

# PADDOCK PLANTS

20TH ANNIVERSARY PLANT LISTING

2023

GROWN PEAT FREE

DELIVERED PLASTIC FREE

## WELCOME TO THE PADDOCK PLANTS 2023 PLANT LIST

*As you can see from the cover, 2023 marks the 20<sup>th</sup> anniversary of Paddock Plants, and here you will find the plants that will be helping us celebrate it. The past couple of seasons have had their difficulties, both on a personal and the wider front, but we are determined to put them behind us and celebrate our 20 years of growing in style!*

*In these pages we list all (or most of!) the plants we will be growing in 2023 and that should be available during the course of the season. Of course, due to seasonal variation & success or otherwise of crops, there may be some that don't make it to the sales bench, but, equally, there will undoubtedly be plants not on this list that do. But this is as close as we can get to a definitive availability list for the coming year.*

*There are some forty new plants on the list, including a few that are not strictly new, but are rather returning favourites that have been taking a break. Pot sizes vary, but most plants are generally available in 1 litre or 2 litre pots. In some cases, particularly houseplants, pot sizes may be smaller. For more details and for prices, please see our website. Bear in mind that, in the case of new plants, the webpages may still be waiting to be written, so you might in some instances have to check back again later!*

*Our plants are grown peat-free on the nursery and delivered plastic-free. We grow our plants in plastic pots, which we reuse for anything up to 10 years, but transfer them into cardboard pots for on-site purchases and local deliveries, and remove from pots when sending by post or courier.*

*We hope you enjoy looking through this list and that you will find something sufficiently interesting in it to make you want to visit our website or, even better, visit us in person. You will be very welcome.*

*Happy gardening in 2023.*

*Rob & Joanna*
