

Exot.se växtlista 2017

Livet är för kort för tråkiga växter!

Ludvig Johansson, trädälskare

Vår idé är att erbjuda ett enormt utbud av roliga och härdiga växter till mycket låga priser.

Det kan vi göra genom att ta in beställningar, sedan ta hem plantorna och därefter kan ni hämta dem hos oss i Häggum (söder om Skövde). Som en vanlig plantskola fast fler och större växter till lägre priser.

Ganska enkelt!-Det enda svåra är att bestämma vilka rariteter ni vill ha!

Vi fokuserar på buskar och träd, men kan även erbjuda perenner, bärbuskar och fruktträd. Förutom beställningssortimentet kommer vi försöka ha ett antal växter hemma för impulsköp.

Tipsa dina vänner om växtlistan. Det gör att vi kan fortsätta hålla ett lågt pris.

Vi har lagt till växtbeskrivningar i listan (engelska), hoppas det kan vara till hjälp.

Beställning

Beställ så här:

- 1) Skriv en lista med nr, växtnamn och antal; ett växtnamn per rad.
- 2) Glöm inte dina uppgifter: Namn, adress, telefonnummer, gärna e-post.
- 3) Skicka beställningen via brev eller epost (helst epost).
- 4) Vi hör av oss när växterna kan hämtas hos oss i Häggum

Vi vill ha din beställning senast 28 februari 2017!

Skicka beställningen till:

Leverans och betalning:

Vi hör av oss när ni kan hämta växterna. Det är vår ambition att ni ska kunna göra det i början av april 2017. Växterna betalas i samband med att ni hämtar dem (vi tar kort). Plantskolan ligger bredvid kyrkan i byn Häggum, ca 1,5 mil söder om Skövde (mellan Skultorp och Stenstorp).

OBS! Vi förbehåller oss rätten att neka en beställning. Dessutom kan det hända att växter tar slut. Då gäller först till kvarn.

Förklaring till växtlistan:

Nr	Artikelnummer
Växt	Växtens vetenskapliga namn och beskrivning
Kruka	Alla växter är krukodlade. Krukan är ett sätt att mäta storlek på växten. C2 = Container rundkruka 2 liter, P7 = Fyrkantig kruka med sida 7cm
Höjd	Växtens ungefärliga höjd i cm. Vår erfarenhet är att de flesta växterna som levereras är markant högre. Omkr. betyder omkrets i cm
Omkrets	Anger stammens omkrets i cm t.ex. 10-12 cm omkrets innebär att stammen är ca 3,5-4cm grov (dela med pi 3,14). Jämför med växter i naturen och din trädgård för att få en uppfattning hur stort ett träd med viss stamgrovlek är.
Form	PA = Standard trädform, # = jordklump, specialform t.ex. klot anges
Pris	Ditt pris vid avhämtning med reservation för (större) valutaändringar. Priset är i svenska kronor (SEK).

Moms ingår i priset.

OBS! Listan är lång! Överväg att inte skriva ut den.

Vi tar gärna emot förslag på växter ni skulle vilja beställa i framtiden som inte finns på årets lista.
