

Turnip

TP6-500 - Just Right Turnips

1960 All-America Selections Winner!

50 days. Brassica rapa. (F1) This early maturing plant produces good yields of 4 ½ to 6" diameter turnips. The skin and flesh are pure white! It has mild flavored roots and delicious greens. Extremely cold tolerant. Stores well. Will store until spring. Sow in summer/fall for fall/winter harvests. It is not recommended for spring sowing because of a tendency to bolt early. Excellent choice for home gardens and market growers.

TP3-500 - Tokyo Cross Turnip Seeds

1969 All-America Selections Winner!

35 days. Brassica rapa. (F1) Tokyo Cross Turnip. This early maturing plant produces good yields of 2 to 6" diameter high-quality pure white turnips. The white flesh is firm, crisp, mild, and flavorful. Excellent pickling variety. Leaves are delicious and used as greens. Easy to grow and can be sown from spring to fall. They are cold-tolerant and also slow to bolt. An excellent choice for home gardens and market growers.
