Symbol Key:

-  Plants not listed in the previous years catalog.
-  Native to Ohio or adjacent states including selections and hybrids of plants indigenous thereto.
-  Attracts brightly colored butterflies. (Of course, not attractive to baby butterflies.)
-  Attracts or feeds animals and/or song birds.
-  Hummingbird nectar source.
-  Deer resistant, we're not claiming proof; if they're hungry enough, they'll eat anything.
-  Good for cut flowers or foliage.
-  Fragrant foliage and/or flowers

On the Cover

Coreopsis Lil Bang Series:
Daybreak, Starlight (cool season color), Enchanted Eve, & Red Elf

Lilium orientalis
'Roselily Annika'

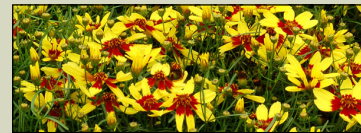

Iris 'Contrast in Styles'

Echinacea
'Colorburst Orange'

Geranium
'Splash Splash'

Coreopsis 'Firefly'

The people who make it all happen:

Our Customers

Thank you for choosing us to supply your perennial material. If not for you, we wouldn't be employed!

New Plants for 2015

These are plants that are new to us and haven't been listed before. We either trialed a small number of the selection and are confident in our ability to provide a quality product, or we grow a related cultivar and want to give you more choices. Many of these new plants we have selected due to your requests. Thank you!

Brunnera 'Alexander's Great'

Terms and Conditions of Sale

Issued January 1st, 2015

This is a wholesale price list only.

This catalog cancels all previous quotations.

PRODUCT AVAILABILITY:

Plants listed will be available for the 2015 season; however, not all of the plants listed will all be available at all times. Please call ahead or check our website to confirm availability.

DELIVERY:

We have put a lot of time and research into developing the most efficient and least expensive delivery system for the size of material we sell, and the condition that we want you to receive it in. All delivery of nursery stock is conducted in our vehicles by a member of our staff. Our truck drive will provide assistance with unloading.

FREIGHT CHARGES:

| | Distance from SGI | Minimum Charge | Rate Charge | Minimum Quantity |
|--------|-------------------|----------------|-----------------|------------------|
| Area 1 | 0-34 miles | \$45.00 | 3.5% of invoice | 75 plants |
| Area 2 | 35-59 miles | \$60.00 | 5% of invoice | 100 plants |
| Area 3 | 60-99 miles | \$90.00 | 6.5% of invoice | 100 plants |
| Area 4 | 100-149 miles | \$120.00 | 7.5% of invoice | 150 plants |
| Area 5 | 150-225 miles | \$150.00 | 8.5% of invoice | 150 plants |

For all other areas please call for a freight quote.

Freight Charges are subject to change without notice based on the fluctuating conditions of the current market.

TERMS:

Net 30 days on approved credit. All new accounts are paid in cash or credit card. We will not accept personal checks from new customers until credit is approved. Past due accounts will be assessed a 4% service charge per month.

GUARANTEE:

We guarantee our plants to be healthy, and to the best of our knowledge, true to name. We will replace or refund the price paid for any plants that prove to be otherwise. It is agreed that the original price paid shall be the maximum damages to which the purchaser is entitled. We will not be held responsible for any other expenses, losses, or inconveniences which the purchaser may sustain as a result thereof. Legal jargon aside, if you are not satisfied with our products, we appreciate knowing just that. Please, allow us the opportunity to fix it.

WHOLESALE PRICES:

Prices are based on present market conditions and are often changed based on quantity available, sales, or size of your order. Please note that the prices listed in our catalog are for quantities of 5 or more of that variety. Orders for 4 or fewer of each variety may be subject to an additional charge.

RETAIL PRICING and BAR CODES:

We offer retail pricing of material with or without a bar code. Please call for more details. Taking advantage of this service during the winter months can save a lot of time pricing during the season. Every year we hear, "Oh, if I only knew of that earlier." Let us make your life a little bit easier. Any pricing received after April 15th will be subject to \$100 set-up fee.

LOCATION:

We are located at 7520 Home Rd., Delaware, Ohio; west of the Scioto River, between Rt. 745 and Jerome Rd. in southern Delaware County. (See map on page iv) Plan to visit us anytime you are in the area.

HOURS:

Our business hours are:

March – November

Monday – Friday 8:00 am – 5:00 pm

Saturday Closed

April – July: We are probably working but call ahead to be sure. Arrangements can be made for someone to be there.

Sunday

Closed

December through February

Closed for the winter but please call if you have any questions. Again, arrangements can be made for someone to be there.

Thank you Terra Nova Nursery and Walters Gardens for the use of your pictures!

LABELS AND SIGNAGE:

Every plant that leaves our nursery receives a full color adhesive label complete with locally specific horticultural data. Because we generate our labels in house, they can include your logos and font preferences, retail prices, bar codes, SKUs, and much more. Our labels can be quickly modified to accommodate your preferences. If you would like additional labels with your order(s) to use for signage, let us know. They will be provided at no charge.

We also have 3.25" x 8", full color, theme specific labels (edible, natives, butterfly, hummingbird, deer resistant, etc). By providing these larger, showier labels to be used on an endcap or themed display, we hope to enhance your marketing efforts.

Good Cut Flower

Cheyenne Spirit Coneflower

Echinacea 'Cheyenne Spirit'

- 🌿 A 22-30" tall perennial, native to the Midwest
- 🌿 Full sun to part shade, drought resistant
- 🌿 First time such a range of color from seed
- 🌿 Care free, doesn't even need dead heading

Cheyenne Spirit is a new seed selection. This means the flower color will vary plant to plant, from rich shades of tomato red, golden yellow, near-fluorescent orange, magenta, and even a stray white here and there. Cheyenne Spirit blooms from June to September. Though the height of each color varies slightly, they are all very well-branched, bushy plants. We expect the seedlings to continue to produce mixed colors. Most other echinaceas will re-seed purple no matter the color of their parent.

Golden Zebra Foamy Bells

Heuchera 'Golden Zebra' pp# 22,104

Annual propagation prohibited without license

Part Shade
 Deer Resistant
 Winter Interest
 Growing Tips

- 🌿 Stunning bright yellow leaves with red centers
- 🌿 Small white flowers 6-8" above the foliage
- 🌿 Tolerant of heat and humidity
- 🌿 A low growing ground cover, to 12", for shade

This new Heuchera from Terra Nova Nurseries looks like it could have come from another planet. Both the coloring and the shape of the leaves are utterly fantastic, with foliage that is bright yellow, feathery, and boldly marked with dark red along the center and veins. A more compact plant than Alabama Sunrise, Golden Zebra will produce white flowers on airy spikes in spring.

Georgia Plum Coral Bells

Heuchera 'Georgia Plum' ppaf

Annual propagation prohibited without license

- 🌿 A 7" tall perennial
- 🌿 Purple pink flowers bloom spring to fall
- 🌿 Tolerant of heat and humidity
- 🌿 Part shade, drought resistant

Georgia Plum is an eye-catching new form of H. 'Georgia Peach'. This new selection from Terra Nova is tough, with amazing year round rose purple leaves, pink to silver overlying and purple pink flowers. Georgia Plum has a tighter habit with smaller leaves and shorter flowers than H. 'Georgia Peach' giving it a cleaner appearance in the landscape. Easy to grow and care free, coral bells thrive in low-water zones with good drainage.

Nicky Tall Garden Phlox

Phlox paniculata 'Nicky'

Sun to Part Shade
 Attracts Hummingbirds
 Attracts Butterflies
 Growing Tips

- 🌿 Striking magenta-purple flowers in summer
- 🌿 Flowers attract hummingbirds & butterflies
- 🌿 A long blooming perennial, June to August
- 🌿 A 50-56" tall, great in the back of a sunny border

Brightly colored Tall Garden Phlox are a staple plant in the perennial garden. Their sweetly fragrant flowers are loved by hummingbirds and butterflies. Glowing magenta flowers, the darkest of all Tall Garden Phlox, are produced nearly all summer long atop clumps of medium green foliage. Plants should be well spaced for air circulation that will help to prevent disease issues.

Stained Glass Hosta

Hosta 'Stained Glass'

- 🌿 A 22" tall perennial
- 🌿 Intense yellow leaves with green margins
- 🌿 Thick textured, good slug resistance
- 🌿 Grow in bright shade for best color

The aristocrat of the shade garden, Hostas contribute form, color and texture. Stained Glass is an outstanding sport of Hosta 'Gascamelle' that has incredibly bright yellow leaves with rich green margins. The color intensifies as the season progresses. Fragrant white flowers in July and August. A fantastic Hosta for use as either a specimen or mass planting.

Growing Tips

Grand Parade™ Bee Balm

Monarda didyma Grand Parade™ (HCrude) pp# 19,580

Annual propagation prohibited without license

- 🌿 Lavender-purple flowers top a fuzzy, compact plant
- 🌿 Attracts butterflies and hummingbirds
- 🌿 Deer resistant, minty scented foliage
- 🌿 Compact, 15-16" tall perennial for part shade

Grand Parade™ is a wonderful, compact selection of Sachalin producing a profusion of bright lavender-purple blooms in summer that attract butterflies and hummingbirds to the garden. The fuzzy, aromatic foliage smells like mint when crushed and can be used to flavor tea. Does, however find the leaves distasteful! This variety is very resistant to powdery mildew but still should be grown in part sun with good aeration and moist garden soil.

Supplying outstanding plant material for green industry professionals since 1981

We first launched our website (www.smithsgardensinc.com) in 2010 to better serve our customers, but quickly realized that it could be used as a source of information and ideas for the home gardener, that would hopefully inspire them to buy more plants from you. On the "Homeowners" side of the website we have many educational tools available, including our catalog (without pricing), locations of the garden centers that sell our plants, and growing tips for plants with different garden requirements, such as: average soil in full sun or wet/poor soil in the shade.

Each 4"x 5" plant label has a QR code that sends the gardener to a page on our website, corresponding to that plant; i.e. the QR code on Coreopsis goes to the growing tips for full sun/average soil perennials. These growing tips pages also link the home gardener to companion plants well suited for similar growing conditions, like Salvia, Achillea, or Leucanthemum.

We also have a great edibles section on our website, offering growing tips and recipes for each type of fruit. There's a Reference Guide, comparing the common cultivars of Blackberries, Currants, Raspberries, and more. We even use this in April and May, when someone asks us "What's the difference between Caroline and Latham Raspberries?"

On the professionals side of our website, you have access to our current Availability, 2015 Catalog (with pricing), and our New Plants and Edibles Supplements.

We will be launching our Facebook page in the Spring of 2015, sharing pictures of plants we're shipping out each week as well as tips on how to use them in the landscape. We hope this will be another educational tool for the home gardener, giving them thoughts on what to look for at your garden center, as well as landscape ideas and plant combinations.

PERENNIALS

Acanthus spinosus

Bear's Breeches

Height: 24-30"

Exposure: sun

This clump-forming perennial is grown for its large, deeply cut, attractive foliage. Spikes of white and reddish-purple, hooded flowers sit atop arching, glossy green, spiny leaves. A long taproot helps this plant survive drought, but lack of water can cause it to go dormant in early summer.

True 1 gallon \$7.50

Acanthus spinosus

Aconitum carmichaelii 'Arendsii'

Autumn-flowering Monkshood

Height: 36-48"

Exposure: sun

This hybrid monkshood features dense panicles of hooded, deep azure blue flowers in fall atop thick, rigid, leafy stems. Arendsii stems are unusually thick and are less likely to need support. Flowering in September, they combine well with fall blooming Anemones. All parts of this plant are poisonous.

True 1 gallon

Aconitum 'Arendsii'

Agastache

Agastache is a genus of about 30 aromatic species native to central and eastern Asia, Mexico, and the United States. Careful breeding and selection have given us new, colorful varieties that offer exceptional garden performance and a long season of bloom. Flowers are attractive to bees, hummingbirds, and butterflies, while the fragrant leaves are distasteful to deer and rabbits. In full sun and well-drained soil, they happily shrug off summer heat and early frosts. However, they are very susceptible to root rot during winter and require sharp drainage for over wintering success.

Agastache aurantiaca 'Tango'

Tango Hyssop

Height: 12-18"

Exposure: full sun

Tango produces an abundance of bright orange creamsicle colored, flower spikes that rise above clean, grey-green foliage from mid-summer into fall. Exhibits excellent disease resistance.

True 1 gallon

Agastache 'Tango'

Agastache 'Kudos Coral'

Kudos Coral Hyssop

ppaf

Height: 16-20"

Exposure: full sun

Kudos Coral sports an abundance of warm, coral colored flower spikes that rise above clean, green foliage from mid-summer into fall. The Kudos Series features dwarf, well-branched plants that are very hardy and extremely resistant to Downy Mildew.

True 1 gallon

Agastache 'Kudos Coral'

Agastache 'Kudos Mandarin'

Agastache 'Kudos Mandarin'

ppaf

Height: 16-20"

Exposure: full sun

Kudos Mandarin Hyssop

Kudos Mandarin sports an abundance of bright orange flower spikes that rise above clean, green foliage from mid-summer into fall. The Kudos Series features dwarf, well-branched plants that are very hardy and extremely resistant to Downy Mildew.

True 1 gallon

Agastache 'Summer Glow'

Agastache 'Summer Glow'

pp# 20,980

Height: 20"

Exposure: full sun

Summer Glow Hyssop

Summer Glow features lemon custard flowers with dark calyces atop deep green foliage. Blooms all summer. The Summer Series is a group of American native hybrids, bred for fuller flower spikes on sturdy, upright plants.

True 1 gallon

Agastache 'Summer Love'

Agastache 'Summer Love'

pp# 20,510

Height: 20"

Exposure: full sun

Summer Love Hyssop

Summer Love features violet-red blooms all summer atop bright green foliage. The Summer Series is a group of American native hybrids, bred for fuller flower spikes on sturdy, upright plants.

True 1 gallon

Weeds are flowers too, once you get to know them.

-A. A. Milne

Ajuga

Bugleweed

Height: 4-6"

Exposure: part-full shade

Ajuga forms a dense mat of foliage, up to 6" tall, that always seems to look neat and fresh. In many cases, the leaves are colored with shades of purple, white, silver, cream, or pink. Individual plants grow as a rosette, but they intertwine to form a solid carpet that withstands light foot traffic. Flower spikes adorn plants from late spring to early summer. Ajuga is a great groundcover for part to full shade.

Ajuga 'Blueberry Muffin'

pyramidalis 'Metallica Crispa' - a clump forming Ajuga with short runners. Leaves are scrunched, shiny, and metallic purple. Short spikes of purple-blue flowers appear in late spring.

reptans 'Blueberry Muffin' - A faster growing sport of A. 'Chocolate Chip' with thicker, more weather resistant foliage. Dark bronze new growth and blueberry-blue flowers on 8" spikes.

'Metallica Crispa'

'Burgundy Glow'

r. 'Burgundy Glow' - features tricolored foliage (white, pink and green) and blue flowers on 6" spikes in late spring

r. 'Pink Lightning' - soft, mint-green leaves with a distinct creamy white edge. Bubblegum pink flower spikes rise above the carpet of variegated leaves in early May. A sport of Purple Torch discovered and introduced by Sunny Border Nursery.

Ajuga 'Pink Lightning'

4"

With fronds like you, who needs anemones.
-Finding Nemo

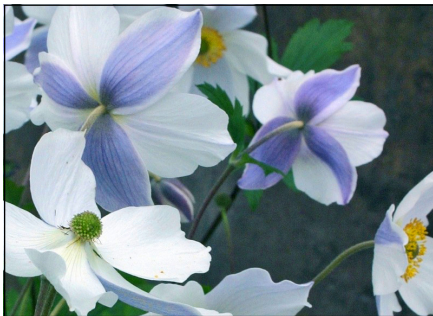

Anemone 'Loreley'

'Lucky Charm'

'Pocahontas'

Anemone 'Wild Swan'

Asclepias c. 'Silky Deep Red'

Asclepias syriaca

Anemone

Windflower

Exposure: sun-light shade

Fantastic perennials for shaded areas, they provide dramatic color in the fall garden. Blooming in September, the delicate, upward-facing flowers come in shades of white and pink and are held well on long stems above the dark green palmate foliage. Always eye catching, Japanese Anemones add a unique form and texture to the garden. The taller varieties may require staking when in flower, but those two feet or less generally don't. They will perform equally well in sun if provided consistent moisture.

NEW 'Loreley' - rosy-pink flowers with broad, overlapping petals. The darker pink edges accentuate the petals making them look very ruffled; 40" tall

NEW 'Lucky Charm' - leaves start off deep purple and change to dark green with a lighter violet back. Flowers are deep rich pink with very dark purple stems; 36" tall

NEW 'Pocahontas' - dwarf plant with frilly, double pink flowers, blooms a little earlier, beginning in late July; 18-24" tall

NEW Wild Swan™ ('Macane001') - selected from a group of seedlings pp# 23,132 derived from five different parents which included *A. rupicola* as a female parent. The precise parentage is difficult to pin down but involves both early and late flowering types. Wild Swan™ was chosen as the pick of a small group of seedlings by Elizabeth MacGregor at her nursery in Kirkcudbright, Scotland, where it has been on trial for ten years. This exceptional hybrid offers continuous and prolific flowering from June until frost, well beyond that of the Japanese hybrid cultivars, a very unique trait!

True 1 gallon

Summer

NEW Asclepias curassavica 'Silky Deep Red'

Silky Deep Red Milkweed

Height: 2-3'

Exposure: full sun

Also called Blood Flower, this annual Milkweed is native to South America. Showy flowers are deep red with a yellow hood, appearing in late spring and continuing until early fall. The new growth of Silky Deep Red has a lovely bronze cast. It has a much longer flowering time than the perennial milkweeds. Blooms are followed by long narrow seed pods, typical of the milkweed family.

4"

NEW Asclepias syriaca

Common Milkweed

Height: 3-4'

Exposure: sun

This native Milkweed typically grows 3-4' tall on thick, upright stems. Blooming in June and July, it features fragrant, light pink flowers that smell like honey. These are followed by prominent, warty seed pods which split open when ripe releasing their silky-tailed seeds for dispersal by the wind. Once commonly seen along roadsides and fields, this native plant is becoming scarce due to the widespread use of herbicides (Round-Up) on genetically modified farm crops and habitat destruction.

4"

Belamcanda chinensis 'Freckle Face'

Freckle Face Blackberry Lily

Height: 18-24"

Exposure: sun

Freckle Face features showy orange flowers with heavy red freckling, up to 2" wide. Pear-shaped, tan seed pods burst open in the fall to display black-purple seeds that resemble blackberries. Strappy, olive green leaves are similar to iris foliage, sturdy and drought resistant. Prefers drier soils.

True 1 gallon

Belamcanda 'Freckle Face'

Belamcanda chinensis 'Hello Yellow'

Hello Yellow Blackberry Lily

Height: 18-24"

Exposure: sun

Hello Yellow features bright yellow, star-shaped flowers with no speckling. Pear-shaped, tan seed pods burst open in the fall to display black-purple seeds that resemble blackberries. Strappy, olive green leaves, reminiscent of iris. Are sturdy and drought resistant. Prefers drier soils.

True 1 gallon

Belamcanda 'Hello Yellow'

Bletilla striata

Chinese Ground Orchid

Height: 8-12"

Exposure: afternoon shade

Chinese Ground Orchid is a terrestrial orchid which produces small, cattleya-like, pinkish-purple flowers in clusters atop naked scapes typically rising to 18" tall. Blooms in late spring and prefers a cool woodland or shady rock garden. For best overwintering success, choose a site that is well-drained, and cover the crown in a thick layer of mulch to insulate the plant during the winter.

4"

Bletilla striata

Brunnera macrophylla 'Alexander's Great'

Alexander's Great Siberian Bugloss

ppaf

Height: 14"

Exposure: part shade to shade

The HUGE heart shaped leaves of Alexander's Great are double the size of B. 'Jack Frost'. They have a heavy silver overlay with prominent dark green veins and unique, spiraled leaf-bases. Great for brightening up dark shady areas. It produces tiny, blue, Forget-Me-Not type flowers in early spring.

True 1 gallon

Brunnera 'Alexander's Great'

Buddleia davidii 'Buzz™ Sky Blue'

Buzz™ Sky Blue Butterfly Bush

ppaf

Height: 3-5'

Sun Exposure: sun

Buzz Sky Blue is a dwarf featuring full-sized, pale blue flower spikes. Buddleias will flower from summer until frost with dead-heading and adequate water. They usually die back hard in cold winters so winter protection and spring pruning are suggested. Rich soil and/or spring fertilizer will promote more flowers. Avoid wet winter soils.

True 1 gallon

Buddleia 'Buzz™ Sky Blue'

Convallaria majalis

NEW Convallaria majalis

Height: 8-10"

Exposure: sun to part shade

Lily of the Valley

This old fashioned perennial bears fragrant, white, bell-shaped flowers in early spring set off against clean, green foliage. Lily-of-the-Valley prefers part shade and moist, fertile soils, however it does well in full sun, forming a dense, weed free groundcover that is surprisingly drought tolerant. All parts of this plant are poisonous, which makes it very deer resistant.

4" \$2.75

Coreopsis

Valued for their dependable nature and colorful, daisy-like flowers, Coreopsis are low maintenance, drought tolerant, and long blooming. Native to US prairies, the flowers attract butterflies and their seeds are enjoyed by Goldfinch and other birds. There is a lot of variety among Coreopsis, including broadleaf vs threadleaf, tall vs short, and flower colors including pinks, reds, yellows, oranges, whites, and bi-colors. Most Coreopsis are clump forming, holding their flowers on tall stems, above the foliage making them good cut flowers.

Coreopsis should be sited in full sun and average garden soils with good winter drainage. And don't over fertilize, or you'll have tall, leggy plants that tend to flop over. Dead-heading will keep the plants tidy and promote re-bloom, however leave some seed heads for the birds in fall and winter.

Coreopsis 'Enchanted Eve'

NEW Coreopsis 'Enchanted Eve'

ppaf

Height: 10"

Exposure: sun

Daybreak Coreopsis

Enchanted Eve has single, butter-yellow flowers have a soft, red eye on clean, dark green foliage. From Daryl Probst's new and very compact, long-blooming Li'l Bang™ Series.

-Gertrude Jekyll

Echinacea

Prized for their large, brightly colored flowers, coneflowers have become a mainstay in today's landscapes. Their color and form combine equally well in the wildflower or urban garden. Most varieties make excellent cut flowers. The cones hold up well into winter providing architectural interest as well as attracting seed eating birds. Echinacea perform best in full sun to light shade. They prefer consistent moisture to avoid leaf burn and early petal decline. Being native, they are well adapted to our soils and climate. Height listed is in flower. We hope to have 20 varieties available in 2015.

Iris sibirica 'Contrast in Styles'

Iris sibirica

Height: 30-36"

Exposure: sun-light shade

Siberian Iris 

A wonderful addition to the garden with their bright green, gracefully arching foliage that acts as a soft vertical accent. Flowers are produced in early summer in a wide range of colors including: blue, purple, pink, yellow, and white. Siberian Iris prefer full sun but will tolerate light shade. Native to moist meadows, their thick roots drive down deeply, (which makes them somewhat drought resistant) and great plants for bank stabilization. Siberians are less prone to rot and iris borer than German Iris, and do not need to be divided as often.

'Contrast in Styles' - incredible contrasting color patterns. The flowers are 3-5" across with wine-purple standards and falls, and lighter blue-purple styles. The falls have prominent white and yellow signals with purple veining.

Iris sibirica 'Gull's Wing'

'Gull's Wing' - large, elegant, slightly-rippled, pure white flowers with wide flaring falls and short standards. Some Siberian Iris aficionados rate Gull's Wing as the best of the white-flowered varieties and it has been in commerce for nearly 100 years.

True 1 gallon

Lilium orientalis

Oriental Lily

Height: 3-4'

Exposure: sun

Brightly colored and intensely fragrant, these bulbs add elegance and form to the garden. They prefer full sun to light shade and moist but well drained soil. These excellent cut flowers look best planted in the middle of the border where their flowers can stand out and shine but the foliage blends into the background. Plant a variety of forms to get six weeks of bloom.

'Stargazer' - Rich magenta-red, freckled, 6-8", outward facing flowers with a wonderful fragrance in July on 3-4' plants.

Lilium o. 'Stargazer'

NEW 'Sunny Grenada' - Dark burgundy red flowers are heavily spotted with a bright white edge; extremely fragrant. Dwarf, 16-18" tall, flowers the same time as Stargazer

2 gallon

Lilium o. 'Sunny Grenada'

NEW Lilium orientalis Roselily™ Series

Although referred to as double Orientals, the Roselily™ cultivars are selected to have at least 18 flower petals, which is 12 more petals than cultivars with single flowers. Sterile, individual flowers with last about a week longer than non sterile selections which improves longevity at retail or a longer vase life. An added bonus is that these hybrids do not produce pollen, no yellow stains disfiguring the flowers beauty, or hands and clothes.

Roselily™ 'Annika' - Double white petals striped with lime green mid ribs, very fragrant. Flowers about three weeks after Stargazer

Roselily™ 'Belonika' - Large, light pink, double flowers with darker rose midribs, and lightly spotted centers; mildly fragrant. Flowers about a week after Stargazer.

Roselily™ 'Thalita' - Huge, double, rose red blooms with lighter edges and spotted center, looks like a double Stargazer, fragrant. Flowers about a week after Stargazer
