**2022 - 2023**

proudly offered by our partners at

## WELCOME 2022-2023

All of us at Green Fuse® Botanicals would like to welcome you to our 2022/23 North American offerings. We are also proud to deliver the news of our all new breeding and stock facility in Somis, California. Here we not only breed our genetics, we also produce domestic stock and operate a fully functional lemon grove under Green Fuse® Grove. We remain focused on delivering pioneering genetics to our grower partners. Our new facility clearly promotes our breeding directive and commitment to you, our customers. Green Fuse® Botanicals also owns and operates Calico™ Genetics, our internal breeding company as well as a liaison to our global network of breeding partners. Calico™ Genetics strives to not only deliver revolutionary varieties to the marketplace, but to orient all breeding to the ultimate goal of grower ready solutions.

Our grower advantage breeding clearly extends to our end gardening consumer. This year we deliver the all NEW Tradescantia Pistachio™ White. A perfect fit to our Lifestyle collection, promoting indoor and outdoor applications with year round performance. Our Rudbeckia Dakota™ series expands with two new colors. This series takes the traditional annual Rudbeckia offering and not only delivers zone hardiness as a first ever, but also adds daylength neutrality to allow year-round sales. These new introductions highlight our breeding strategy of innovation.

We at Green Fuse® Botanicals are constantly and systematically driven to the continuation of breeding breakthroughs delivered to the horticultural community. It is the trust and support of you, our growing partners, that is the true strength of the program. We strive for our partnership to ensure success for us both this season and for many to come.

Lifestyle Plants™ is our selection of plants designed for the changing life-style needs of our customers. Lifestyle Plants™ can be grown for outdoor seasonal color or as indoor house plants. Year round availability brings all new options for seasonal programs. There are no boundaries to where we can bring color into our lives!

### Lifestyle™ Plants

Begonia Citizen™ Cane	4
Begonia Shadow King®	4
Begonia Bewitched™	5
Begonia Curly™	5
Begonia Dibs®	6
Echeveria Coral Reef®	6
Streptocarpus Ladyslippers®	7

The breeding goal of the Green Fuse® Botanicals Optimum™ Annuals program is to deliver uniformity within each series for ease of production. Each color in each series will perform uniformly regardless of geography. The earliness to flower allows delivery anytime of year.

### Optimum™ Annuals

Anigozanthos JoeJoe®	8
Anigozanthos Kanga®	8
Anigozanthos Jump®	9
Anigozanthos Big Roo®	9
Arctotis Majec™	10

Scaevola Scampi®	25
Sutera Betty®	26
Tradescantia Pistachio™	26
Verbena Vivid®	27
Vinca Quasar™	28
Annual Compatibles®	29

The First Light® Perennial program contains first year flowering varieties that require no cold treatment (vernalization) to flower and are day length neutral. The goal of First Light Perennials® is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.

### First Light® Perennials

Perennial Compatibles®	32
Achillea Sun N' Fun™	34

## BEGONIA CITIZEN™ CANE PINK NEW

An all new addition to the Green Fuse® Lifestyle™ collection, Citizen™ Cane Pink will absolutely demand retail attention. It's crisp dark foliage with clean white polka dots lends well to foliage programs. It will also maintain massive strings of deep pink blossoms with strong fragrance all growing season. Tight internodes and strong stems allow for worry free shipping. Garden height is 18" to 20".

## BEGONIA SHADOW KING®

The Green Fuse® Shadow King® series has small leaves and is heavily branched, making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. The complete, textural color selection will enhance any retail bench. Garden height is 8" to 12".

Bred by Koppe. Plants protected under USPP 24,717; USPP24,738; USPP23,468; USPP27,483 and USPPAF

## BEGONIA REX BEWITCHED™

The strong upright growth and incredible leaf structure on the Bewitched™ series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs®, due to their aggressive growth pattern. A yearlong sales window, with such an excellent habit, it's just plain scary! Garden height is 12" to 18".

## BEGONIA REX CURLY™

The Curly™ series delivers the traditional "snail" type leaf formation on a reimagined plant habit. This strong vigor series allows growers to finish with consistency never before seen on the classic leaf type. The color intensity will easily be a favorite at the retail level. Garden height is 12" to 18".

Cherry Mint

Chocolate

## BEGONIA REX DIBS®

Begonia Dibs® are spectacular! Unsurpassed vigor and basal branching make Begonia Dibs® a breeding portfolio for Rex Begonia. Best suited for containers 6" and up, the Dibs® crush traditional rex timing standards. Perfectly suited for holiday sales as well as spring color pots. Garden height is 12" to 18".

Butterscotch

Rothko

Thin Mint

Tuxedo

Sangria

## ECHEVERIA CORAL REEF®

It's a simple process to see the attributes of the Coral Reef® series as the name clearly defines the plant. Strongly pronounced ruffled foliage bring contrast and interest that demands consumers to reach out and touch. A true Lifestyle™ plant, Coral Reef® positions itself perfectly indoors or out. Garden height is 5" to 10".

Dark Chocolate

### ANIGOZANTHOS JOEJOE®

Anigozanthos JoeJoe® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. JoeJoe® works great in quarts through gallons. They will finish quickly easily allowing multiple turns in a season. Garden height is 12" to 15".

### ANIGOZANTHOS JUMP®

Anigozanthos Jump® are excellent in landscapes and for large containers. Jump® are larger growing plants with excellent disease resistance and drought tolerance. Hummingbirds find the brightly colored tubular flowers of these Anigozanthos irresistible. Garden height is 24" to 36".

### ANIGOZANTHOS KANGA®

Anigozanthos Kanga® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. Kanga® is geared for quick turn gallon production. They will finish quickly easily allowing multiple turns in a season. Garden height is 17" to 20".

Cherry

Red

Yellow

### ANIGOZANTHOS BIG ROO®

Anigozanthos Big Roo® are excellent in landscapes and for large containers. Big Roo® are the largest Anigozanthos we carry. They feature excellent disease resistance and drought tolerance, and hummingbirds love them! Garden height is 48" to 60".

Flamingo

### ARCTOTIS MAJEC™

This fantastic five color series is quickly becoming a grower and consumer favorite. Soft silver foliage on a well rounded habit delivers season long vibrant blooms. An excellent choice to welcome spring at retail, the MAJEC™ series throws out an impressive number of single "daisy" type flowers for the entire growing season. Garden height is 8" to 10".

Fuchsia

Pink

Ruby

Scarlet

### BIDENS DOUBLOON™

Doubloon™ puts on a show of gold in the garden that lasts the entire summer. Doubloons™ compact size plays well for perfect containers and combinations without the need for growth regulators. Garden height is 4" to 6".

Gold

Red Bicolor

### CALIBRACHOA CRUZE® CONTROL

Calibrachoa Cruze® Control series boast enormous flowers and a more "controlled" habit than other calibrachoa. Plants have shorter internodes producing more branching for a beautifully full container. The multicolored "Splash" additions bring a whole new level of interest. Cruze® Control are among the earliest of all to flower, so they are perfect for any part of the world. Garden height is 6" to 10".

### EUPHORBIA CRYSTAL™ WHITE

Euphorbia Crystal™ White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Garden height is 8" to 12".

### FUCHSIA WINDCHIMES® BASKET

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Garden height is 8" to 14".

### FUCHSIA WINDCHIMES® UPRIGHT

The Windchimes® Upright are sturdy enough to hold their upright habit while loaded with massive blooms, making them perfect for pot crops and combinations. They will flower in short days to hit the market extremely early. An excellent choice for the elusive shade combination. Garden height is 10" to 16".

White/White

## IPOMOEA SWEET GEORGIA®

The Ipomoea Sweet Georgia® series is a heavily branched series with a completely uniform, compact habit and proven performance. Their combination friendly habit extends their use easily into mixed containers. The Sweet Georgia® series includes selections with both palmate and heart shaped leaf forms, as well as the variegated selection of Green Splash. Garden height is 4" to 6".

## PETUNIA BLANKET®

Every garden bed needs a Blanket® Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just 1 plant per basket. Their milliflora flowers require near zero maintenance for the consumer, even the doubles are excellent at self-cleaning. The TOP SELLING Silver Surprise is an instant one plant combination! Garden height is 6" to 8" with an impressive 36" spread.

### RUDBECKIA RISING SUN® CHESTNUT GOLD

The first ever day length neutral Rudbeckia Hirta has proven itself an all-star award winner in trial gardens around the world. Chestnut Gold is ready for sales year round without the need for supplemental lighting. From the earliest of spring through autumn frost, Rising Sun is the only Rudbeckia needed in your Hirta program. Garden height is 18" to 24".

### RUDBECKIA RODEO™ DOUBLE RED

Fantastically unique fully double, deep red flowers will generate late spring sales through fall. Rodeo™ will deliver consumer excitement with never before seen color on this fan favorite genus. Coming into flower under long days, Rodeo™ Double Red will flower continuously until heavy frost. Garden height is 18" to 24".

### SALVIA CATHEDRAL®

Salvia Cathedral® is a true outdoor performer for all regions, including hot and humid environments. The series is early to flower with a wide range of colors. Their consistently uniform habit throughout the series allows row run shipping. Also perfect for multicolored mixed containers. Garden height is 12" to 16".

### SUTERA (BACOPA) BETTY®

Sutera (Bacopa) Betty® are best known for their incredible heat performance that has been showcased in trials across North America. Their industry leading large flowers completely cover the plant all season. The Blue and Pink perfectly match the class favorite Betty White. Garden height is 6" to 8" with a 10" to 12" spread.

Dark Blue

White

### TRADESCANTIA PISTACHIO™ WHITE

A breeding breakthrough allows this all new tradescantia to maintain heavy white variegation while still supporting vigorous growth. An excellent selection for monoculture in quarts through hanging baskets, as well an eye popping combination item. Year-round sales are simple as a spring or foliage item. Garden height is 4" to 6".

### VERBENA VIVID®

Verbena Vivid® have proven to be Powdery Mildew resistant after years of spring and summer trials in all areas of the country. Their wide color range makes Vivid® perfect for a complete Verbena program. Vivid Swirl's two-tone colors easily grab attention at the retail level. Garden height is 5" to 8".

## PERENNIAL COMPATIBLES®

First Light® Perennial Compatibles® can be scheduled and finished just like annual mixes. No more worrying about forcing varieties out of season or planning for special cold requirements or vernalizations. The First Light® Perennial Compatibles® are completely programmable, since all our components are completely day length neutral and require zero cooling. These mixes shine brightly for early spring sales, through the summer heat and are a great companion crop to break the mundanity of fall mum programs.

### DARLING DAISY® IMP

Leucanthemum Darling Daisy® has a short stature and a small, pure white daisy flower. Darling Daisy® are continuous flowering, so they are easy to finish for early sales. Perfect for quarts and gallon containers. Garden height is 6" to 8". Zone 6

### DOUBLE DARLING DAISY®

With a fully double flower and compact habit, Double Darling Daisy® is positioning itself as a crowd favorite. The snowball shaped flowers sit cleanly on this day length neutral selection for a tidy appearance throughout the entire growing season. Garden height is 8" to 10". Zone 5

### WHITE MOUNTAIN®

White Mountain® is also day length neutral. White Mountain® boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain® is the flag ship of the Green Fuse® Botanicals Leucanthemum program. Garden height is 18" to 24". Zone 4

### DOUBLE ANGEL DAISY®

The Double Angel Daisy® throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy® perfectly, Double Angel Daisy® will boast the same finishing time and garden performance with a unique flower formation. Garden Height 8" to 12". Zone 4

### CARPET ANGEL DAISY®

Yet another industry first in leucanthemum breeding, the world's only ground cover shasta daisy! Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3" to 4". Garden width is 18" to 20". Zone 4

### DARLING DAISY® SUPREME

It is easy to see the supremacy of Darling Daisy Supreme®! With industry exclusive breeding program to develop multiple flowering branches along the same stem, Darling Supreme® rarely cycles out of color. This is a clear advancement for all leucanthemum breeding. Garden height is 12" to 15". Zone 3

### ANGEL DAISY®

Angel Daisy® is so early to flower, it makes production planning a snap. Angel Daisy® has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8" to 12". Zone 4

### WHISKER WHITE NEW

A complete reinvention of the "crazy daisy" type of shasta. Whisker™ White is completely day length neutral and requires zero cooling hours to bloom. This is scheduling ease for all growers. Its massive five to six inch flowers will continue in the garden all growing season. Garden height is 15" to 18". Zone 4

### BETSY®

Betsy® is the world's largest flowering day length neutral shasta daisy. With flower sizes of 5" to 8" Betsy® will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy's® robust stature will impress! Garden height is 18" to 20". Zone 4

### LUPINE STAIRCASE®

Utility Patent # UP 10412924

The Lupine Staircase® Series is the pure definition of First Light™ perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. Red/White is a standout in this ten-color series. This also allows for a fantastic new fall crop. The Staircase® series allows any grower to become a lupine grower! Garden height is 18" to 24". Zone 3

### SCABIOSA GIGA®

Scabiosa Giga® Blue showcase exceptionally large flowers with excellent garden performance. Giga® Silver may have more traditional sized scabiosa flowers, but in a very untraditional, massive quantity. The 2020 intro of Pink and the ALL NEW Deep Ocean maintain the large, recognizable flower of the Giga®. All are day length neutral and require zero cold treatments. These larger framed plants fill containers quickly and can be programmed to meet a spring through summer or fall sales schedule. Garden height is 16" to 20". Zone 4

### SILENE CAROL JEAN™

A 2020 introduction for Green Fuse Botanicals®, Carol Jean showcases revolutionary performance on an old world plant. Carol Jean™ pink and white lend themselves as a ground cover. A true heat love, the Carol Jean™ series will explode with color mid spring and all summer long. Garden height is 4"-5". Garden width is 18"-24". Zone 5

### TRIFOLIUM 4 LUCK®

Trifolium 4 Luck® are exceptional component plants for annual or perennial mix containers. Their landscape performance is fantastic as a border or a perennial groundcover. The multicolored plants will form a tight, mounded canopy that is both heat and cold tolerant. 4 Luck® have been bred to develop four leaves per petiole for enhanced grower luck. Garden height is 2" to 4". Zone 4
