

Emerald Queen Maple

(Acer platanoides 'Emerald Queen')

Mature Height: 40'-50'

Mature Spread: 35'-45'

Growth Rate: Fast

Fall Color: Yellow

Emerald Queen maple is an excellent variety of Norway Maple that grows relatively fast, but maintains the excellent branch structure and strength characteristic of Norway Maples. It is tolerant of many soil conditions. The summer color is a dark, glossy green and the fall color is a brilliant yellow. Of all the Norway Maples, the Emerald Queen is the most tolerant of urban conditions. It has been used extensively and successfully as a street tree throughout the country. Due to its dense shade and shallow roots, it can be difficult to grow grass underneath the tree. Shade loving perennials such as hostas can thrive there though. It is a hardy tree that makes excellent shade and will last for generations.
