Our Roots, Your Success

Dear
Customer

Welcome!

Thank you for taking the time to review our new, redesigned catalogue. We proudly present a range of (new) products that is reliable, stunning, unique and all of the very highest quality. I cordially invite you to take a close look.

Harry Kloppenburg, president

This year, we take a big step maximizing Osteospermum Margarita and Impatiens NG Tamarinda® series. Not forgetting interspecific geraniums Mambo and Belcanto. Further product novelties can be found throughout this catalogue. For our total assortment and these introductions the same rule applies: We offer consistent high quality cuttings and the best technical and marketing support.

As Fides is part of Agribio Group, a group of leading

breeders with an unique product proposition of cut flowers and pot plants, we can combine our extensive expertise of 45 years of breeding and propagation with the most modern breeding technology available in the horticulture sector.

Over the coming years the emphasis of these new technologies will boost our current breeding activities, leading to new, valuable varieties with more variation in plant and flower form, scent and colour. It also results into reduced timelines

between a trial to being a commercial variety and more efficient production methods.

Together we can build a lasting partnership to ensure that everyone's wishes are fulfilled, from grower to the end consumer. We look forward to a profitable partnership.

“We combine our expertise with the most modern breeding technology.”

Welcome to our world

Our
world

**“Our high
quality
products find
their way all
over the world.”**

E Fides, founded in 1967 and part of Agribio Group, is a company that is specialized in breeding, propagation and sales of cut Chrysanthemums and flowering pot plants.

Fides is innovating and inspiring, our products have a high market value and produce long lasting returns to partners in the supply chain. To achieve the best market value for all Fides products, we regularly keep in touch with the market and do our utmost to support our products to all partners.

Production of Fides plant material takes place in the most ideal conditions at locations in Kenya, Uganda, Tanzania and Guatemala. Breeding of Fides products is located in the Netherlands, Denmark and the United Kingdom.

F Fides a été fondé en 1967 et fait partie de l'Agribio Group, c'est une entreprise spécialisée dans la sélection, la multiplication et la vente de chrysanthèmes à fleurs coupées et de plantes fleuries en pot.

Fides est une entreprise innovante et dynamique. Nos produits ont une valeur élevée sur le marché et permettent aux partenaires de la distribution d'obtenir des rendements satisfaisants sur le long terme. Afin de mieux valoriser nos produits, nous restons régulièrement en contact avec le marché et faisons notre maximum pour promouvoir nos gammes auprès de l'ensemble de nos partenaires.

La production du matériel végétal Fides se fait dans des conditions optimales sur des sites au Kenya, en Ouganda, Tanzanie et Guatemala. L'amélioration génétique des produits Fides a lieu aux Pays-Bas, au Danemark et au Royaume-Uni.

ES Fides, fundada en 1967 y parte del grupo de empresas Agribio Group, es una compañía especializada en la mejora genética, propagación y venta de crisantemos de corte y plantas de flor en maceta.

Fides es una compañía innovadora e inspiradora; nuestros productos tienen un alto valor de mercado y generan rendimientos duraderos para todos los socios en la cadena de suministro. Para conseguir el mejor valor de mercado para todos los productos de Fides, estamos en estrecho contacto con el mercado y nos esforzamos al máximo para ofrecer asistencia con nuestros productos a todos los socios.

La producción del material vegetal tiene lugar en las condiciones más idóneas en plantas de producción en Kenia, Uganda, Tanzania y Guatemala. La mejora genética de los productos de Fides se realiza en los Países Bajos, Dinamarca y el Reino Unido.

Healthy

A healthy start gives healthy results

“Successful products start out with consistently high quality and clean cuttings.”

E Fides processes all of its products through its own Elite System. This system guarantees absolutely healthy stock material. The Elite System builds up stock from individually selected mother plants.

The build up of propagation stock is controlled by the Fides laboratory during the entire process, guaranteeing the absence of viruses, bacteria and pathogenic fungi. There is an individual control for each base plant and sampling of propagation stock. This constantly controlled system combined with high level corporate hygiene protocols guarantees healthy stock material. Cuttings taken from these plants will give you a healthy start to achieve the best results.

F Fides transforme tous ses produits par l'intermédiaire de son propre Elite System. Ce système garantit un matériel de base absolument sain. Elite System produit le matériel de base à partir de plantes mères sélectionnées individuellement.

La production du matériel de multiplication est contrôlée par le laboratoire Fides durant tout le processus. Nous pouvons ainsi garantir que le matériel est exempt de virus, bactéries et champignons pathogènes. Des contrôles individuels sont effectués sur chaque plant de base et des échantillons sont prélevés à partir du matériel de multiplication. Ce système de contrôle permanent, associé à des protocoles internes d'hygiène très rigoureux, garantit un stock de plantes mères sain. Les boutures obtenues à partir de ces plants vous fourniront une base saine et des résultats optimaux.

ES Todos los productos de Fides pasan por su propio sistema de calidad “Elite System”. Este sistema garantiza que el material de base sea absolutamente sano. El “Elite System” crea el material de base a partir de plantas madres individualmente seleccionadas.

Durante todo el proceso, el laboratorio de Fides controla la producción del material de propagación, garantizando la ausencia de virus, bacterias y hongos patógenos. Hay un control individual para cada planta base y se toman muestras del material de propagación. Este sistema de control continuo, en combinación con unos protocolos de higiene empresarial de alto nivel, garantiza un stock de plantas madres libre de enfermedades. Esquejes tomados de estas plantas le darán un buen comienzo para obtener los mejores resultados.

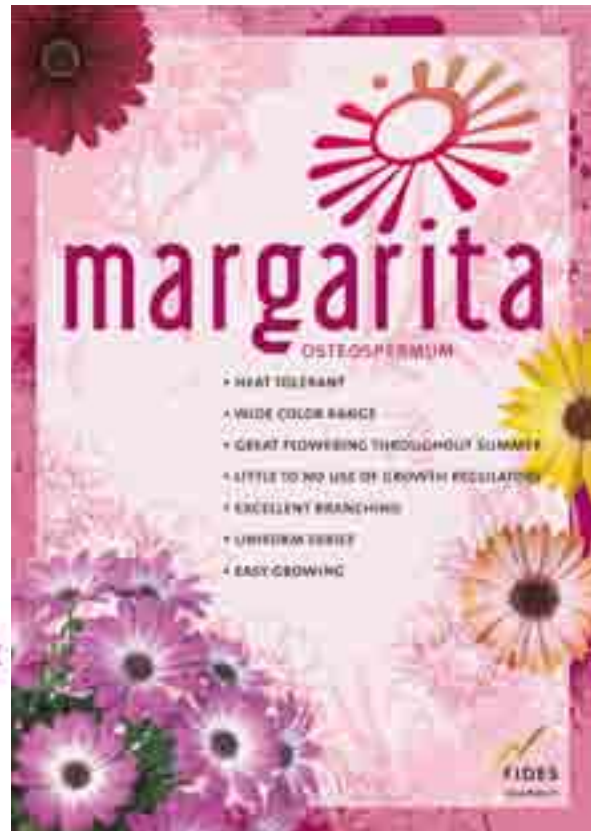

Fides

World of Fides

E It all comes to a clear positioning of your product. The experienced marketing department of Fides welcomes you with open arms to seek close partnership and expanding new ideas and branding opportunities. With this, you can sell an even more attractive product, matching today's and tomorrow's demands.

F Tout tourne autour du positionnement clair de notre produit. Le service marketing expert de Fides vous accueille à bras ouverts afin de pouvoir créer une étroite collaboration. Notre grande expérience vous permettra de mettre en œuvre des idées novatrices et de développer votre marque. Vous pourrez ainsi vendre un produit encore plus attrayant, correspondant aux exigences d'aujourd'hui et de demain.

ES Todo gira alrededor de un claro posicionamiento de nuestro producto. El experimentado departamento de marketing de Fides le recibirá con los brazos abiertos para crear una estrecha colaboración con Ud. Nuestra amplia experiencia le ayudará a desarrollar nuevas ideas y oportunidades para posicionar su marca. De esta manera, Ud. podrá vender un producto incluso más atractivo, que satisfaga las exigencias de hoy y de mañana.

Landscape/Garden Kalanchoe

Kalanchoe has shown to be a perfect garden/border plant. The fantastic bright colors, the shelf life and the low water-requirement make it a joy in the garden.

MYSTIC MUMS THE NEW REVELATION

Mystic Mums is a new brand from Fides Oro, representing more than 45 years of Chrysanthemum breeding experience and growers support. We, at Fides Oro are proud to present our new Mystic Mums for 2012. Mystic Mums are bred to have larger flowers, a flexible mounding plant habit, exciting and unique colors, great color retention and outstanding shelf life.

These striking new mums have been selected and trailed by some of the leading mum producers in the North American market. For several years, these growers have been selecting and trailing the mums we offer today and will keep the pipeline full of great new introductions. Our sustainable approach to growing mums includes the cutting edge production that our technical

staff Dr. Royal Heins, Dr. Roger Styer, Dr. Henk Dresselhuys, breeder Peter Wain and product specialist Joe Bergen have developed. This team of specialists represents more than 100 years of experience in mum production and working with top growers of Mystic Mums worldwide. The good news is that you can benefit from this experience.

SERIES

Daybreak - Very Early (Up to week 36)

Sunbeam - Early (Week 37)

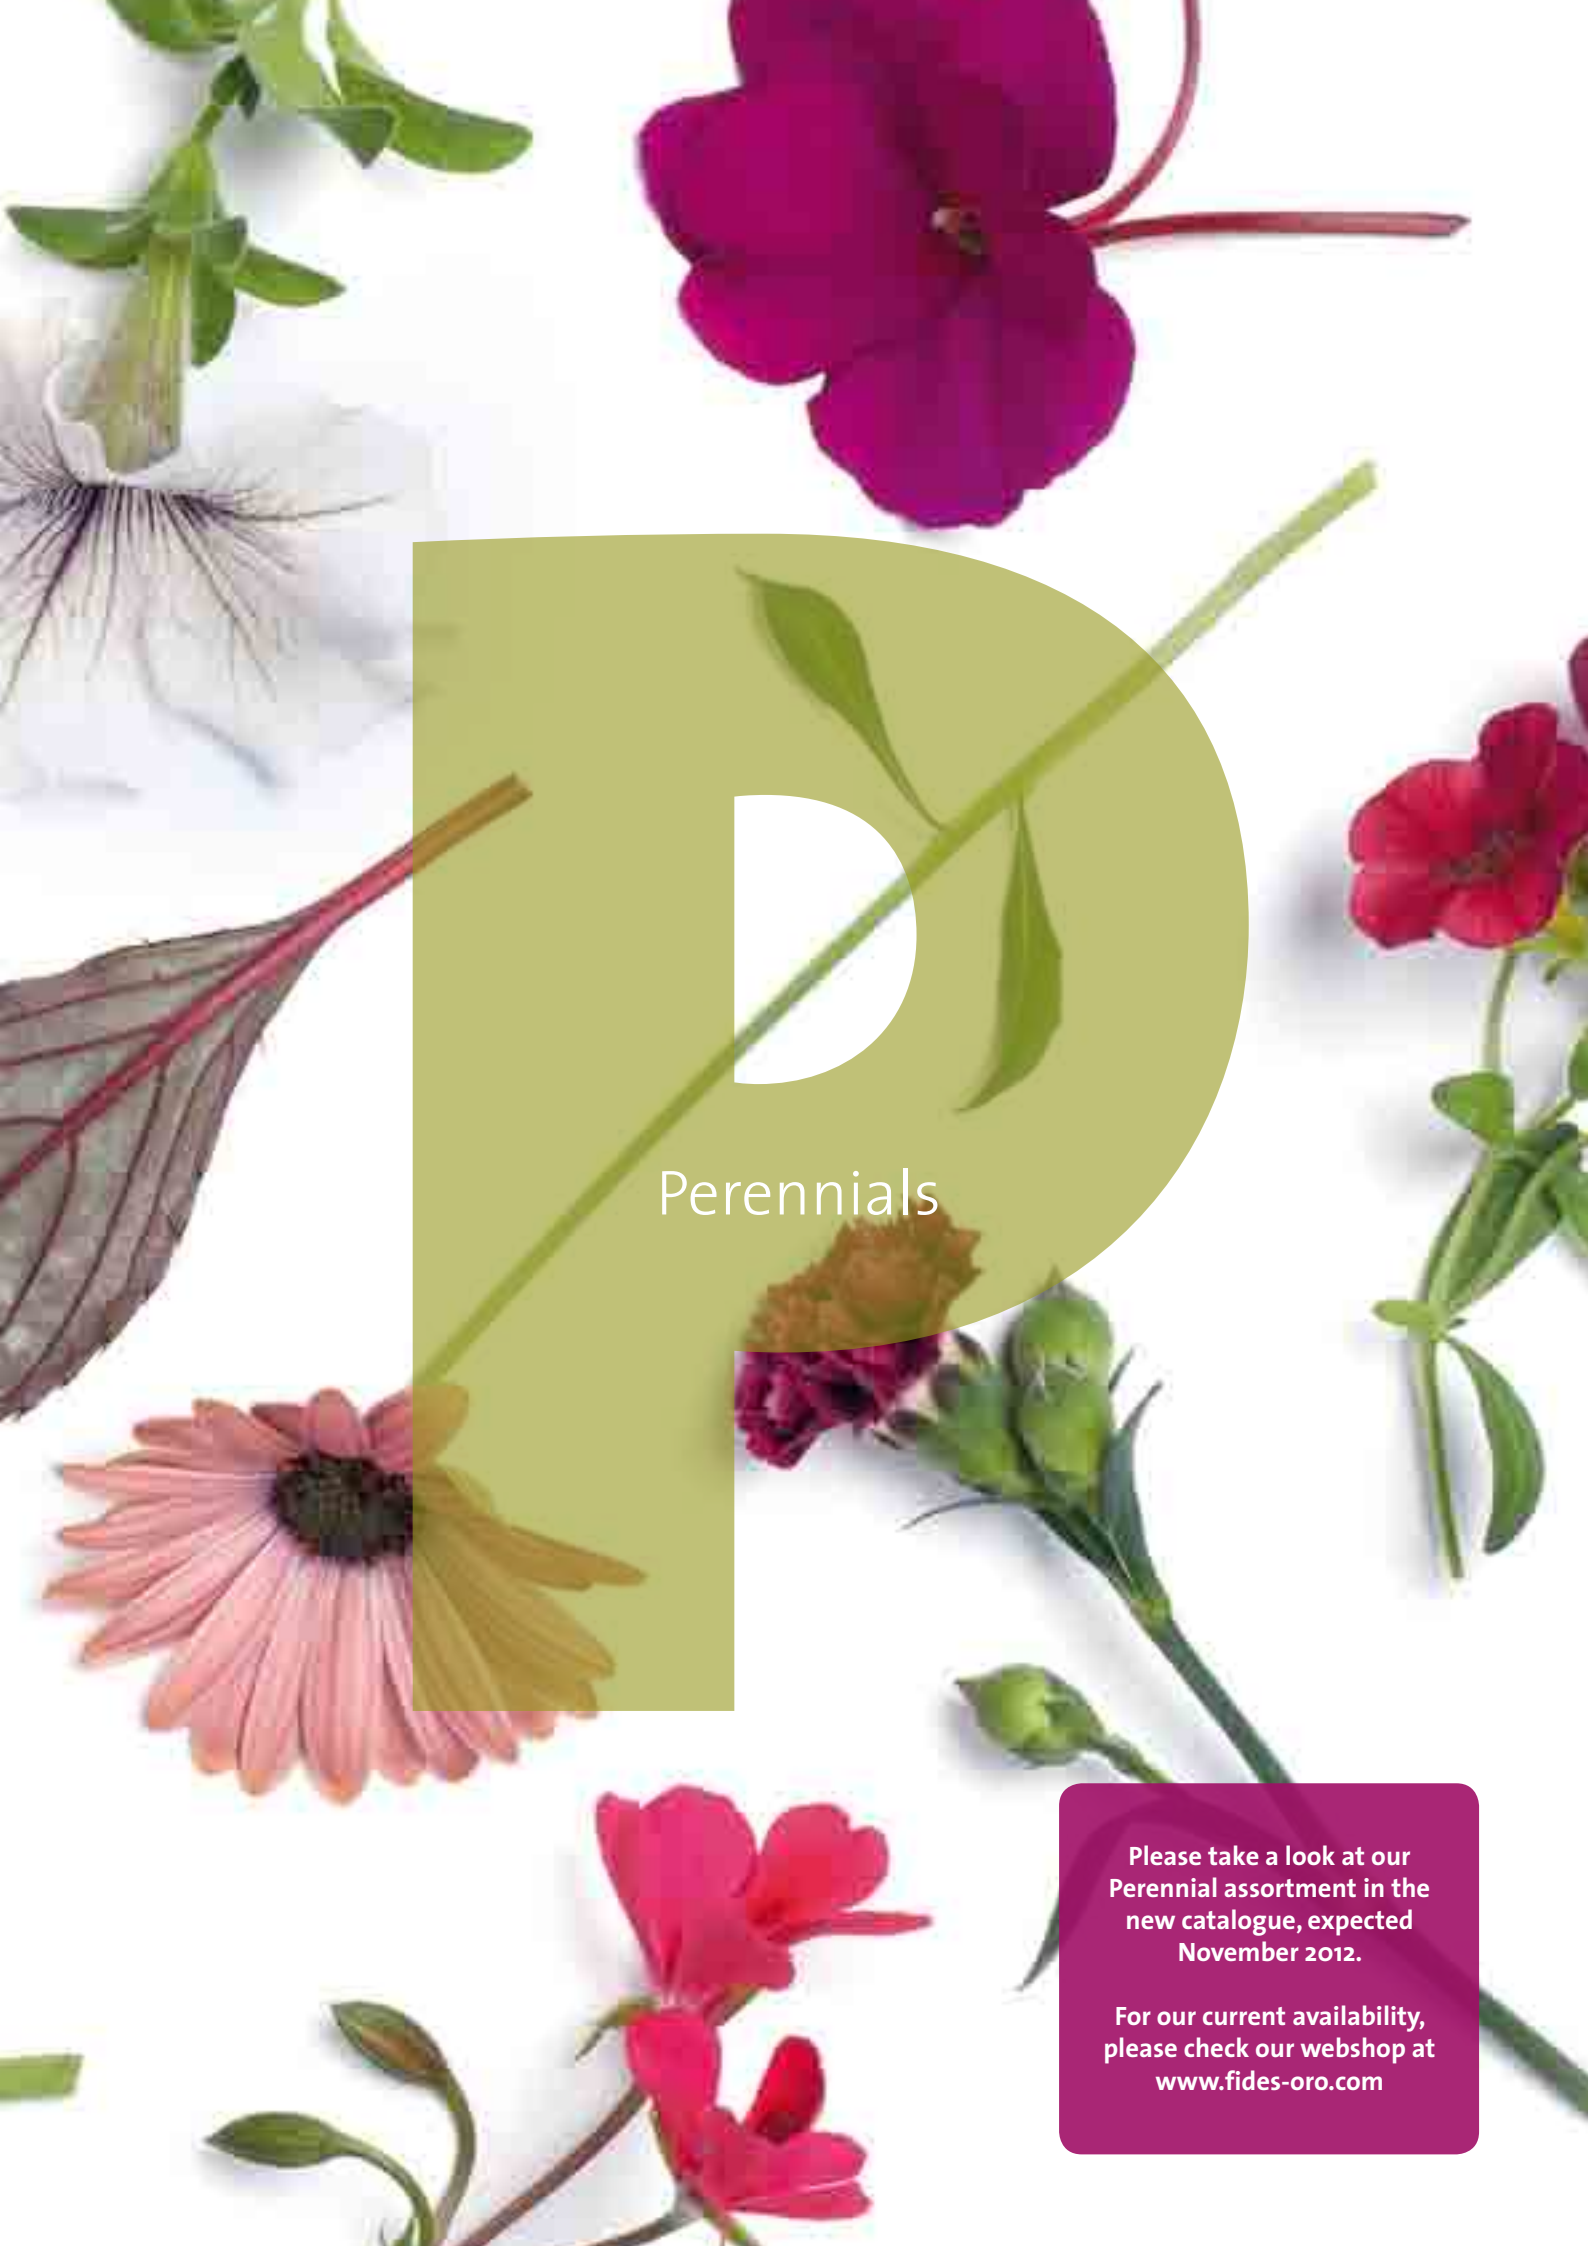

Meridian - Mid Season (Week 38)

Eventide - Late (Week 39)

Afterglow - Very Late (Week 40 & later)
