## INTRODUCTION

The information in *Daffodils to Show and Grow* is taken from the *Tom D. Throckmorton Daffodil Data Bank* of the ADS and includes those daffodils likely to be seen in shows, in gardens, or in commerce. Many catalogs from around the world have been scoured to make sure those flowers in commerce are listed here.

It should be noted that when alphabetizing, the program makes note of spaces in a cultivar name, so that 'Gold Velvet' comes ahead of 'Goldcourt' and that 'Moon Valley' comes ahead of 'Moonbird'.

Occasionally the name of a cultivar is followed by one or more pound signs (#). These serve to signal an unusual feature or circumstance which exists in our knowledge of the cultivar. Most commonly the # draws attention to the fact that more than one cultivar bears the name.

The flower name is followed by the classification. Immediately after the classification is a column headed with a "V/I/M/H." When a V appears in this column, it indicates that the flower is variable, either in color or form. An intermediate-sized flower is indicated by an I; PI indicates a flower which may be an intermediate, as no measurements were given at registration. M indicates an ADS-approved miniature, and H indicates a historic flower.

Breeder is the raiser, not the registrant.

Season of bloom is based on a scale of 1 to 7. Season 1 is extra early, Season 6 is extra late; and Season 7 indicates an unusual period of bloom, such as autumn or winter blooming cultivars.

Height indicates the relative height of the plant, based on a scale of 1 to 4. Height 1 indicates an ADS approved miniature.

Year is the date of registration. If registration is long delayed, the date is followed by a < sign. If the cultivar is unregistered, the date of Introduction or exhibition is given, followed by an \*. REMEMBER, SOME TROPHIES REQUIRE THAT THE FLOWER BE REGISTERED.

Ctry gives the country of origin.

Daffodils Distinguished Solely by Botanical Name, now in Division 13, are taken from the RHS *Daffodil Register and Classified List 2008*, as updated, and are listed in the back of the book.

A listing of those cultivars currently on the ADS Approved List of Miniature Cultivars is also at the back of the book.

The *Tom D. Throckmorton Daffodil Data Bank of the ADS* contains most pertinent information about known daffodil cultivars. Parentage, chromosome count, and fertility data are given in addition to information found here. The *Data Bank* is updated annually, and a printout may be purchased from the Society's office at P.O. Box 522, Hawkinsville, GA 30036-0522.

Those with access to computers will find the above information, along with many photos, at [www.DaffSeek.org](http://www.DaffSeek.org).

## ROYAL HORTICULTURAL SOCIETY SYSTEM OF CLASSIFICATION

For garden purposes, daffodils are classified in thirteen divisions. Division number indicates form, while letters indicate color. For example, 2 Y-YYO is a large-cupped daffodil, all yellow except for an orange rim; 1 W-Y is a trumpet daffodil with white perianth (petals) and yellow corona (trumpet).

### **Division 1**

*Trumpet Daffodil  
Cultivars*

One flower to a stem;  
corona (trumpet) as long

as, or longer than, the perianth  
segments (petals)

### **Division 2**

*Large-cupped Daffodil  
Cultivars*

One flower to a stem;  
corona (cup) more than

one-third but less than equal to the  
length of the perianth  
segments (petals)

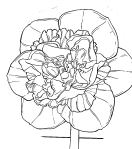

### **Division 3**

*Small-cupped Daffodil  
Cultivars*

One flower to a stem;  
corona (cup) not more than  
one-third the length of the

perianth segments (petals)

### **Division 4**

*Double Daffodil  
Cultivars*

One or more flowers  
to a stem, with

doubling of the perianth segments or  
the corona or both

### **Division 5**

*Triandrus Daffodil  
Cultivars*

Characteristics of *N.*  
*triandrus* predominant:  
usually two or more

pendent flowers to a stem; perianth  
segments reflexed

### **Division 6**

*Cyclamineus Daffodil  
Cultivars*

Characteristics of *N.*  
*cyclamineus* clearly

evident: one flower to a stem;  
perianth segments significantly  
reflexed; flower at an acute angle to  
the stem, with a very short pedicel  
(neck)

### **Division 7**

*Jonquilla and  
Apodanthus Daffodil  
Cultivars*

Characteristics of  
Sections Jonquilla or

Apodanthi clearly evident: one to five  
flowers to a stem; perianth segments  
spreading or reflexed; flowers usually  
fragrant

**Division 8**

*Tazetta Daffodil Cultivars*

Characteristics of the *N. tazetta* group

predominant: usually three to twenty flowers to a stout stem; leaves broad; perianth segments spreading, not reflexed; flowers fragrant

**Division 11**

*Split Corona Daffodil Cultivars*

Corona split—usually for more than half its length

a) Collar Daffodils  
Split-corona daffodils with the corona segments opposite the perianth segments; the

corona segments usually in two whorls of three

**Division 9**

*Poeticus Daffodil Cultivars*

Characteristics of the *N. poeticus* group

predominant: usually one flower to a stem; perianth segments pure white; corona usually disc-shaped, with a green or yellow center and a red rim; flowers fragrant

b) Papillon Daffodils  
Split-corona daffodils with the corona segments alternate to the perianth segments; the corona

segments usually in a single whorl of six

**Division 12**

*Other Daffodil Cultivars*

Daffodil cultivars which do not fit the definition of any other division.

**Division 10**

*Bulbocodium Daffodil Cultivars*

Characteristics of Section

*Bulbocodium* clearly

evident; usually one

flower to a stem; perianth segments insignificant compared with corona; filament and style are usually curved

**Division 13**

*Daffodils*

*Distinguished Solely by Botanical Name*

All species and wild or reputedly wild variants and hybrids
