

A woman in a white polka-dot dress and black belt is riding a blue bicycle. She is holding a large red umbrella. The background is a large-scale mosaic of blue and red flowers with yellow centers. The floor is dark and reflective.

Mosaic Collection

Un viaggio in 23 tappe raccontate con la capacità descrittiva di un vocabolario cromatico ineguagliabile. SICIS seleziona e combina i 179 toni di vetro di cui è la sola a disporre, gioca con le superfici specchiate e iridescenti, alterna opacità e trasparenze per dare vita a un giardino multiforme e spettacolare. Su eleganti texture di sfondo sbocciano motivi floreali ora ispirati alle ardenti atmosfere spagnole, ora alle delicate primavere provenzali, da Barcellona ad Arles, e poi ancora da Venezia a Tunisi lungo il percorso liquido del mare come in quello dell'immaginazione. Mediterranea ha tutti i caratteri delle sue città, delle civiltà che intorno ad esse si abbracciano, dei toni dell'ambra come quelli del turchese, della menta come del melograno. I colori si fondono senza confondersi nelle sfumature perfette di un petalo, nei pistilli, nelle venature esatte delle foglie.

Mediterranea è ricerca e sintesi: da una parte, la modularità replicabile e perfetta del mosaico totalmente computerizzato in una miriade di combinazioni fatte di texture di sfondo e soggetti floreali componibili con la massima libertà, dall'altra, la possibilità assolutamente esclusiva di realizzare gli stessi elementi decorativi con la tecnica del mosaico artistico per un risultato ancora più dettagliato e unico.

Una soluzione originale a tutto vantaggio di nuove ipotesi progettuali e possibilità realizzative, in grado di decorare superfici di notevoli dimensioni con piani di posa semplici da applicare e allo stesso tempo altamente personalizzabili, in cui combinare la scelta dei pattern, il decoro, la sua tecnica di realizzazione e perfino le dimensioni dello stesso, la rotazione fino a 90°, la frequenza e la disposizione lungo la superficie con risultati mai visti prima.

A 23-stage journey told with the descriptive capacity of an unrivalled chromatic dictionary.

SICIS selects and blends the 179 shades of glass usually employed, playing with the mirrored and iridescent surfaces and alternating matts and transparencies to create a spectacular, multi-form 'garden'. Floral motifs bud forth from elegant textures, some inspired by the ardent Spanish atmosphere, others devoted to delicate Provencal springtimes, from Barcelona to Arles, and yet others from Venice to Tunis, along the liquid path of the sea, as that of the imagination.

Mediterranea has all the characters of its cities and civilisations that embrace around it, with amber hues and turquoise shades, mint and pomegranate. The colours blend without losing themselves in the perfect tones of a petal, pistils, the exact veining of the leaves.

Mediterranea is research and synthesis: on the one hand, the repeated, perfect modularity of the fully-computerised mosaic in a myriad of combinations of background textures and floral subjects to be arranged at will, and on the other, the absolutely exclusive option of creating the same decorative elements with the artistic mosaic technique, for an even more detailed and unique result.

An original solution to the complete benefit of new design hypotheses and development options. One that will decorate large surfaces with lay surfaces that are simply to apply and yet, at the same time, highly personalised. You combine your choice of pattern, decoration, development technique and even dimensions. You can rotate up to 90°, opt for different frequencies and arrangements over the surface. You create your very own unprecedented results.

M e d i t e r r a n e a

Un voyage en 23 étapes avec la capacité descriptive d'un dictionnaire chromatique sans pareil. SICIS sélectionne et combine les 179 tonalités de couleurs de verre qu'elle seule possède, elle joue avec les surfaces en miroir et iridescentes, elle alterne les opacités et les transparences pour créer un jardin multiforme et spectaculaire.

Sur des textures de fond élégantes, s'épanouissent des motifs floraux s'inspirant ici des atmosphères ardentes espagnoles et là des délicats printemps provençaux, de Barcelone à Arles, et puis encore de Venise à Tunis, le long du parcours liquide de la mer comme dans celui de l'imagination.

Mediterranea a tous les caractères de ses villes, des civilisations qui autour d'elles s'enlacent, des tons de l'ambre à ceux du turquoise, de la menthe au grenadier.

Les couleurs se mêlent sans se confondre dans les nuances parfaites d'un pétale, dans les pistils, dans les veinures exactes des feuilles.

Mediterranea est recherche et synthèse: d'une part, la modularité répliquable et parfaite de la mosaïque totalement informatisée dans une myriade de combinaisons faites de textures de fond et de sujets floraux composables avec un maximum de liberté, d'autre part, la possibilité absolument exclusive de réaliser les mêmes éléments décoratifs avec la technique de la mosaïque artistique pour un résultat encore plus détaillé et unique.

Une solution originale favorisant pleinement de nouvelles hypothèses conceptuelles et des réalisations possibles, en mesure de décorer des surfaces de dimensions remarquables avec des plans de pose simples à appliquer tout en étant hautement personnalisables, sur lesquels associer le choix des motifs, la décoration, sa technique de réalisation et même les dimensions de celle-ci, la rotation jusqu'à 90°, la fréquence et la disposition le long de la surface avec des résultats jamais vus jusqu'ici.

Eine Reise in 23 Etappen, erzählt mit der Fähigkeit zur Beschreibung eines chromatischen Vokabulars ohne gleichen. Die Firma SICIS wählt und kombiniert die 179 Farbtöne des Glases, über die nur sie allein verfügt, spielt mit den verspiegelten und schillernden Flächen, wechselt Mattheit und Transparenzen miteinander ab, um einem Garten in vielen und spektakulären Formen Leben zu verleihen. Auf eleganten Texture des Hintergrundes erblühen Blumenmotive, die einmal an die heiße Atmosphäre Spaniens, einmal an den zarten Frühling in der Provence von Barcelona bis Arles, und auch von Venedig bis Tunis entlang des fließenden Weges des Meeres erinnern, wie dem in der Vorstellung, Mediterranea besitzt alle Eigenschaften seiner Städte, der Einwohner, die von ihnen eingeschlossen werden, der bernstein- und türkisfarbenen Töne der Pfefferminze wie auch des Granatapfels. Die Farben verschmelzen ohne sich zu vermischen in den perfekten Nuancen eines Blütenblattes, in den Blütenstempeln, in den präzisen Äderungen der Blätter. Mediterranea ist Forschung und Synthese: einerseits die wiederholbare und perfekte Wiederholbarkeit eines vollkommen auf dem Computer erarbeiteten Mosaiks in einer Unmenge von Kombinationen bestehend aus Texture des Hintergrundes und Blumenmotiven, die sich ohne Einschränkungen kombinieren lassen, andererseits die unbedingt einzigartige Möglichkeit, die gleichen Dekorelemente mit der Technik des künstlerischen Mosaiks für ein noch detaillierteres und einzigartigeres Ergebnis herzustellen. Eine originelle Lösung ganz zum Vorteil neuer Entwurfs und Ausführungsmöglichkeiten, die in der Lage ist, große Oberflächen mit einfach anzubringenden und gleichzeitig stark kundenspezifischen Verlegeflächen zu gestalten, bei denen die Auswahl der Pattern, des Dekors, seiner Herstellungstechnik und schließlich auch die Abmessungen, die Drehung bis zu 90°, die Häufigkeit und die Verteilung auf der Oberfläche mit nie zuvor erreichten Ergebnissen kombiniert werden.
