FOREWORD

This is our seventh report on the performance of introduced cultivars of grasses and legumes. All data collected in the past 10 years are included.

Data are obtained from single plots comprising 5 rows, 30.5 cm (1 foot) apart and 6.1 metres (20 feet) long. Two rows are harvested for herbage and the remaining 3 for seed. Each cultivar is seeded in 3 successive years and each seeding is retained for 3 harvest years. Weeds are controlled by both mechanical and chemical means. Plots are fertilized annually. Irrigation is employed only in the year of seeding if required to ensure complete stands. While many observations are recorded, emphasis is placed on winter hardiness and seed yield.

Key to Symbols

| | | |
|--|-------------------------------------|--------------------|
| * following cultivar name indicates standards (std) for comparison | cm - centimeters (1 inch = 2.54 cm) | D.C. = double cut |
| Rating 1 to 9 (9 best), - (not rated) | kg/ha - kilograms per hectare | S.C. = single cut |
| | lb/acre - pounds per acre | Tetra = tetraploid |
| | | Dip. = diploid |

INDEX

| GRASSES | Page | GRASSES | Page | GRASSES | Page |
|----------------------|------|---------------------------------------|------|------------------|------|
| Bentgrass - Colonial | 3 | Hair Grass, Early | 11 | Wheatgrass, Tall | 17 |
| - Creeping | 3 | Needlegrass | 11 | Wildrye, -Altai | 17 |
| - Velvet | 3 | Oatgrass - Tall | 11 | -Russian | 17 |
| Bluegrass - Canada | 3 | - Yellow | 11 | | |
| - Kentucky | 3 | Orchardgrass | 11 | LEGUMES | |
| - Rough | 4 | Redtop - (Agrostis alba L.) | 13 | Alfalfa | 18 |
| - Upland | 5 | - (A. gigantea) | 13 | Clover - Alsike | 19 |
| Bromegrass | 5 | - (A. stolonifera) | 13 | - Arrowleaf | 20 |
| Dogstail, Crested | 5 | Reed Canarygrass | 13 | - Red | 20 |
| Fescue - Chewings | 5 | Timothy - (P. bertolonii, P. nodosum) | 13 | - White | 23 |
| - Creeping Red | 6 | - (P. pratense) | 13 | Sainfoin | 24 |
