

What a year!

- More snow than we have ever seen in Britain, which closed the nursery and delayed plant growth, then a hot, dry spring that more than made up for the delay, and then a long, wet, cool summer. For the first time we had a display at Chelsea, and almost every plant we planned to show was already over!
- The good news is that our young plants have grown well, and we have a great list for you. Some are completely new, and others will be familiar to our regular customers.
- Alpine and woodland plants are ideal for small gardens, giving variety and interest all through the year.
- If you are uncertain how to begin, ask for help from our expert plant-list service.

Best wishes, Stella and David Rankin

You can buy our plants

- by mail order using the form in the middle of this catalogue, all year, throughout the European Union. There is a minimum plant value of £25.00 per order, but if your order is £40 or more we give you an extra plant (our choice) free. When you order please include the plant code and write credit card details clearly.
 - through our on-line store, where you can order and pay on-line. This has many pictures, more detailed descriptions and is updated through the year. It has more plants, too – those for which numbers available are too small for them to be included in this printed catalogue.
 - at organised visits to the garden, or at shows, lectures, Edinburgh Farmer's Market. Full details are given on our web site – click on 'plant stalls and talks'.
 - wholesale on request.
- Sorry! We are not a retail garden centre open to the public.

The plants are listed in alphabetical order

The type of each plant is stated : alpine, bulb, climber, fern, grass, herbaceous, orchid, shrub or tree. Plants associated with George Forrest, the great Scottish plant collector, are marked **F**.

Bulbs

We have catalogues of bulbs at very competitive prices. The list of bulbs to flower in the summer is issued in March, and the one with autumn- and spring-flowering bulbs in April. We can email you when these are published. Let us know that you want to be informed.

Terms and conditions are given inside the back cover of this catalogue. When problems arise we make every effort to resolve them fairly.

Please note that some plants listed here may be out of stock at some times. The catalogue on our web site will be more up-to-date, but the situation is continually changing.

U

Unemployed people on work experience placements do some of the work at the nursery. It is great to have their help, and to be able to help them to get used to a regular schedule. It has been encouraging to see some of them move on into permanent employment.

V

Value – contact us if you have project that needs a lot of plants. We grow on a lot of our spare material in fish boxes and mushroom boxes, and at the end of the season can offer some great deals.

ZOO-9	Zaluzianskya ovata orange centre Alpine. Flowers maroon outside and white inside with a central, brilliant orange blotch.	9 cm pot	£4.50

We have a bulb catalogue too!

- Quality bulbs at competitive prices
Bulbs are all the largest sizes we can obtain
- Delivered to you fresh
not stored in warm, dry shops
- Buy bulbs, not packaging!
Sold in numbers that minimise packing and admin. costs

The catalogue of bulbs to flower in Autumn and Spring is normally ready in April, listing a huge range of bulbs. Some of them we grow ourselves, but we are also able to get the most favourable 'large quantity' rates from Dutch suppliers, and that brings the price for you about as low as it is possible to get. And the prices we quote INCLUDE the postage and packing (for mainland UK; elsewhere please enquire).

Orders should be placed as soon as possible after the catalogue is issued, and at the latest by July 31st 2012.

- The catalogue will be on-line at www.kevockgarden.co.uk.
- If you want to be alerted when it is published, send an email request to bulbs@kevockgarden.co.uk
- If you want a paper copy, send four first-class stamps with your details.

We also have a catalogue of summer-flowering bulbs, issued in March, for ordering straight away.

Wudwerx, Giving Nature a Helping Hand

We are pleased to be able to offer these useful and beautifully made homes for wild creatures in your garden – while giving a helping hand to our son, Mike, as well!

Most of these items are in stock, but from time to time there may be a delay while more are made. We will try to keep up-to-date information on the web site. (They are in our store, as members of the genus Wudwerx!) They are ideal gifts. Orders for Christmas will be sent to you in good time.

Bee hotels

Your garden will soon be buzzing with this great bug house, an insect habitat that is ideal for hanging in a sheltered garden, house wall or orchard.

It is designed primarily to be used by solitary bees such as Mason Bees or Leafcutter Bees, which are non-aggressive and excellent for pollinating in the garden, helping to increase fruit yields. The strong roof and solid timber construction also give excellent insulation for overwintering Ladybirds and Lacewings.

Site using the supplied hanger in a sheltered spot, preferably to catch the morning sun, and to keep the rain from flooding the bees' bedrooms.

Terms and conditions

Availability: The sale of all plants listed is subject to crop success and being available when the order is processed. We cannot be held responsible if previously ordered plants are not available at the time of delivery. Orders will be made up according to date received.

Dispatch of plants: We send plants throughout the year. Weather permitting we will process the order within a few days. In early summer and at show times there may be delays. Christmas gifts and tokens will be sent by December 17th. Please indicate any special delivery date you require.

Please give phone numbers and delivery instructions as we cannot accept responsibility for damage caused by delay because you are not at home. Overseas people please write these details in your own language. Poste restante addresses are not acceptable. If you are hard to find please give directions. Risk passes to the customer when the parcel leaves the premises of Kevock Garden Plants. Please inspect parcel on arrival. If there is obvious damage note this as you sign. Otherwise sign as 'unchecked'.

Complaints: Deliveries should be examined on receipt and problems notified in writing within 7 days. No refunds are considered after this point. Every effort is made to keep plants disease and pest free and to identify stock correctly, but with diverse sources problems can arise. Some colour variations occur in seed-grown material. Rare plants are a challenge to grow and keep. Success is not guaranteed. Compensation is limited to the price of the plants only and not for any consequential loss.

Prices: Prices and pot sizes may change in the course of the year. There is no VAT for private customers. We are registered for 4% Farmers' flat rate VAT and ask for trade customers' VAT status.

Payment: You may pay by cheque, Switch or credit card (Visa or MasterCard). Cheques should be made payable to Kevock Garden. To allow for items being out of stock it is best if you leave the amount to be paid blank, and cross the cheque 'Not to exceed £xxx', where £xxx is the maximum value of the order. If you want us to substitute for any items no longer available, please allow a couple of pounds leeway. We will not cash cheques or take payment from a credit or debit card until shortly before dispatch of your order.

Carriage: We send mail orders by next-day courier service. The standard charge is for UK mainland only. Apologies, but there is an unavoidable non-mainland supplement of £10. Large deliveries will be sent by pallet at quotation. We will email quotes for European deliveries.
