INTRODUCTION FOR 2015

Greetings to you all

As I put pen to paper, here in January the garden is stirring with Snowdrops , Crocus and some early Daffodils Flowering , the fields are showing good growth and the early flowers soon to start.

Last year when spring finally came we enjoyed Beautiful Flowers over a long period, the Harvest of Bulbs was good and we managed to get everything done in good time and the bulbs were good size and quality.

At the shows Adrian was awarded Royal Horticultural Society Gold Medals for the Displays at the London Plant Fair, and at the Cardiff Show where we were delighted to receive our 25th RHS Gold Medal and the prestigious Best Floral Exhibit, we are also very proud to receive for the Display at Cardiff Show, the Williams Memorial Medal and Mrs F.E.Rivis Prize for excellence in cultivation and in addition the E.H.Trophy for the best exhibit of cut flowers made at any of the RHS show during 2014.

The Royal Horticultural Society Bulb Committee awarded Ron the prestigious Peter Barr Cup this is a great honour and is given to those in recognition of work with Daffodils.

Our Display's received the Gold at the County show at Boconnoc , Falmouth and Trelassick. Once again we are very grateful to the Royal Caledonian Horticultural Society for the Display in Edinburgh and to Don Elder for his stalwart work in Scotland, all these shows create considerable enjoyment for the show visitors and we are pleased to be able to supply the flowers for the occasion.

The Walk and Talk visits to our Fields were well received and the weather was kind to us, we hope to continue these for various charities.

This year we shall again be featuring Displays at;

Devoran on the 14th March

The RHS Garden at Rosemoor for the Daffodil competition on the 14th and 15th March

Falmouth on the 21st and 22nd March

Boconnoc on the 28th March and 29th March

Trelissick on the 11th and 12th April

The RHS Show Cardiff on the 17th, 18th and 19th April

We thank you all for you continued support and hope that you will enjoy our 25th Catalogue for 2015

Best wishes for an enjoyable and successful season

Ron, Maureen, Adrian and Sharon

New or First Time Introductions for 2015

We are pleased to include these new varieties, that have been greatly admired by visitors to our trial field when under number, some are names that have been commissioned by other Daffodil enthusiasts and all have proved to be strong and vigorous growers.

Gylly Glow: 6Y-O [E]

30/50cm (Tregarrick x n.cyclamineus) A good example of the cyclamineus section, a good stock permitted this variety to be planted by the School Children of Falmouth as an encouragement to plant bulbs for the 2015 show at the Gyllyngvase Garden in Falmouth and hold a competition to name the flower, "Gylly Glow" was selected from all the names submitted from all the names sent in by the schools.
3 Bulbs for £10.00

Gloriana Fair: 2Y-Y [M]

40/60cm
(Ormeau x St Keverne)
Perfectly formed and clear golden colour, has won best Bloom on several occasions as a seedling and when first introduced.
3 Bulbs for £12.00

Oliver Carne: 4Y-Y[M]

40/60cm
(Celtic Gold x Menebilly) A full and rounded flower of dark Golden Yellow, the inner petals can in some seasons develop an orange tone.
£10.00 each

Wind Whistle: 6Y-Y [E]

30/50cm (Arctic Gold x n.cyclamineus) The sounds of wind in the rocks and cliffs of the Cornish coast inspired this name, the flower does stand the weather extremely well perfect in the Garden and good on the show bench. £5.00 each

Trevene: 3O-R [L]

40/60cm (Achduart x Prairie Fire) The flower opens with dark yellow perianth and flushes orange as the flower matures has proved to be successful on the show bench and much admired on our show displays.
3 Bulbs for £12.00

Ava Grace: 2W-W [LM] 40/60cm
(Inverpollly x April Love)

A lovely well formed and pure white flower of good show quality. £12.50 each

Sancreed: 11aW-Y[M] 40/60cm
(Silver Shell x Pink Silk) This is

a good addition to our Division 11 collection, perfect in bold clumps in the Garden and lasts well as a cut flower, lovely clear colours. £8.00 each

Christine Berriman: 11aW-YPP [M]

40/60cm (Quiet Day x Phantom) A flower of heavy substance frilled and beautiful shades of pink can sometime be a little variable in the corona split. 3 Bulbs for £10.00

Division 1 Trumpet Daffodils for garden and exhibition

One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

Division 2 Large cup Daffodils for exhibition and garden

One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

"Gallipoli Dawn" 2Y-Y

During the trial period, "Gallipoli Dawn" has proved to be a vigorous and hardy plant and produces a good medium-sized bulb with strong foliage. The flowers are early to mid-season, 45 to 60 cms in height and appear to last for several weeks in the garden. The colour is a clear Golden Yellow. Not only has this proved to be a fine Show Quality Flower, but is a sound variety for the discerning gardener and is well suited for the cut flower industry.

Profits from the sale of these bulbs are being donated to the Gallipoli Association assist them in the work they do.

Kiwi Magic:[M]40/60cm. Good
for show but has a soft stem.
3 Bulbs for £10.00

Division 5 Triandrus Hybrids for exhibition and garden

These delightful varieties of Daffodil are the result of selective breeding where the species *n.triandrus* has been introduced into its parentage; the resulting plants often have 2 or 3 flowers on the stem, and are amongst the ladies' favourites in floral arrangements.

These from Division 5. and those of Division 6. are generally much dwarfer in stature and are ideally suited to the garden or rockery. The plants are hardy and quite resistant to the windier spot where the conventional Daffodil often gets broken off.

Division 5. All White.

Division 8 Tazetta Hybrids for exhibition and garden

Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

These plants are the result of many years of breeding and can really be divided into two types. They are with the exception of "Minnow" all quite big plants, some do have very tall stems and foliage. The first kind are more of the true N.Tazetta species in form. As the species is generally found in warmer regions of Southern Europe and the Mediterranean. They are somewhat tender and do require a hot dry summer period to perform at their best, however they are well worth trying, when each stem could have up to 15 or 20 highly scented florets. The second group or kind is the "Poetaz", these are slightly different in style and have fewer florets, and the scent is an admixture of the N.Tazetta and that of the N.Poeticus from which these hybrids have been derived. It is the poeticus part that makes these much hardier and withstand our winters as well as any other of daffodil.

Murlough:[LM]40/60cm.
5 Bulbs for £4.50

These flowers have been commonly called the "Pheasants Eye" and indeed they have been bred from the old species, however these varieties are far superior in form and colour, and bloom when most other Daffodils have been long finished. They are best picked young as the sun does affect the lovely colours if left out. They are without exception all highly scented. The plants like to be planted in good soil that never completely dries out, this helps to keep them cool. Set the bulbs slightly deeper than normal and leave undisturbed. New bulbs may take a season to settle, but are well worth their place in the garden.

Division 13 The Species and Wild Forms Daffodils for exhibition and garden

I have been acquiring these for many years and have obtained much pleasure from them, particularly those grown in the alpine house. The species always seems to resent being moved about, but once settled are a joy to see in naturalized surroundings. Some are not available in very large quantities.

I believe them all to be true to name, but like many there seems to be some considerable variance of form; they are however named as sent to me or have been grown from seed.

Part of our field of Minitures

Historical Varieties

For many years it has been one of our passions to collect and preserve for the future Daffodils of bygone years.

Today we have many of the varieties that are often seen in the old Gardens and around Churches and the bordering hedges of the market gardens in the late 1800s and early 1900s, these and many others now form an important part of our collection some stocks are still very small and some are still under assessment to ascertain the correct name.

We are pleased to offer the varieties we list here, we believe to be true to name or have been confirmed by other very knowledgeable enthusiasts.

Notes

PLANTING GUIDE FOR BULBS

DAFFODILS Please note Daffodils are not edible

On arrival keep the bulbs dry and cool in an airy place until ready to plant.

The ideal aspect is in full sun or light shade; avoid the windy aspect unless you are planting the dwarf or miniature varieties.

All should be planted as soon as possible after receipt and certainly before the end of October as bulbs can start to deteriorate, the ground should be moisture retentive but with good drainage, Daffodils do not like to be completely water logged.

Plant at a depth of 3 times height of the bulb this can be at least 15 to 20 cm on top of the bulbs depending on the size and variety and with a space equivalent to 2 or 3 Bulbs, they can then be left for several years to develop, closer planting is fine but you will need to lift and divide much more often.

Avoid fertilizers with a high Nitrogen content as this will cause soft growth and encourage softness and susceptibility to fungal disease, use a general fertilizer with high Potash, spread this at planting time and give an annual top dressing in the autumn.

After flowering remove the dead flower heads this prevent seed setting and will direct the energy to the bulb, please let the foliage die back naturally, as the leaves produce the energy to produce next years bulb and flowers.

Daffodils in pots or containers can be a joy to see in the Conservatory or Greenhouse, use a good quality bulb fibre or compost and plant the bulbs only just below the surface, do not allow the pots to dry out at any time, you will need to keep a careful eye on them during the growing season, keep the pots in a cool dark spot or outside in a sheltered spot, bring them into the open once the bulbs are sprouting, avoid too much heat as this can over force the bulb and could cause the flower to abort.

Please ensure the pots are kept moist throughout the Winter and most important protect them from freezing as the roots and or the base plate of the bulb can separate and growth will be stunted and the bulb die and rot away.

Once the flowers are over, you can transplant them direct into the garden and allow them to die back naturally; they may take a season to get back to full vigour.

TULIPS

Keep these dry and cool until you are ready to plant, the best time to plant Tulips is during October and November in a well drained situation with full light they will tolerate light shade.

Plant around the 10 to 12 cm deep and 10 to 12cm apart, if you need to add fertilizer do this at planting time and again as soon as the flowers have faded, high potash general fertilizer is best.

Remove the seed head as soon as the flower has finished and collect the fallen petals from the surrounding soil, allow the foliage to die back completely then lift the bulbs and store in a cool, dry and airy place.

The species and short Tulips can be left in the ground from year to year, but the Tall Hybrid Tulips do need to be lifted annually.

HYACINTHS

Please note Hyacinths bulbs can sometimes cause irritation to the skin,

These bulbs must be kept cool and dry until ready to plant, September to October is best, some bulbs are available as prepared bulbs for forcing, this a special preparation given by the producers and will flower before Christmas, but generally bulbs are supplied in their natural state to flower early in the spring.

They are ideal for planting in Bowls and Pots and must never be allowed to become waterlogged, as this does cause the bulbs to rot.

Planting in the garden choose a light sunny spot and set the bulbs 12-15 cm deep and 20cm apart if potting you can plant them almost touching for the best effect.

Top dress generously with a good high potash fertilizer, and again during the growing season, Hyacinths need to be well fed to perform at their best.

After flowering allow the foliage to die back completely bulbs can be left in the ground for another year but it is best to lift annually.

ALLIUMS

Keep bulbs dry and cool until ready to plant, they prefer an open sunny aspect with rich well drained soil, plant 10-20 cm deep the bigger bulbs deeper than the small varieties, top dress with a good general high potash fertilizer when planting and again each Autumn.

The foliage often turns brown at the tips at flowering this can be trimmed and removed; generally leave the foliage to die back naturally.

FRITILLARIA

Plant these as soon as possible in the Autumn 5-10 cms deep and 15-20 cms apart in an Dappled light or slight shade, avoid very hot and dry situations, a good rich but well drained soil is best, but these bulbs should never become waterlogged as they will rot

Top dress with a good general fertilizer at planting, and again each autumn.

IRIS

Plant these as soon as possible in the Autumn in full sun and a well drained situation, the dwarf varieties should be 10 cm deep and 10 cm apart, they can be left undisturbed for best results, top dress annually with a good general fertilizer.

MUSCARI

Keep cool and dry until ready to plant, choose a full sun to light shade situation and well drained, plant 10-12 cm deep and 10 cm apart top dress with a good general fertilizer annually, they are best left undisturbed.

Horticultural Classification

Whether of wild or cultivated origin, once a selection has been distinguished by a cultivar name it should be assigned to Divisions 1 - 12. Daffodils distinguished solely by botanical name should be assigned to Division 13.

Notes

1. The characteristics for Divisions 5 to 10 are given for guidance only; they are not all necessarily expected to be present in every cultivar assigned to those divisions.
2. Divisions 12 and 13 are not illustrated owing to the wide variation in shape and size between the flowers involved.

DIVISION 1
TRUMPET DAFFODIL CULTIVARS
One flower to a stem; corona (trumpet) as long as, or longer than the perianth segments (petals)

DIVISION 2
LARGE-CUPPED DAFFODIL CULTIVARS
One flower to a stem; corona more than one-third, but less than equal to the length of the perianth.

DIVISION 3
SMALL-CUPPED DAFFODIL CULTIVARS
One flower to a stem; corona not more than one-third the length of the perianth segments.

DIVISION 4
DOUBLE DAFFODIL CULTIVARS
One or more flowers to a stem, with doubling of the perianth segments or the corona or both.

DIVISION 5
TRIANDRUS DAFFODIL CULTIVARS
Characteristics of *N.Triandrus* clearly evident: usually two or more pendant flowers to a stem; perianth segments reflexed.

DIVISION 6
CYCLAMINEUS DAFFODIL CULTIVARS
Characteristics of *N.cyclamineus* clearly evident: one flower to a stem; perianth segments significantly reflexed; flower at an acute angle to the stem, with very short pedicel (neck).

DIVISION 7
JONQUILLA AND APODANTHUS DAFFODIL CULTIVARS
Characteristics of Sections Jonquilla or Apodanthi clearly evident: one to five (rarely eight) flowers to a stem; perianth segments spreading or reflexed; corona cup-shaped, funnel-shaped or flared, usually wider than long; flowers usually fragrant.

DIVISION 8
TAZETTA DAFFODIL CULTIVARS
Characteristics of Section Tazetta clearly evident: usually three to twenty flowers to a stout stem; perianth segments spreading not reflexed; flowers usually fragrant.

DIVISION 9
POETICUS DAFFODIL CULTIVARS
Characteristics of the *N.poeticus* group: usually one flower to a stem; perianth segments pure white; corona very short or disc-shaped, usually with a green and/or yellow centre and a red rim, but sometimes of a single colour; flowers usually fragrant.

DIVISION 10
BULBOCODIUM DAFFODIL CULTIVARS
Characteristics of Section Bulbocodium clearly evident: usually one flower to a stem; perianth segments insignificant compared with the dominant corona; anthers dorsified (ie attached more or less centrally to the filament and style usually curved).

DIVISION 11

SPLIT CORONA DAFFODIL CULTIVARS.
Corona split - usually for more than half its length

a). Collar Daffodils
Split-corona daffodils with the corona segments opposite the perianth segments; the corona segments usually in two whorls of three.

b). Papillon Daffodils
Split-corona daffodils with the corona segments alternate to the perianth segments usually in a single whorl of six.

DIVISION 12 - OTHER DAFFODIL CULTIVARS
Daffodil cultivars which do not fit the definition of any other division

DIVISION 13 - DAFFODILS DISTINGUISHED SOLELY BY BOTANICAL NAME

New Horticultural Classification (taken from the International Daffodil Register by kind permission of the Royal Horticultural Society)
