**WILDFLOWER TURF**<sup>®</sup>  
*the first name in wildflower turf*

# Welcome

This guide has been produced to give an overall view of the product range at Wildflower Turf Limited.

As you will see the company has a wide range of products that have been developed over a number of years to deliver reliable results in a range of different environments.

Wildflower Turf Limited are recognised as the UK's leading supplier of wildflower turf and related products and are proud to have been recognised in a number of National Awards.

The company has its own research facility and is constantly striving to improve and widen its product offering.

With the knowledge gained over the years, we have grown numerous bespoke wild flower mixes for a wide range of customers, including several bespoke mixes for the 2012 Olympics.

We would welcome any enquiry you have and look forward to working with you to produce colourful, biodiverse and stunning landscapes.

# Wildflower Landscape Turf

## Key product points:

A UK native Wildflower Turf suitable for a range of soil types.

All ground landscaping applications from 30m<sup>2</sup> to 10,000m<sup>2</sup>.

Shade and drought tolerant.

Low Maintenance – one to two cuts a year

### Stock item.

## About the Product:

As a core product Wildflower Turf has been developed by the company using its unique 'soil-less' system that is weed suppressing, easy to handle and delivers a guaranteed wildflower environment. The turf is made up of 34 UK native wildflowers and grasses, with a minimum of 50% wildflowers.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

## Typical Applications:

Gardens, parks, municipal areas, private grounds and estates, education/outdoor classrooms

## Specification:

### Species

<b>Grasses:</b>			
Crested Dogstail (Cynosurus cristatus)	Sheep's Fescue (Festuca ovina)	Slender Creeping Red Fescue (Festuca rubra ssp. littoralis)	
<b>Flora:</b>			
Autumn Hawkbit (Scorzoneroides autumnalis)	Betony (Stachys officinalis)	Birdsfoot Trefoil (Lotus corniculatus)	Bladder Champion (Silene vulgaris)
Cats Ear (Hypochoeris radicata)	Common Knapweed (Centaurea nigra)	Common Sorrel (Rumex acetosa)	Common Toadflax (Linaria vulgaris)
Common Vetch (Vicia sativa ssp. segetalis)	Cowslip (Primula veris)	Field Scabious (Knautia arvensis)	Greater Hawkbit (Leontodon hispidus)
Lady's Bedstraw (Galium Verum)	Meadow Buttercup (Ranunculus acris)	Meadow Cranesbill (Geranium pratense)	Meadowsweet (Filipendula ulmaria)
Musk Mallow (Malva moschata)	Ox Eye Daisy (Leucanthemum vulgare)	Perforate St Johns Wort (Hypericum perforatum)	Ragged Robbin (Lychnis flos-cuculi)
Red Champion (Silene dioica)	Ribwort Plantain (Plantago lanceolata)	Salad Burnet (Sanguisorba minor)	Self-heal (Prunella vulgaris)
Tufted Vetch (Vicia cracca)	Wild Carrot (Daucus carota)	Wild Marjoram (Origanum vulgare)	Wild Red Clover (Trifolium pratense)
White Champion (Silene latifolia)	Yarrow (Achillea millefolium)	Yellow Rattle (Rhinanthus minor)	

## Maintenance

Cutting Cycle: Once every autumn  (Summer cut optional)

Watering: For the first 2 weeks to prevent turf from drying out. After which the occasional soak in long periods of dry weather.

## Product Weight

Typical per m<sup>2</sup>: 18kg

Typical Saturated per m<sup>2</sup>: 22kg

## Width & Length

\*Roll size: 0.77 x 1.62 (1.25m<sup>2</sup>)

## Min / Max Established Height††

Min: 30cm

Max: 75cm

## Delivery

# Wildflower Bespoke Turf

## Key product points:

Wildflower Turf grown to order

Minimum 400m<sup>2</sup> order size

### Grown to order

## About the Product:

Wildflower Turf Ltd uses its unique 'soil-less' system to produce turf that is grown to order. The customer chooses their own seed mix (seeds can be supplied by the customer) and within 12 weeks (depending on time of season), the bespoke turf is ready for delivery.

Wildflower Turf Ltd uses its extensive experience to work closely with the customer to ensure a suitable mix is chosen to provide the required results.

## Typical Applications:

Geographical region requiring a native, local provenance seed mix, Aesthetic appeal – specific colours, Regulatory requirements (e.g. BREEAM), Wet, dry, shaded or site specific requirements e.g. soil type

## Specification:

Seed mix specified by the customer

### Maintenance

Dependent on mix

# Wildflower Border Turf

## Key product points:

A non-native Wildflower Turf suitable for a range of soil types.

A highly colourful, low maintenance and cost effective alternative to conventional garden flower beds and borders.

Garden and urban applications from 30m<sup>2</sup> to 1,000m<sup>2</sup>.

Shade and drought tolerant.

Low Maintenance – one to two cuts a year.

## Stock item

## About the Product:

Wildflower Border Turf has been developed by the company to provide a highly colourful, low maintenance and cost effective alternative to conventional garden flower beds. It is weed suppressing, easy to handle and delivers a guaranteed colourful flowering environment. The border mix has been specifically designed to extend the flowering season with a variety of colour throughout the season. The turf is made up of 34 UK native wildflowers and grasses, with the addition of approximately 19 non-native perennial flowers, subject to availability.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

## Typical Applications:

Gardens, parks, municipal areas, private grounds and estates, verges and roundabouts

## Specification:

### Species

<b>Grasses:</b>			
Crested Dogstail (Cynosurus cristatus)	Sheep's Fescue (Festuca ovina)	Slender Creeping Red Fescue (Festuca rubra ssp. littoralis)

# Wildflower Shade Tolerant Turf

## Key product points:

A wildflower turf for all soil types.

All ground applications designed to perform well around trees and shaded areas. From 10m<sup>2</sup> to 10,000m<sup>2</sup>.

Shade and drought tolerant.

## Stock item

## About the Product:

This Wildflower turf mix has been specifically designed to be installed around high shaded areas, specifically around trees, but is not restricted to this application, it will also thrive in open meadow sites where the extra species will flourish.

The turf has been developed by the company using its unique 'soil-less' system that is more drought tolerant than other more conventional methods.

The turf has a wider selection of flowers and is made up of 41 different species of wildflowers and grasses, subject to seed availability, with a minimum of 75% wildflowers.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

## Typical Applications:

Shaded sites such as around trees and areas of low direct sunlight, also open wildflower meadows.

## Specification:

### Species: 41 subject to seed availability

<b>Grasses:</b>			
Sheeps fescue (Festuca ovina)	Crested dogstail (Cynosurus cristatus)	Yellow Oatgrass (Trisetum flavescens)	
<b>Flora:</b>			
Autumn Hawkbit (Leontodon autumnalis)	Betony (Stachys officinalis)	Birdsfoot Trefoil (Lotus corniculatus)	Cats Ear (Hypochaeris radicata)
Common Knapweed (Centaurea nigra)	Common Sorrel (Rumex)	Common Toadflax (Linaria vulgaris)	Common Vetch (Vicia sativa)
Cowslip (Primula veris)	Dames Violet (Hesperis matronalis)	Field Scabious (Knautia arvensis)	Lady's Bedstraw (Galium Verum)
Kidney Vetch (Anthyllis vulneraria)	Meadow Buttercup (Ranunculus acris)	Meadow Cranesbill (Geranium pratense)	Meadow Vetchling (Lathyrus pratensis)
Meadowsweet (Filipendula ulmaria)	Musk Mallow (Malva moschata)	Ox Eye Daisy (Leucanthemum vulgare)	Pepper Saxifrage (Silaum silaus)
Ragged Robin (Lychnis flos-cuculi)	Red Campion (Silene dioica)	Ribwort Plantain (Plantago lanceolata)	Rough Hawkbit (Leontodon hispidus)
Sainfoin (Onobrychis vicifolia)	Salad Burnet (Sanguisorba officinalis)	Self Heal (Prunella vulgaris)	Spiny Restharrow (Ononis spinosa)
St Johns Wort (Hypericum perforatum)	Tufted Vetch (Vicia cracca)	White Campion (Silene alba)	Wild Carrot (Daucus carota)

Wood sage (Teucrium scorodonia)	Wild Marjoram (Origanum vulgare)	Wild Mignonette (Reseda lutea)	Wild Red Clover (Trifolium pratense)
Yarrow (Achillia millefolium)	Yellow Rattle (Rhinanthus minor)		

**Maintenance**

Cutting regime: Once every autumn, collection of cuttings is essential. If installing around trees, extra care and attention must be applied to the collection of leaf material and should be cleared immediately to prevent mulching and the introduction of nutrients.

Watering: For the first two weeks to prevent turf drying out, after which occasional soak in long dry periods.

# Wildflower Roof Turf

## Key product points:

A UK native Wildflower Turf suitable for green roof applications.

All green roof applications from 10m<sup>2</sup> to 10,000m<sup>2</sup>.

Developed to minimise irrigation and to thrive in this particular environment.

Shade tolerant.

Low Maintenance – one cut per year.

## Stock item

## About the Product:

Wildflower Roof Turf has been developed by the company using its unique 'soil-less' system that is more drought tolerant than the landscape product. It is easy to handle and delivers a guaranteed wildflower environment on a roof. The roof turf is made up of 34 UK native wildflowers and grasses, with a minimum of 50% wildflowers.

This product can be used in conjunction with our unique Wildflower Roof Substrate. This substrate has been developed to support plant growth whilst free-draining and is lightweight.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

## Typical Applications:

Public Buildings, private houses, garden buildings, garages, containers, wall capping

## Specification:

### Species

<b>Grasses:</b>			
Crested Dogstail (Cynosurus cristatus)	Sheep's Fescue (Festuca ovina)	Slender Creeping Red Fescue (Festuca rubra ssp. littoralis)	
<b>Flora:</b>			
Autumn Hawkbit (Scorzoneroides autumnalis)	Birdsfoot Trefoil (Lotus corniculatus)	Black Medick (Medicago lupulina)	Bladder Campion (Silene vulgaris)
Clustered Bellflower (Campanula glomerata)	Common Knapweed (Centaurea nigra)	Common Poppy (Papaerva rhoeas)	Common Spotted Orchid (Dactylorhiza fuchsii)
Common Toadflax (Linaria vulgaris)	Common Vetch (Vicia sativa ssp. segetalis)	Corncockle (Primula veris)	Cornflower (Centaurea cyanus)
Cowslip (Primula veris)	Hoary Plantain (Plantago media)	Lesser Stitchwort (Stellaria graminea)	Musk Mallow (Malva moschata)
Perforate St John's-wort (Hypericum perforatum)	Rough Hawkbit (Leontodon hispidus)	Self-heal (Prunella vulgaris)	Scarlet Pimpernel (Anagallis arvensis)
Sheep's-bit (Jasione montana)	Small Scabious (Scabiosa columbaria)	Thrift (Armeria maritima)	Viper's Bugloss (Echium vulgare)
Wild Basil (Clinopodium vulgare)	Wild Marjoram (Origanum vulgare)	Wild Pansy (Viola tricolor)	Wild Red Clover (Trifolium pratense)
Wild Thyme (Thymus polytrichus)	Yarrow (Achillea millefolium)	Yellow Rattle (Rhinanthus minor)	

## Maintenance

Cutting Cycle: Once every autumn

Watering: For the first 2 weeks to prevent turf from drying out. After which the occasional soak in long periods of dry weather. Consider irrigation.

# Wildflower Roof Turf PLUS

## Key product points:

A Wildflower Turf suitable for green roof applications.

All green roof applications from 10m<sup>2</sup> to 10,000m<sup>2</sup>.

Developed to further minimise irrigation with the inclusion of eight SEDUM varieties.

Low Maintenance – one cut per year.

## Stock item or grown to order

## About the Product:

Wildflower Roof Turf Plus offers an alternative to pure sedum green roofs. It is easy and light to handle, and quick to establish, combining 4 annuals, 27 perennials, 3 grasses and 8 sedum varieties. The inclusion of sedum gives extra drought tolerance over Wildflower Roof Turf. This product is suitable where access and/or location limit irrigation use.

This product can be used in conjunction with our unique Wildflower Roof Substrate. This substrate has been developed to support plant growth whilst free-draining and is lightweight.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

# Wildflower Roof Substrate

## Key product points:

A specific growing medium for Wildflower Roof Turf and Roof Turf Plus.

All green roof applications from 10m<sup>2</sup> to 10,000m<sup>2</sup>.

Specifically developed to support wildflower growth on green roofs.

## Stock item

## About the Product:

Wildflower Roof Turf Substrate is a dedicated growing medium to support wildflower growth on green roofs. It is easy to handle and apply, and can be supplied in a unique grow-bag format or in bulk bags.

In line with our environmental policy, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. These ingredients are carefully blended to suit the green roof environment.

## Typical Applications:

Public Buildings, private houses, garden buildings, garages, containers, wall capping, green walls

## Specification:

# Wildflower Show Turf

## Key product points:

A mature Wildflower Turf with a strong, robust root mass for clean, easy handling.

Supplied rolled or unrolled.

Suitable for indoor and outdoor venues or special occasion events.

Adaptable to suit customer requirement.

## Stock item or grown to order

## About the Product:

Based on the core product, Wildflower Turf Ltd has developed a lightweight and strong Wildflower Turf for use in the entertainment and events industry.

This turf is available in a range of heights and can be supplied rolled or unrolled (to maintain product integrity).

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water.

## Typical Applications:

Filmsets, gardening shows, theatre productions, weddings, parties and special occasion events

# Species Rich Lawn Turf

## Key product points:

A lawn turf that includes 26 species

All ground landscaping applications from 400m<sup>2</sup> to 10,000m<sup>2</sup>.

Shade and drought tolerant.

400m<sup>2</sup> minimum order

## Stock item or grown to order

## About the Product:

This turf is used as an alternative to a standard monoculture grass lawn, with improved biodiversity to help meet regulatory standards such as BREEAM and the Code for Sustainable Homes.

This biodiverse lawn is treated in the same way as a conventional lawn (regularly mown and fertilised) but the flowering species included in the mix are able to survive and thrive with this regime. This is not a colourful solution, but it is species rich.

## Typical Applications:

Lawns, Grassed areas that are subject to regular mowing, Grassed areas that are subject to regular wear.

## Specification:

### Species

<b>Grasses:</b>			
Anthoxanthum odoratum (Sweet vernal grass)	Festuca rubra trichophylla	Festuca rubra commutata (Chewing's Fescue)	Lolium perenne (dwarf cultivar)
Phleum bertolonii (Smaller Cat's-tail)	Poa pratensis (Common Meadow-grass)		
<b>Flora:</b>			
Achillea millefolium (Yarrow)	Bellis perennis (Daisy)	Campanula rotundifolia (Harebell)	Centaurea nigra (Common knapweed)
Clinopodium vulgare (Wild Basil)	Conopodium majus (Pignut)	Galium Verum (Lady's Bedstraw) Galium mollugo (smooth bedstraw)	
Lathyrus pratensis (Meadow Vetchling)	Lotus corniculatus (Bird's-foot Trefoil)	Medicago lupulina (Black medick)	Origanum vulgare (Wild majoram)
Prunella vulgaris (Self-heal)	Ranunculus acris (meadow buttercup)	Rumex acetosa (Garden Sorrel)	Sanguisorba minor (Salad Burnet)
Stachys officinalis (betony)	Trifolium (sub to) pratense (red clover)	Trifolium dubium (Suckling Clover)	Trifolium repens (White Clover)

## Maintenance

Regular mowing, occasional fertilising

Watering: For the first 2 to 4 weeks to prevent turf from drying out.

# Enkazon Turf

## Key product points:

Incorporates Enkamat 7010 erosion control mesh

Instant soil stabilisation

Hard Wearing

2kN/m strength

400m<sup>2</sup> minimum order

## Grown to order

## About the Product:

Enkazon Turf incorporates Enkamat, a three dimensional erosion control mesh, and is grown using the soil-less turf principles. Enkazon turf provides instant soil stabilisation as soon as it is laid. The 2kN/m<sup>2</sup> strength of the netting protects the roots of the plant within the turf and the soil profile.

## Typical Applications:

Dam spillways

River banks

Bioswales

Storm water ditches

## Specification:

### Species:

To suit clients requirements.

### Maintenance:

Dependent on seed mix.

Watering: For the first 2 weeks to prevent turf from drying out.

### Netting:

Three dimensional polyamide matting

### Product Weight:

Typical Dry per m<sup>2</sup>: 18-20kg

Typical Saturated per m<sup>2</sup>: 30kg

### Width & Length:

2 x 20m (40m<sup>2</sup>)

### Delivery:

Delivery Method	Roll sizes	*m <sup>2</sup> Per Roll
Bespoke - Haulier	2m x 20m	40m <sup>2</sup> *
Collection	Optional	-

Enkazon

# Bidimat Turf

## Key product points:

Incorporates Bidim erosion control blanket

Instant soil stabilisation

Hard Wearing

Tear proof

8kN/m strength

400m<sup>2</sup> minimum order

## Grown to order

## About the Product:

Bidimat Turf is custom grown to order and incorporates Bidim, a non-woven, needle punched polyfelt blanket. Its 8kN/m<sup>2</sup> strength protects the roots of the plant within the turf and the soil profile, against washing and mechanical damage.

The roots of the grass grow through the Bidim as the turf develops, to produce a turf mat where the Bidim is fully incorporated. This very tough product can help in areas prone to vandalism as it offers a tear proof mat.

## Typical Applications:

Dam spillways

River banks

Bioswales

Storm water ditches

## Specification:

### Species:

To suit clients requirements.

### Maintenance:

Dependent on seed mix.

Watering: For the first 2 weeks to prevent turf from drying out.

### Netting:

Non-woven needle punched polyfelt fabric

### Product Weight:

# Coronet Lawn Turf

## Key product points:

Larger than average roll size

Strong

Weed Free

Lightweight.

Fast to establish and use

## Stock item

## About the Product:

The original soil-less lawn turf, Coronet turf is lightweight and strong for handling purposes and is very quick to establish once laid; giving a top quality, weed free, hardwearing lawn.

## Typical Applications:

Lawns, golf tees, croquet lawns

## Specification:

### Species

Grasses:			
15% Cassiopeia - Perennial ryegrass (Lolium perenne)	15% Evita - Perennial ryegrass (Lolium perenne)	35% Herald - Strong creeping red fescue (Festuca rubra spp.)	5% Highland - Browntop Bent (Agrostis capillaris)
10% Limousine - Smooth stalk meadow grass (Poa pratensis)	20% Musica - Chewing fescue (Festuca rubra spp.)		

### Maintenance

Cutting Cycle: Regular weekly cutting regime

Watering: During establishment and drought periods

### Netting

Fine lightweight netting

### Product Weight

Typical per m<sup>2</sup>: 18kg

Typical Saturated per m<sup>2</sup>: 22kg

### Width & Length

\*Roll size: 0.77 x 1.62 (1.25m<sup>2</sup>)

### Delivery

Delivery Method	Pallet Size	*m <sup>2</sup> Per Pallet
Bespoke - Haulier	1.5m x 1.2m	80m <sup>2</sup> *
Courier	1m x 1.2m	50m <sup>2</sup> *
Collection	Optional

# Wildflower SUD Turf

## Key product points:

A wildflower turf for all soil types.

All SuD Systems and Bio-Swale applications. From 10m<sup>2</sup> to 10,000m<sup>2</sup>.

Shade and drought tolerant, suitable for periodic flooding and assists in flood water dispersal and pan breakup.

### Stock item

## About the Product:

This Wildflower Turf solution has been designed by our research and development department, using our experience with the installation of Wildflower Turf in Sustainable Urban Drainage Systems within the UK and liaising with Landscape and Ecology professionals.

The species selected, have been chosen to assist in the breakup of pan or soil compaction for maximum water dispersal, whilst remaining established in times of drought or periodic flooding. This solution remains aesthetically and environmentally pleasing, introducing improved biodiversity with very low maintenance required.

This turf has been developed by the company using its unique 'soil-less' system that is more drought tolerant than other more conventional methods.

The turf is made up of 37 different species of wildflowers and grasses, subject to seed availability, with a minimum of 50% wildflowers.

To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water. The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.

## Typical Applications:

Bioswale and water run-off integrated with Sustainable Urban Drainage Systems.

## Specification:

### Species 37 species – Subject to seed availability.

Flora:			
Autumn Hawkbit (Scorzoneroides autumnalis)	Betony (Stachys officinalis)	Birdsfoot Trefoil (Lotus corniculatus)	Cats Ear (Hypochaeris radicata)
Bladder Campion (Silene vulgaris)	Tufted Vetch (Vicia cracca)	Common Knapweed (Centaurea nigra)	Common Vetch (Vicia sativa)
Common Sorrel (Rumex acetosa)	Yellow Rattle (Rhinanthus minor)	Common Toadflax (Linaria vulgaris)	Lady's Bedstraw (Galium Verum)
Cowslip (Primula veris)	Field Scabious (Knautia arvensis)	Greater Hawkbit (Leontodon hispidus)	Wild Carrot (Daucus carota)
Wild Marjoram (Origanum vulgare)	Meadow Buttercup (Ranunculus acris)	Meadow Cranesbill (Geranium pratense)	Yarrow (Achillea millefolium)
Meadowsweet (Filipendula ulmaria)	Musk Mallow (Malva moschata)	Ox Eye Daisy (Leucanthemum vulgare)	Wild Red Clover (Trifolium pratense)
Perforate St Johns Wort (Hypericum perforatum)	Ragged Robin (Lychnis flos-cuculi)	Red Campion (Silene dioica)	White Campion (Silene latifolia)
Ribwort Plantain (Plantago lanceolata)	Salad Burnet (Sanguisorba minor)	Self-heal (Prunella vulgaris)	

<b>Grasses:</b>			
Sheeps fescue (Festuca ovina)	Crested dogstail (Cynosurus cristatus)	Yellow Oatgrass (Trisetum flavescens)	Slender Creeping Red Fescue (Festuca rubra ssp. Littoralis)
Smooth Stalked Meadow Grass (Poa pratensis)	Sweet vernal Grass (Anthoxanthum odoratum)		

## Maintenance

Cutting regime: Cut once every autumn, with the collection of cuttings.

Watering: For the first two weeks to prevent turf drying out, after which occasional soak in long dry periods.

## Product Weight

Typical dry per m<sup>2</sup>: 18kg

Typical saturated per m<sup>2</sup>: 22kg

## Width & Length

\*Roll size: 1.62m x 0.77m (1.25m<sup>2</sup>)

Or 2m x 20m (40m<sup>2</sup>)
