New Roses

2-3, 6, 12, 14, 16, 26, 33, 35, 41-43

Fresh and fun, they're either new to the industry, new additions to our catalog, or returning after an absence.

Hybrid Teas

2-26

Mainly characterized as having long stems and solitary blooms that are ideal for cutting. Flowers appear in flushes throughout the season, with the first flush being the most productive.

Grandifloras

4-9, 11-15, 17, 21-26

Also ideal for cutting, these roses appear singly or in clusters throughout the season, opening at different times for a greater bloom display in the garden.

Floribundas

3, 27-32

Great for landscapes, the flowers appear in clusters, freely and continuously throughout the season, as long as the spent blooms are removed.

Shrubs

3, 33-35

Generally one of the hardier rose classes and ideal for landscapes, these bushy plants will often rebloom during the season if spent blooms are removed.

Ground Covers

36-37

Ideal for sunny areas that are hard to maintain, these roses grow wider than tall, spreading to cover the landscape with a carpet of color.

Climbing Roses

38-40

Perfect for training on arches, trellises, fences and more, the long, arching branches of these roses make ideal vertical accents in the landscape.

Miniatures

41

Hardier than hybrid teas and quite petite in stature, use these roses for containers on your patio or accents in borders and landscape beds.

Tree Roses

42-43

Unique, one-of-a-kind accents for your gardens and walkways.

Dear Rose Enthusiast,

Welcome to our 2022 catalog! We're excited to share with you some beautiful, new roses we know you'll want to add to your collection. We're especially excited about *Cathedral Bells* (p. 3) and our 2023 Preview Rose, *Top Cream* (below). Both have amazing fragrance that you're not going to want to miss.

What else is new? Paging through, you may discover we have eliminated our order form insert. Many of you are already utilizing our website and we encourage more of you to do so. It's the fastest way to reserve your roses. For those who still like paper and ink, turn to page 47 and you'll find an order form to mail. We apologize for any inconvenience this change makes, but because paper is a valuable resource, we are trying to do our part to decrease usage.

With labor costs increasing, everything seems to cost more, and our roses are no exception. Please rest assured that our quality standards will not change. We stand behind our roses and if you're not satisfied, we want to hear from you.

We're incredibly grateful for our long-time customers who stick with us through thick and thin; we wouldn't be here without you. We also offer a warm welcome to our newer customers. We're excited that you've discovered a love of roses and we can't wait to help you on your journey.

Enjoy your roses,

Richard Zondag, President
Edmund's Roses

HYBRID TEA

(PPAF, Var: MEloguste) This new rose is the cream of the crop, so grab it while it's fresh. The buds are large and appear suffused with pale pink as they begin to unfurl. Once the blossoms open, the pink tones fade and you're left with pure white perfection and a lovely, old-fashioned form that draws you in to partake of the strong, fruity fragrance. Vigorous, upright plants continuously produce beautiful, bouquet-worthy roses through the season and are filled with glossy green foliage that resists common rose diseases. Part of the Sweet Cottage™ series, a new collection from Star® Roses and Plants. Grown own root.

Cathedral Bells™

SHRUB

(PPAF, Var: DELamo, aka: Sister Emmanuelle) Just as the magnificent bells of a cathedral draw people to its doors, so the powerful perfume of this rose will draw you into the garden. Follow the classic, old rose fragrance, with notes of anise and lavender, and you might be surprised at what you find. Your mind may have envisioned a tall, towering beauty, with long stems perfect for cutting. Instead, you find a rose of a more humble stature, but its abundance of enticing blooms has made it well worth the journey. Appearing in clusters, bubblegum pink buds slowly open to reveal layer upon layer of lilac pink petals, creating blooms with a wonderful, old-fashioned form. The shrubs have rich green, disease resistant foliage and arching canes that can be trained along a fence or up a small trellis in a container.

Euphoria®

HYBRID TEA

(PPAF, Var: IPB065013) With florist rose bloodlines in its parentage, the incredibly long-lasting blooms of this rose are sure to bring a new level of excitement to your bouquets and arrangements. Not only do the blooms hold nicely, but they appear on the bush in slight color variations, from greenish cream edged with deep pink, to soft yellow, pastel apricot, and everything in between. No matter the color, the blooms have an interesting, crenellated edge that will add wonderful texture to cut flower bouquets. Healthy, low-growing plants have glossy green foliage and continuously produce their colorful creations throughout the season.

Fiesta Veranda®

FLORIBUNDA

(PPAF, Var: KORhesanwes) Get ready for a party on your patio with this flashy, multicolored creation. Like clusters of party lights, the ruffled, cuplike blooms shine brightly in a brilliant shade of yellow, variably suffused with orange so that no two blooms look alike. Floriferous plants keep the celebration going all season long, continuously popping open new clusters of blooms for you to enjoy. Dark green, glossy foliage and a rounded, bushy habit create a perfect backdrop for this sizzling sensation. Hardy to Zone 5. Grown own root.

Adolf Horstmann®

HYBRID TEA

The rich color is lemon gold with pink to salmon tints on the outer rows of petals and the blooms appear in great numbers despite the large size. The leathery foliage covers robust and free-branching plants that are extremely resistant to both black spot and mildew. Certainly the hardiest of anything near its color.

All Dressed Up™

All Dressed Up™

GRANDIFLORA

(Plant Patent #31315 Var: WEKgrasucejuc) This beauty is all dressed up and ready to go...into your rose collection. Her full gown of glossy, dark green foliage is highlighted with old-fashioned, fully double blooms in a sparkling shade of watermelon pink. The non-fading blooms are held to perfection on long stems ideal for cutting, but are equally as glamorous when left on the bush. A mild perfume completes her ensemble and enhanced resistance against common rose diseases ensures this fancy lady is here to stay.

Height: 5-5½' **Petals:** 35-50 **Flower Size:** 3-4"

Anna's Promise®

Anna's Promise®

GRANDIFLORA

(Plant Patent #27865, Var: WEKdoofat) The interesting color, golden tan with a pink blush and copper reverse, comes from 'dad' About Face, but the blooms are larger with improved form over the original. Bouquets of these beauties are perfect for the table with delicious scents similar to that of grapefruit and fresh cut apples. The upright bushes have deep, glossy green foliage with good disease resistance and bloom prolifically throughout the season.

Height: 5-6' **Petals:** 30-35 **Flower Size:** 3½-4"

Fragrance: Subtle, fruit with spice

Apricot Candy™

Apricot Candy™

HYBRID TEA ☼

(Plant Patent #21284, Var: MEIbidull) Classic form, gently ruffled petals, and luscious apricot color combine in this sweet as can be rose. One would expect a sweet perfume to issue forth, but a surprisingly spicy scent lends its intrigue instead. Soft green foliage has above average disease resistance, rounding out the bushy, upright plants to perfection. Grown own root.

Height: 5-5½' **Petals:** 17-25 **Flower Size:** 3-3½"

Arizona

GRANDIFLORA

(Var: WERina) Full, mid-sized blossoms are reminiscent of an Arizona sunset with deep golden-orange tones layered with hints of pink and yellow hues. Cool weather intensifies the colors, giving this plant regional appeal. As though the unique color blend weren't enough, this rose also boasts an intensely sweet fragrance that is astonishingly captivating. Vigorous plants are upright and bushy with bright emerald green leaves that are glossy and leathery, helping to fend off disease.

Height: 5' **Petals:** 25-30 **Flower Size:** 3"

Barbra Streisand®

HYBRID TEA

(Plant Patent #13120, Var: WEKquaneze) This impressive rose shares star qualities with the dynamic woman for whom it is named. The striking foliage and healthy habit of the bush command a dramatic stage presence, but it is the masses of deep lavender buds gradually opening into layers of lavender tones that will turn all eyes. She asked for fragrance and got it.

Height: 3-5' **Petals:** 26-40 **Flower Size:** 4-6"

Beverly™

HYBRID TEA

(Plant Patent #23495, Var: KORpauvio, aka: Perfume Passion, Pink Perfection, Sophie Davant) Perfectly formed blooms are an enchanting blend of pinks and appear in flushes throughout the season. The fragrance includes notes of citrus, peach, pear and plum with underlying notes of patchouli and myrtle. Dark green foliage with just a hint of sheen clothes the bushy, upright plants and offers good resistance to both black spot and mildew. Winner of multiple gold and silver medals world-wide. Part of the Eleganza® collection.

Height: 3-4' **Petals:** 40-55 **Flower Size:** 4"

Big Purple

HYBRID TEA

(Var: STEbigpu) We love this beautiful rose, first because of its brilliant color, and second because it's so intensely fragrant you don't have to see it to know it's in the room. Huge blooms of mauve to violet red are borne on tall, stiffly upright plants covered with very dark green, leathery foliage. It's quite hardy, resists black spot, mildew, and rust and occasionally makes its way on the show table.

Height: 5-6' **Petals:** 35-70 **Flower Size:** 5-7"

Fragrance: Strong, sweet, old rose

Black Baccara™

Black Baccara™

HYBRID TEA ☼

(Plant Patent #13152, Var: MEIdebene) While bred for the florist trade, this one of a kind hybrid tea also has what it takes to flourish in outdoor gardens. The velvety texture of the petals and unique burgundy-black color of the blooms is an instant success in any cutting garden. The flowers last up to 2 weeks in a vase. Semi-glossy, dark green foliage lines the long stems. Enjoy flushes of these beauties throughout the season.

Height: 5-6' **Petals:** 40-45 **Flower Size:** 3-4"

Black Magic™

Black Magic™

HYBRID TEA

(Var: TANKalcig) You might be tempted to touch the petals of this dark-as-night rose to see if they're as velvety as they appear. The extremely long-lasting blossoms have thick petals of intense garnet red with darker edges, carried on strong stems and displayed against glossy dark green foliage. The flowers hold their strong color and are superb for cutting. High mildew resistance is an added bonus. One of the darkest red roses ever produced.

Height: 5½-7' **Petals:** 30-40 **Flower Size:** 4-4½"

Fragrance: Subtle, sweet

Bliss™

Bliss™

GRANDIFLORA

(Plant Patent #28991, Var: KORmarzau) Nothing in this life can ever be perfect, but this rose will bring you enough happiness that it's quite close. Compact, bushy plants present a pretty picture when they're covered with wonderfully fragrant clusters of rosettes in a delicate shade of creamy pink with an apricot heart. Dark green, semi-glossy foliage looks lush against the blossoms and shrugs off rust, black spot, Botrytis, and powdery mildew with ease. Part of the Parfuma® collection. Zone 5 hardy. Grown own root.

Height: 3' **Petals:** 120 **Flower Size:** 3½"

Bride's Dream

Bride's Dream

HYBRID TEA

(Var: KORoyness) This rose should really be called an exhibitors' dream. The pale, satiny pink blooms start out with a long, slender bud that opens slowly into a perfect spiral. The plants bear medium green foliage with a noticeable grayish sheen and have reasonable disease resistance. It's quite a tall grower, but is easily kept in check by harvesting the arm loads of sparsely thorned, long-stemmed cut flowers it will produce.

Height: 5-6' **Petals:** 30-35 **Flower Size:** 5-7"

Fragrance: Medium

California Dreamin'™

California Dreamin'™

HYBRID TEA

(Plant Patent #21388, Var: MEIbihars) This Meilland® introduction captures all the beauty, elegance, and radiance of the original *Princesse de Monaco*, but is enhanced with strong citrus fragrance, even better flower form, and more tolerance to common rose diseases. Why the name *California Dreamin'*? Simply because the exceptional rose climates of California and the dry West enhances every one of its fine qualities, making it a dream rose to grow in those areas.

Height: 3-4' **Petals:** 28-35 **Flower Size:** 4-6"

Centennial Star™

Centennial Star™

HYBRID TEA

(Var: MEInerau) These fragrant yellow blooms are somewhat reminiscent of the famous Peace rose, but are much fuller in form and stronger in color. The double, cupped blooms are filled with gently ruffled, golden-yellow petals edged with azalea pink. Long cutting stems are clothed with glossy, dark green foliage that is quite disease resistant for the type. The flowers appear in flushes throughout the season ensuring an endless supply of their lovely perfume.

Chicago Peace

HYBRID TEA

(Var: JOHnago) A color variant of the most famous rose of all time that was discovered in the windy city of Chicago. The pink edge sometimes suffuses the entire surface of the petals and the reverse is a deep, rich gold. A rather unstable sport, it occasionally produces some surprising color variations. Weatherproof, tough, disease resistant plants are clothed in gorgeous, apple green foliage.

Color Magic

Color Magic

HYBRID TEA

(Var: JACmag) *Color Magic* illuminates the garden with its ever-transforming blossoms and strong, fruity fragrance that infiltrates the surrounding air. Each 5 inch blossom is a glorious gradation of pink and salmon hues. The palest ivory-pink is on display at the center and then slowly transforms to a deep salmon-red at the outer petals. No two blossoms are alike and the color intensifies when sunlight graces their surface. The clean, glossy leaves are medium green and attractive, but take a backseat to the magical color display.

Double Delight

HYBRID TEA 🌹

(Var: ANDell) Nicely formed cream blooms have strawberry markings invading the outer ring of petals as they unfold, becoming more pronounced as the summer wears on. It not only deserves its place on the show table, but also makes a dramatic cut flower with its intensely fragrant profusion. The plants are medium to tall, slightly spreading and quick to repeat. The green, matte foliage will fall prey to mildew if you neglect your spray program, but that's its only fault and it doesn't mind cold winters.

Dream Come True™

GRANDIFLORA 🌹

(Plant Patent #20633, Var: WEKdocpot) All America honors were a 'dream-come-true' for Dr. John Pottschmidt, whose love for roses became a driving force in his life. One of his many goals was to breed an AARS winner, and he did just that with this gorgeous rose everyone can enjoy. The bushy, vigorous, exceptionally disease-resistant plants pump out loads of large, long-stemmed, shapely blooms of yellow edged in ruby red. Each flower blushes to all-ruby at the finish, giving a delightful multi-colored display.

Hybrid Tea & Grandiflora Roses

HYBRID TEA

A brilliant, deep clear pink that's so neon-bright you'd think it would glow in the dark. As a garden subject it has no peer because it's constantly in bloom all season long. In fact, few bother to disbud it because it would limit bloom production. The large foliage is polished deep green and goes right up to the neck of the bloom. Under ordinary circumstances it's one of the cleanest, hardiest, brightest pinks around. Cursed with a myriad of tiny, sharp thorns, which is undoubtedly its only means of protecting its super fragrant blooms.

Elina

HYBRID TEA

(Var: DICjana) Exhibition quality, light yellow blooms with extraordinary substance hold their form despite having less than 30 petals. The vigorous plants are almost as broad as tall, covered with glossy green foliage that's quite resistant to disease, especially black spot. During the heat of summer, the flower size will diminish and the color lightens, but it always seems to be there when you need a bouquet for the table.

Enchanted Peace™

HYBRID TEA

(PPAF, Var: MEIzoloi) Take Love & Peace, add more fragrance, more blooming power, and you get *Enchanted Peace*. The classic hybrid tea blooms open yellow, largely suffused with orange, especially near the edge of the petals, and quickly change to yellow suffused with pink. Disease resistant, bushy plants have very glossy, green foliage and produce an abundance of the beautiful blooms throughout the season. Performs as well in containers as it does in the garden. *Grown own root.*

Eternal Flame™

HYBRID TEA

(Plant Patent #18918, Var: MEIfacul) The dramatic blooms of this hybrid tea are large and fragrant, with ruffled petals of soft yellow that pop against the dark green foliage. As the name implies, this plant is a blooming machine, putting out flush after flush of gorgeous, citrus-scented blooms. Part of the Memorial Rose collection named in honor of those who've fought for our freedom. Exceptionally disease resistant and an absolute must in the cutting garden. Zone 5 hardy. *Grown own root.*

Falling In Love™

HYBRID TEA ☼

(Plant Patent #19872, Var: WEKmoomar) When you combine Moonstone with Marilyn Monroe how can you help but create a star? We know you'll fall in love with these full, shapely blooms of exhibition form. The pure pink color softens to white on the outer petals and on the reverse to give the flowers a surreal glow, plus the strong rose and fruit fragrance is downright heavenly. The upright plants stay tidy and compact, just right for the front of the flower border. Large, dark green foliage clothes long stems perfect for cutting.

Firefighter®

HYBRID TEA 🌹

(Var: ORAdal, aka: Hacienda, Red n' Fragrant) The flowers of *Firefighter* are strong, rich red, and wonderfully scented. This upright hybrid tea battles back disease and the blooms, true to the name, hold up well even in intense heat. Fragrant red roses don't come down the path very often because they can bring disease as baggage. This one resists them all with minimal spraying. The first sponsorship rose of the Remember Me garden fund to honor the victims of 9-11.

Folklore

HYBRID TEA

(Var: KORlore) One of the top exhibition roses. Slow-opening, high-centered blooms are warm salmon with a rich golden-orange reverse. The tall, slightly spreading, vase-shaped plants bear long stems covered with red tinted, waxy foliage that is extremely disease resistant. Every year several of our customers report a climbing sport, but this isn't true. It's just the nature of the beast. Pinching will keep the critter in bounds. Deliciously fragrant and hardy.

Fragrant Cloud

HYBRID TEA

(Var: TANellis) Large, full blooms of deep orange-red have a fragrance that will knock your socks off. The plant is a shorty and requires an extra application of fertilizer to get stems long enough to show. The red tinted foliage is extremely resistant and persists long enough to give the plant an extra shot of starch that ensures hardiness even in cold winter areas. Oddly enough, the introducer withheld this variety from the market for five years for fear it couldn't compete with *Tropicana*. Looks like it's going to outlive it.

Francis Meilland®

HYBRID TEA

(Plant Patent #19970, Var: MEItron) One of the first hybrid tea roses to win the prestigious ADR contest in Germany, having been observed there for 3 years under no spray conditions and found to have excellent disease resistance for its type. This remarkable rose bears the name of a remarkable rose breeder, in honor of his 100th birthday. The large, high-centered blooms of soft, shell pink emit a wonderful fragrance that everyone identifies with a "real rose." Dark green, semi-glossy foliage rounds out the package of this multiple award winner. Zone 5 hardy.

HYBRID TEA

(Var: MAClanoflon) Watch your head, helm's alee! You'll like the cut of Full Sail's jib. In the garden it provides a frothy display of creamy white blooms on nearly thornless canes and it's guaranteed to take the cup at the show. This intensely fragrant sport of New Zealand will prove seaworthy in gardens from coast to coast. Like New Zealand, it has tough, disease resistant, shiny dark green foliage that contrasts perfectly with its flowers. Be sure to hold on tight, otherwise the intense, heady fragrance is sure to knock you overboard.

Kardinal™

HYBRID TEA

(Var: KORlingo) This superbly formed, pure scarlet rose has such heavy substance that it seems to take forever to become full blown. Just barely large enough to qualify as an exhibition variety, it makes up for it in productivity since its original destiny was a cut flower. Dark green, leathery foliage is so resistant to disease you almost know before you sniff that it isn't going to be very fragrant. The upright plants tend to build upon themselves during the summer and are thankfully quite hardy.

Moonstone™

HYBRID TEA

(Var: WEKcryland, aka: Cadillac DeVille) This exhibition gem is a very large pure white that has a delicate pink edge on each petal giving it a fragile-as-porcelain look. But don't be deceived because it has substance, form, and vigor – everything you want in a great show rose. The plant is clothed in leathery, dark green foliage with strong upright stems. Will do best where the weather is hot.

Height: 4-6' **Petals:** 30-35 **Flower Size:** 5-7"

Mother of Pearl™

GRANDIFLORA

(Plant Patent #18707, Var: MElludere) Luminous blooms add grace and style both in the vase and the landscape. The flowers of soft, light pink have a deeper shaded heart and almost appear to glow from within. The elegant color goes with just about anything and the disease resistance of the semi-glossy, dense foliage means you can plant it just about anywhere. Floriferous plants perform as well in cooler climates as in heat and humidity. Zone 5 hardy. Grown own root.

Neil Diamond

HYBRID TEA

(Plant Patent #27272, Var: WEKdereroro) With Rock & Roll in its lineage it makes sense to name this rose after Hall-of-Famer Neil Diamond. Just like his music, the performance of this plant transcends expectations. Not only is it gorgeous to look at, with glossy leaves and unusual pink blooms speckled with white, but it is an absolute scent-sation with an intense, classic rose fragrance. An upright growth habit and long stems make this hybrid tea phenomenal for cutting, so the show can go on indoors!

Neptune

Neptune

HYBRID TEA

(Plant Patent #16614, Var: WEKhilpurnil) Intense, sweet fragrance and elegant, classic form combine to make this rose more than a myth. For fun, imagine the sturdy, upright clusters of exquisite flowers as the trident of undersea's King Neptune. Each flower boasts lavender petals that are crowned with subtle purple edges, and the green, glossy foliage maintains a beauty that resists disease. Will require some disbudding for you exhibitors.

New Zealand

HYBRID TEA

(Var: MACgenev) Though its large, luminous shell pink blooms open a little too fast for exhibition, New Zealand has everything else going for it. The foliage is very dark green with a lustrous quality that is surprisingly clean. Since its introduction, this beauty has maintained its popularity simply because its unmatched fragrance keeps finding new noses. Its vigor will require you to disbud the many side buds if you want long stemmed single flowers, but let them all bloom and you can cut big sprays of large, aromatic flowers.

HYBRID TEA

(Var: MACauck) Exquisite blooms of pure, clear red have all the qualities of a great exhibition rose and are borne so prolifically that they can be depended upon for cutting all season long. The plants are tall, long-stemmed, and covered with light green, heavily toothed foliage that is quite mildew resistant for its class. Sam McGredy had a strong belief that roses should be fragrant. Alas, this one has little fragrance, but that doesn't stop it from being one of the most popular red roses.

Papa Meilland®

HYBRID TEA

(Var: MEIcesar) Rich, velvety blooms adorn long sturdy stems making this the ultimate cutting rose. Unlike other roses of intense red, the color of this beauty does not fade as the blossom matures. In fact, it deepens in richness and warmth, becoming an intense dark burgundy. It is common for a rose of this color to lack fragrance, but *Papa Meilland* does not follow suit. The perfume is intense and fruity, not just for a red rose, but across the board. This rose has won several awards including the James Alexander Gamble Fragrance Medal from the American Rose Society and was also elected into the World Federation of Rose Societies Hall of Fame.

Peace

HYBRID TEA

Hands down the most popular rose ever hybridized, and still going strong after more than half a century. Big, somewhat spreading, rugged plants will stay clean as long as you don't over fertilize. Some have claimed that this pink edged yellow is deteriorating because of over propagation, but if you go back to the fertilization methods of the era in which it was introduced, gardeners were dependent upon manure and rarely employed commercial plant foods. This plant still appears in rose shows because it seems to survive anywhere.

GRANDIFLORA

This rose has been around for over half a century and is the original member of the grandiflora class. In cool climates, blooms are a shell pink picking up salmon shades where the nights are warm. Nearly thornless plants grow quite tall by fall, producing huge candelabras. With its lustrous, cast iron foliage it is often employed as a shrub because it's almost impervious to disease.

CLIMBER

(Var. WEKmeyer) With pastel pink flowers coming on in clusters of large, fully double blooms, this sport of America is a welcome addition to this class. With the strong clove spice and old rose scent, you'll think you are in heaven when you sniff the flowers. Blooms on new and old wood and will bloom the first season. One that is sturdy enough for cutting.

Pretty In Pink Eden®

CLIMBER

(Plant Patent #20953, Var: Margaret Mae) This resilient climber holds many of the wonderful qualities of Eden, with some definite improvements. The petal count has been increased and the fragrance intensified, while the disease resistance and vigor has been maintained. The deep pink color is also a change from the original Eden and adds to the unique qualities of this repeat bloomer. Zone 5 hardy. *Grown own root.*

Height: 10-12' **Petals:** 70-80 **Flower Size:** 3-3½"
Fragrance: Moderate, floral vintage rose

CLIMBER

(Var: KORwest) This hardy climber is by far one of the nicest to come along. It has a warm, rich apricot-orange color and a lovely perfume. It blooms the first season on both new and old wood. It is the only rose in this color class that will survive the temperature extremes of the colder parts of this country. This one takes the cold and comes back for more. Glossy, disease resistant foliage. Hardy to Zone 4.

Height: 10-12' **Petals:** 18-25 **Flower Size:** 4-5"

PILLAR/CLIMBER

(Hybrid Kordesii) One of the most popular roses for northern climates. It can be kept right on an arbor or trellis without winter protection. The vigorous, free-flowering plants bear a profuse display of deep pink, semi-double flowers in clusters of up to 30 blossoms. Steady repeat keeps the plant clothed in blooms nearly all season. Glossy foliage is resistant to mildew and black spot, keeping the plant clean and attractive. Hardy to Zone 3. Grown own root.

Height: 8-10' **Petals:** 20-30 **Flower Size:** 2-3"

ANTIQUE CLIMBING BOURBON

The non-fading, cerise pink, old-fashioned blooms of this rose have exquisite fragrance. One of the few roses that blooms well in open shade, it can tolerate poor soil and air pollution better than most roses and best of all, the canes are nearly thornless, making them easy to train. Light green, semi-glossy foliage densely lines the stems. Blooming abundantly in late spring, some repeat can be expected, more so in mild climates. Zone 5 hardy. Grown own root.

36" Tree Roses

We are offering 19 varieties of tree roses this season, some of the best varieties that will grow well on standards. Tree roses may be shipped separately from your regular rose order as they require special packing. Please specify which variety and the tree item number. Remember tree roses are more susceptible to damage during cold weather so they do need some sort of winter protection. Complete growing instructions are included with each order. Our tree roses are shipped bareroot with a wooden stake and sheet of burlap for protection when planted. All are husky 2 year-old plants budded on hardy Dr. Huey rootstock. Four grafts ensures big, well-balanced, symmetrical heads.

Information about your order

Hardiness & Rootstock

Winter hardiness of roses is a complex subject. Many factors in addition to temperature can impact rose hardiness such as planting location, cultural practices, plant health, planting depth and adequate winter protection. 'Dr. Huey' was chosen for its vigor and non-invasive qualities. With the majority of budded roses, winter protection must be provided to ensure winter survival in zones colder than Zone 6.

At the end of some descriptions in our catalog you will find the notation 'Grown own root.' Many of our shrub roses and an increasing

number of hybrid teas, grandifloras, floribundas and miniatures are very easily and successfully grown on their own roots. This gives them the ability to come back true-to-name even when severe winter damage has occurred. For these roses, we will often list the zone at which the crown of the plant is reliably winter hardy.

There are some differences in the appearance of bare root budded vs. own root roses.

Our two year old #1 grade budded roses will have a minimum of at least three strong, substantial canes. Own root roses often (not always) tend to be smaller in size with thinner canes. This will vary by variety. They are grown for several months in pots and then lined out into fields for a season to develop strong root systems. If you live in cold climate areas (zone 5 and colder), we highly recommend giving own root roses a try. Please bear in mind that all newly planted roses need time to settle in to their new homes, especially own root roses. Because of this, the first blooms may differ from our description in color, size, petal count, or fragrance. Roses are very long-lived, and given time should develop their proper characteristics.

Hardiness Zones

This simplified plant zone map issued in 2012 is available to view in full detail online. There is an interactive online feature that allows you to find your hardiness zone by typing in your zip code.

Type this link into your browser, <http://planthardiness.ars.usda.gov/PHZMWeb/?> or follow the Zone Map link on our website at edmundsroses.com to find your hardiness zone.

The AARS Award for Rose Excellence!

This symbol identifies those roses honored with the coveted All-America Rose Selections award. Each winner has been grown and evaluated by experts in official test gardens across the U.S. The winners have displayed consistently superior performance. You can plant these roses with confidence that they will thrive in your own garden.

The ADR Quality Rose Certificate

ADR trials are conducted at 11 different sites throughout Germany to evaluate new varieties on characteristics such as winter hardiness, number of flowers, attractiveness and scent of flower, growth type, and resistance to pests and diseases. ADR varieties are grown at trial sites for three years without the use of chemical pesticides to evaluate their natural beauty and strength. Only varieties that exceed the extremely tough standards set forth are decorated with this prestigious award.

The Edmunds' Guarantee

We will deliver dormant, top-grade, true-to-name roses. We guarantee they will grow and bloom the first season providing our recommended planting instructions (included with every order) are followed and the roses are planted within the optimal planting time for your zone. A credit voucher will be issued for any rose purchased and planted in late winter and early spring 2022 that fails to grow, provided we are notified by August 1, 2022. Sale items will only be issued a credit voucher for the purchase price. This guarantee may be considered null and void if you purchase and plant our roses past the optimal planting time for your zone. In no case will we be liable for any amount greater than the purchase price.

Gardening Aids and Hardware products are satisfaction guaranteed against material and workmanship defects. If not fully satisfied, the product may be returned for a replacement or refund.

Shipping charges are not refundable.

Although every precaution is taken to ensure accuracy, errors in price, quantity and/or specifications may occur. We reserve the right to correct such errors.

Shipping Dates

Please research your specific zone and region to make certain that you are ordering at the proper time. If it is past the optimal planting time for your zones, (noted below) it may be best to postpone your bare root rose purchase until next year. For optimum success with bare root roses, daily temperatures should be in the range of 40°F to 70°F. We do not recommend planting when average daytime temperatures consistently reach 75°F or higher.

ZONE	(EST.) START OF SHIPPING	OPTIMAL PLANTING TIME
ZONES 8 TO 11	Mid to late January	January to Mid March
ZONE 7	Late February	Mid March to end of April
ZONE 6	April	April to end of May
ZONE 3 TO 5	May	May to middle of June

Future Catalogs

Your order will guarantee free catalog service from us for the next 4 years. Prices in this catalog are effective until September 30, 2022 and are subject to stock on hand.

Check Acceptance Policy

When you provide a check payment, you authorize us to process a one-time ACH debit entry for up to the amount of your check. You also authorize us to process credit adjustments to your bank account if a refund is needed. If you have insufficient funds to cover your payment, you authorize us to collect your payment plus a fee of \$40 from your account. Funds may be withdrawn from your account on the same day we receive your payment. Sending a paper check increases processing time and you may not receive your check back from your financial institution.
