

2000 *Hosta* Registrations

Thanks to all who took the time to register cultivars in 2000.

There were 284 registrations for 2000. In keeping with the decision of last year an updated index is included with this year's new registrations. Corrections to prior registrations begin on page 34.

As with last year, the simplified form introduced in June of 1998 resulted in some wide variation in the detail of cultivar descriptions. One significant difference was in the dimensions of the "plant". Part of the simplification was to give registrants the option to place their cultivar in a more general category rather than give the specific dimensions. These categories (miniature, small, medium, large, and giant) are somewhat arbitrary. Since the object was to not have to measure clump size, no dimensional ranges have been attached to the categories.

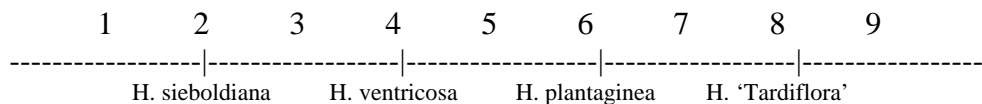

Under parentage information (found within the brackets) the category of "parentage undetermined" was added in 1997. As is consistent with the registrar's policy of not adding further to the confusion of the nomenclatural soup, this category is used when the parentage information submitted by the registrant contradicts information already in print. "Parentage undetermined" does not imply anything regarding the validity of either existing published information or information submitted by the registrant, only that an inconsistency exists. Parentage information published with registrations is intended to be "known parentage" as opposed to guesses, educated or otherwise.

Brief Key to Descriptions:

ONIR: O=originator, N=nominant (Namer), I=introducer, R=registrant.

Flowers: Bloom periods are given in either start – peak – finish format or a more general period format. The general periods are very early period: before June 1, average period: June 1 – July 15, summer period: July 15 to August 15, late period: August 15 to October 1, very late period: after October 1.

Bloom Period Codes: Ties the flowering of the cultivar to a "species scale". The registrant has provided the number code from the scale below for the start - peak - finish of the flowering period.
