INTRODUCTION FOR 2004

Greetings to you all.

2003 was a vintage year for us here in Cornwall; we had enough rain to give and sustain good growth to the bulbs and plenty of substance to the flowers and to give us one of the most pleasant and enjoyable spring seasons with our flowers.

We were pleased to be awarded Gold Medals for our displays throughout the Country, and in particular the National Show at Warwick, and at the Bath Show our very first display at this venue, but our greatest Joy was to be awarded the Royal Horticultural Societies coveted Gold Medal for the display at Wisley Garden.

This year we shall again be featuring Displays at;

- Devoran on the 13th March (Display only)
- Penzance on the 18th, 19th and 20th March
- Cotehele House 25th to 29th March (Display only)
- Falmouth Spring Show 27th and 28th
- Eden Project 30th March to 2nd April (Display only)
- Cornwall Garden Society Show at Boconnoc 3rd and 4th April
- Southwest Group Show at Probus Gardens 10th, 11th and 12th April
- The Daffodil Society Show at Warwick 17th and 18th April
- RHS Daffodil Show at Wisley Garden 27th and 28th April

We would like to take this opportunity to congratulate The Royal Horticultural Society on their 200 year bi-centenary celebration, many fine and new plants have been selected by them to commemorate this occasion, we are pleased to be able to offer you their choice selection of Daffodil and Tulip Bulbs, the Tulips are grown especially in Holland.

Please remember, if you do not find what you are looking for in this list please contact us as we just may have the variety in our collection.

Whether you like to just grow, or enjoy the challenge of Showing your flowers, best wishes for an enjoyable year.

Ron and Maureen Scamp

HORTICULTURAL CLASSIFICATION

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

Notes

1. The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
2. Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

DIVISION 1

TRUMPET DAFFODIL CULTIVARS

One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

Cultural Notes

Many people like to grow some Daffodils in pots, indeed there can be no nicer way to enjoy fine flowers than when grown correctly and opened to perfection in the conservatory or greenhouse.

However, the following notes are a guide to and for the benefit of those who would perhaps try this. Today there are many prepared composts available for this purpose, and will suit our needs quite admirably, with perhaps the addition of a little coarse grit to aid drainage, and gentle feeding at flowering time.

After potting, it is essential that the bulbs are kept cool and moist, this is to develop the root system. Plunging the pots outside and covering with a couple of inches of peat or similar substance is the ideal, as should the bulbs be subjected to premature indoor warmth, growth will be weak and often the flower will strangle in the neck of the bulb, also the bulb could be severely checked and die. So a simple rule is to plant early, keep cold, and bring inside to a cool room or conservatory when the flower buds are clearly well out of the bulb. After flowering keep well watered and give an occasional feed for about six to eight weeks, then plant outside in the usual way.

For open ground culture, most garden soils will grow fine daffodils, but the ground should be deeply cultivated and free draining. Should manure or compost be necessary, this should be well rotted and worked into the soil a good spade's depth below the surface. Bulbs should never be in actual contact with manures as this does encourage disease and could be the cause of rotting.

When planting outside, make a hole deep enough to cover the bulbs by at least twice the depth of the bulb. Some of the larger bulbs will need at least 6" of soil covering them. They can then be left undisturbed for several years until lifting and dividing is necessary.

For garden display, a clump always looks better than a straight row; in this way Daffodils can be incorporated into a flower bed or shrubbery. Remember a little feeding at flowering time will benefit the bulbs and assist in producing next year's display. You should not remove the leaves until they are beginning to turn yellow, or for at least eight weeks after flowering.

"Greenodd" 3W-YYW. (L) This has been much admired at National level. The plant is vigorous and the stem is tall and stiff. "Poppy's Choice" 4Y-R(LM) S484 (Golden Aura x Menabilly). The perianth and petaloid segments are in a number of whorls prominently mucroid, and a very dark yellow with the coronal segments deep red. A good show bloom with several successes nationwide, the flowers last a long time. It is a strong plant and makes large bulbs each £4.50 or 3 for £10.00

"Tamar Fire" 4Y-R. Early season. This is the earliest of all doubles to flower. The flower is a little on the small size for show but has won best bloom in Division 4 at national level. It is neat and brightly coloured, always well liked when seen at the early shows, and has an added bonus of being nicely scented. One of my favourites, it is very nice in arrangements. AGM5 for £6.50

"Watersmeet" 4W-O, (LM) S/629 (Jamaica Inn x Gay Kybo) This is a bold rounded flower of strong stems that stand the weather extremely well, it is well formed for show with several layers of pure white perianth segments and prominent bright Orange corona interspersed, a delicate scent can often be detected£20 each

"Westward" 4W-Y. Late mid-season. A full formal double with clear colours, a very strong plant with a stiff stem and good neck to hold the flower perfectly for show3 for £2.95

"Wheal Bush" 4Y-Y (M) S438 (St Keverne x Tamar Fire). A large flower with the perianth and outer segments in several whorls, dark golden colour with the corona segments slightly darker and slightly frilled, we have had good success when showing in our collections.3 for £7.50

St. Day 5W-Y

Tater Du 5W-Y

Budock Bells 5W-W

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage, the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfier in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

"Budock Bells" 5W-W(L) S98 (Broomhill x *n.triandrus*) Up to three florets per stem - chalky white - drooping, the perianth segments are narrow and slightly reflexed, smooth and nicely overlapped - the bulb sometimes gives secondary stems to extend the flowering period. A super garden variety with plenty of show potentialeach £6.00

"St. Day" 5W-Y(LM) S717 (Merlin x Foundling) x *n.triandrus*). This has been much admired by everyone who has seen it growing in the field trials where it has withstood 'all weathers' very well. For show we have success on many occasions. Usually it has 2 or 5 blooms to a stem, it is smooth, well poised and of good clear colourseach £12.50

"Tater Du" 5W-Y (Penril x *n.triandrus*) S374 Mid season. This charming little Triandrus cultivar is ideally suited to the rockery and has consistently produced many stems with 2 or 3 drooping florets to each stem, the perianth segments reflex to show off the widely expanded corona with the stamens and stigma exerted. For those who like to show this has won several first cards and has been admired for several years on our trade exhibits.each £3.50

DIVISION 6 - CYCLAMINEUS HYBRIDS

"Betsy MacDonald" 6W-P(LM) S130 (Foundling x Tangent). This is a most sturdy plant with a flower on short stems that seems to withstand the weather well, has been greatly admired by many visitors to the shows here in Cornwall and has had some success on the show benches. The perianth is broad and well overlapping which reflexes naturally, to show off the vibrant pink corona. It is perhaps a little large for some tastes but never the less a fine example of its kind. £3.00

"Coombe Creek" 6W-O (LM) S431 (Kea x Foundling). The short stiff stem makes this a perfect plant for the more exposed situation, but the flower is also well suited for the show bench, the ivory white perianth is broad, well overlapped and strongly reflexed, with a long corona of orange with pinkish undertones. each £6.00

"Crofty" 6Y-Y (E) S271 (Perimeter x *n.cyclamineus*). We have been admiring this charming little variety in our trial beds for some years now, and when shown at the Royal Horticultural Society hall to several distinguished authorities, achieved much acclaim for its dainty charm and cyclamineus characteristics, the cup is short and neat, with a very broadly overlapped perianth of soft golden yellow, excellent for show and the garden. £2.50 each or 3 for £5.00

"Frogmore" 6Y-Y (LM) S210 (Ormeau x *n.cyclamineus*) We have named this at the request of several successful exhibitors and enthusiasts, it is a little larger than many in this division but does show all the natural characteristics, and has been very successful on the show benches, beautiful solid colour and a strong plant. £3.00 each or 3 for £7.50

"Kathy's Clown" 6W-WWP (M) S432 (Kea x Foundling). Here is a lovely little dwarf plant that has stood the trials in our windswept fields, it is beautifully formed for showing purposes with the broad well overlapped perianth strongly reflexed, the cup opens with pinkish yellow tones but quickly fades to a clear pink and neatly frilled rim, this one we love and highly recommend. each £2.50

"Kea" 6W-YP (Jenny x 2W-P seedling) S217. Late mid-season. Successfully shown at the R.H.S. This has a good cyclamineus form, the colour and does need a little time to develop each £5.00

"Penril" 6W-O. Mid-season. Another seedling acquired from Brian, this is a much shorter plant and has a typical cyclamineus growth habit. The perianth is not quite pure white but does reflex naturally and the slightly expanded goblet cup is a most interesting coppery orange tone, a very good plant admirably suited to the garden or show 5 for £2.95

"Peppercorn" 6Y-WWY (M) S672 (*n.cyclamineus* x Trumpet Warrior)

Many time a show winner and absolutely gorgeous luminous colours, the blooms open soft yellow and develop as they mature, the stems are short and plant small but strong and of good increase, a distinct reflexing perianth of this classification of flower. £15.00 each

"Percuil" 6Y-Y (St Keverne x *n.cyclamineus*) S3. Early season. A true Division 6 flower with narrow naturally reflexing perianth segments and a typical trumpet, short stemmed and very nice in pots. each £4.00 or 3 for £8.50

"Roscarrick" 6W-P. Late season. Raised by Brian Duncan, this is a seedling stock that I purchased some time ago, and is a particularly fine plant that increases well and is a pretty flower, much admired by all who see it. A little large for some Division 6 critics, but has had many successes on the show benches both here in Cornwall and at national level - very smooth lovely colours 3 for £4.50

"Trehane" 6Y-Y (St Keverne x *n.cyclamineus*) S212. Early season. Another good Division 6. A strong plant that produces many fine blooms that last a long time on the plant each £2.50

DIVISION 7. JONQUILLA HYBRIDS.

This Jonquilla section is for hybrids that have been bred with the species *n.jonquilla*. The resulting plants vary in stature from quite dwarf to very tall, however they are generally on good stiff stems that can stand a fair amount of wind. Most of the stems do have several flowers on each and without exception all are sweetly scented, which makes them ideal for indoor decoration.

"An-Gof" 7W-GYO(LM) S727 (Lancaster x *n.jonquilla*). This we believe to be the first of this colour in the Division, it has up to 3 florets on the stem but mostly twos, very scented and of excellent show form, the plant is strong and of good increase£6.50

"Boscastle" 7Y-Y(L) S111 (Aircastle x *n.jonquilla*). 2 or 3 sweetly scented flowers to a stem with broad smooth and well overlapping perianth segments make this an ideal show quality flower, bulbs often give secondary stems which can only add to its benefits as a perfect plant for the garden or cutting3 for £2.50 or 5 for £4.00

"Crill" 7Y-R, (LM) S/677. "Sweet Blanche" 7W-W (M) S220 (Grand Prospect x *n.jonquilla*) Most stems have only one flower but the bulbs will send several secondary stems thus extending the flowering period, this makes for perfect cut or garden variety although it has won its class on many occasions. Division 8. The Tazetta Hybrids.

These plants are the results of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true n.tazetta species in form. As the species is generally found in warmer regions of southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the n.tazetta and that of the n.poeticus from which these hybrids have been derived. It is the poeticus part that make these much hardier and do withstand our winters as well as any other type of daffodil.

"Hugh Town" 8Y-O(VE) Raised at the Rosewarne this wonderful multi-headed flower is proving to be one of the best of its type for cutting and floral arrangements, and is a magnificent choice for the early Garden Display. Site the planting to avoid a very cold situation and to receive the full benefit of sun during the summer to ensure a thorough ripening of the bulbs. This is one we highly recommend to you, highly scented. each £1.00, 3 for £2.50

Division 9. The Poeticus Hybrids

These flowers have been commonly called the "Pheasant Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour and flower when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

"Blisland" 9W-YYR(L) S584 (Corofin x Lady Serena). We have had many successes with this on the show bench, the flowers are pure white with a shallow corona of yellow rimmed in red, of good substance and delightfully scented, we have a good stock available
.....each £5 or 3 bulbs for £10

"Colville" 9W-GYR (Corofin x Crenver) x Crenver) S131 Late season. Named at the request of several enthusiasts, this flower has already featured in the prize winners on several occasions, the perianth opens with greenish undertones, but soon whitens to form a good foil for the brilliantly coloured corona, like all flowers of this kind it will not tolerate the sun and does need to be picked young. .each £7.00

"Kabani" 9W-GYR(L) S742 (Woodland Star x Lady Serena). This is a tall strong growing plant of good constitution, a very consistent show quality flower with a broad well overlapped perianth and a shallow corona of bright yellow and a dark red band with a lovely green centre, we have successfully shown this on several occasions ...
.....£4.50

"Penjerrick" 9W-GYR (L) S554 (Woodland Star x Lady Serena)
This is a larger flower on the style of Lady Serena, but with much more substance and a smoother perianth the shallow crown is very rich in colour with a hint of olive in the throat, I have show this with success on several occasions at the RHS shows in my 5 to 9 group.

One of our earlier crosses in this Division but we were reluctant to name it, but as the stock built up the vigour and quantity of blooms has made this a most desirable plant for the garden or for cutting, but we have also had some success with it on the show benches, it always attracts attention in our fields, the flowers are white with a soft canary yellow frilled corona with greenish tones at the centre, well liked by our florist friends.

DIVISION 12 - Miscellaneous Daffodils

"Cornish Chuckles" 12Y-O(E) (Matador x n.cyclamineus).

This super little plant is a sister to Eaton Song being just a little shorter in the stem and of darker colour in the cup, a very prolific bloomer with several blooms to a stem and established bulbs will produce secondary stems to extend the flowering period, a must for the front border or tubs.....

.....3 for £3.50, 10 for £7.50 or 100 for £50.00.

"Eaton Song" 12Y-O (Matador x n.cyclamineus). AGM

Very early. This is an excellent Dwarf garden plant and an interesting variety for showing, very long lasting and sends many secondary blooms to lengthen its flowering season.....

.....5 for £2.50

"Odd Job" 12W-O, (LM) S/350 (Merlin x Foundling) x n.triandrus)

We attempted to breed a dwarf plant with different colour, this variety is shorter in the stem and the flower smaller, the vigour is amazing and produces large healthy bulbs with several bloom from each bulb, the flowers are quite novel as the perianth reflexes to show off the flat almost disc like corona, we have shown this on several occasions in the novelty classes where it has been very successful. A colourful addition to the Garden.

£2 each or 3 bulbs for £5

"Upalong" 12W-YYR, (LM) S/351 (Merlin x Foundling) x n.triandrus)

Quite a novel little flower, a sister plant to 'Odd Job', with naturally reflexing perianth segments and a drooping poise, not as tall as many and will stand the weather well, it is a most prolific grower and make good bulbs, I have shown this in the novelty classes with success on many occasions, but is most suited to the Garden border

DIVISION 13 - The Species and Wild Forms

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalised surroundings. Very large quantities are not available. I believe them all to be true to name, but like many there seems to be some considerable variance of form, they are however named as sent to me or have been grown from seed.

INTERMEDIATE SIZE VARIETIES

Many of these varieties have been re-classified from the Miniature section as being just too large in bloom size for the show classes, however the plants are much dwarfer in stature than the standard cultivars and most are well suited for the intermediate classes at show or for the Border and rock Garden.

"Pentire" 11aY-R (M) S686 (Falstaff x Brandaris)

We have been growing this for many years and almost put it aside except for the perfection of bloom and its size, but the vigour and increase has now made this a indispensable and valuable little variety for the "Intermediate" sections the plant and flowers are dwarf and much smaller than its counterparts, but the quality of this little flower is such that it has already won on several occasions both here and in the U.S.A. where it received the accolade of Reserve in the entire Show. £10.00 each

"Radjel" 4Y-R(M) S298 (Paricutin x Tamar Fire). A perfect intermediate size bloom that won its class at the National Shows. The stems are tall and stiff with a small formal double flower of bright golden yellow with rich red petaloids. Like its parents a good grower. each £5.00

"Salakee" 2Y-Y (E) S401 (Ristin x n.cyclamineus). This lovely little flower is a true intermediate, very dwarf and a good grower, despite its pollen parentage there is no reflex in the perianth, but it has inherited the rich golden colour and smoothness of "Ristin", and has many times been a winner in the intermediate classes. each £4.50

"Skilliwidden" 2Y-Y (E) S539 (Ristin x n.cyclamineus) AMe. This is a Fun flower named after one of our mischevous, Cornish Pixies (Piskies). The plant and flowers are small, rich in colour and perfectly formed, an ideal intermediate bloom. .£3.00 each or 3 for £7.50

'Golden Rain' 4Y-YOO (VE)

Some say this is a double sport of the 'Soleil D'Or' with several blooms to a stem, the scent is delightful and the plant is vigorous, however it is slightly tender and as such may not do so well in colder districts, here in Cornwall we produce some very fine flowers early in the year, but the best results have been achieved by specialised treatment of the bulb during the flowering initiation, the results have been quite startling, these we offer have been prepared for you. . . .£6.95 per 10 bulbs
