**SUNTORY**  
FLOWERS EUROPE

**Original, Unique and Innovative!**

These are the words I like to use to describe our collection, and I am very proud to present our new catalogue for the 2017-2018 season. We can look back on a turbulent year with a great deal of change and the start of many a new project. Last autumn, we said goodbye to our trading name of Moerheim New Plant. From now on we will be known as MNP Flowers.

With the installation of a greenhouse certified to Naktuinbouw (Netherlands Inspection Service for Horticulture) Elite standards which is dedicated to Sundaville®, we will soon be able to supply our customers with the very latest material to build up their mother plants from our own stock. We have also established an extensive network of trialling companies in Europe and are using the latest breeding and selection methods. Never before have our selection gardens contained so many brilliant top-of-the range products with such great potential, so everything looks very promising.

This new catalogue focuses on our main products, including: Surfinia®, Sundaville®, Senetti®, Grandaisy® and Princettia®.

Surfinia® Petunia is still the biggest brand in Europe and is famous for its weather-resistance and long flowering period. For the 2018 season we have a completely new version known as Surfinia® New Edge. This newcomer to the family combines all the best characteristics of the successful Surfinia® collection, notably a strong colour, rich flowering and long-lasting garden pleasure, but is also two weeks earlier than Surfinia® Purple. We also have two more new varieties that you really cannot afford to miss.

Sundaville® Mandevilla has already set its stamp on the market and is a real favourite among consumers. Our

selections contain plenty of new candidates which are guaranteed to strengthen our market leadership. This spring, we have chosen Sundaville® Apricot, a yellow Mandevilla® which will become a definite ladies' favourite with its Ibiza-type colour. It is genetically comparable with Sundaville® Red, but flowers much earlier!

This year Senetti® Pericallis has been equipped with an arsenal of new colours, growth habits and flower sizes. These will further increase the popularity of this true spring-flowering plant, and we hope that it will also capture the hearts of our French and Italian consumers.

Following its careful introduction, Grandaisy® Argyranthemum made its mark in 2016 and finished the year riding high as a promising bedding plant in the UK. This new Argyranthemum collection with its innovative colours, impressive growth and large flowers is well placed to become the new patio plant par excellence!

Princettia® Euphorbia started as an outsider but is seriously gaining in popularity and is now positioned strongly among the traditional poinsettias. The arrival of Princettia® Pure White brought an explosive growth in sales, and we expect to reach a new milestone with the introduction of the new Princettia® Midi series. In this 'Midi' range we have combined the best characteristics of Princettia® with the existing poinsettia plant form – you could say that Princettia® has grown from a Princess into a Queen!

We hope you enjoy browsing through this catalogue. If there's something you can't find, take a look at our completely new website [www.suntoryflowers.eu](http://www.suntoryflowers.eu)

**Jeroen F. Egtberts**

Managing Director MNP flowers

*A new name,  
a clear goal and  
a fresh identity.*

Since the 1990s, Moerheim New Plant has built a reputation for introducing innovative and successful bedding plants to the European ornamental sector. During this time, we have created many major and unique brands, including Surfinia®, Sundaville®, Senetti® and Princettia®. This work continues, with our recently introduced Beedance® and Grandaisy® brands among many others. In short: we are always evolving. And part of this evolution is an attractive new name with international appeal. We are therefore pleased and very proud to present: **MNP flowers**. Our new name stands for innovation, quality and creativity. Visit [www.mnpflowers.com](http://www.mnpflowers.com) for more information.

FLOWERS EUROPE

# *Novelties*

  
SUNDaville®

# Apricot

SUNPAPRI

Here it is! The biggest revolution in the world of Mandevilla (Dipladenia) since we introduced the Sundaville® brand. We are talking about the first Sundaville® with a beautiful and exiting new bright orange color, the Sundaville® Apricot!

Sundaville® Apricot has the same distinctive characteristics as the Sundaville® varieties from the Classic range. It has large, very long lasting, 9 cm apricot coloured flowers with a darker, orange-yellow heart. It boasts a good branching habit, blooms very early and flowers continuously. Sundaville® Apricot plants are best grown in 15 and 17 cm pots with support.

**This is a stunning and remarkable variety which will grab your attention straight away. You won't be able to take your eyes off it!**

  
SUNDaville®

# Soft Peach

SUNPASOPE

Alongside the Sundaville® Apricot, which revolutionised Mandevilla colour, we introduced a similarly soft and gentle colour innovation and named it the Sundaville® Soft Peach.

Sundaville® Soft Peach has the same distinctive characteristics as the Sundaville® varieties from the Beauty range. It has 6 cm peach coloured flowers with a darker, orange-yellow heart. It branches well, blooms very early and is a true champion with its rich and abundant flowers. Sundaville® Soft Peach plants are highly versatile and suitable for hanging baskets, as well as for 10 to 27 cm pots with support.

**It's soft, gentle and a real champion with its rich and abundant flowers.**

  
SUNDaville®

# Mini Scarlet

SUNPAMIS

A new kind of Sundaville® range is born with this unique scarlet variety which has star-shaped flowers: the Sundaville® Mini Scarlet. Despite its name, it does not have small flowers: "Mini" describes its smaller and narrower petals which, taken together, resemble the shape of a star. These unique star-shaped flowers are a real breakthrough in the Mandevilla ranges.

Sundaville® Mini Scarlet has the same distinctive characteristics as the Sundaville® from the Classic range. Its 7 cm flowers have small and very bright scarlet petals. It has good branching, blooms very early and has a strong upward growth habit. Sundaville® Mini Scarlet plants are suitable for 12 cm pots with minimal support. Its branches can also be trained in a spiral through plant supports when grown in bigger pots.

**Mini describes the smaller, narrower petals. These unique star-shaped flowers are a real breakthrough.**

*Surfinia*<sup>®</sup>

*Surfinia*<sup>®</sup> 2.0

# *Red Trailing*

**SURF GOPREHANA**

Can a product with the outstanding qualities of Surfinia<sup>®</sup> be improved? The brand has been at the top for a long time with its excellent rain resistance and long flowering period until late in the autumn. A top product for containers and hanging baskets.

However, we have still managed to make Surfinia<sup>®</sup> even better. Thanks to the breeder, the new generation now blooms even earlier, without affecting the well-known flowering characteristics of the series. This means we really can talk about Surfinia<sup>®</sup> 2.0!

**We are convinced that this important development will give the collection a real boost.**

KEIPEBLOCNUL

Can a product with the outstanding qualities of Surfinia<sup>®</sup> be improved? The brand has been at the top for a long time with its excellent rain resistance and long flowering period until late in the autumn. A top product for containers and hanging baskets.

But we have still managed to make Surfinia<sup>®</sup> even better. Thanks to the breeder, the new generation now blooms slightly earlier, without affecting the familiar characteristics of the flower. This means we really can talk about Surfinia<sup>®</sup> 2.0!

**We are convinced that this important development will give the collection a real boost.**

*Surfinia*<sup>®</sup>

*Surfinia*<sup>®</sup>

# *Coral Morn*

SURF GONITOMI

Can a product with the outstanding qualities of Surfinia<sup>®</sup> be improved? The brand has been at the top for a long time with its excellent rain resistance and long flowering period until late in the autumn. A top product for containers and hanging baskets.

However, we have still managed to make Surfinia<sup>®</sup> even better. Thanks to the breeder, the new generation now blooms even earlier, without affecting the well-known flowering characteristics of the series. This means we really can talk about Surfinia<sup>®</sup> 2.0!

**We are convinced that this important development will give the collection a real boost.**

SENETTI®

*Pink*

SUNSENEMIHA

The Pericallis Senetti® varieties have been in a class of their own for a long time with their striking, brilliant colours. Having presented a new series in 2016, we feel that this is the year to further expand the existing collection with a number of new developments.

The breeder has managed to create completely new varieties of Senetti® at an unprecedented speed. Aspects such as even earlier flowering, different colours and larger flowers characterise these introductions for 2017/2018.

**These varieties will further increase the popularity of this favourite spring-flowering plant.**

SENETTI®

SENETTI®

# Red Bicolor

SUNSENMURE

GRANDAISSY®

GRANDAISSY®

*Red*

BONMAX 1472

Grandaisy® (Argyranthemum) conjures up that special summer feeling like no other plant can. Happy and care-free enjoyment of hot days and sultry evenings in the garden or on the patio and balcony. Grandaisy® is an uncomplicated, unassuming and understated plant that will bring you summer every day and put a smile on every face. Perhaps that's why consumers love Grandaisy® so much. In any case, it's why we want to share the Grandaisy® experience with everyone. The Argyranthemum Grandaisy® collection was introduced in 2016 and quickly attracted attention thanks to its outstanding results as a bedding plant in a number of European trials. We are now expanding the series with several new varieties, featuring even bolder colours and impressively large flowers. That's why we say: bold and beautiful Grandaisy!

**A top product which will give consumers real value for money. This will be the new patio plant par excellence!**

SURDAISY®

# *Brachyscome*

COLLECTION

Surdaisy® continually produces an abundance of flowers which provides a sea of colour from March to October. These durable plants withstand cold, rain and sun and all have excellent branching. Pink has the largest flowers and darkest foliage. Yellow is unique. White makes excellent ground cover. The varieties work very well in combinations but equally as a mono-crop. Surdaisy® produces a mass of daisy flowers and blooms continuously from spring into autumn. This much-loved Brachyscome hybrid is resistant to rain, but likes a sunny location. With its self-cleaning properties and excellent garden performance, Surdaisy® is the ideal plant for the modern consumer. This strong variety is suitable for different uses, doing well in hanging and balcony baskets and as a bedding plant. Surdaisy® copes well with slightly dry growing conditions and its leaves will not yellow.

**Surdaisy Impr. White gives you 76% more flowers. That's super flower power! Strong, compact, with maximum flowering.**

SUNDIASCIA®

# *Diascia*

COLLECTION

Sundiascia® is a completely new form of Diascia that offers market benefits along with a stunning show of colours. This new shape also reduces growing and shipping space and prevents breakage from the centre. It produces an exceptional display of blooms over a very long period. More robust than other Diascia with longer flower spikes, they will provide a stunning display in containers and borders all summer long and well into the autumn.

From the breeders of Sundaville® and Surfinia® comes Sundiascia®, a range of Diascia with compact and upward growth. Sundiascia® flowers continuously from May to September. This lovely plant produces a rich display of flowers in fresh and lively colours. Sundiascia® is ideal for patio containers and borders.

Euphorbia*

COLLECTION

Princettia® Euphorbia (Poinsettia) is the most beautiful jewel imaginable and available for every living-room. Give these spectacular pink gems and white pearls a special place in your home and enjoy their stunning looks. Princettia® is a new style of Poinsettia (Christmas Star), with a compact growth habit and strong branching. This makes it an easy plant, which everyone can manage! Grow Princettia® in borders or pots in your garden, or on your balcony, and enjoy these pink and white stars until the first frosts of autumn.

Princettia® is perfect as a gift and can even be used for landscaping in mild climates.

SUNTORY® LOBELIA

*Lobelia*

COLLECTION

The Suntory® Lobelia Compact series has been bred with the focus on heat tolerance and offers great summer performance, a growing trend in Lobelia breeding. The Suntory® Lobelia Compact series is available in four separate colours. Plants show an upright growth and develop dense and heavy flowering. They bloom early and are pleasantly uniform across the series. The Suntory® Lobelia series can be grown at cool temperatures to save energy, and no PGR's are required. Plants flower profusely and hold their agreeable, mounded shape.

Lophospermum*

**SUNTORY**  
FLOWERS EUROPE

# *Lofos® Lophospermum*

## COLLECTION

This unique, premium item is easy to grow and care for and should attract interest at retail level. Plants are self-branching and self-cleaning. As an added benefit, Lofos® are naturally resistant to disease and pests.

This marvellous vine continues to flower throughout the season until the first frosts. Lofos® is ideal for creating spectacular hanging baskets and window boxes. Lofos® generally has triangular leaves and the plants produce tubular to funnel-shaped flowers in shades of white and crimson. Lofos® is self-cleaning and requires little water, making it a low-maintenance plant which is perfect for the modern consumer.

The Lofos® Compact varieties introduce a new Lofos® style to the original Lophospermum varieties, which have a vigorous trailing and climbing habit. The Lofos® Compact range is compact and well branched. Available in two lovely colours, Compact Pink and Compact White, these new Lofos® varieties can brighten up any garden or balcony.

SUNPEDDLE®

# Nemesia

COLLECTION

We proudly present a new brand from Suntory Flowers Europe: Sunpeddle®. Sunpeddle® is a collection of revolutionary, compact Nemesia hybrids which produce a spectacular show of flowers and a wonderful scent in every garden and on every balcony, making gardening even more enjoyable for the modern consumer!

The varieties in the Sunpeddle® range flower very early in the season and have a naturally compact growth habit. Sunpeddle® nemesias originate from South Africa, where they grow on sandy flats. We would therefore like you to meet our Sunpeddle® mascot: penguin Peddle and his family from South Africa! The original Sunpeddle® series consists of revolutionary, compact Nemesia, which have a lovely scent. Nemesia is a genus of annuals, perennials and sub-shrubs which are native to sandy coasts or disturbed ground in South Africa. These strong and healthy plants are suitable for almost every climate. They can be used as a patio plant, in balcony boxes, hanging baskets, and also as a bedding plant.

*The  
secrets of  
Senetti®*

**SUNTORY**  
FLOWERS EUROPE

SENETTI®  
*Pericallis*

COLLECTION

Kick off your spring season with Senetti®! Senetti® thrives in low temperatures and provides high colour impact early in the season. Senetti® is available in a wide range of colours including vivid blues, magentas, violets and stunning bicour varieties. Senetti® is unique in its ability to flower more than once. Flowers bloom from early spring until summer.

Senetti® has large, daisy-like flowers which appear from early spring until summer. Senetti® is packed with flowers: up to 200 on a plant grown in a 25 cm pot. When the first flowers start to fade, plants can be cut back to bloom again later in the season, extending consumer enjoyment.

*No 1 original  
trailing  
Petunia*

**SUNTORY**  
FLOWERS EUROPE

# *Surfinia<sup>®</sup> Petunia*

## COLLECTION

Surfinia<sup>®</sup> was the first trailing (hanging) Petunia grown from cuttings to be perfectly trailing and completely rain resistant. A real breakthrough! Introduced in the nineties and still top of the bill on the European market: the No.1 original trailing Petunia!

Surfinia<sup>®</sup> is known for its strong garden performance, endless flowering and excellent rain resistance. The classic varieties are still on the bestseller lists: Surfinia Hot Pink, Purple, Blue, White, Sky Blue, Burgundy and Lime are all dominant in today's European market. Suntory Flowers Europe keeps adding new varieties to the classics to keep this range up-to-date. New additions such as Heavenly Blue, Velvet Blue and Deep Red all meet the high standards Surfinia<sup>®</sup> is known for. We will keep on bringing you special classics (trailing Petunia) with excellent performance that you can always rely on!

SURDIVA®

# *Scaevola*

COLLECTION

Surdiva® is a Scaevola hybrid. It is one of the most heat-tolerant bedding plants, and offers manageable growth and low maintenance. Surdiva® has a mounding, semi-trailing habit and produces distinctive fan-shaped flowers on short terminal spikes. These plants are drought tolerant, making them ideal for low-maintenance situations.

TAPIEN®

# *Verbena*

COLLECTION

Tapien® Verbenas are the perfect ground cover plants, carpeting an area of up to 1 square meter each and easily crowding out weeds. Constantly in bloom, they are impervious to heat, humidity and light frosts, thriving where other verbenas fail. Extraordinary in hanging baskets too.

Tapien® is the fine-leaved Verbena hybrid from Suntory Flowers Europe. This colourful Verbena is available in a wide variety of colours and gives a rich carpet of flowers throughout the season. Tapien® blooms continuously from spring to autumn and is a strong and sturdy plant. Tapien® is unmatched in its resistance to powdery mildew thanks to innovative breeding by Suntory® Flowers Ltd. Tapien® is suitable for baskets, balcony containers and for use as (ground covering) bedding plants.

TEMARI®

# *Verbena*

COLLECTION

Temari® Trailing varieties grow vigorously in the landscape, easily spreading to over a metre across! Plants bloom profusely as large, cheerful clusters of flowers appear continuously from spring right through to autumn. Perfect for hanging baskets. Winter hardy in mild climates.

Temari® is the broad-leaved Verbena hybrid from Suntory Flowers Europe. This Verbena is available in more than twenty different varieties. Temari® blooms continuously from spring to autumn and is a strong and sturdy plant. Temari® is suitable for baskets, balcony containers and for use as a bedding plant. Like Tapien®, Temari® is resistant to powdery mildew thanks to innovative breeding by Suntory® Flowers Ltd.

# *Contact & info*

## *What do we do*

**The business of MNP flowers can broadly be divided into four activities nowadays. Each year MNP flowers selects new and innovative varieties and brands them under Suntory Flowers Europe.**

### *# Testing & selection*

MNP flowers introduces new plants and varieties from Suntory Flowers Europe, among others, onto the European horticultural market. Breeding takes place in Japan, where an extensive team of plant professionals works passionately on creating the perfect plant for gardens and balconies worldwide. MNP flowers specialises in specific R&D areas, including selection. We employ several professionals, who all have in-depth knowledge of the European horticultural market. Together they select plants and varieties that suit this market perfectly.

Selected plants and varieties are assessed extensively at several testing locations. Varieties are trialled for earliness, floriferousness, weather resistance, sturdiness, colour consistency, and so on. At MNP flowers we value and care about the opinions of our business partners with regard to new plant introductions. Therefore, our business partners are closely involved in the selection and testing process.

### *# Building brands*

After final selection, we decide on which varieties will be introduced, and which will be either retested or disregarded. This is where we start building brands!

The marketing department of MNP flowers is the creative heart of our organization. We carry out market research for all varieties that will be introduced. We investigate who the customer will be, and his or her perception of the new product. This is very important for positioning the product in

the market. We think about product naming plus the total concept and finally we come to the brand design, which is when we start to create a brand with its own logo, labels, pots, leaflets, website, etc., ready to be marketed!

### *# Introduction, sales & licensing*

One important activity at MNP flowers is bringing our new varieties (novelties) to customers. Part of the new introduction strategy at MNP flowers is to spread novelties over the year. MNP flowers introduces new varieties three times a year: during the IPM in January, the FlowerTrials® in June and the FloraHolland Trade Fair in November. This means that there is always a reason to visit MNP flowers, both on location during exhibitions and at home during the FlowerTrials®. Business partners can then express their interest in a new product and decide whether they want to run trials at their own site or add the introduction to their catalogue immediately.

Growers must pay a licence fee for every Suntory Flowers Europe plant. MNP flowers recoups this licence fee to its business partners by creating marketing concepts, arranging free publicity and PR, safeguarding plant quality, etc.

### *# Monitoring & support*

Because we charge a licence fee, we are obligated to provide our business partners with all the support they need. We therefore keep in close contact with our partners and visit them as often as possible, not only to provide advice about propagating and growing specific Suntory Flowers crops, but also to listen to their own experience in the field so that we can take it into account during the next testing and selection cycle.

# *Sales, Product management & technical support*

**MNP flowers introduces new plants and varieties from Suntory Flowers Europe onto the European horticultural market. Breeding takes place in Japan, where an extensive team of plant professionals works passionately on creating the perfect plant for gardens and balconies worldwide.**

MNP flowers specialises in specific R&D areas, including selection. We employ several professionals, who all have an in-depth knowledge of the European horticultural market. Together they select plants and varieties that suit this market perfectly. Selected plants and varieties are assessed extensively at several different testing locations. Varieties are trialled for earliness, floriferousness, weather resistance, sturdiness, colour consistency, and so on. At MNP flowers we value and care about the opinions of our business partners with regard to new plant introductions. Therefore, our business partners are closely involved in the selection and testing process.

**At MNP flowers we are happy to guide and advise our business partners who choose to propagate and grow our plants. Therefore, we work closely with our licensees and are highly committed to offering a high level of customer service.**

For cultivation and selection advice please contact Klaas Droog, our sales and growing expert. Klaas has more than a decade of intrinsic experience in the ornamental horticulture trade and can therefore provide you with the best tips and advice about propagating and growing Suntory Flowers Europe plants.

*We value the opinions of our business partners with regard to new plant introductions.*

For questions and advice about sales and export, please feel free to contact Klaas Droog or Jeroen F. Egtberts. With many years of experience in the European horticultural sector, they have developed an extensive knowledge of the market. They also have a wide network in the sector, and are therefore of great value to MNP flowers, and to you, as our business partner.

Growers must pay a licence fee for every Suntory Flowers Europe plant. MNP flowers recoups this licence fee to its business partners by creating marketing concepts, arranging free publicity and PR, safeguarding plant quality, etc. For questions about licence administration and control, please contact Willem Mulder.

*Marketing:  
we are here  
to help you!*

The marketing department of MNP flowers is the creative heart of our organisation. All the artwork for MNP flowers and Suntory Flowers Europe is designed by our own marketing team. Dynamic marketing concepts are extremely important if you want to be unique in today's horticultural market. And that's our goal: to create exceptional marketing concepts for our beautiful products.

*Profit from stunning marketing concepts!*

Profit from the excellent marketing concepts that are created for products from Suntory Flowers Europe. For example, you can choose a new Surfinia® label or grow your Beedance® varieties in our specially designed printed pots.

Our clients are valuable to us. We would love to intensify our contact with you, and respond to all your thoughts and questions about the marketing of these products. Feel free to contact us.
