra. Pink and white lockets on arching stems in early summer. Part-shade. Moist humus rich soils. Height 60cm. Grown from our own seed. Some have golden leaves.
Lathyrus latifolius 'Pink Pearl'	Perennial Pea. Pale pink pea flowers on scrambling foliage. Can be trained. Humus rich well drained soil. Full sun to part shade. Climber.
Lathyrus latifolius 'Red Pearl'	Perennial Pea. Red pea flowers on scrambling foliage. Can be trained.

	Humus rich well drained soil. Full sun to part shade. Climber.
Lathyrus latifolius 'White Pearl'	Perennial Pea. Pure white pea flowers on scrambling foliage. Can be trained. Humus rich well drained soil. Full sun to part shade. Climber
Lathyrus vernus	Dense clump forming herbaceous perennial producing purple blue pea flowers in spring. Humus rich well drained soil. Full sun to part shade. H45cm x S45cm.
Lathyrus vernus 'Rosenelfe'	Light pink pea flowers in early summer. Good rich well drained soil. Sun to part shade. H25cm x S45cm.
Leucojum 'Graveteye Giant'	Summer snowflake. Large ivory white flowers in april to may. Any good soil. Sun to light shade. H45cm.
Leucojum vernum	The spring snowflake. White nodding flowers like a large snowdrop. Moist soil. Good for pond side. Full sun to part shade. H60 cm x S10cm.
Lewisia cotyledon 'Rainbow'	Funnel shaped flowers in rainbow shades of peach through to pink in late spring to early summer. Good for planting in cracks in walls. Humus rich well drained soil. Sun to part shade. H15cm x S15cm.
Lewisia nevadensis	A mass of white flowers in summer above a small cluster of dark green strap like leaves. Well drained soil. Full sun. Good for trough or rock garden. Deciduous. H6cmxS8cm.
Ligularia dentata 'Britt-Marie Crawford'	Dark glossy leaves with large deep orange yellow flowers in late \summer. Moist but well drained soil. Sun to part shade. H1m.
Ligularia dentata 'Desdemona'	Handsome large deep purple leaves. Vivid orange flower heads in summer. Moist but well drained soil. Sun to part shade. H120cm.
Ligularia dentata 'Midnight Lady'	Deep purple bronze foliage with large golden flowers in late summer. Moist but well drained soil. Sun to part shade. H1m.
Ligularia 'The Rocket' AGM	Slender spikes of bright yellow flowers on jet black stems above large toothed leaves in summer. Moist, fertile soil. Sun to part shade. H1.5m xS80cm.
Lilium formosanum	Dark green linear leaves with fragrant slender trumpet shaped white flowers flushed with purple outside. Humus rich moist but well drained soil. Part shade. H1m x S30cm.
Lilium lancifolium 'Farrers Form'	Vigorous form with large heads of orange spotted lily flowers in late

	summer. Moist acid soil. Part shade. H1.5m.
Lilium macklinae	Delicate small lily from NE India. Light pink nodding flowers in summer. Humus rich soil. Part shade. 30-45cm.
Lilium martagon 'Album'	Desirable white flowered form of the turk's cap lily. Flowers in June to July. Well drained humus rich soil. Part shade. H90cm.
Linaria purpurea	Upright perennial bearing spikes of small snapdragon like purple flowers from mid to late summer. Well drained soil. Sun. h60cm.
Linaria purpurea 'Cannon Went'	Upright perennial bearing spikes of small snapdragon like pink flowers from mid to late Summer. Well drained soil. Sun. H60cm.
Linaria purpurea 'Springside White'	Spikes of small snapdragon like white flowers from mid to late summer. Well drained soil. Sun. H60cm.
Lobelia tupa	Clump forming perennial with brick red flowers in late summer. Well drained soil. Full sun, sheltered site. H1.5m x S1m.
Lychnis flos-cuculi 'White Robin'	Feathery white flowers in early summer. Well drained soil. Sun. H40cm x S30cm.
Marjoram 'Acorn Bank' (Origanum aureum)	Long pointed golden leaves. Any good well drained soil. Part shade. Originates from Acorn Bank, the National Trust garden. H45cm.
Meconopsis baileyi	Hairy pointed basal leaf rosettes above which rise large heavenly blue poppy flowers in summer. Moist but well drained humus rich soil. Part shade. H60cm.
Meconopsis baileyi 'Hensol Violet'	Hairy and pointed basal leaf rosettes giving rise to large lilac flowers in early Summer. Moist but well drained humus rich soil. Part shade. H60cm.
Meconopsis baileyi 'Alba'	Hairy and pointed basal leaf rosettes giving rise to large white flowers in early summer. Moist but well drained lime free humus rich soil. Part shade. H1m x S60cm.
Meconopsis chelidoniifolia	Small half nodding yellow flowers in early summer. Moist humus rich soil. Happy in woodland. H90cm.
Meconopsis x cookei	Rare meconopsis with dusky pink drooping flowers in early summer. Moist soil, in part shade. H 40cm.
Meconopsis horridula	Variable monocarpic species with stunning blue flowers in Summer. Leaves and stems covered in bristly spines. Moist but well drained humus rich soil. Part shade. H20-100 cm.
Meconopsis integrifolia	The lampshade poppy. Multiple stems of pale yellow flowers in Summer. Monocarpic. Moist but well drained humus rich soil. Part shade. H up to 1m.

Meconopsis 'Lingholm'	Hairy and pointed basal leaf rosettes giving rise to large sky blue flowers in early summer. Moist but well drained lime free humus rich soil. Part shade. H1m x 60cm.
Meconopsis napaulensis	Yellowish bristly pinnate rosette forming leaves give rise to branching stems of cup shaped pink, red through to purple flowers in summer. Moist but well drained lime free humus rich soil. Part shade. H1.5m x 60cm.
Meconopsis punicea	Flowers with petals that look like crumpled red silk from late spring. Moist humus rich soil. Part shade. H50cm. Usually monocarpic.
Meconopsis quintuplinerva	Harebell Poppy. Slowly creeping forming a dense mat of small hairy leaves giving rise in spring to arching hairy stems each holding one pendent lavender blue bell shaped flower. An exquisite species. Moist but well drained lime free humus rich soil. Part shade. H45cm x S30cm.
Meconopsis x sarsonii	<i>M. betonicifolia</i> x <i>M. integrifolia</i> . Toothed leaves covered in rust coloured hairs forming basal rosettes producing in early summer branching stems of singular pale creamy yellow cup shaped flowers. Moist but well drained lime free humus rich soil. Part shade. H1.2m x S60cm.
Monarda 'Beauty of Cobham' AGM	Soft pink flowers above purple pink bracts in summer and early autumn. Loved by butterflies and bees. Moist but well drained soil. Full sun to part shade. H90cm.
Monarda 'Cambridge Scarlet'	Bright red flowers in summer. Any good soil. Sun to part shade. H90cm x S90cm.
Monarda 'Croftway Pink'	Rose pink flowers above purple bracts in summer and early autumn. Loved by butterflies and bees. Moist but well drained soil. Full sun to part shade. H90cm.
Monarda 'Fishes'	Pale pink flowers in summer. Any good soil. Sun to part shade. H100cm x S60cm
Monarda 'Mahogany'	Dark red flowers in summer. Any good soil. Sun to part shade. H90cm x S90cm.
Monarda 'Prarie Night'	Purple flowers in summer. Any good soil. Sun to part shade. H100cm x S60cm.
Monarda 'Scorpio'	Violet purple flowers in summer. Any good soil. Sun to part shade. H100cm x S60cm.
Muscari 'Pink Sunrise'	The first pink grape hyacinth. Not easy to obtain. Any good soil. Sun to light shade. H18 cm.
Muscari 'Valerie Finnis'	Grape hyacinth. Powder blue flower spikes in spring. Any good soil. Sun to light shade. H15cm.
Muscari botryoides 'Album'	Grape hyacinth. Pure white flower spikes in spring. Any good soil. Sun to light

	shade. H15cm.
Narcissus cyclamineus 'Toto'	New dwarf variety. Delicate cream flowers with reflexed petals. Any good soil. Sun to light shade. H25cm.
Narcissus 'Jumblie'	Easy miniature garden narcissus with reflexed petals. Golden yellow. Any good soil. Sun to part shade. H15cm.
Narcissus 'Ice Wings'	Scented ivory flowers. Any good soil. Sun to part shade. H 30cm.
Narcissus 'Minnow'	Dwarf narcissus. Multiple soft yellow flowers on each stem. Any good soil. Sun to part shade. H 18cm.
Narcissus 'Rapture'	Swept back petals around a golden trumpet. Any good soil. Sun to part shade. H 30cm.
Narcissus 'Silver Chimes'(Triandrus)	Vigorous narcissus with up to seven flowers on a stem. Small, scented cream flowers. Any good soil. Sun to part shade. H 40cm.
Narcissus 'Tete a Tete'	Lovely dwarf golden yellow daffodil flowering in spring. Any good soil. Sun to part shade. Ht 15cm.
Narcissus 'Thalia'	Snow white flowers in spring. Any good soil. Sun to part shade. H30cm.
Nepeta subsessilis 'Blue dreams'	Bright blue flowers throughout summer. Moist but well drained soil. Sun to part shade. H60cm.
Nepeta subsessilis 'Pink Dreams'	Dusky pink flowers throughout the summer. Moist but well drained soil. Sun to part shade. H90cm.
Omphalodes 'Cherry Ingram'	Compact variety with large deep blue flowers in spring. Moist humus rich soil. Part shade. H15cm x S30cm.
Paeonia 'Bowl of Beauty'	Single pink flowers with cream centre in summer. Any good soil. Full sun. H100cm.
Paeonia 'Kansas'	Semi double red flowers in summer. Any good soil. Full sun. H80cm.
Paeonia 'Karl Rosenfield'	Double magenta flowers in June and July over bronzed foliage. Any good soil. Full sun to part shade. H80cm x S80cm.
Panicum virgatum 'Heavy Metal'	One of the best grasses. Upright purple grey foliage with large panicles of purplish spikelets in summer. Turns golden yellow in autumn. Well drained soil. Full sun. H1.2m.
Papaver orientale 'Aglaja'	Semi double flowers shading from cherry red at the base to soft salmon pink. May-June. Short and sturdy. Any good soil. Full sun. H50cm.

Papaver orientale 'Beauty of Livermere'	Bright red flowers with a black centre in early summer. Moist but well drained soil. Sun to part shade. H80cm.
Papaver orientale 'Coral Reef'	Large coral pink flowers in early summer. Moist but well drained soil. Full sun to part shade. H80cm.
Papaver orientale 'Konigin Alexandra'	Salmon pink flowers with a black centre in early summer. Moist but well drained soil. Full sun to part shade.H80cm.
Papaver orientale 'Lilac Girl'	Large raspberry to deep lilac flowers in early summer. Moist but well drained soil. Full sun to part shade.H80cm.
Papaver orientale 'Patty's Plum'	Flowers soft plum coloured in May to July. Any good soil. Full sun. H 75cm.
Papaver orientale 'Royal Wedding'	Pure white flowers with a black centre. Moist but well drained soil. Full sun to part shade. H80cm.
Papaver orientale 'Snow Goose'	Large semi double white flowers with a black blotch at the base. . Moist but well drained soil. Full sun to part shade. H80cm.
Peltoboykinia watanabei	Large glossy pale green leaves producing pale creamy yellow flowers in summer. Moist but well drained soil. Part shade. H70cm.
Phlox divaricata 'Dirigo Ice'	Small shade loving phlox with palest ice blue flowers in spring. Humus rich moist soil. Part shade. H15cm.
Phlox divaricata 'Blue Perfume'	Masses of fragrant lilac blue flowers in early summer. Humus rich soil. Part shade. H35cm x S50cm.
Phlox divaricata 'Chattahoochee'	Prostrate purple tinted leaves and stems producing open lavender blue flowers with purple eyes from summer to early autumn. Humus rich moist but well drained soil. Part shade. H15cm x S30cm.
Phlox divaricata 'Eco Texas Purple'	Strong purple flowers from April to June. Any good soil in sun or part shade. Height 30cm.
Phlox douglasii 'Crackerjack'	Low growing perennial with masses of crimson-red flowers from April to June. Good for rock garden or trough. Well drained soil in sun. H 5cm x W 25cm.

Phlox douglasii 'Waterloo'	Compact plant with rich crimson-red flowers in May to June. Good for rock garden or trough. Well drained soil in sun. H 5cm x W 25cm
Phlox 'Kelly's Eye'	Masses of pale pink flowers with darker eye in early summer. Good for rock garden or trough. Well drained soil in sun. H 7cm x W 15cm.
Phlox maculata 'Alpha'	Soft , scented lilac pink flowers in early and mid summer. Any good soil. Sun to part shade. H90cm x S45cm.
Phlox maculata 'Omega'	Fragrant white flowers with pink centres in summer. Any good soil. Sun to part shade. H100cm.
Phlox maculata 'Rosalind'	Soft pink flowers with a deeper pink centre in summer. Any good soil. Sun to part shade. H90cm x S45cm.
Phlox paniculata 'Blue Paradise'	Fragrant blue flowers with paler centres and deeper veins July-Sept. Foliage flushed purple. Humus rich moist but well drained soil. Full sun. H100cm.
Phlox paniculata 'Bright Eyes' AGM	Scented pale pink flowers with red centre mid to late summer. Any good soil. Sun or part-shade. Height 90cm.
Phlox paniculata 'David'	Scented pure white flowers in summer. Any good soil. Sun or part-shade. Height 90cm.
Phlox paniculata 'Discovery'	Lightly scented soft pink flowers in late summer. Humus rich moist but well drained soil . Full sun. 75cm.
Phlox paniculata 'Eventide'	Scented lavender blue, lilac flushed flowers from July-Sept. Humus rich moist but well drained soil. Full sun. H 90cm.
Phlox paniculata 'Franz Schubert'	Clusters of pale pink flowers from July to September. Any good soil. Full sun to part shade. H 90cm.
Phlox paniculata 'Fujiyama'	Large panicles of pure white flowers from midsummer onwards. Fertile moist soil. Sun to part shade. H1.2m x S60cm.
Phlox paniculata 'Jade'	Clusters of cream flowers edged green in summer. Any good soil. Full sun to part shade. H 65cm.
Phlox paniculata 'Little Laura'	Violet blue flowers with white eye from mid summer onwards. Fertile moist soil. Sun to part shade. H60cm.
Phlox paniculata 'Miss Pepper'	Rose pink flowers in late summer. Any good soil. Sun to part shade. H80cm x S30cm.
Phlox paniculata 'Monica Lynden-Bell'	Soft pink flowers over dark buds from midsummer onwards. Very attractive. Any good soil. Sun to part shade. H75cm.
Phlox paniculata 'Othello'	Claret red flowers from mid summer onwards. Any good soil. Sun to part

	shade. H75cm.
Phlox paniculata 'Prince of Orange'	Intense orange scarlet flowers from mid summer onwards. Any good soil. Sun to part shade. H90cm.
Phlox paniculata 'Prospero'	Large scented soft lilac flowers from midsummer onwards. Any good soil. Sun to part shade. H100cm.
Phlox paniculata 'Starfire'	Vigorous phlox with good crimson red flowers from midsummer onwards. Striking dark foliage. Any good soil. Sun to part shade. H90cm.
Phlox paniculata 'Tiara'	Scented double creamy white flowers from midsummer onwards. Any good soil. Sun to part shade. H60cm.
Phlox subulata 'Emerald Blue Cushion'	Dwarf creeping phlox with blue star like flowers from late spring to summer. Low but spreading. Good for rock garden or trough. Sun. Well drained soil.
Phlox subulata 'Samson'	Dwarf creeping phlox with purple pink flowers from late spring to summer. Low but spreading. Good for rock garden or trough. Sun. Well drained soil.
Phlox x arendsii 'Luc's Lilac'	Large heads of small scented lilac flowers in mid summer. Humus rich well drained soil. Full sun. H100cm.
Phuopsis stylosa	Drooping stems of narrow foliage with dense heads of tiny pink flowers in summer. Good border edge plant. Any good soil. Sun. H30cm x S60cm.
Phyllostachys nigra (Black Bamboo)	Lge elegant evergreen bamboo, green canes at first, becoming black with maturity. Moist but well drained soil. Full sun to part shade. H2.5 -3.5m, S1.5-2.5m (in 10-20yrs)
Phytolacca americana	American pokeweed. Large foliage plant with purple black berries in late summer. Any good soil. Sun to part shade. H2-3m. Plant and berries are toxic.
Platycodon grandiflorus 'Fuji Pink'	Balloon flower. Soft pink flowers in summer. Well drained soil. Full sun. H50cm.
Podophyllum peltatum	The May apple from open woodlands in Canada and America. Long glossy leaves above single white flowers. Any good soil. Shade to part shade. H40cm x S120cm.
Polemonium 'Lambrook Mauve'	Neat mounds of pinnate leaves producing many bell shaped lilac blue flowers in late spring to early summer. Fertile well drained soil. Sun to part shade. H45cm x S45cm.
Polemonium yezoense 'Purple Rain Strain'	Pinnate reddish purple foliage producing many lilac blue flowers in summer. Fertile well drained soil. Sun to part shade. H50cm x S45cm.

Polygonatum hookeri	Dwarf plant reaching only 10cm high. Deep pink purple flowers emerge in spring before the leaves. Shade. Any good soil.
Potentilla atrosanguinea var. agrophylla	Bi-coloured orange yellow and red flowers in mid to late summer. Any good well drained soil. Sun top part shade. H40cm x S45cm.
Potentilla atrosanguinea var. agrophylla 'Scarlet Starlit'	Bright scarlet red flowers over silky foliage in early summer. Any good well drained soil. Full sun. H30cm.
Potentilla 'Gibsons Scarlet'	Soft green foliage producing single saucer shaped bright scarlet flowers in summer. Well-drained soil. Full sun. H45cm x S60cm.
Potentilla 'Helen Jane'	Soft green foliage producing single saucer shaped bright pink flowers in summer. Well-drained soil. Full sun. H45cm x S60cm.
Potentilla nepalensis 'Ron McBeath'	Clump forming perennial with strawberry like bright green leaves. Carmine –red flowers throughout summer. Well drained soil. Full sun. H30cm.
Potentilla nepalensis 'Shogran'	Dwarf, compact potentilla. Strawberry-like bright green leaves with brilliant carmine pink flowers throughout summer. Well drained soil. Full sun. H15cm.
Potentilla thurberi 'Monarchs Velvet'	Soft green foliage producing double deep maroon flowers in summer. Well-drained soil. Full sun. H45cm x S60cm.
ALPINE PRIMULAS	
Primula "Alice Collins"	Small alpine primula with strong purple blue flowers in early spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula allionii	Small alpine primula with tubular rose pink flowers in spring. Grow in well drained compost. Ideally needs protection from winter wet. H5cm x S20cm.
Primula allionii 'Adrian Jones'	Neat mound of leaves covered in pale lavender pink flowers in Feb to March. Grow in well drained compost. Ideally needs protection from winter wet. H5cm x S20cm.
Primula allionii x 'Aire Mist'	Alpine primula with pure white tubular flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant.H10cm x S20cm.
Primula allionii x 'Aire Mist' in terracotta pot	Alpine primula with pure white tubular flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant.H10cm x S20cm.
Primula allionii 'Anne'	Alpine primula. Neat mound of leaves covered in soft pink flowers in early spring. . Moist but well drained, gritty soil.

	Good for a raised bed or trough.
Primula allionii x 'Koblenz'	Rarely available alpine primula. Neat mound of leaves with creamy white flowers in early spring. . Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula allionii x 'Pink Aire'	Alpine primula with pink shading to white tubular flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant.H10cm x S20cm.
Primula allionii x 'Snow Ruffles'	Alpine primula with frilled white flowers in spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula apoclita	Rarely offered species from Tibet/Yunnan (muscarioides group).Small purplish blue grape hyacinth like flowers on long stems. Sun to part shade.Moist but well drained soils.
Primula bileckii	Very small leaved alpine primula with rich crimson flowers in spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula 'Blairside Yellow'	Cushion of leaves bearing golden yellow open bell shaped flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant. H 7cm.
Primula burmanica	The Burma primrose. Candelabra primula with rosy red flowers. Humus rich moist soil. Part shade. H80cm.
Primula x Chamois	Alpine auricula with the softest peachy yellow flowers in spring. Sometimes classed as a border auricula. Moist but well drained compost. Part shade. H15cm.
Primula 'Firecracker'	Alpine primula with good red flowers in early spring . Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula glaucescens	Umbels of pink flowers with white eyes in spring. Humus rich well drained soil. Sun to part shade. H10cm x S20cm.
Primula halleri	Rosettes of mealy leaves producing open lilac-pink flowers in late spring. Moist humus rich peaty soil in part shade or in an alpine house in well drained loam based compost. H30cm x S25cm.
Primula 'Harlow Carr'	Vigorous rosette forming leaves producing white blushed pink flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant.
Primula 'Helena'	Not a clue. Does it exist?

Primula integrifolia	European alpine species. Neat rosettes of flesh leaves with pink flowers early spring. Moist but well drained soils in cool position. Ideal for rock garden, scree or trough. Height 5cm.
Primula 'Jo-Jo'	Lovely allionii hybrid. Large clear lilac flowers with a cream eye in Feb –Mar. Well drained soil. Scree, trough or cool green house. 5-8cm.
Primula 'Lavender Mist'	Small European hybrid covered in wavy edged pale lavender flowers in spring. Well drained soil. Scree, trough or cool green house.
Primula x loiseleurii 'Aire Mist'	Alpine primula with pure white tubular flowers in spring. Moist but well drained soil. Full sun to part shade. Good container or rockery plant.H10cm x S20cm.
Primula x loiseleurii 'Aire Mist' in terracotta pot	Alpine primula with pure white tubular flowers in spring. H10cm x S20cm.
Primula marginata	Rosette forming mealy edged leathery leaves with umbels of shallowly tubular lavender-blue flowers in spring. Moist but well drained soil. Sun to part shade. Good for a raised bed or trough. H15cm x S15cm.
Primula marginata 'Adrian Evans'	Good alpine primula with purple red flowers in early spring . Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula marginata 'Barbara Clough'	Good alpine primula with soft lilac pink flowers in early spring . Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula marginata 'Kesselrings'	Easy alpine primula. Neat rosettes of leaves with deep lavender flowers in spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula marginata 'Lemon Sorbet'	Easy alpine. No info available. Some query it's existence. But here it is! Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula marginata 'Linda Pope'	Toothed mealy green leaves forming rosettes giving rise to umbels of mauve-blue flowers with white mealy centres in spring. Moist but well drained, gritty soil. Good for a raised bed or trough. H15cm x S15cm.
Primula marginata 'Malvern'	Another?
Primula marginata 'Waithman's'	Alpine primula with light blue flowers in early spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula marginata 'White Lady'	Beautifully delicate pure white flowers in spring. Moist but well drained, gritty soil. Good for a raised bed or trough. H15cm

x S15cm.

Primula 'Maria Talbot'	Beautiful European hybrid alpine primula. Large burgundy frilled flowers in March. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula 'Midnight'	Hybrid alpine primula. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula 'Mylene'	Hybrid alpine primula with deep purple flowers in early spring . Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula 'Pink Aire'	Allionii hybrid. Soft pink flowers. Well drained soil. Scree, trough or cool greenhouse. 10 cm.
Primula modesta	Rosettes of spoon shaped mealy leaves producing in spring umbels of open tubular purple-pink flowers. Moist but well drained humus rich soil. Sun to part shade. Can be grown under glass in loam based gritty compost. H20cm x S20cm.
Primula petiolaris	Toothed leaves producing tiny magenta purple flowers in spring. Moist but well drained soil. Part shade. H10cm x S20cm.
Primula 'Pink Ice'	Allionii hybrid. Pink shaded white flowers. Humus rich moist but well drained soil. Part shade, will tolerate a little sun. Good container or rockery plant. H20cm x S20cm.
Primula 'Pink Ice' in terracotta pot	Allionii hybrid. Pink shaded white flowers. Humus rich moist but well drained soil. Part shade, will tolerate a little sun. H20cm x S20cm.
Primula x pubescens 'Apple Blossom'	Vigorous rosettes of leaves producing masses of lilac pink flowers in early spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula x pubescens 'Bewerley White'	Vigorous rosette forming leaves producing masses of white flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.
Primula x pubescens 'Bill Martin'	Vigorous rosette forming leaves producing deep lilac flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.
Primula x pubescens 'Christine'	Vigorous rosette forming leaves producing purple pink flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.
Primula x pubescens 'Cream Viscosa'	Free flowering, with masses of cream flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.

Primula x pubescens 'Crimson Velvet'	Alpine primula with crimson flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant.
Primula x pubescens 'Faldonside'	Vigorous rosette forming leaves producing dusky red-pink flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.
Primula x pubescens 'Freedom'	Vigorous rosette forming leaves producing clear lilac purple flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm x S30cm.
Primula x pubescens 'Harlow Carr'	Vigorous rosette forming leaves producing creamy white flowers with a flush of pink in spring. Moist but well drained soil. Sun to part shade. Good container or rockery plant. H 10cm.
Primula x pubescens 'Pat Barwick'	Vigorous rosette forming leaves producing pale cream blushed pink flowers in early spring. Moist but well drained soil. Sun to part shade. Good container or rockery plant H10cm.
Primula x pubescens 'Pat Bernard'	Alpine primula with deep pink flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant.
Primula x pubescens 'Sonya'	Alpine primula with cream flowers in spring. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant.
Primula x pubescens 'The General'	Dwarf alpine primula with red flowers. Humus rich moist but well drained soil. Sun to part shade. Good container or rockery plant.
Primula x pubescens 'Wedgwood'	Vigorous rosette forming leaves producing Wedgwood blue flowers in early spring. Moist but well drained soil. Sun to part shade. Good container or rockery plant H10cm.
Primula x pubescens 'Wharfedale Bluebell'	Vigorous rosettes of leaves producing light blue flowers in early spring. Moist but well drained, gritty soil. Good for a raised bed or trough. H10cm
Primula x pubescens 'Wharfedale Buttercup'	Vigorous rosettes of leaves producing cream coloured flowers in early spring. Moist but well drained soil. Sun to part shade. Good container or rockery plant. H10cm.
Primula x pubescens 'Wharfedale Village'	Vigorous rosettes of leaves, coated in farina. Greenish white flowers in early spring. Moist but well drained, gritty soil. Good for a raised bed or trough.
Primula 'Slack Top Violet'	Marginata type primula. Violet flowers over mound of leaves in spring. Moist but well drained soil. Sun or part shade. Good for a container or rockery. H10cm.
Primula 'Redpoll'	Petiolearis hybrid with rich purple-red flowers in early spring. Moist humus rich soil in part shade. Height 8cm.

Primula 'Tantalón'	Fine hardy asiatic hybrid with lavender blue flowers in early spring. Moist humus rich soil in part shade. Height 8cm.
Primula Acaulis	
Primula acaulis Mixed Barnhavens	A Barnhaven primula. Single flowers in a mixture of colours. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Barnhaven Blues'	A Barnhaven primula. Single flowers in shades of cornflower, turquoise, indigo and azure. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Butterscotch'	A Barnhaven primula. Single flowers in shades of copper, bronze, champagne and butter yellow in spring. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Candy Pinks'	A Barnhaven primula. Single flowers in shades of clear pinks, satin pinks soft peach, shell salmon and baby pinks. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Harbinger'	A Barnhaven primula. Single flowers in shades of palest yellow. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Osiered Amber'	A Barnhaven primula. Single flowers in shades of amber, apricot and pale yellow in spring. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Tartan Reds'	A Barnhaven primula. Single flowers in rich red shades, many with dark stems and foliage. Any good soil. Part shade. H10cm x S15cm.
Primula acaulis 'Traditional Yellows'	A Barnhaven primula. Single flowers in shades of yellow. Any good soil. Part shade. H10cm x S15cm.
Polyanthus primulas	
Primula polyanthus 'Chartreuse'	A Barnhaven primula. Many flowers on one stem in shades of cream iced with green or white and shading to a green centre. Any good soil. Part shade. H25cm.
Primula polyanthus 'Desert Sunset'	A Barnhaven primula. Many flowers on one stem in shades of coral, salmon, shrimp, champagne, apricot and burnt orange. Any good soil. Part shade. H25cm.
Primula polyanthus 'Grand Canyon'	A Barnhaven primula. Many flowers on one stem in shades of copper, bronze, terracotta, rust and tangerine. Any good soil. Part shade. H25cm.
Primula polyanthus 'Harbour Lights'	A Barnhaven primula. Night on the waterfront. Startling oriental and pastel reds, smoky apricot, and vivid orange

	apricot, neon pinks and salmon reds. Any good soil. Part shade. H25cm.
Primula polyanthus 'Harvest Yellows'	A Barnhaven primula. A direct descendent of Gertrude Jekyll's Munstead strain. Many flowers on one stem in shades of ivory, lemon, mimosa and orange yellow. Any good soil. Part shade. H10cm x S15cm.
Primula polyanthus 'Indian Reds'	A Barnhaven primula. Many flowers on one stem in shades of scarlet, vermilion, guardsman and cherry reds. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Little Egypt'	A Barnhaven primula. Many flowers on one stem in shades of vivid reds, oranges and brick colours. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Marine Blues'	A Barnhaven primula. Many flowers on one stem in shades of cobalt, delft, sky and navy blues. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Mauve Victorians'	A Barnhaven primula. Many flowers on one stem in shades of mauve, lavender, pink orchid, orchid, lilac, porcelain, cattleya and heliotrope with a frothing of white. . Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Midnight Blues'	A Barnhaven primula. Deep blue blacks and magenta purples, some with white centres and some edged with silver wire.
Primula polyanthus 'Muted Victorians'	A Barnhaven primula. Many flowers on one stem in shades of lavender, violet, blue or buff. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'New Pinks'	A Barnhaven primula. Many flowers on one stem in shades of wild rose, bright raspberry and sweet pea pinks. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Old Rose Victorians'	A Barnhaven primula. Many flowers on one stem in rose shades from the deepest passionate through bright and frivolous to softest sugar mouse. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Paris 90'	A Barnhaven primula. Barnhaven primula. White and cream edged blue flowers in spring. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Ramona'	A Barnhaven primula. Barnhaven primula with spectacular coppered red flowers in spring. Any good soil. Part shade. H25cm x S15cm.
Primula polyanthus 'Spice Shades'	A Barnhaven primula. Many flowers on one stem in shades of chocolate, coffee, cinnamon and ginger. Any good soil.

Part shade. H25cm x S15cm.

Primula polyanthus 'Striped Victorians'

A Barnhaven primula. Many flowers on one stem in shades of blues, violets and dusky pinks, all veined and striped. Any good soil. Part shade. H25cm x S15cm.

Primula polyanthus 'Tango'

A Barnhaven primula. Refreshing tones of orange and gold, very striking in the garden. Any good soil. Part shade. H25cm x S15cm.

Primula polyanthus 'Violet Victorians'

A Barnhaven primula. Many flowers on one stem in shades of violet, royal purple, plum and damson. Any good soil. Part shade. H25cm x S15cm.

Cowichan primulas

Primula 'Amethyst Cowichan'

A Barnhaven primula. Many flowers on one stem in shades of amethyst and violet. Any good soil. Part shade. H25cm x S15cm.

Primula 'Blue Cowichan'

A Barnhaven primula. Many intense blue flowers on one stem, some with a black bee centre. Any good soil, part shade. H25cm x S15cm.

Primula 'Garnet Cowichan'

A Barnhaven primula. Many flowers on one stem in shades of garnet, black garnet and ruby. Any good soil. Part shade. H25cm x S15cm.

Primula 'Venetian Cowichan'

A Barnhaven primula. Many flowers on one stem in shades of hot pink-reds, mandarin and strawberry reds. Any good soil. Part shade. H25cm x S15cm.

Primula 'Yellow Cowichan'

A Barnhaven primula. Many flowers on one stem in shades of richest yellows. Any good soil. Part shade. H25cm x S15cm.

Juliana primulas

Primula 'Blue Julianas'

A Barnhaven primula. Small blue and violet flowers in early spring. Any good soil. Part shade. Will form a good clump over the years. H10cm x S15cm.

Primula juliana 'Fireflies'

A Barnhaven primula. Early small flowering variety. Many flowers on one stem in shades of deep crimson to bright red. Any good soil. Part shade. H15cm x S10cm.

Primula juliana 'Vera Maud'

A Barnhaven primula. Compact early flowering variety covered in soft pink flowers with a deep pink picotee edge above dark compact leaves. Flowers for up to 3 months. Any good soil. Part

shade. H15cm x S10cm.

Other Barnhavens

- Primula Gold Laced Polyanthus 'Beeches Strain' AGM** A Barnhaven primula. One of the best strains of gold laced primulas, winning an AGM in the RHS hardy polyanthus trials in 1995. Any good soil. Part shade. H25cm.
- Primula Gold Laced Polyanthus (Barnhaven Strain)** A Barnhaven primula. One of the best strains of gold laced primulas. Any good soil. Part shade. H25cm.
- Primula 'Oriental Sunrise'** Barnhaven's famous strain of candelabra hybrids. Flowers in flame reds, coral, burnt orange, pastel yellows, peach and lavender in early summer. Humus rich moist soil. Part shade. H60-90cm

AURICULAS

- Auricula 'Abundance'** Gold centred alpine. Plum shades. Moist but well drained compost. Part shade.
- Auricula 'Adrienne Ruan'** Gold centred alpine. Deep shades of rust. Moist but well drained compost. Part shade.
- Auricula 'Adrian'** Light centred alpine. Shaded bright to light purple. Moist but well drained compost. Part shade.
- Auricula 'Agamemnon'** Light centred alpine. Shaded pink. Moist but well drained compost. Part shade.
- Auricula 'Alexandra Georgina'** Gold centred alpine. Flowers deepest red shading to apricot. Moist but well drained compost. Part shade.
- Auricula 'Alamo'** Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
- Auricula 'Alf'** Light centred alpine. Purple with a wide lilac edge. Moist but well drained compost. Part shade.
- Auricula 'Alicia'** Light centred alpine. Purple mauve - pink shading. Moist but well drained compost. Part shade.
- Auricula 'Alison Jane'** Gold centred alpine. Conker brown to flaming orange shading. . Moist but well drained compost. Part shade.
- Auricula 'Amicable'** Gold centred alpine. Shaded red. Moist but well drained compost. Part shade.
- Auricula 'Ancient Society'** Gold centred alpine. Red shading to orange. Moist but well drained compost. Part shade.
- Auricula 'Andrea Julie'** Gold centred alpine. Orange red to light orange shading. . Moist but well drained compost. Part shade.
- Auricula 'Andrew Hunter'** Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
- Auricula 'Anwar Sadat'** Light centred alpine. Blue shades. Moist but well drained compost. Part shade.
- Auricula 'Appleblossom'** Border auricula, although inclining towards pubescens. Small pink blushed

Auricula 'Applecross'	appleblossom flowers. Moist but well drained compost. Part shade.
Auricula 'Argus'	Gold centred alpine. Red shades. Moist but well drained compost. Part shade.
Auricula 'Arthur Delbridge'	Light centred alpine. Plum shades. Moist but well drained compost. Part shade.
Auricula 'Arundel Stripe'	Gold centred alpine. Purple pink shades. . Moist but well drained compost. Part shade.
Auricula 'Aurora'	Yellow, maroon and white stripes. White centre. Moist but well drained compost. Part shade.
Auricula 'Austin'	Light centred alpine. Raspberry pink shades. Moist but well drained compost. Part shade.
Auricula 'Avril'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Avril Hunter'	Light centred alpine. Good flowerheads in shades of plum red. Moist but well drained compost. Part shade.
Auricula 'Balbithan'	Light centred alpine. Shaded lilac blue. Moist but well drained compost. Part shade.
Auricula 'Barnhaven Cinnamon Double'	Neat purple flowers on dainty leaved plant. Possibly a pubescens hybrid. . Moist but well drained compost. Part shade.
Auricula 'Barnhaven Coffee Double'	Double cinnamon coloured flower. Propagated by us from a seedling. Moist but well drained compost. Part shade.
Auricula 'Barnhaven Plum Double'	Double coffee coloured flower. Propagated by us from a seedling. Moist but well drained compost. Part shade.
Auricula 'Barr Beacon'	Plum coloured double. Propagated by us from a seedling. Moist but well drained compost. Part shade.
Auricula 'Basuto'	Gold centred alpine. Deepest red shades. Moist but well drained soil. Part shade.
Auricula 'Beatrice'	Gold centred alpine. Rich crimson. Moist but well drained compost. Part shade.
Auricula 'Bellamy Pride'	Light centred alpine with shaded blue flowers. Moist but well drained soil. Part shade.
Auricula 'Blue Chip'	Border auricula with the palest mauve flowers. Moist but well drained soil. Part shade.
Auricula 'Blue Heaven'	Grey edged show auricula. Blue grey flowers. Moist but well drained soil. Part shade.
Auricula 'Blue Velvet'	Show striped. Purple blue striped white. Moist but well drained compost. Part shade.
Auricula 'Blue Yodeler'	Blue flowered border auricula. Robust. Moist but well drained compost. Part shade.
	Light centred alpine. Shaded blue flowers. Moist but well drained soil. Part shade.

Auricula 'Blush Baby'	Striped auricula. Pink and white. Moist but well drained soil. Part shade.
Auricula 'Boromir'	Light centred alpine. Blue shades. Moist but well drained soil. Part shade.
Auricula 'Brenda's Choice'	Gold centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Broad Gold'	Gold centred alpine. Rust shading to wide gold edge. Moist but well drained compost. Part shade.
Auricula 'Broadwell Gold'	Tall yellow and white border. Moist but well drained soil. Part shade.
Auricula 'Brownie'	Border auricula. Russet brown flowers. Moist but well drained soil. Part shade.
Auricula 'Bush Baby'	Border auricula. Apricot yellow flowers. Moist but well drained compost. Part shade.
Auricula 'Butterwick'	Gold centred alpine. Rich brown red. Moist but well drained compost. Part shade.
Auricula 'Cambodunum'	Light centred alpine. Plum shades. Moist but well drained compost. Part shade.
Auricula 'Carole'	Gold centred alpine. Red brown shading to orange. Moist but well drained compost. Part shade.
Auricula 'Chaffinch'	Self. Opens bright red and fades to dusky pink. Very attractive and neat. Moist but well drained compost. Part shade.
Auricula 'Charles Rennie'	Border auricula. Soft pink flowers. Moist but well drained compost. Part shade.
Auricula 'Cheops'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Cherry Picker'	Light centred alpine. Velvet pink. Moist but well drained compost. Part shade.
Auricula 'Chiffon'	Soft lilac pink self. Moist but well drained compost. Part shade.

Auricula 'Chorister'	Vigorous deep yellow self. Moist but well drained soil. Part shade.
Primula 'Chamois' find under P x Chamois	Dusty yellow coloured border. Lovely. Moist but well drained soil. Part shade.
Auricula 'Chiquita'	Double with burnt orange colouring. Moist but well drained soil. Part shade.
Auricula 'Cindy'	Light centred alpine. Deepest purple with narrow lighter shading. Moist but well drained compost. Part shade.
Auricula 'Clatter Ha'	Deep purple double. Moist but well drained soil. Part shade.
Auricula 'Clare'	Grey edged show auricula. Moist but well drained compost. Part shade.
Auricula 'Claudia Taylor'	Fancy show auricula. Red and green flowers. Moist but well drained compost. Part shade.
Auricula 'Comet'	Light centred alpine. Red pink shades. Moist but well drained compost. Part shade.
Auricula 'Connaught Court'	Light centred alpine. Dark shading to light pink. Moist but well drained compost. Part shade.
Auricula 'Coventry Street'	Bright yellow self. Moist but well drained compost. Part shade.
Auricula 'Craig Vaughan'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Crimson Glow'	Deep red double. Moist but well drained soil. Part shade.
Auricula 'Crinoline'	Lavender and green stripes with a white edge and white centre. Moist but well drained compost. Part shade.
Auricula 'Cuckoo Fair'	Royal blue flowered self. Moist but well drained compost. Part shade.
Auricula 'Dales Red'	Border auricula. Crimson red with a light centre. Moist, well drained soil. Part shade.

Auricula 'Dark Eyes'	Almost black double flower. Moist well drained soil. Part shade.
Auricula 'Delilah'	Rich purple double. Moist but well drained soil. Part shade.
Auricula 'Dill'	Plum coloured light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Double Pink Pearl'	Plant given to us by a kind garden visitor. We are unable to verify the name. Soft pink double. Moist well drained compost. Part shade.
Auricula 'Doublet'	Maroon coloured double. Moist but well drained compost. Part shade.
Auricula 'Douglas Bader'	Light centred alpine. Shaded deep to pale blue. Moist but well drained compost. Part shade.
Auricula 'Douglas Black'	Deepest maroon flowered self. Moist but well drained compost. Part shade.
Auricula 'Dusky Maiden'	Gold centred alpine. Purple maroon flowers. Moist but well drained compost. Part shade.
Auricula 'Eastern Promise'	Brownish orange gold centred alpine. Moist but well drained compost. Part shade.
Auricula 'Eden Blue Star'	Border auricula with vibrant blue flowers. Moist but well drained compost. Part shade.
Auricula 'Eden Sunrise'	Good yellow border auricula. Moist but well drained compost. Part shade.
Auricula 'Edith Major'	Softest lavender double. Moist but well drained compost. Part shade.
Auricula 'Eglinton'	Light centred alpine. Rich purple shades. Moist but well drained compost. Part shade.
Auricula 'Elf Star'	Light centred alpine. Lilac purple shades.

Auricula 'Ellen Thompson'	Light centred alpine. Blue lightly scented flowers. Moist but well drained compost. Part shade.
Auricula 'Elsie May'	Velvet red light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Emmett Smith'	Gold centred alpine. Rich red shaded flowers. Easy. Moist but well drained compost. Part shade.
Auricula 'Erica'	Gold centred alpine. Free flowering, strong red. Moist but well drained soil. Part shade.
Auricula 'Eve Guest'	Light centred alpine. Rich blue shades. Moist but well drained compost. Part shade.
Auricula 'Excalibur'	Double purple pink flowers . Moist but well drained compost. Part shade.
Auricula 'Eye Opener'	Gold centred alpine. Deep pink flowers. Moist but well drained compost. Part shade.
Auricula 'Favourite'	Really good bright red self. Moist but well drained compost. Part shade.
Auricula 'Fennay'	Dark red self. Moist but well drained soil. Part shade.
Auricula 'Fiddler's Green'	Double green and red. Moist but well drained compost. Part shade.
Auricula 'Fleet Street'	Fancy show auricula with red flowers neatly edged grey. Moist but well drained compost. Part shade.
Auricula 'Forest Fire'	Double rust red flowers Moist but well drained compost. Part shade.
Auricula 'Frank Crosland'	Light centred alpine. Shaded blue. Moist but well drained compost. Part shade.
Auricula 'Fred Booley'	Bright lavender double. Moist but well drained compost. Part shade.
Auricula 'Fred Livesley'	Good light centred alpine with purple flowers. Moist but well drained compost. Part shade.
Auricula 'Funny Valentine'	Rose red double. Moist but well drained compost. Part shade.
Auricula Fuller's Red'	Deepest red self. Moist but well drained compost. Part shade.
Auricula 'Gail Atkinson'	Gold centred alpine. Deep rust shades. Moist but well drained compost. Part shade.
Auricula 'Gay Crusader'	Gold centred alpine. Shaded orange red. Moist but well drained compost. Part shade.
Auricula 'Gee Cross'	Gold centred alpine. Orange brown and gold. Moist but well drained compost. Part shade.
Auricula 'Geldersome Green'	Green edge show auricula. Moist but well drained compost. Part shade.

Auricula 'Generosity'	Gold centred alpine. Plum to apricot shading. Moist but well drained compost. Part shade.
Auricula 'Girl Guide'	Blue self. Moist but well drained compost. Part shade.
Auricula 'Gleam'	Mustard coloured self. Moist but well drained compost. Part shade.
Auricula 'Glenelg'	Show fancy green edge auricula. Deep red flowers with a green edge.
Auricula 'Golden Boy'	Gold centred alpine. Burgundy to peach shading. Moist but well drained compost. Part shade.
Auricula 'Golden Hind'	Golden russet coloured double. Moist but well drained compost. Part shade.
Auricula 'Golden Splendour'	Double gold flowers. Moist but well drained soil. Part shade.
Auricula 'Goldwin'	Gold centred alpine. Red flowers. Moist but well drained compost. Part shade.
Auricula 'Good Report'	Light centred alpine. Flowers in shades of blue. Moist but well drained compost. Part shade.
Auricula 'Greenfinger'	Show auricula. Yellow shading to green
Auricula 'Grey Lag'	Grey edge show auricula, with a black body. Moist but well drained compost. Part shade.
Auricula 'Habenera'	Light centred alpine. Purple to pink shaded flowers. Moist but well drained compost. Part shade.
Auricula 'Hallmark'	Light centred alpine. Flowers in shades of pink. Moist but well drained compost. Part shade.
Auricula 'Harmony'	Light centred alpine in shades of blue. Moist but well drained soil. Part shade.
Auricula 'Harry Hotspur'	Light centred alpine in shades of pink. Moist but well drained soil. Part shade.
Auricula 'Hearts of Gold'	Gold centred alpine. Flowers in shades of brown. Moist but well drained compost. Part shade.
Auricula 'Helen Barter'	Green edged purple fancy. Moist but well drained compost. Part shade.
Auricula 'Helen Ruan'	Border auricula. Pale lemon flowers with a grey edge. Moist but well drained compost. Part shade.
Auricula 'Highland Park'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Hillhook'	Moist but well drained compost. Part shade.
Auricula 'Hobby Horse'	Bright purple striped auricula. Moist but well drained compost. Part shade.
Auricula 'Honey'	Pale yellow classic double. Easy. Early to flower. Moist, well drained soil. Part shade.
Auricula 'Ian Greville'	Raspberry pink light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Ice Maiden'	Light centred alpine. Flowers in shades of blue. Moist but well drained compost. Part shade.
Auricula 'Immaculate'	Gold centred alpine. Shades of red. Moist but well drained compost. Part shade.
Auricula 'Indian Love Call'	Gold centred alpine. Good plant with red and gold shading. Moist but well

	drained compost. Part shade.
Auricula 'Jaffa'	Gold centred alpine with orange flowers. Moist but well drained soil. Part shade.
Auricula 'Jeannie Telford'	Light centred alpine. Flowers shaded purple to pink. Moist but well drained compost. Part shade.
Auricula 'Jenny'	Gold centred alpine. Maroon shaded flowers. Moist but well drained compost. Part shade.
Auricula 'Jilting Jessie'	Show striped auricula with dusky pink and white stripes. Moist but well drained compost. Part shade.
Auricula 'Jim Lister'	Green and purple striped auricula. Moist but well drained compost. Part shade.
Auricula 'Joel'	Deep violet self. Moist but well drained compost. Part shade.
Auricula 'Johann Bach'	Deep blue border auricula. Moist but well drained compost. Part shade.
Auricula 'John Wayne'	Pink light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Joy'	Light centred alpine with pink purple flowers. Vigorous. Moist but well drained soil. Part shade.
Auricula 'Joyce'	Light centred alpine. Purple shading to light blue. Moist but well drained compost. Part shade.
Auricula Julie Nuttall'	Deep lilac border auricula. Moist but well drained compost. Part shade.
Auricula 'June'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Karen Cordrey'	Deep red and white striped show auricula. Moist but well drained compost. Part shade.
Auricula 'Karen Mc Donald'	Light centred alpine. Purple pink shades. Moist but well drained compost. Part shade.
Auricula 'Kevin Keegan'	Light centred alpine. Crimson shading to pink. Moist but well drained compost. Part shade.
Auricula 'Kilby'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Kingfisher'	Light centred alpine. Shades of pink. Moist but well drained compost. Part shade.
Auricula 'Koh I Noor'	Light centred alpine. Deep pink flowers. Moist but well drained compost. Part shade.
Auricula 'Lamplugh'	Red double. Moist but well drained compost. Part shade.
Auricula 'Lara'	Light centred alpine. Purple shades.
Auricula 'Lechistan'	Dark velvet red self. Moist but well drained compost. Part shade.
Auricula 'Lee Clark'	Light centred alpine. Pink. Moist but well drained compost. Part shade.
Auricula 'Lee Paul'	Gold centred alpine. Brown and yellow shading. Strong grower. Moist but well drained compost. Part shade.
Auricula 'Lee Sharpe'	Deep raspberry with a pale pink edge. Light centred alpine. Moist but well

	drained compost. Part shade.
Auricula 'Leverton'	Lavender flowered double auricula. Moist but well drained compost. Part shade.
Auricula 'Likely Lad'	Blue and white striped auricula. Moist but well drained compost. Part shade.
Auricula 'Ling'	Gold centred alpine. Velvet red shades. Moist but well drained compost. Part shade.
Auricula 'Little Rosetta'	Rusty red double. Moist but well drained compost. Part shade.
Auricula 'Lolita'	Pink and yellow striped auricula. Moist but well drained compost. Part shade.
Auricula 'Lord Saye en Sele'	Green yellow and light red stripes. Moist but well drained compost. Part shade.
Auricula 'Lucy Locket'	Border auricula with pale yellow flowers. Moist well drained flowers. Part shade.
Auricula 'Maggie'	Show auricula. Black edged with a white centre. Moist but well drained compost. Part shade.
Auricula 'Mandarin'	Light centred alpine. Light to deep pink shading. Moist but well drained compost. Part shade.
Auricula 'Margaret'	Green fancy show auricula. Yellow flowers with a bright green edge. Moist but well drained compost. Part shade.
Auricula 'Mary'	Neat lemon yellow double. Moist but well drained soil. Part shade.
Auricula 'May'	Light centred alpine. Deep to light lilac pink. Moist but well drained compost. Part shade.
Auricula 'Meadowlark'	Light centred alpine. Good blue shade. Moist but well drained compost. Part shade.
Auricula 'Merlin'	Double with maroon and white stripes with a hint of green. Moist but well drained compost. Part shade.
Auricula 'Mersey Tiger'	Deep red and green stripes. Moist but well drained compost. Part shade.
Auricula 'Mikado'	Black red self. Moist but well drained compost. Part shade.
Auricula 'Millicent'	Light centred alpine. Blue shades. Moist but well drained compost. Part shade.

Auricula 'Miss Newman'	Light centred alpine in shades of purple. Moist but well drained compost. Part shade.
Auricula 'Mojave'	Light red self. Moist but well drained soil. Part shade.
Auricula 'Moonfairy'	Very good fancy show auricular. Flowers fade from red to purple with age. Moist but well drained compost. Part shade.
Auricula 'Mrs. L. Hearn'	Light centred alpine. Blue grey flowers. Moist but well drained compost. Part shade.
Auricula 'Murray Lakes'	Light centred alpine. Good purple shading. Moist but well drained compost. Part shade.
Auricula 'Nantenan'	Fancy auricula. Yellow and green with red markings. Moist but well drained compost. Part shade.
Auricula 'Nefertiti'	Light centred alpine. Very neat plant with velvet purple to lilac shading. Moist but well drained compost. Part shade.
Auricula 'Nickity'	Gold centred alpine. Dusky to light red shading. Moist but well drained compost. Part shade.
Auricula 'Nocturne'	Rich deep red self. Moist but well drained soil. Part shade.
Auricula 'Noelle'	Show auricular. Red flowers with a silver edge. Moist but well drained compost. Part shade.
Auricula 'Nona'	Cappucino coloured double. Moist but well drained compost. Part shade.
Auricula 'Nonchalance'	Gold centred alpine. Rose pink flowers. Moist but well drained compost. Part shade.
Auricula 'Old Clove Red'	Border auricula. Small red scented flowers. Moist but well drained compost. Part shade.

Auricula 'Old Smokey'	Gold centred alpine. Dusty red flowers. Moist but well drained compost. Part shade.
Auricula 'Olton'	Gold centred alpine. Crimson brown shading to orange flowers. Moist but well drained compost. Part shade.
Auricula 'Orwell Tiger'	Good deep red and white striped show auricula. Moist but well drained compost. Part shade.
Auricula 'Overdale'	Gold centred alpine. Crimson to pink flowers. Moist but well drained compost. Part shade.
Auricula 'Paleface'	Gold centred alpine. Soft pink flowers. Moist but well drained compost. Part shade.
Auricula 'Pauline'	Light centred alpine with rich purple flowers. Moist but well drained compost. Part shade.
Auricula 'Pavarotti'	Light centred alpine. Deep pink flowers. Moist but well drained compost. Part shade.
Auricula 'Peggy'	Light centred alpine. Purple blue shades. Moist but well drained compost. Part shade.
Auricula 'Pequod'	Light centred alpine. Deepest purple with small light rim. Possibly fits new lace edged alpine group.
Auricula 'Phantom'	Lavender shaded double. Moist but well drained compost. Part shade.
Auricula 'Phyllis Douglas'	Light centred alpine. Blue to mauve flowers. Moist but well drained compost. Part shade.
Auricula 'Piglet'	Double with soft dusky pink flowers. Moist but well drained compost. Part shade.
Auricula 'Pierrot'	Purple shaded light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Piers Telford'	Gold centred. Orange shading to dark red. Moist but well drained soil. Part shade.
Auricula 'Pink Lady'	Light centred alpine. Shaded claret to light pink. Moist but well drained compost. Part shade.

Auricula 'Pinstripe'	Striped auricula. Redish mauve stripes. Moist but well drained compost. Part shade.
Auricula 'Pippin'	Light centred alpine. Large red shaded flowers. Moist but well drained compost. Part shade.
Auricula 'Polestar'	Light centred alpine. Purple shades. Moist but well drained compost. Part shade.
Auricula 'Polly'	Show fancy. Maroon with mealy green edges. Moist but well drained compost. Part shade.
Auricula 'Pretender'	Gold centred alpine. Deep red to peach flowers. Moist but well drained compost. Part shade.
Auricula 'Prince John'	Gold centred alpine. Flowers maroon shading to red. Moist but well drained compost. Part shade.
Auricula 'Prometheus'	Fine double brick red auricula. Moist but well drained compost. Part shade.
Auricula 'Purple Sage'	Good purple coloured self. Moist but well drained compost. Part shade.
Auricula 'Quintessence'	Rich purple light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Rabley Heath'	Light centred alpine. Purple blue. Moist but well drained compost. Part shade.
Auricula 'Rameses'	Velvet purple light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Red Gauntlet'	Bright red self. Moist but well drained compost. Part shade.
Auricula 'Red Wire'	Red and green striped. Moist but well drained soil. Part shade.
Auricula 'Redcar'	Gold centred alpine. Flowers in red shades. Moist but well drained compost. Part shade.
Auricula 'Regency Emperor'	Show auricula with red and white stripes. Moist but well drained compost. Part shade.

Auricula 'Remus'	Deep blue self. Moist but well drained compost. Part shade.
Auricula 'Rene'	Gold centred alpine. Crimson. Moist but well drained compost. Part shade.
Auricula 'Rowena'	Light centred alpine with strongly shaded purple mauve flowers. Moist but well drained compost. Part shade.
Auricula 'Roy Keane'	Gold centred rust red alpine. Moist but well drained compost. Part shade.
Auricula 'Royal Mail'	Bright red self. Moist but well drained compost. Part shade.
Auricula 'Ruby Hyde'	Border auricular. Ruby red flowers with a light centre. Moist but well drained compost. Part shade.
Auricula 'Sally'	
Auricula 'Sasha Files'	Light centred alpine with purple shades flowers. Moist but well drained compost. Part shade.
Auricula 'Sandwood Bay'	Gold centred alpine. Flowers in strong shades of red and orange. Moist but well drained compost. Part shade.
Auricula 'Scorcher'	Red self. Moist but well drained compost. Part shade.
Auricula 'Sharon Louise'	Outstanding yellow self. Moist but well drained compost. Part shade.
Auricula 'Shere'	Bright red self. Moist but well drained compost. Part shade.
Auricula 'Sibsey'	Blue flowered double. Moist but well drained compost. Part shade.
Auricula 'Simply Red'	Red show self! Moist but well drained compost. Part shade.
Auricula 'Sirbol'	Gold centred alpine. Flowers in shades of soft brown. Moist but well drained compost. Part shade.

Auricula 'Sirius'	Gold centred alpine. Maroon to cream shading. Moist but well drained soil. Part shade.
Auricula 'Slim Whitman'	Gold centred alpine. Burnt orange with a light edge. Moist but well drained compost. Part shade.
Auricula 'Slioch'	Show auricula. Black edged with a white centre. Moist but well drained soil. Part shade.
Auricula 'Sophie'	Light centred red purple alpine. Moist but well drained compost. Part shade.
Auricula 'South Barrow'	Purple red double. Moist but well drained compost. Part shade.
Auricula 'Spring Meadow'	Green fancy show auricula. Single yellow flowers with a green edge. Moist but well drained compost. Part shade.
Auricula 'Stant's Blue'	Show self with purple blue flowers. Moist but well drained compost. Part shade.
Auricula 'Starling'	Superb border auricula, with slate purple flowers covered in farina. Moist but well drained compost. Part shade.
Auricula 'Stromboli'	Double bright red auricula. Moist but well drained compost. Part shade.
Auricula 'Sue Ritchie'	Double pale blue flowers. Moist but well drained compost. Part shade.
Auricula 'Sugar Plum Fairy'	Deep pink self. Moist but well drained compost. Part shade.
Auricula 'Sumo'	Gold centred alpine. Conker to apricot shaded flowers. Moist but well drained compost. Part shade.
Auricula 'Sunstar'	Show self with clear yellow flowers. Easy. Moist but well drained soil. Part shade.
Auricula 'Susan'	Good velvet blue light centred alpine. Moist but well drained compost. Part shade.
Auricula 'Suzannah'	Double lavender pink flowers. Moist but well drained soil. Part shade.

Auricula 'Sword'	Double green flowers. Vigorous. Moist but well drained compost. Part shade.
Auricula 'T.A. Hadfield'	Gold centred alpine with red flowers. Moist but well drained compost. Part shade.
Auricula 'Taffeta'	Lavender pink self. Moist but well drained compost. Part shade.
Auricula 'Tarantella'	Gold centred alpine. Strongly shaded red and brown flowers. Moist but well drained compost. Part shade.
Auricula 'Ted Gibbs'	Light centred alpine with pink shaded flowers. Moist but well drained compost. Part shade.
Auricula 'Ted Roberts'	Gold centred alpine with deep wine red flowers. Moist but well drained compost. Part shade.
Auricula 'The Sneep'	Gold centred alpine. Small flowers, orange shading to brown. Moist but well drained compost. Part shade.
Auricula 'Tim'	Deep purple double. Moist but well drained compost. Part shade.
Auricula 'Toffee Crisp'	Gold centred alpine in orange shades. Moist but well drained compost. Part shade.
Auricula 'Tony Bray'	
Auricula 'Tosca'	Green and red fancy auricula. Moist but well drained soil. Part shade.
Auricula 'Trouble'	Milky coffee coloured double. Moist but well drained compost. Part shade.
Auricula 'Twiggy'	Pale yellow self. Moist but well drained soil. Part shade.
Auricula 'Valerie Clare'	Gold centred alpine. Flowers shading brown to orange. Moist but well drained compost. Part shade.
Auricula 'Velvet Moon'	Light centred alpine. Purple blue shading. Moist but well drained compost. Part shade.

Auricula 'Venetian'	Light centred alpine. Flowers in the richest pink shades. Moist but well drained compost. Part shade.
Auricula 'Vera'	Gold centred alpine. Red shading to orange. Moist but well drained compost. Part shade.
Auricula 'Violet Surprise'	Striped show auricula. Moist but well drained compost. Part shade.
Auricula 'Vulcan'	Gold centred alpine. Flowers shading orange to brown. Moist but well drained compost. Part shade.
Auricula 'War Paint'	Striped auricula. Deep red on green. Moist but well drained soil. Part shade.
Auricula 'White Wings'	White edged show auricula. Moist but well drained compost. Part shade.
Auricula 'William Gunn'	Double auricula with golden brown flowers. Moist but well drained compost. Part shade.
Auricula 'Wincha'	Deep red, almost black self. Moist but well drained compost. Part shade.
Auricula 'Windway's Mystery'	Border auricula. Brown yellow flowers. Moist but well drained compost. Part shade.
Auricula 'Winifred'	Border auricula. Golden orange brown flowers. Moist but well drained compost. Part shade.
Auricula 'Woodmill'	Light centred alpine. Purple mauve. Moist but well drained compost. Part shade.
Auricula Barnhaven coffee coloured double	Double creamy brown auricula. Moist but well drained compost. Part shade.
Auricula 'Barnhaven Double Auricula'	Evergreen rounded fleshy leaf rosettes producing open double flowers in colours through cream, red, blue, purple etc. Moist but very well drained compost. Full sun to part shade. H20cm x S25cm.
Barnhaven Garden Auricula – mixed colours	Flowers in colours through cream, red, blue, purple etc. Moist but very well drained soil. Part shade

Auricula 'Blairside Yellow'	Border Auricula primula. Yellow flowers in spring. Humus rich moist but well drained soil. Part shade, will tolerate a little sun. H10cm x S20cm.
Auricula Caroline Beck's double red	Given to us by Caroline Beck for propagation.
Auricula mixed	Mixed auricula, various colours in late spring. Humus rich moist but well drained soil. Part shade, will tolerate a little sun. H20cm x S20cm.
Primula denticulata 'Alba'	Drumstick Primula. White pom pom flowers from mid spring to summer. Humus rich moist soil. Part shade, will tolerate some sun. H45cm x S45cm.
DOUBLE PRIMULAS	
Primula 'Alan Robb'	Double apricot-yellow flowers from March to May. . Sun to part shade. Moist well drained soils. Height 20cm.
Primula vulgaris 'Alba Plena'	Double creamy white primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Dawn Ansell'	Double pure white flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Double Deep Blue'	Double deep blue primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Double Deep Red'	Double deep red primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Double Yellow'	Double yellow primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Double Pale Blue'	Stunning soft blue double flowers. Propagated by us from a seedling which turned up in a tray of mixed seed. Any good soil. Part shade. H15cm x S20cm.
Primula 'Elizabeth Killelay'	Double deep maroon edged silver primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Marie Crousse'	Double purple red primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Miss Indigo'	Double violet purple white edged primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.
Primula 'Petticoat'	Double, with masses of pure white flowers in spring. Sun to part shade. Moist well drained soils. Height 20cm.

Primula 'Quakers Bonnet' Primrose with double pale lilac flowers in spring. Moist humus rich soil. Part shade but will tolerate sun if soil is moist at all times. H20cm x S35cm.

Primula 'Strong Beer' New double with deep violet purple flowers in spring. Any good soil. Part shade. H15cm x S20cm.

Primula 'Sue Jervis' Double dusky pink primrose flowers in spring. Any good soil. Part shade. H15cm x S20cm.

OTHER PRIMULAS

Primula alpicola A long flowering exuberant species producing umbels of fragrant tubular yellow, white or purple flowers in summer. Humus rich moist soil. Part shade. H50cm x S30cm.

Primula alpicola var alpicola Long flowering exuberant species producing umbels of fragrant tubular pale yellow flowers in summer. Humus rich moist soil. Part shade. H50cm x S30cm.

Primula alpicola var. violacea This long flowering species produces umbels of tubular scented purple violet flowers in summer. Moist humus rich soil. Part shade. H50cm x S30cm.

Primula anisodora Candelabra Primula producing whorls of green eyed brown purple flowers in summer. Humus rich moist soil. Part shade. H60cm x S60cm.

Primula aurantiaca Candelabra primula producing whorls of flowers which are red in bud opening to a rich orange. Humus rich moist soil. Part shade H60 cm x S60cm.

Primula 'Barbara Midwinter' Good garden primula with masses of carmine to purple flowers in spring. Any good soil. Part shade. H10cm

Primula beesiana Candelabra Primula with whorls of rose lilac flowers in summer. Humus rich moist soil. Part shade. H60cm x S60cm.

Primula x bulleesiana Candelabra primula with a bright colour range from yellow to red to violet in early summer.. Humus rich moist soil. Part shade. H40cm.

Primula bulleyana Candelabra primula with whorls of deep orange flowers in summer. Humus rich moist soil. Part shade. H60cm x S60cm.

Primula capitata ssp. Mooreana Deep purple flower heads from mid summer to late autumn. A very good late flowering plant. Humus rich moist soil. Part shade. H40cm x S30cm.

Primula cernua Low soft leaves with upright stems carrying narrow spikes of purple or mauve small flowers in early summer. Humus rich moist soil. Part shade. H30cm.

Primula chionantha	Whorls of creamy white fragrant flowers in late spring. Humus rich moist but not waterlogged soil. Part shade to full sun in good soil. H60cm x S60cm.
Primula chionantha ssp. sinopurplea	Whorls of purple star like , fragrant flowers in late spring. Humus rich moist but not waterlogged soil. Part shade to full sun. H60cmxS60cm.
Primula chungensis	Candelabra primula with whorls of pale orange flowers in early summer. Humus rich moist soil. Part shade. H80cm x S60cm.
Primula cockburniana	Short-lived candelabra Primula with whorls of red tinged orange flowers in summer. Humus rich moist soil. Part shade. H40cm x S40cm.
Primula cortusoides	Softly hairy leaves producing umbels of rose red to pink to red violet in late spring to early summer. Humus rich moist soil. Part shade. 30cm x 30cm.
Primula denticulata 'Alba'	Drumstick Primula. White pom pom flowers from mid spring to summer. Humus rich moist soil. Part shade, will tolerate some sun. H45cm x S45cm.
Primula denticulata 'Blue Selection'	Drumstick Primula. Flowers in shades of blue from mid spring to summer. Humus rich moist soil. Part shade, will tolerate some sun. H45cm x S45cm.
Primula denticulata 'Rubin Selection'	Drumstick primula. Flowers in shades of red from mid spring to summer. Humus rich moist soil. Part shade, will tolerate some sun. H45cm x S45cm.
Primula denticulata 'Rubinball'	Drumstick Primula. Rich pink-purple pom pom flowers from mid spring to summer. Humus rich moist soil. Part shade, will tolerate some sun. H45cm x S45cm.
Primula 'Don Keefe'	Beautiful deep red flowers from early spring to early summer. Any good soil. Part shade. H23cm.
Primula elatior	True oxlip.Upright stems with clusters of pale yellow flowers. Any good soil. Part shade. H20cm.
Primula elatior 'Gold Lace'	Deep red open flowers edged with gold in spring. Humus rich moist soil. Part shade. H20cm x S20cm.
Primula farinosa	Rosettes of mealy leaves giving rise to umbels of tubular yellow eyed lilac-pink flowers in late spring. Moist humus rich peaty soil in part shade or in an alpine house in well drained loam based compost. H25cm x S25cm.

Primula firmipes	Delicate species with soft yellow hanging bell shaped flowers in spring. Moist but well drained humus rich soil in part shade. Height 20cm.
Primula flaccida	Pyramidal spikes of scented lavender blue flowers in early summer. Moist but well drained soil. Part shade. Height 20cm.
Primula florindae	Umbels of fragrant funnel shaped sulphur yellow flowers in summer. Humus rich moist soil. Part shade. H1.2m x S90cm.
Primula florindae 'Rays Ruby'	Umbels of fragrant intense red flowers in summer. Humus rich moist soil. Part shade. H1.2m x S90cm.
Primula florindae ex'Rays Ruby'	Umbels of fragrant intense red flowers in summer. Humus rich moist soil. Part shade. H1.2m x S90cm.
Primula florindae 'Red Group'	Umbels of fragrant funnel shaped orange red flowers in summer. Humus rich moist soil. Part shade. H1.2m x S90cm.
Primula 'Francisca'	Unusual green frilly flowers in late spring. Humus rich soil. Part shade. H20cm x S10cm.
Primula 'Guinevere'	Dark purple crumpled foliage with solitary pale lilac flowers in spring. Humus rich moist soil. Part shade. H10cm x S20cm.
Primula 'Hall Barn Blue'	Delightful woodland primula with glossy leaves. Rich purple blue flowers with a yellow eye. Humus rich soil. Part shade. H12cm.
Primula Harlow Carr Hybrids	Famous candelabra primula in shades of apricot, orange and pink in summer. Humus rich moist soil. Part shade. H70cm.
Primula helodoxa (prolifera)	Candelabra Primula with whorls of yellow flowers in summer. Humus rich moist soil. Part shade. H45cm x S45cm.
Primula hirsuta	Native primula to the Alps and Pyrenees. Leaves covered in short hairs. Flowers range from pale pink to deep purple red. Moist but well drained soil. Part shade. H7cm.
Primula hoffmanniana	Unusual primula from the petiolaris group. Low growing with pale lavender flowers in spring. Moist shade. Spreads by strawberry like runners, and can cover a considerable area. H10cm.
Primula incana	White flowers over silvery leaves in spring. Humus rich moist soil. Part shade. H30cm x S15cm.

Primula japonica 'Alba'	Candelabra Primula with whorls of white flowers in summer. Humus rich moist soil. Part shade. H80cm x S30cm.
Primula japonica 'Apple Blossom'	Candelabra Primula with whorls of pale pink flowers in summer. Humus rich moist soil. Part shade. H80cm x S30cm.
Primula japonica 'Carminea'	Candelabra Primula with whorls of carmine red flowers in summer. Humus rich moist soil. Part shade. H80cm x S30cm.
Primula japonica 'Inschriach Hybrids'	Broad finely toothed leaves forming generous rosettes giving rise to stems bearing in late spring whorls of flowers in shades of pinky-oranges. Moist humus rich soil. Part shade. H45cm x S45cm.
Primula japonica 'Millers Crimson'	Broad finely toothed leaves forming generous rosettes giving rise to stems bearing whorls of crimson flowers in late spring. Moist humus rich soil. Part shade. H45cm x S45cm.
Primula 'Johanna'	Small basal leaf rosettes producing in spring umbels of delicate clear pink flowers. Moist humus rich soil. Part shade. H15cm x S15cm.
Primula juliae	Small rosettes of scalloped deep green leaves producing solitary saucer shaped pink-purple flowers with yellow eyes in early spring. Moist but well drained humus rich soil. Sun to part shade. H7cm x S15cm.
Primula 'Schneekissen'	Small rosettes of scalloped deep green leaves producing solitary saucer shaped white flowers with yellow eyes in early spring. Moist but well drained humus rich soil. Sun to part shade. H7cm x S15cm.
Primula 'Beeches Pink'	Small rosettes of scalloped deep green leaves producing clusters of dusky purple pink flowers in early spring. Moist but well drained humus rich soil. Sun to part shade. H7cm x S15cm.
Primula 'Groenekan's Glorie'	Small rosettes of scalloped deep green leaves producing solitary saucer shaped clear pale pink flowers in early spring. Moist but well drained humus rich soil. Sun to part shade. H7cm x S15cm.
Primula 'Old Port'	Small rosettes of scalloped deep green leaves producing solitary saucer shaped deep red flowers in early spring. Moist but well drained humus rich soil. Sun to part shade. H7cm x S15cm.
Primula 'Lady Greer'	Clusters of small pale yellow flowers over crinkled foliage in spring. Humus rich soil. Part shade. H15cm x S25cm.
Primula laurentiana	Leathery blue green leaves producing tiny pale lilac flowers in spring. Humus rich soil. Part shade. H20cm x S10cm.

Primula luteola	Rosettes of leaves producing in spring mealy stems with yellow flowers. Moist but well drained humus rich soil. Sun to part shade. H35cm x S45cm.
Primula maximowiczii	Striking whorls of bright red flowers in April and May. Moist but well drained soil. Part shade. H30cm.
Primula nivalis	Purple flowers in spring. Humus rich moist soil. Part shade. H30cm x S20cm.
Primula parryi	North American native. Vigorous showy primula with long slim leaves. As many as 20 magenta flowers on each stem in spring. Moist soil. Sun to part shade. H40cm x S15cm.
Primula poissonii	Candelabra primula with purple carmine flowers in late summer to autumn. Moist soil. Full sun to part shade. H50cm.
Primula polyanthus 'Gold Lace'	Deep red open flowers edged with gold in spring. Humus rich moist soil. Part shade. H20cm x S20cm.
Primula polyneura	Rosettes of lobed leaves producing in late spring umbels of purple-pink flowers. Moist humus rich soil. Part shade but will tolerate sun if soil is moist at all times. H45cm x S45cm.
Primula prolifera	Rosettes of shiny deep green leaves producing whorls of clear yellow flowers in summer. Moist humus rich soil. Part shade. H40cm.
Primula pulverulenta	Candelabra Primula with whorls of tubular deep red flowers in summer. Humus rich moist soil. Part shade. H1m x S60cm.
Primula pulverulenta 'Bartleys Strain'	Candelabra Primula with whorls of shell pink to deeper red flowers in summer. Humus rich moist soil. Part shade. H50cm x S20cm.
Primula rosea 'Gigas'	Lance shaped rosette forming leaves giving rise to umbels of red-pink flowers in spring. Moist humus rich soil. Part shade but will tolerate sun if soil is moist at all times. H30cm x S30cm.
Primula secundiflora	Umbels of tubular deep rose red flowers in summer. Humus rich moist soil. Part shade. H90cm x S60cm.
Primula sieboldii Barnhaven Mixed	Umbels of delicate pastel flowers in early summer. Humus rich moist soil. Part shade. H30cm x S45cm.
Primula sieboldii 'Dancing Ladies'	Umbels of rose to lavender to pink frilly flowers in summer. Humus rich moist soil. Part shade. H30cm x S45cm.
Primula sieboldii 'Manakoora'	Frilly flowers in shades of blue, violet and lilac blues. Also whites with hints of blue. Humus rich moist soil. Part shade. H30cm x S45cm.

Primula sieboldii 'Pago Pago'	Frilly flowers in shades of rose, carmine, marshmallow and blush pinks. Humus rich moist soil. Part shade. H30cm x S45cm.
Primula sieboldii 'Snowdrop'	Large white flowers in late spring. Humus rich moist soil. Shade to part shade. Dormant in summer. H25cm.
Primula sieboldii 'Winter Dreams'	Umbels of white frilly flowers in summer. Humus rich moist soil. Part shade. H30cm x S45cm.
Primula sikkimensis	Long rounded leaf rosettes producing umbels of funnel shaped pale creamy yellow flowers in late spring. Humus rich moist soil. Part shade but will tolerate sun if soil is moist at all times. H90cm x S60cm.
Primula sikkimensis var. hopeana	Dwarf form of primula sikkimensis with ivory white flowers in late spring. Humus rich moist soil. Part shade. H30cm.
Primula sikkimensis var. pudibunda	Dwarf form of primula sikkimensis. Pale creamy yellow flowers in late spring. Humus rich moist soil. Part shade. H50cm.
Primula sikkimensis var hopeana	Umbels of large funnel shaped creamy yellow flowers in late spring. Humus rich soil. Part shade. H40cm x S30cm.
Primula 'Tie Dye'	Blue and white striped flowers in spring. Any good soil. Part shade. H10cm x S20cm.
Primula veris	Cowslip. Nodding fragrant deep yellow flowers in spring. Moist humus rich soil. Sun to part shade. H25cm x S25cm.
Primula viallii	Lance shaped softly hairy rosette forming leaves producing in summer dense spikes of tubular flowers bright crimson when in bud, blue-violet when open. Humus rich moist soil. Part shade but will tolerate sun if soil is moist at all times. H60cm x S30cm.
Primula vulgaris	Primrose. Pale yellow solitary flowers in spring. Any good soil. Part shade. H10cm x S20cm.
Primula vulgaris 'Innisfree'	Good crimson red flowers with deepest purple foliage. Any good soil. Part shade. H10cm x S20cm.
Primula vulgaris ssp. Sibthorpii	Rosette forming wedge shaped leaves producing rose-pink flowers in spring. Humus rich moist soil. Part shade but will tolerate sun if soil is moist at all times. H25cm x S30cm.

Primula waltonii (hybrids)	Umbels of funnel shaped purple, crushed strawberry or palest yellow flowers in summer. Humus rich moist soil. Part shade. H30cm x S20cm.
Primula wilsonii	Glossy lance shaped rosette forming leaves giving rise to stems with whorls of open purple-pink flowers in summer. Humus rich moist soil. Part shade but will tolerate sun if soil is moist at all times. H60cm x S60cm.
Primula x bulleesiana	Candelabra primula with a bright colour range from yellow to red to violet in early summer.. Humus rich moist soil. Part shade. H40cm.
Primula x chungensis	Candelabra Primula with whorls of orange flowers in summer. Humus rich moist soil. Part shade. H80cm x S60cm.
Pulmonaria 'Blake's Silver'	Pure soft pink flowers, without a hint of blue above silver foliage. Any good soil. Full to part shade. Tough and easy. New plant from Jimmi Blake's garden. H35cm.
Pulmonaria 'Blue Ensign'	Dark green leaves with large tubular blue violet flowers in spring. Humus rich moist but not waterlogged soil. Full to part shade. H35cm x S40cm.
Pulmonaria 'David Ward'	Cream variegated leaves with coral red tubular flowers in early spring. Humus rich moist but not waterlogged soil. Full to part shade. H30cm x S40cm.
Pulmonaria 'Diana Clare'	Silvery variegated leaves producing tubular violet blue flowers in spring. Humus rich moist but not waterlogged soil. Full to part shade. H30cm x S45cm.
Pulmonaria 'Mrs. Kittle'	Soft blue flowers over silver spotted foliage in spring. Humus rich moist but not waterlogged soil. Full to part shade. H25cm x S45cm.
Pulmonaria 'Munstead Blue'	Rich blue flowers in spring with dark green foliage. Part-shade. Prefers moist but well drained humus rich soils. Height 25cm.
Pulmonaria officinalis 'Sissinghurst White'	Pretty white spotted leaves with pure white tubular flowers opening from pale pink buds in early spring. Humus rich moist but not waterlogged soil. H30cm x S60cm.
Pulmonaria 'Opal'	Palest blue flowers in Spring over silver spotted leaves. Humus rich moist but well drained soil. Full to part shade. H25cm.

Pulmonaria rubra	Brick red tubular flowers borne early in the year from late winter to mid spring. Humus rich moist but not waterlogged soil. Full to part shade. H40cm x S90cm.
Pulmonaria saccharata 'Dora Bielefeld'	Coral pink buds opening to soft rose pink flowers in spring. Green spotted leaves. Any good soil. Part shade. H20 -25cm.
Pulmonaria 'Victorian Brooch'	Sought after new variety with distinct spotted leaves and magenta coral flowers in spring. Any good soil. Part shade. H30cm x S45cm.
Pulsatilla vulgaris 'Alba'	Silky bell shaped white flowers in spring. Fertile well drained soil. Full sun. H30cm x S30cm.
Pulsatilla vulgaris 'Blau Glocke'	Finely divided softly hairy leaves with silky bell shaped blue flowers in spring. Fertile well drained soil. Full sun. H30cm x S30cm.
Pulsatilla vulgaris 'Heiler- Hybrids'	Silky bell shaped flowers in spring. Colours range from violet through to white. Fertile well drained soil. Full sun. H30cm x S30cm.
Pulsatilla 'Pearl Bells'	Finely divided softly hairy leaves with silky bell shaped softest pink flowers in spring. Fertile well drained soil. Full sun. H30cm x S30cm.
Pulsatilla vulgaris 'Red Bells'	Finely divided softly hairy leaves with silky bell shaped rich red flowers in spring. Fertile well drained soil. Full sun. H30cm x S30cm.
Pulsatilla vulgaris 'Violet Bells'	Finely divided softly hairy leaves with silky bell shaped violet purple flowers in spring. Fertile well drained soil. Full sun. H30cm x S30cm.
Ranunculus ficaria 'Brazen Hussy'	Lesser celandine with deepest bronze leaves and deep yellow flowers. Any soil. Will tolerate dry shade. Good ground cover. H15cm.
Ranunculus ficaria 'Coffee Cream'	Large single cream flowers with a coffee coloured reverse. Spring. Any soil. Shade to sun. Good ground cover. H15cm.
Ranunculus ficaria 'Collarette'	Neat golden yellow double flowers with a green centre. Any reasonable soil in shade or sun. Good ground cover. H10cm.
Ranunculus ficaria 'Double Bronze'	Double yellow, bronze backed flowers in spring. Any reasonable soil in shade or sun. H10cm.

Ranunculus ficaria 'Double Mud'	Double cream flowers in spring. Any reasonable soil in shade or sun. Good ground cover. Height 10cm.
Ranunculus ficaria Flore Pleno Group	Tightly packed green centred, double yellow flowers in spring. Any reasonable soil in shade or sun. Good ground cover. Height 10cm.
Ranunculus ficaria 'Fried Egg'	Bud opens yellow and then petals fade to white with yellow centre. Any reasonable soil in shade or sun. H10cm.
Ranunculus ficaria 'Orange Sorbet'	Soft orange flowers in spring. One of the few orange cultivars. Any reasonable soil in shade or sun. H10cm.
Ranunculus ficaria 'Randall's White'	Charming white flowers in spring. Any reasonable soil in shade or sun. H10cm.
Ranunculus gramineus	Grass like basal glaucous leaves with lemon yellow cup shaped flowers borne on branching stems in late spring to early summer. Fertile moist but well drained soil. Full sun to part shade. H30cm x S15cm.
Ribes sanguineum 'White Icicle'	Deciduous upright shrub with green leaves and pure white flowers in Spring. Moist fertile well drained soil. Sun. H180cm.
Ribes speciosum	Exotic looking currant. Drips with scarlet fuschia like flowers in spring. Any good soil. Sun to part shade. S1.5m x H2.5m. Good trained up a wall.
Roscoea scillifolia	Small roscoea with pink flowers intermittently through to October. Humus rich but well drained soil. Sun to part shade.H20cm
Roscoea auriculata	Linear dark green leaves producing rich purple flowers in late summer. Humus rich moist but well drained soil. Part shade. H35cm x S15cm.
Roscoea cauleoides	Linear dark green leaves producing pale yellow flowers in late summer. Humus rich moist but well drained soil. Part shade. H55cm x S15cm.
Roscoea purpurea	Linear dark green leaved producing large purple flowers in late summer. Humus rich moist but well drained soil. Part shade. H40cm x S15cm.
Rubus 'Benenden'	Deciduous arching shrub. Large pure white rose like flowers in late spring and early summer. Fertile well drained soil.

	Sun to part shade. H3m x S3m.
Rubus cockburnianus 'Goldenvale'	Thicket forming shrub with all year round interest. Golden foliage in summer and striking white stems in winter. Any reasonable soil in sun or part shade. Height 240cm x Width 240cm.
Rubus spectabilis 'Olympic Double'	Medium sized shrub with double magenta rose like flowers in April-May. Happy in any situation. Will tolerate dry soil and shade. H150-180cm. Can be pruned hard back.
Rubus thibetanus 'Silver Fern'	Vigorous suckering shrub grown for it's silvery arching stems, which look really good in winter. It also has silver grey fern like leaves in summer. Any reasonable soil in sun or part shade. H1.5 -2.5m x S3m
Rubus tricolour	Chinese Bramble. Glossy green foliage and white flowers followed by red fruit. Good ground cover for shade in most soils. Height 25-50cm. Indefinite spread.
Sanguisorba menzesii	Divided foliage producing deep red bottlebrush flowers in summer. Fertile soil. Sun to part shade. H1.5m x 60cm.
Sanguisorba officinalis	Clump forming perennial producing small spikes of red-brown flowers in late summer. Moist soil. Full sun. H1.2m x S60cm.
Scopolia carniolica	Creeping perennial with shiny green wrinkled leaves producing solitary bell shaped brownish purple flowers in spring. Humus rich moist but well drained soil. Part shade. H60cm x S60cm.
Sedum 'Red Cauli'	Succulent greyish foliage with bright red flowers in autumn. Any well drained soil. Full sun. H25 cm.
Sedum 'Frosty Morn'	Pale green and cream variegated fleshy leaves with flat heads of creamy white flowers in autumn. Any well drained soil. Full sun. H60cm x S60cm.
Sedum 'Matrona'	Succulent rosy edged leaves with darker stems producing flat heads pink flowers in autumn. Any well drained soil. Full sun. H60cm x S60cm.
Sedum spectabile 'Autumn Joy'	Toothed fleshy green leaves with flat heads of coppery red flowers in autumn. Any well drained soil. Full sun. H60cm x S60cm.
Sedum spectabile 'Brilliant' AGM	Succulent foliage and large heads of tiny pink flowers late summer. Full sun. Well drained soil. Height 45cm.
Sedum spectabile 'Iceberg'	Large flat white flowerheads over succulent foliage in late summer. Any good soil. Sun. H45cm x S45cm.

Sedum spurium 'Voodoo'	Creeping stems of small evergreen rich purple leaves with bright red flowers in autumn. Any well drained soil. Full sun. H10cm x S60cm.
Sedum 'Strawberries and Cream'	Succulent purple tinted foliage with flat heads of pale pink and cream flowers in autumn. Any well drained soil. Full sun. H60cm x S60cm.
Semiaquilegia ecelcarata	Dainty flowers like a spurless aquilegia in early summer. Soft dusky pink. Humus rich soil. Sun to part shade. H30cm
Soldanella alpina	Evergreen clump forming perennial. Bell shaped fringed lavender blue flowers in Spring. Humus rich well drained soil. Part shade. H8cm x S8-10cm.
Soldanella 'Spring Symphony'	Delightful small perennial raised by Edrom nursery. Pale blue frilled flowers in Spring. Moist soils in part-shade. Height 15cm.
Stachys macrantha (grandiflora)	Spikes of purple rose flowers in mid to late summer. Any good soil. Sun. H45cm x S40cm.
Symphytum 'Goldsmith'	Rhizomatous spreading perennial with dark green hairy leaves with gold and cream variegation. Tubular pale blue, cream or pink flowers in mid to late spring. Moist fertile soil. Sun to part shade. H30cm x S30cm.
Symphytum 'Hidcote Pink'	Pure pink flowering form of comfrey. Vigorous and attractive. Good for dry shade. H 40cm.
Thalictrum delaveyi	A delicate plant with fine loose green leaves. Wide branched and airy flowerheads formed from individual flowers of lilac sepals with a tuft of cream stamens in summer. Moist humus rich soil. Part shade. H150cm x S60cm.
Thalictrum delaveyi 'Album'	A delicate plant with fine lime green leaves. Airy pure white flowerheads in summer. Moist humus rich soil. Part shade. H100cm x S60cm.
Thalictrum delaveyi 'Hewitt's Double'	A tall delicate plant with fine loose green leaves. Long lasting double lilac flowers in summer. Moist humus rich soil. Part shade. H100cm.
Thalictrum rochebrunianum	Lobed foliage producing loose heads of fluffy white to lavender pink flowers in summer. Moist humus rich soil. Sun to part shade. H90cm x S30cm.

Tiarella 'Iron Butterfly'	Deeply lobed leaves with a dark central blotch. Spikes of tiny white star shaped flowers in spring. Good ground cover for shade. Humus rich soil. Part to deep shade. H 40cm.
Tiarella 'Pink Skyrocket'	True pink flowers in late spring to early summer over deeply cut maple leaf foliage. Part-shade. Well drained soils. Height 35cm.
Tiarella wheryii	Pale green heart shaped leaves with slender spikes of white possible pink tinged flowers in late spring to early summer. Moist humus rich soil. Part to full shade. H20cm x S15cm.
Tricyrtis formosana	Clump forming rhizomatous species with lance shaped dark green leaves spotted with darker purple green. Unusual star shaped pinkish white to pinkish purple spotted flowers. Humus rich moist but well drained soil. Full to part shade. H80cm x 45cm.
Tricyrtis hirta	Clump forming rhizomatous species with lance shaped pale green leaves. Unusual star shaped purple spotted white flowers in autumn. Humus rich moist but well drained soil. Full to part shade. H80cm x S60cm.
Tricyrtis hirta 'Albomarginata'	'Toad Lily'. Spotted purple flowers in late summer. Cream variegated leaves. Moist shady position. Height 80cm.
Tricyrtis latifolia	Glossy spotted young leaves producing star shaped spotted brown yellow flowers in summer. Humus rich moist but well drained soil. Full to part shade. H80cm x S90cm.
Trillium cuneatum	Beetroot red flowers in spring above mottled green leaves. Moist but well drained humus rich soil. Shade to part shade. Height 30-50cm.
Trillium erectum	Beetroot-red flowers in spring over plain green foliage. Moist but well drained humus rich soil. Shade. Height 50cm.
Trillium grandiflorum	The American wakelily. White flowers in April above deep green leaves. Humus rich soil. Full to part shade. H40cm x S30cm.
Trillium luteum	Bronze-yellow flowers in spring over mottled foliage. Moist but well drained humus rich soil. Shade. Height 25cm.
Trollius altaicus	Siberian Globeflower. Large cup shaped double golden flowers in late spring to early summer. Moist humus rich soils. Part-shade. Height 50cm.

Trollius chinensis 'Golden Queen'	Golden flowers with prominent gold stamens in summer from basal clump of finely divided leaves. Best in moist soil. Sun or shade. H80cm. AGM.
Trollius 'Alabaster'	Cream globe shaped flowers in late spring from basal clump of finely divided leaves. Best in moist soil. Sun or shade. H60cmxS45cm.
Trollius x cultorum 'Lemon Queen'	Finely divided leaves with pale yellow bowl shaped flowers in late spring to early summer. Moist deep fertile soil. Sun to part shade. H60cm x S45cm.
Trollius x cultorum 'New Hybrids'	Finely divided leaves with bowl shaped flowers in shades of pale yellow to deep orange in early summer. Moist deep fertile soil. Sun to part shade. H60cm x S45cm.
Trollius x cultorum 'New Moon'	Cream globe shaped flowers in late spring from basal clump of finely divided leaves. Best in moist soil. Sun or shade. H60cmx S45cm.
Uvularia grandiflora pallida	Palest lemon yellow flowers in spring on pointed soft green foliage. Moist humus rich soils. Part-shade. Height 25cm.
Valeriana phu 'Aurea'	Rounded leaves appearing soft yellow in spring turning lime green in summer. Loose branching stems of small white flowers in early summer. Any good moist soil. Sun to part shade. H1.5m x S60cm.
Verbascum phoeniceum 'Violetta'	Dark purple flower spikes in summer above basal rosette of fresh green leaves. Well drained soil. Prefers sun but will take some shade. H90cm.
Verbena bonariensis	Tall rigid stems topped with clusters of tiny mauve flowers in late summer. Lovely airy effect. Good with grasses. Well drained soil. Sun. H up to 2m. May not survive a hard winter unless protected.
Verbena hastata 'Blue Spires'	Blue flower spikes in late summer to autumn. Any good soil. Sun or part shade. H100cm x S45cm.
Vernonia noveboracensis	Fluffy purple flowers in late summer. Any well drained soil. Sun to light shade. H200cm.
Veronica gentianoides 'Tissington White'	Palest blue flowers in early summer. Any good soil. Sun to part shade. H45cm xS60cm.
Veronica grandis	Spikes of blue flowers in summer. Any good soil. Sun to light shade. H120cm.
Veronica longifolia	Spires of deep blue flowers in summer. Moist but well drained soil. Full sun. H80cm.
Veronica longifolia 'Alba'	Spires of white flowers in summer. Moist but well drained soil. Full sun. H80cm.
Veronica teucrium 'Crater Lake Blue' AGM	Intense blue flowers in mid summer. Any good soil. Sun to part shade. H40cm.

Veronica teucrium 'Royal Blue' AGM	Deepest blue flowers in mid summer. Any good soil. Sun to part shade. H40cm.
Vinca major var. oxyloba	Vigorous interesting vinca with leaves leaf stalks and calyces edged with long hairs. Dark purple blue star like flowers over a long period. Great ground cover for shade.
Vinca minor 'Azurea flore pleno'	Dwarf periwinkle with double pale-blue flowers in spring. Good ground cover for shade. Any good soil. Height 20cm.
Vinca minor 'Argentea Variegata'	Variegated periwinkle with blue flowers in spring to early summer. Any good soil. Sun to shade. Good ground cover.
Vinca minor 'Gertrude Jekyll'	Mat forming evergreen with pure white flowers throughout summer. Any good soil. Sun to part shade. 15cm x 50cm.
Viola 'Alice Kate'	Sunny yellow flowers with an orange eye. Scented. Fertile moist but well drained soil. Sun to part shade.
Viola 'Ardross Gem'	Neat evergreen viola with pretty blue and gold flowers. Moist but well drained soil. Full sun to part shade.
Viola cornuta 'Bowles' Black'	Delicate velvet black flowers on this annual viola. Flowers all summer long. Any good soil. Sun to part shade. H 15cm.
Viola 'Buttercup'	Deep yellow scented flowers. Fertile moist but well drained soil. Sun to part shade.
Viola 'Dawn'	Creamy yellow flowers from April to October. Fertile moist but well drained soil. Sun to part shade. H15cm x S25cm.
Viola 'Desdemona'	Perennial viola with small pale blue and white flowers. Vigorous, quickly making a large clump. Moist but well drained soil. Full sun to part shade.
Viola 'Fabiola'	Masses of small deep lavender flowers with an orange eye. Vigorous. Fertile moist but well drained soil. Full sun to part shade.
Viola 'Hannah May'	Flowers of pale primrose, flushed and edged mauve. Scented. Moist but well drained soil. Full sun to part shade.

Viola 'Isabel'	Flowers have pale lilac upper petals with cream lower petals. Scented and vigorous. Fertile moist but well drained soil. Sun to part shade.
Viola 'Jersey Gem'	Deep purple flowers on a vigorous plant. Fertile moist but well drained soil. Sun to part shade.
Viola 'Louisa'	Purple flowers with a bronze flush. Scented and vigorous. Fertile moist but well drained soil. Sun to part shade.
Viola 'Maggie Mott'	Large flowers of soft silvery blue, with a cream centre. Scented. Moist but well drained soil. Full sun to part shade. Popular old variety.
Viola 'Martin'	Purple velvety flowers all summer. Vigorous. Fertile moist but well drained soil. Sun to part shade. H18cm.
Viola 'Molly Sanderson'	Small almost black flowers from April to October. Fertile moist but well drained soil. Sun to part shade. H12cm x S30cm.
Viola 'Mrs Lancaster'	Pure white scented flowers. Fertile moist but well drained soil. Sun to part shade but also seems to grow well in full shade.
Viola 'Myfanwy'	Pale lavender flowers with white veining. Fertile moist but well drained soil. Sun to part shade.
Viola 'Raven'	Deepest purple flowers with a black sheen. Low spreading plant. Fertile moist but well drained soil. Sun to part shade.
Viola 'Smuggler's Moon'	Compact viola with bluish lilac and soft yellow flowers. Fertile moist but well drained soil. Sun to part shade.
Viola 'Ulla'	Difficult to get perennial viola with rich purple flowers all summer. Fertile moist but well drained soil. Sun to part shade. H15cm.
Viola 'Vanessa'	Soft lilac pink flowers with a deeper blotch. Fertile moist but well drained soil. Sun to part shade.
Viola 'Vita'	Dusky pink flowers. Raised at Sissinghurst. Fertile moist but well drained soil. Sun to part shade.

Viola 'White Pearl'	Soft white flowers with an orange eye. Vigorous. Fertile moist but well drained soil. Sun to part shade.
Viola 'Zoe'	Lilac-blue flowers with a yellow centre in spring and summer. Fertile moist but well drained soil. Sun to part shade. H 10cm.
Viola cornuta	Rhizomatous species with heart shaped toothed leaves with lilac to violet blue scented flowers in spring. Fertile moist but well drained soil. Sun to part shade. H7cm x S20cm.
Viola cornuta 'Alba'	Vigorous plant with perfect white flowers in spring. Fertile moist but well drained soil. Sun to part shade.
Viola cornuta 'Blue Moonlight'	Vigorous plant with soft blue and cream flowers. Fertile moist but well drained soil. Sun to part shade.
Viola cornuta 'Karpatenfruhling'	Small dark lilac flowers with yellow and white markings from April to October. Fertile moist but well drained soil. Sun to part shade.
Viola cornuta 'Pat Kavanagh'	Soft yellow flowers. Fertile moist but well drained soil. Sun to part shade.
Viola cornuta 'Victoria's Blush'	Light pink flowers with a darker centre. Vigorous. Fertile moist but well drained soil. Sun to part shade.
Viola cornuta 'Alba'	Heart shaped toothed leaves with pure white flowers in spring and through to summer. Fertile moist but well drained soil. Sun to part shade. H7cm x S20cm.
Viola 'Irish Molly'	Evergreen species producing a long succession of dark gold flowers with brown centres in summer. Fertile moist but well drained soil. Sun to part shade. H15cm x S20cm.
Viola odorata 'Reine des Blanches'	Double white scented flowers from Oct to May. Moist but well drained soil. Sun or part shade. H 12cm.
Viola odorata var. rosea	Highly scented deep pink flowers from Feb to May. Fertile moist but well drained soil. Sun to part shade. H12cm.
Viola pedatifida	Palmate leaves with deep violet blue flowers in spring and summer. Fertile moist but well drained soil. Sun to part shade. H10cm x S20cm.

Viola sororia 'Albiflora'	Rhizomatous species with white flowers in spring and summer. Fertile moist but well drained soil. Sun to part shade. H10cm x S20cm.
Viola sororia 'Dark Freckles'	Rhizomatous species with purple flowers speckled white in spring and summer. Fertile moist but well drained soil. Sun to part shade. H10cm x S20cm.
Viola sororia 'Freckles'	Rhizomatous species with white flowers speckled purple-violet in spring and summer. Fertile moist but well drained soil. Sun to part shade. H10cm x S20cm.
Viola sororia 'Rubra'	Rhizomatous species with purple-red flowers in spring and summer. Fertile moist but well drained soil. Sun to part shade. H10cm x S20cm.
Weigela middendorffiana	Interesting shrub. Pale yellow tubular flowers with orange speckled throats in early to mid summer. Any soil. Full sun to light shade. H1.5m.
Zantedeschia aethiopica	Arum lily. Glossy bright green foliage producing large pure white spathes in summer. Humus rich soil. Full sun. May need winter protection. H90cm x S60cm.

FERNS

Athyrium otophorum 'Okanum'	Hardy deciduous fern. Glowing green fronds with reddish stems and midribs. Moist humus rich soil in shade. Also makes good pot specimen. Height 30cm.
Dryopteris affinis 'Crispa Congesta'	Good garden fern. Evergreen when sheltered. Moist but well drained soils. Part shade. H22cm.
Dryopteris affinis 'Cristata Angustata'	Elegant fern with narrow, long, arching fronds. Moist but well drained soils. Part shade. H60-90cm Shade.
Dryopteris dilatata 'Crispa Whiteside' AGM	Hardy semi evergreen woodland fern. Golden green crisped and congested fronds. Moist well drained soil. Shade. H 60cm.
Dryopteris erythrosora	Glossy triangular fronds emerge pink, turning bronze then green. Surprisingly evergreen retaining good winter colour. Moist but well drained soils. Part-shade/shade. H60cm.
Dryopteris filix-mas 'Cristata'	Crested form of the common male fern. Pale green. Easy and useful in shady spot. H60cm.

Dryopteris stewartii	Semi evergreen noted for its fresh pale yellow- green foliage in spring. Typical shuttlecock shape. Humus rich soil (does not like to dry out). Shade to part shade. H60cm
Dryopteris wallichiana	Dramatic shuttlecock fern. Bright green fronds with black-brown bristly stems. Damp humus rich soil. Part-shade. Will cope with drier soils once established. Height 90cm.
Onoclea sensibilis	'Sensitive fern'. Eye catching triangular blue-green fronds. Spreading and ideal for damp site. H60cm. Part shade.
Osmunda regalis	'Royal fern' Dramatic lance shaped fronds. Needs moist soil. H 100-200cm. Part shade.
Osmunda regalis 'Purpurascens'	Delicate form of the royal fern, stems purple when young. Moist soils. H100cm. Part shade.
Polystichum munitum	Western sword fern. One of the larger evergreen ferns, forming a loose shuttlecock. Full or part shade. H90cm.
Polystichum setiferum 'Herrenhausen'	Spreading fronds, triangular to lance shaped. Well drained soils. Full or part shade. H60-75cm
Polystichum setiferum 'Plumosum Densum'	A real beauty. Dense and feathery. Well drained soils in shade. H35cm
Polystichum setiferum 'Pulcherrimum Bevis'	Very desirable tall architectural fern with upright arching fronds maturing from bright green in summer to deep green in winter. Any good soil. Part shade. Do not cut back.
Polystichum setiferum 'Wollaston'	Spreading triangular fronds. A lovely variety discovered in Devon in 1852 by G.Wollaston. Part shade. Well drained soils. H50-60cm. Evergreen.
Polystichum tsussimense	Neat, clump forming oriental fern. Evergreen. Moist humus rich soil. Part to full shade. H30cm.
Stipa tenuissima	Bright green clumps with soft fluffy plumes, fading to beige. Beautiful planted in drifts. Moves gracefully in the wind. Any good soil. Full sun. H60cm.

HERBS

Chives (<i>Allium schoenoprasum</i>)	Easy to grow herb which lasts for years. Any good soil. Full sun.
Apple mint (<i>Mentha suaveolens</i>)	The best culinary mint. Apple scented foliage. Any good soil. Full sun to part shade.
Oreganum vulgare 'Country Cream'	Good culinary herb with variegated leaves and pink flowers. Well drained soil. Full sun.
Icterina sage (<i>Salvia officinalis</i> 'Icterina')	Golden variegated sage with lilac flowers. Leaves just as well flavoured for culinary purposes as the plain variety. Well drained soil. Full sun. Grows to a 1m tall shrub in 5yrs.
Broad Leaf Thyme (<i>Thymus pulegioides</i>)	Excellent thyme for cooking. The soft leaves can also be used in salads. Cut back after flowering. Well drained soil. Full sun.
Thyme 'Hartington Silver'	Creeping thyme with silver and green leaves. The flowers are pink and white. Well drained soil. Full sun.
Thyme 'Doone Valley'	Low, creeping, evergreen thyme with gold and green leaves. Good culinary herb with a fruity lemon flavour. Well drained soil. Full sun.
