INTRODUCTION FOR 2003

Greetings to you all

Our flower season in 2002 proved to be one of our most successful with a good number of new and exciting seedlings being selected for further trial from the seed beds, it was especially pleasing for us to be awarded the unique Daffodil Society Gold Medal for our Display at the annual Show at Warwick.

We were also to gain Gold Medal Cards for Displays at The West Cornwall Spring Show, Falmouth, Probus and a large gold from the County Show at Trellisick.

A number of our own varieties have now received the coveted AGM Award of Garden Merit by the Royal Horticultural Society; these are marked as such throughout the catalogue.

Our customers continue to inform us of the prizes and awards they have had from Bulbs supplied by us, so please do let us know of your success (disappointments as well, though please not too many), we all prefer to hear the good news.

You will notice that a number of varieties have, due to the unprecedented demand, had to be marked as sold out, we hope to re-introduce these again in 2004/5

2002 saw the launch of our very successful web site, www.qualitydaffodils.co.uk do have a look it is our intention to develop this during 2003/4, and we are grateful to CHE and DEFRA for their assistance in part of the funding of this project.

For your convenience we are now able to accept payment for your orders by most credit cards.

As ever we continue to add to the list available to you but space prohibits our full collection, so if you do not see the variety you are looking for send me a note, Phone or e-mail with your request, it could well be possible we have a bulb or two.

We shall this year be featuring Displays at the following events.

Devoran Show 15th March

Cotehele Gardens 15th March (we will not be manning the display)

Penzance Show 20th, 21st and 22nd March

RHS Wisely Garden Daffodil Show 15th and 16th April

We look forward to meeting many of you at these events

Best wishes for an enjoyable Daffodil season.

HORTICULTURAL CLASSIFICATION

Cultural Notes

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

DIVISION 2 - LARGE CUPS

"Amber Castle" 2YYW-WYY. (LM) A super garden or show flower, its only fault is its colour classification, it opens a pale yellow and changes to distinct buff pink tones 3 for £3.50

"Auntie Eileen" 2W-P (M) (Easter Moon x Debutante) S151 This has been a consistently good flower with a broad well overlapping perianth of chalky white, the neat corona of soft pink is not completely sunproof, but is superb when picked young. each £2.00 or 3 for £4.50

"Bedruthan" 2W-YYR(L) S521 (High Society x Raspberry Ring) A large flower of different style in this colour combination which has been much admired for several years under seedling number, it is a good show bloom with a broad well overlapping perianth and neat funnel shaped corona that ends in a lovely dark red rim each £8.00

"Bodwannick" "2W-OOY(E) (Foresight x (Arbar x Signal Light) S174 Bodwannick is a bi-product of my 1W-O attempts, it is perhaps not the best of show forms, but has had modest success, it is however an exceptionally vigorous plant, with a flower having a broad perianth and a long brightly coloured corona of apricot orange colour with a narrow band of yellow at the rim. 3 for £3.50

"Bosmeor" 2Y-W (Daydream x OP) S16. Mid-season. A good stem and vigorous plant, the flower is of good medium size with a broad rounded perianth of soft yellow. The full length cup shows a clear reverse and has a neat frill to the rim 3 for £6.50

DIVISION 3 - SMALL CUPS

"Aintree" 3W-O. (EM) (Park Springs x Shinning Light).

This is an excellent show variety with smooth, chalky white broadly overlapping perianth segments, good poise, a neat goblet shaped cup of rich orange, at maturity the perianth does take slight reflex in a manner similar to its parent. An excellent plant and fine flower for show

.....SOLD OUT

"Bethal" 3Y-Y(LM) S342 (Aircastle x Montego)

When first shown this interesting variety won Best Bloom in the Southwest Championship class. I think it has improved since then. The flower opens with a whitish yellow to the broad perianth and soon develops in colour to become a lovely citrus lemon tone throughout

.....each £12.00

"Cheesewring" 3W-WWY(L) S486 (Cool Crystal x Delos)

This flower is large and of good show form. The broadly ovate perianth shows off the shallow bowl shape corona which is pale primrose yellow and white at the base. Tall stem, also excellent as a cut flower

.....£4.00 each or 3 for £8.00

"Fairlawns" 3W-YYO(M) S191 (Corofin x Kimmeridge)

x Merlin). A flower with a broad well overlapping perianth of pure white and an evenly goffered small cup of yellow and a bright orange rim, good for show or the garden, and a strong vigorous plant

.....each £5.00

"Falmouth Bay" 3W-GWW (LM) S389 (Cool Crystal x Delos)

Shown in my winning collections at the County Festival Show, and has been much admired by several knowledgeable experts for several years. The flower is large and round with broad smooth perianth segments, and a bright yellow neatly frilled cup with a deep red rim, a strong plant and an excellent show flower

.....each £4.50

"Gorran" 3W-YYR(LM) S196 (Corofin x Kimmeridge).

Here is a large flower with ovate perianth that is well overlapping and quite acute at the tips. The brightly coloured flatish cup is yellow with a dark red rim. It has won its class several times here in the Southwest and done well in other regions as a pre-released seedling, a very prolific flowerer and a rapid increaser.

.....each £3.00 or 3 for £7.50

"Greenodd" 3W-YYW. (L) This has been much admired at National level. The plant is vigorous and the stem is tall and stiff. Apart from the impeccably smooth perianth and very pretty bowl shaped cup, it is the very pronounced green in the throat of this flower that makes it a super show flower and a must for the exotic flower arrangements

.....each £12.00

"John's Delight" 3W-YYR(M) S316 (Corofin x Kimmeridge)

The main stock of this was acquired and named by the River Society, it is a superb variety for cutting, being most prolific in bloom and a very vigorous plant but has also been much admired as a show winning flower on the benches here in the West Country. We are pleased to be able to introduce and continue to offer this variety to you

.....each £2.50 or 3 for £5.00

.....each £3.00 or 3 for £8.00

.....each £8.00

"Spirit of Rame" 3W-YYR(L) (Corofin x Crenver)

DIVISION 5 - TRIANDRUS HYBRIDS

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

"Budock Bells" 5W-W(L) S98 (Broomhill x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potentialeach £6.00

"St. Day" 5W-Y(LM) S717 (Merlin x Foundling) x *n.triandrus*). This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear coloursSOLD OUT

"Tater Du" 5W-Y (Penril x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits.each £5.00

DIVISION 6 - CYCLAMINEUS HYBRIDS

"Betsy MacDonald" 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind.£6.00

"Carlew" 6Y-Y (ST. Keverne x n.cyclamineus) S6 Early Season. A undisputed Division 6 which has been much admired both at shows and in the field trial beds, the perianth segments are narrow and fully reflexed, the flower is of bright golden yellow, held on a short neck and stiff stem, and is an ideal plant for the windy situationSOLD OUT

"Coombe Creek" 6W-O (LM) S431 (Kea x Foundling). The short stiff stem makes this a perfect plant for the more exposed situation, but the flower is also well suited for the show bench, the ivory white perianth is broad, well overlapped and strongly reflexed, with a long corona of orange with pinkish undertones.each £6.00

"Crofty" 6Y-Y (E) S271 (Perimeter x n.cyclamineus). We have been admiring this charming little variety in our trial beds for some years now, and when shown at the Royal Horticultural Society hall to several distinguished authorities, achieved much acclaim for its dainty charm and cyclamineus characteristics, the cup is short and neat, with a very broadly overlapped perianth of soft golden yellow, excellent for show and the garden.£2.50 each or 3 for £5.00

"Frogmore" 6Y-Y (LM) S210 (Ormeau x n.cyclamineus) We have named this at the request of several successful exhibitors and enthusiasts, it is a little larger than many in this division but does show all the natural characteristics, and has been very successful on the show benches, beautiful solid colour and a strong plant.£5.00 each

"Kathy's Clown" 6W-WWP (M) S432 (Kea x Foundling). Here is a lovely little dwarf plant that has stood the trials in our windswept fields, it is beautifully formed for showing purposes with the broad well overlapped perianth

strongly reflexed, the cup opens with pinkish yellow tones but quickly fades to a clear pink and neatly frilled rim, this one we love and highly recommend.each £4.50

"Kea" 6W-YP (Jenny x 2W-P seedling) S217. Late mid-season. Successfully shown at the R.H.S. This has a good cyclamineus form, the colour and does need a little time to develop each £5.00

"Penril" 6W-O. Mid-season. Another seedling acquired from Brian, this is a much shorter plant and has a typical cyclamineus growth habit. The perianth is not quite pure white but does reflex naturally and the slightly expanded goblet cup is a most interesting coppery orange tone, a very good plant admirably suited to the garden or show5 for £2.50

"Peppercorn" 6Y-WWY (M) S672 (n.cyclamineus x Trumpet Warrior)

Many time a show winner and absolutely gorgeous luminous colours, the blooms open soft yellow and develop as they mature, the stems are short and plant small but strong and of good increase, a distinct reflexing perianth of this classification of flower.

.£25.00 each

"Percuil" 6Y-Y (St Keverne x n.cyclamineus) S3. Early season. A true Division 6 flower with narrow naturally reflexing perianth segments and a typical trumpet, short stemmed and very nice in pots.each £4.00 or 3 for £8.50

"Roscarrick" 6W-P. Late season. Raised by Brian Duncan, this is a seedling stock that I purchased some time ago, and is a particularly fine plant that increases well and is a pretty flower, much admired by all who see it. A little large for some Division 6 critics, but has had many successes on the show benches both here in Cornwall and at national level - very smooth lovely colours3 for £4.50

"Sumo Jewel" 6Y-Y (Arctic Gold x n.cyclamineus) S213 Early season. A sturdy plant with lovely graceful flowers that last a long time on the plant, the reflexing perianth segments of deep yellow do have a slight twist, and the long and narrow waisted trumpet is neatly flanged at the mouth, all to make this a perfect flower for both show and garden.SOLD OUT

"Trehane" 6Y-Y (St Keverne x n.cyclamineus) S212. Early season. Another good Division 6. A strong plant that produces many fine blooms that last a long time on the planteach £2.50

DIVISION 7. JONQUILLA HYBRIDS.

This Jonquilla section is for hybrids that have been bred with the species *n.jonquilla*. The resulting plants vary in stature from quite dwarf to very tall, however they are generally on good stiff stems that can stand a fair amount of wind. Most of the stems do have several flowers on each and without exception all are sweetly scented, which makes them ideal for indoor decoration.

"An-Gof" 7W-GYO(LM) S727 (Lancaster x *n.jonquilla*).

This we believe to be the first of this colour in the Division, it has up to 3 florets on the stem but mostly twos, very scented and of excellent show form, the plant is strong and of good increaseSOLD OUT

"Boscastle" 7Y-Y(L) S111 (Aircastle x *n.jonquilla*). 2 or 3

sweetly scented flowers to a stem with broad smooth and well overlapping perianth segments make this an ideal show quality flower, bulbs often give secondary stems which can only add to its benefits as a perfect plant for the garden or cutting

.3 for £2.50 or 5 for £4.00

"Kit Hill" 7Y-YWW(L) S107 (Aircastle x *n.jonquilla*).

Stems usually with two sweetly scented florets, very smooth and soft pale yellow perianth segments and a neat round cup that fades to ivory white, this flower has already won its class on several occasions and much admired in our trials . .each £2.00 or 3 for £5.00

"Mowser" 7Y-OOR (LM) S557 (Altruist x *n.jonquilla*) Up

to 4 florets on a stiff stem, it is very prolific of bloom with many secondary blooms with 1 to 3 florets, the blooms are neat and rounded, of dark golden yellow with a shallow crown of dark red slightly paler at the base (AM)e.each £10.00

"Penstraze" 7Y-GRR (M) S694 (Montego x *n.jonquilla* var *henriquessi*)

A lovely twin headed and very sweetly scented flower ideal for exhibition and has won its class on many occasions, the richly coloured Yellow and Red blooms with a contrasting Green centre are small and in perfect balance with shorter stem, it is long lasting and appears to stand the weather well.

.£12.50 each.

"St. Piran" 7W-Y (Aircastle x *n.jonquilla*) S108 Late

season. Like our Cornish Saint this flower has been much revered, it has had some good success on the show benches when under number, it is also a particularly good plant and well suited to the garden and stands the weather well, like most in the jonquilla section has a delightful scent, usually two or three florets on the stem.each £2.50 or 3 for £5.00

"Sweet Blanche" 7W-W (M) S220 (Grand Prospect x *n.jonquilla*) Most stems have only one flower but the bulbs will send several secondary stems thus extending the flowering period, this makes for perfect cut or garden variety although it has won its class on many occasions. The scent is sweet and the perianth smooth and opens a soft creamy yellow which fades to white. Very long lasting. . . .each £1.00 or 3 for £2.50

"Treble Two" 7Y-GYY(LM) S222 (Aircastle x *n.jonquilla*)

Named at the request of several admirers of this flower. It has been successfully shown under number for many years. Two or three large rounded flowers to the stem, smooth and very broadly overlapped. A good show flowereach £12.00

"Wheal Coates" 7Y-O(M) S416 (Pinza x *n.jonquilla*) AGM

This is a lovely flower of show quality, beautifully scented and a rounded well overlapped perianth with shallow cup of bright orange, usually two flowers to each stem, with bulbs sending many secondary stems to extend the season.£2.00 each, 5 for £7.50

"Wheal Kitty" 7W-W (Handcross x *n.jonquilla*) S219 Early

season. Named at the suggestion of several noted growers as an ideal plant for the garden, the stem is short and stiff and the flower stands well in bad weather, like many from this division a great many secondary blooms are produced to extend the flowering period, the flowers open with yellow undertone but soon fades out to a clear chalky white, the perianth is broad and sometimes take on a little twist when mature, it has been exhibited with some success and we see no reason why it should not continue to do so.3 for £2.50 or 10 for £6.00

Division 8. The Tazetta Hybrids.

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"Hugh Town" 8Y-O(VE) Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you, highly scented. each £1.00, 3 for £2.50

Division 9. The Poeticus Hybrids

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

"Blisland" 9W-YYR(L) S584 (Corofin x Lady Serena). We have had many successes with this on the show bench, the flowers are pure white with a shallow corona of yellow rimmed in red, of good substance and delightfully scented, we have a good stock available
.....each £5 or 3 bulbs for £10

"Colville" 9W-GYR (Corofin x Crenver) x Crenver) S131 Late season. Named at the request of several enthusiasts, this flower has already featured in the prize winners on several occasions, the perianth opens with greenish undertones, but soon whitens to form a good foil for the brilliantly coloured corona, like all flowers of this kind it will not tolerate the sun and does need to be picked young. .each £7.00

"Kabani" 9W-GYR(L) S742 (Woodland Star x Lady Serena). This is a tall strong growing plant of good constitution, a very consistent show quality flower with a broad well overlapped perianth and a shallow corona of bright yellow and a dark red band with a lovely green centre, we have successfully shown this on several occasions ...
.....SOLD OUT

"Penjerrick" 9W-GYR (L) S554 (Woodland Star x Lady Serena)
This is a larger flower on the style of Lady Serena, but with much more substance and a smoother perianth the shallow crown is very rich in colour with a hint of olive in the throat, I have show this with success on several occasions at the RHS shows in my 5 to 9 group.

- "Arwenack"** 11aY-YYO(EM) S224 (Brandaris x Paricutin). The broad, smooth and flat perianth is well overlapped and a bright Golden Yellow, and is an excellent foil to the six coronal segments opposite and closely overlying the perianth, the outer zone being slightly frilled and deeper orange tone, the plant is vigorous and flowers of a good show quality each £2.50 or 3 for £5.00
- "Bosbigal"** 11a Y-O (Brandaris x Paricutin) S315 Early season. The perianth is broad and well overlapping, a little pointed, and the coronal segments are evenly split and laying flat to the perianth, a vigorous plant and very colourful flower of good show form.5 for £4.50
- "Boscoppa"** 11a Y-O(M) S293 (Obelisk x Tamar Fire) This is a plant of strong vigorous growth - a stiff tall stem that holds the flower with broad overlapping perianth segments, the corona is evenly split and lays flat in six segments to almost cover the length of the perianth, many show successes, we predict this new and exciting variety will have a great future. ... 3 for £5.00
- "Bosinney"** 11a W-WPP(M) S333 (Pearlax x Audubon) A flower that has been much admired under trial, the stems are only of a medium length and flowers seem to resist the weather, to make this the perfect plant for the garden. The perianth is somewhat acute though well overlapped and shows off the very pretty slightly frilled corona to its best. 3 for £4.50
- "Boslowick"** 11aY-O AGM (Gironde x Paricutin) S225. Mid-season. A tall strong plant with a flower of good colour. The perianth is broad and flat, slightly pointed at the tips, with an evenly split cup laying flat against each segment. 3 for £4.50
- "Bosvale"** 11aW-P(LM) S685 (Chenoweth x Rainbow) x Phantom. This is a good decorative bloom, a flat smooth corona of soft peachy pink that lays nicely against the white perianth segments, has been much admired at shows and won its class on several occasions each £15.00
- "Carnyorth"** 11aY-R(EM) S117 (Brandaris x Paricutin) The flower appears to last an extraordinary long time and seems to stand the weather, I have used this for show for many years and has many top awards to its credit. The perianth is slightly pointed but flat and well overlapped with a flat evenly split corona, highly recommended. each £3.00, 3 for £7.50
- "Gillan"** 11aY-YOO(LM)PCe S411 (Brandaris x Falstaff) Has oval perianth segments that are well overlapped of rich yellow. I have successfully shown this for several years. The perianth is broad and well overlapped to show off the round flat evenly split corona to its best. ...each £3.00

"Jack Wood" 11aY-YYO (M) S540 (St Keverne x Tiritomba) AMe

We think this is probably the best show form flower in his division we have yet; beautifully balanced and very smooth the colours are rich golden shades with a flat corona of slightly darker tone with a touch of orange at the rim the vigour of both its parents have been passed on to this plant to make well suited to the Garden, for cutting and for the Showbench. each £8.00

"Jantje" 11aY-O(EM) S113 (Brandaris x Paricutin). Pronounced 'Yan cher' this was named at the special request of the Dalton family for Jan a popular figure in the daffodil fraternity, we are very pleased to release this excellent variety to you. The colours are bright, the plant strong and vigorous, with a proven show record. It has been admired in our trial beds for several years each £4.00 or 3 for £10.00

"Langarth" 11aW-P (LM) S674 (Quiet Day x Phantom)

Not quite an intermediate in size but this is a beautifully formed and colourful little flower on shorter stems, as bonus it is slightly scented, the plant is sturdy and we have on several occasions successfully featured this in our collections at shows £15.00 each

"Max" 11aY-YRR(M) S412 (Gironde x Falstaff).

This is we believe to be one of the best Collar Daffodils yet available. The vigour of this plant is inherited and clearly evident from both the parents, as is the neatness of the round flat coronal segments, beautifully enhanced by the broad well overlapped perianth. A super show flower that we believe will be much sought after each £5.00

"Menehay" 11aY-R (Paricutin x Top Hit)AGM S155. Mid-season. Good perianth with a flat evenly split cup of clear colours, it is of excellent show form, a good plant with stiff stem each £4.50 or 3 for £10.00

"Sparnon" 11aW-GYY (M) S118 (Pearlax x Audubon).
One of our earlier crosses in this Division but we were reluctant to name it, but as the stock built up the vigour and quantity of blooms has made this a most desirable plant for the garden or for cutting, but we have also had some success with it on the show benches, it always attracts attention in our fields, the flowers are white with a soft canary yellow frilled corona with greenish tones at the centre, well liked by our florist friends.

DIVISION 13 - The Species and Wild Forms

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.

INTERMEDIATE SIZE VARIETIES

Many of these varieties have been re-classified from the Miniature section as being just too large in bloom size for the show classes, however the plants are much dwarfier in stature than the standard cultivars and most are well suited for the intermediate classes at show or for the Border and rock Garden.

"Pentire" 11aY-R (M) S686 (Falstaff x Brandaris)

We have been growing this for many years and almost put it aside except for the perfection of bloom and its size, but the vigour and increase has now made this a indispensable and valuable little variety for the "Intermediate" sections the plant and flowers are dwarf and much smaller than its counterparts, but the quality of this little flower is such that it has already won on several occasions both here and in the U.S.A. where it received the accolade of Reserve in the entire Show. £10.00 each

"Radjel" 4Y-R(M) S298 (Paricutin x Tamar Fire). A perfect intermediate size bloom that won its class at the National Shows. The stems are tall and stiff with a small formal double flower of bright golden yellow with rich red petaloids. Like its parents a good grower.each £5.00

"Salakee" 2Y-Y (E) S401 (Ristin x n.cyclamineus). This lovely little flower is a true intermediate, very dwarf and a good grower, despite its pollen parentage there is no reflex in the perianth, but it has inherited the rich golden colour and smoothness of "Ristin", and has many times been a winner in the intermediate classes.each £4.50

"Skilliwidden" 2Y-Y (E) S539 (Ristin x n.cyclamineus) This is a Fun flower named after one of our mischevous, Cornish Pixies (Piskies). The plant and flowers are small, rich in colour and perfectly formed, an ideal intermediate bloom. .£3.00 each or 3 for £7.50
