From the Desk of Tom Kimmel

To Our Esteemed Customers:

I was going to write my usual introduction, fishing for compliments, complaining slightly about life and how tough it is, whining about why our landscaper customers are not working day and night planting more of our plants, and then, in an unwarranted fit of optimism, I asked our sales personages what they recommended for me to write. And their recommendations were pretty much the polar opposite of my natural tendencies. They used the words: Sweetness and Light and Pleasantness and Love. And so, after a few days of mulling that over, I am going with that theme. After all, no one wants to hear about my personal psychological problems, I have found out to my great disappointment, and everyone wants to feel loved, and if telling people we love them will get them to send me their money, then that is a fair exchange.

We had our best sales year ever in 2021 and are all geared up for the same in 2022. As you may have noticed, we did not raise our prices in the middle of last year, and we do not plan on raising them in the middle of this next year. As you will also shortly notice, while leafing through this catalog/price list, we have factored in estimated bouts of inflation. If we were really good at predicting future economic trends we would be doing that for a living and not getting our hands dirty in a business of this level of complexity, so we are amateurs in that area.

Our goal is to keep our work force in place. It is a large, stable, experienced and well-behaved work force, one attractive to every other nursery, landscaper, and factory owner in our area. We have resolved to meet the competition and pay them whatever it takes, hence the price increases. We are concentrating on groundcover as that is our tradition. It is also the easiest thing to ship. Best of all it does not bloom so we do not have to worry about that problem—having it look good all of the time. We are slowing our ivy (*Hedera helix* ‘Thorndale’) production way down and the reasons are too complex to explain here. Laws in our adjoining states are slowing down sales of *Euonymus f. coloratus* but, in the interim, we are hesitant to miss a potential sale. Everything is being replaced with the *Carexes* (Sedges to the normal people) which look like clumps of green grass. We hear that it is the latest hot plant and we are about ready to flood the market.

We like custom grow orders. We like to sell liners—mostly 38 cell paks, but also Deep Fifties and 2 ½” SVDs—and will produce everything that we are already growing or have cutting beds of in the field. We are pretty good at finding the hard-to-find new-and-improved plants. The sooner you give us a heads up the better. Our sales personages have a little spare time in the winter to do this research. In the spring and summer they are busy booking orders and coordinating shipping.

We are very proud of our shipping department and how they deliver reliably and cheerfully. Everyone on our staff understands that if we cannot get it shipped on time and in good shape, then it does not matter what we have. Dianne and I have explained this enough times that it is now well understood.

Keep working, and remember, Peace, Love, and Understanding.

Tom Kimmel

Groundcovers

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1 container	2.25 sq. ft.
24" centers	#1 container	4.00 sq. ft.

Generally, groundcover plants are spaced 6-12" apart. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Ajuga**Zone Varies**

Bugleweed, Dwarf Bugleweed

Forms a dense mat that covers a large area quickly. The flower spikes contain numerous bugle-shaped flowers that are bluish-purple. Needs at least moderate moisture.

Foliage

24ct Standard 1.35 (32.40/flat)

10ct..... 2.25 (22.50/flat)

#1 container..... 5.70

All varieties are not maintained in all sizes, but can be grown upon request.

Arctostaphylos**Zone 2-6**

Bearberry, Kinnikinnick

Loves dry, sunny, and acidic hillsides. An evergreen that grows as a groundcover or low-growing shrub. Spring flowers mature to red berries. Illini Beauty™ reportedly grows better in less acidic soil.

Illini Beauty™ (uva-ursi 'Morton', PPAF)	white w/ pink	6-12"	May-Jun
--	---------------	-------	---------

Not available at this time due to crop losses.

Asarum**Zone 3-8**

Canadian Wild Ginger

Canadian Wild Ginger makes a gorgeous woodland groundcover and prefers an acidic, moisture-retentive soil. The large, herbaceous, gray-green leaves are somewhat fuzzy.

canadense	brownish red	6-12"	Apr

Carex - See Grasses Section

Carexes, commonly called Sedges, are becoming increasingly popular as groundcovers and lawn alternatives. Twixwood offers many of these grass-like plants. See our Grasses Section for the complete list.

Ceratostigma**Zone 5-9**

Plumbago, Leadwort

Intense clusters of peacock-blue flowers cover this vigorous, mat-forming groundcover over a long period of time. In fall, foliage turns deep mahogany while the flowers keep opening for a beautiful contrast. Best color is in full sun.

plumbaginoides	blue	8"	Jul-Sep

10ct.....	2.60 (26.00/flat)		
#1 container.....	6.30		

Convallaria**Zone 3-8**

Lily-of-the-Valley

Intoxicatingly fragrant, bell-shaped flowers that are excellent as cut flowers. Lily-of-the-Valley is hardy, trouble-free, and long-lived. Makes a superb groundcover under trees and shrubs, where aggressive spread is needed.

majalis	white	6-8"	May-Jun
32ct.....	1.38 (44.16/flat)		
10ct.....	2.60 (26.00/flat)		
#1 container.....	6.30		

Dianthus - See Perennials Section

Many *Dianthus* species make excellent groundcovers especially in rock gardens and miniature settings. Check out our [Perennials Section](#) for a complete list.

Euonymus**Zone 4-10**

Wintercreeper, Purple Leaf Wintercreeper

***Euonymus* is a hardy evergreen spreader that is great for erosion control. Foliage turns purple in the fall. Not available for sale to Indiana.**

10ct..... 2.60 (26.00/flat)

Sedum	Native	Zone	Varies
Stonecrop			

Succulent-type perennials that prefer sunny, hot areas in a loose soil with good drainage. *Sedum* are especially susceptible to variations in color, habit, height, etc. depending on growing conditions, light, temperature, etc. They may change color frequently throughout the season. For example, 'Angelina' can be pale yellow to green if grown in shade or over-fertilized. In the heat of the summer it will be bright golden yellow. While in the cold or if stressed with too little water it will be dark orange with red highlights.

The *Sedum* genus is so large it is being subclassified or reclassified. As these come into general use, Twixwood will note them as alternate names. Other genus or subgenus names you will see include *Hylotelephium*, *Petrosedum*, *Phedimus*, *Rhodiola*, and *Sinocrassula*.

#1 container.....	7.40		

All varieties are not maintained in all sizes, but can be grown in these and other sizes upon request.

Vinca**Zone 4-9**

Periwinkle, Myrtle

An evergreen groundcover that is hard to beat for dry, shady areas under trees. Prefers acidic soil and part shade. 'Bowles' is more clumping in habit and has more profuse flowering than the species. 'Dart's Blue' is similar to 'Bowles', but seems to be more disease resistant. 'Ralph Shugert' has variegated foliage.

minor 'Bowles'	blue	6-8"	May-Jun
m. 'Dart's Blue'	blue	6-8"	May-Jun
m. 'Ralph Shugert'	blue	6-8"	May-Jun

Waldsteinia (Geum)**Native****Zone 4-7**

Barren Strawberry

A dependable groundcover native to North America, sometimes called *Geum fragarioides*. Tolerates a wide range of soils and sun, but does best in moist soil with part shade. Buttercup-yellow flowers in late spring.

fragarioides	yellow	4-8"	May-Jun
--------------	--------	------	---------

32ct..... .94 (30.08/flat)

10ct..... 2.25 (22.50/flat)

Grasses and Grass-like Plants

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1, #2, #3 container	2.25 sq. ft.
24" centers	#1, #2, #3 container	4.00 sq. ft.

Generally grasses are spaced 12-24" apart, sometimes farther for the larger varieties. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Acorus**Zone 5-9**

Golden Sweet Flag, Japanese Sweet Flag

Acorus makes an excellent groundcover. It grows well in some shade, loves edges of woods and ponds, and can even grow in several inches of water.

gramineus 'Ogon'	yellow	6-12"	Jun-Jul
38ct.....	1.25 (47.50/flat)		

Ammophila**Native****Zone 5-10**

American Beach Grass, Dune Grass, Marram Grass

A leafy, spreading grass native to North America's sandy beaches and dunes. Commonly found around Lake Michigan. Wind and salt tolerant, but cannot withstand regular foot traffic.

breviligulata	green	30"	Jul-Sep
50ct Deep	1.50 (75.00/flat)		

Other sizes can be grown upon request.

Andropogon**Zone 4-10**

Big Bluestem

The species is a native with lush green foliage that turns a rich orange and copper-red in the fall. 'Black Hawks', bred by Brent Horvath of Intrinsic Perennial Gardens in Chicago, Illinois, features dark green foliage with purple highlights that turn almost black.

gerardii 'Black Hawks' (PP# 27,949)	green/purple to black	60-72"	Sep-Nov
50ct Deep	1.50 (75.00/flat)		
18ct.....	2.75 (49.50/flat)		
#1 container.....	7.40		

Other sizes can be grown upon request.

'Dancing Wind' (PP# 26,892), 'Holy Smoke' (PPAF): Twixwood has started production of these cultivars. May have limited or late availability in 2022.

Bouteloua	Native	Zone Varies
-----------	--------	-------------

Grama Grass, Side Oats Grama, Blue Grama, Mosquito Grass ☉

A warm season grass that is very drought tolerant. The Side Oats Grama common name refers to the *curtipendula* species, which has oat-like seed pods that hang along one side of the stem. The *curtipendula* species is less hardy (only zone 4) and has green foliage that turns golden with hints of orange and red in fall. Flowers are purplish spikelets that turn straw color.

The *gracilis* species (commonly called Blue Grama or Mosquito grass) that Twixwood grows, originally came from the Bad River area of South Dakota as a recognized genotype. *B. gracilis* foliage is more blue in color and the seeds hang down from horizontal seed spikes at the tip of the stem, looking like hovering insects. ‘Blonde Ambition’ is a newer cultivar with striking golden-blond seed heads. Well-drained soil is especially critical for winter survival in the North. ‘Honeycomb’ is similar but with darker seed heads and is believed to be hardier and more suitable for northern regions.

Grasses

Carex	Native	Zone Varies
Sedge		

Sedges are becoming increasingly popular as groundcovers, or lawn alternatives, as well as accent plants. Twixwood continues to add varieties as we find ones that perform well and for which there is a demand. There is a wide variety of shade/sunlight tolerance, hardiness zones, foliage colors, and growth habits.

C. albicans (White-tinged or Oak Sedge) is native to most of America east of the Rockies and usually found in dry, upland forest settings. Narrow, bright green blades form 15-20" tufts.

C. amphibola (Creek Sedge or Eastern Narrowleaf Sedge) is native to the deciduous forests of much of the Eastern US into the South and Southern prairie states. It is often found on the slopes rising from streams. Fountain shaped clumps of narrow foliage. Does have a tendency to reseed.

C. appalachica (Appalachian Sedge) is a native found predominantly in dry deciduous forests & clearings.

C. bicknellii (Prairie Sedge) so-called because it grows out in the open, full sun and can do well in drier situations than most other sedges. It is also one of the taller native sedges.

C. blanda (Common Wood Sedge) is a very versatile native able to handle both sun and shade as well as most soil types. Spreads by rhizomes so can be an aggressive Carex to fill in empty spaces.

C. brevior (Plains Oval Sedge) is a versatile native for sun to part shade that can take wet to dry soils. Small, green oval spikelets turn into brown, prickly seed heads. Formerly known as *Carex festucacea* var. *brevior* and also known by the common name of Shortbeak Sedge.

C. eburnea (Bristle-Leaved, Ivory, or Ebony Bristleleaf Sedge) likes drier, sandy soils and limestone outcroppings. Native from Newfoundland to Alaska and south into Texas and Alabama.

C. elata 'Aurea' (Bowles' Golden Sedge) is a distinct cultivar that has golden leaves with thin green margins. Will grow in 2-3" of water but won't tolerate drought. Best color is in full sun with continually moist soil.

C. emoryi (Emory's or Riverbank Sedge) is a native wetland sedge with long white seed heads that turn to brown crown-like tips over the course of blooming. It is considered endangered in New York.

C. 'Evergold' (Evergold Sedge) is a Japanese cultivar usually considered a member of the *oshimensis* species but sometimes assigned to *hachijoensis* or even *morrowii*. Narrow creamy-white to yellow cascading leaves with deep green margins. Prefers partial sun and moist soil, but will tolerate other conditions.

Continued on Next Page

Carex (continued)

C. flacca (Blue or Blue-Green Sedge) is synonymous with *C. glauca* referring to the blue colored leaves. This native prefers moist soils, even 1-2" of standing water, but established plants can possibly even handle a bit of drought. Prefers some shade. Spreads by rhizomes over time.

C. flacca 'Blue Zinger' (Blue Zinger Sedge) is a cultivar selected for its striking blue foliage. Grows slightly taller than the species, but otherwise similar.

C. hystericina (Porcupine or Bottlebrush Sedge) is a wetland sedge with fine leaves. Native to most of North America except the deep south.

C. 'Ice Dance' (Ice Dance Sedge) is a common variegated cultivar with dark green leaves edged with a very distinct, bright white stripe down each side. Sometimes considered a *morrowii* species. Moderate spreader that prefers moist soil and has best color in shade. May benefit from a winter mulch in northern climates.

C. muskingumensis (Palm Sedge) a native found in areas of temporary standing water.

C. pellita (Woolly or Broad-leaved Woolly Sedge) is native to most of the US. Also known as *C. lanuginosa*. Prefers full to partial sun and wet to moist conditions.

C. pennsylvanica (Pennsylvania Sedge) is one of the most popular sedges, particularly as a dry shade groundcover due to its slow spreading nature. One of the few sedges that prefers well-drained soil. A Roy Diblik favorite that he says may one day replace *Pachysandra*. Native to the Northeast and as far south as Mississippi and Georgia.

C. pennsylvanica 'Straw Hat' was selected by Brent Horvath of Intrinsic Perennial Gardens for its very prominent yellow flowers.

C. plantaginea (Seersucker Sedge) has very wide foliage (1") compared to most of the other sedges we grow. It is native to the northeastern US.

C. radiata (Eastern Star or Straight-Styled Wood Sedge) is native to Eastern North America from Newfoundland to Georgia. Prefers wet to moist soils in part shade.

C. sprengei (Long Beaked or Sprengel's Sedge) is a very hardy native from Alaska to Delaware to New Mexico. Prefers moist to wet soil.

C. vulpinoidea (Fox Sedge) prefers very wet soils and full sun. One of the most common native sedges. The seed heads resemble a fox's tail, but don't last long.

Helictotrichon

Zone 4-8

Blue Oat Grass 

Steel blue blades resemble Fescue, but much larger. ‘Sapphire’ is bluer, has wider leaf blades and is more disease resistant than the species.

sempervirens ‘Sapphire’ (Saphirsprudel)	blue/bluish brown	24-36”	Jun
18ct.....	4.10 (73.80/flat)		
#1 container.....	8.70		

Imperata

Zone 5-9

Japanese Blood Grass  

A slow spreading grass that emerges green and progresses to blood red by fall. The species is considered invasive and banned in many areas. ‘Red Baron’, also known as ‘Rubra’, is shorter, less aggressive, and rarely flowers so it does not self-seed. It is still restricted. Twixwood maintains licensing to sell in several states. Requirements vary, but typically the product cannot be resold or transported out of the state we sell to.

Currently available for the following states: MI, IL, IN, WI, OH, NE, CT

[Liriope](#) - See Groundcover Section

Miscanthus**Zone 5-9**

Chinese Silver Grass, Maiden Grass, Eulalia Grass, Japanese Silver Grass

Miscanthus have been standard ornamental grasses for many years. *Miscanthus sinensis* cultivars are generally considered hardy to Zone 5.

Many varieties can heavily self-seed which has led to *Miscanthus* being considered borderline, if not, invasive. For example, [check out the study done by the Chicago Botanic Garden](#). Twixwood recommends substituting natives and nativars such as *Panicum* and *Schizachyrium* varieties whenever possible.

‘Gracillimus’ is the standard Maiden Grass with narrow green leaves, a silver midrib, and feathery bronze-red seed blooms that turn silver in winter.

‘Little Kitten’ is an extremely dwarf *Miscanthus* with narrow green leaves and silvery plumes.

‘Morning Light’ has narrow leaves with white variegation on the margin. Reddish flower plumes turn silvery in winter.

sinensis ‘Gracillimus’	grn & silver bronze	48-84”	Aug-Nov

Panicum	Native	Zone 5-9
---------	--------	----------

Switch Grass 

Switch Grasses are a native prairie staple. The *virgatum* species has green, 3' foliage with pinkish tinged flower panicles that rise to 6'. Foliage turns yellow in fall.

'Heavy Metal' features 3' columnar clumps of metallic blue leaves that turn yellow in fall. Pink tinged blooms extend to 5'.

'Northwind' is one of the best vertical forms of Switch Grass. Leaves are olive to bluish-green and flowers are yellow. A Roy Diblik selection.

'Prairie Dog' is a Brent Horvath introduction from Intrinsic Perennial Gardens. It was selected for a more reserved habit, upright like 'Northwind' but with coloring more like 'Heavy Metal' with wide blue leaves.

'Purple Tears' was discovered by Piet Oudolf in his nursery in Hummelo, Netherlands. Flower spikes are soft gray with purple seed heads.

Ruby Ribbons has blue-green foliage that matures to purple-red. Flowers are smoky-purple and reach 4'. Ruby Ribbons is the controlled cross of 'Heavy Metal' and 'Haense Herms'.

'Shenandoah' is one of the best red switch grasses. Blue-green foliage turns red by late June. Reddish-pink flowers turn beige as they mature.

Fountain Grass

Fountain grasses prefer full sun and may not bloom as much in partial shade. May not be completely hardy throughout Zone 5. A vigorous, clump forming grass with bottle-brush flower plumes. The cultivars we offer are more compact than the species and have various colors of seed heads.

‘Hameln’ is the standard fountain grass, shorter, more compact and consistent than the species.

‘Little Bunny’ and ‘Piglet’ are miniature versions. ‘Piglet’ is a strong introduction that stays especially short and compact from Brent Horvath of Intrinsic Perennial Gardens.

‘Red Rocket’ is also an introduction from Brent Horvath of Intrinsic Perennial Gardens featuring dark red flower spikes.

Schizachyrium	Native	Zone 3-9
Little Bluestem		

Schizachyrium scoparium and cultivars are the 2022 Perennial Plant of the Year®.

Little Bluestem grasses (formerly classified as *Andropogon scoparius*) are some of the hardiest ornamental grasses. Native to the Canadian Provinces and south through the US all the way to Arizona and Florida. Clumps of slender green leaves with blue bases feature purplish-bronze flowers. Foliage turns bronze-orange in fall.

‘Blue Heaven’ was developed by the University of Minnesota. It is slightly taller and stays upright when most others lodge*. Blue-gray foliage turns burgundy in fall.

‘Carousel’ is a Chicagoland Grows® introduction selected for its compact, rounded habit. Upright green stems with touches of pink. Insignificant flowers.

‘Chameleon’ is a new, variegated cultivar with bright white and green stripes that develop a flush of pink. Has a compact habit.

‘Jazz’ is a sport of ‘The Blues’ selected by Brent Horvath of Intrinsic Perennial Gardens for its shorter form. Less prone to lodge*. Blue foliage turns purple in fall and features purplish flowers.

‘Standing Ovation’ has wider leaves that are blue with red tips. Foliage turns reddish maroon in fall and doesn’t brown out. Seldom lodges*.

‘The Blues’ has slender blue leaves with pinkish stems. Purplish flowers appear in August and foliage turns burgundy-red in fall.

*Lodging is a technical term used to describe the tendency of some Schizachyrium to flop and lay over. This is quite natural in the species and can provide an interesting look in a prairie or mass planting but may not be what is expected in all settings. Newer cultivars are being bred to resist lodging. Lodging tends to be greater with heavy watering and high nutrient levels.

Sesleria**Zone 5-8**

Autumn Moor Grass

A native to the moors of Southeastern Europe. Clump forming with narrow yellow-green foliage and flower spikes that rise to 18". 'Greenlee Hybrid' is shorter and tends to stay greener. Both have purple tinged flowers in the spring and summer.

autumnalis	yellow-green	12-18"	Sep-Oct
'Greenlee Hybrid'	blue-green	10-12"	Sep-Oct

Sporobolus**Native****Zone 3-9**

Prairie Dropseed, Northern Dropseed

This native prairie grass forms clumps of fine green leaves that turn golden-orange in fall. Open flower panicles rising above the foliage are most noted for their sweet fragrance. 'Tara' is a dwarf version with a more upright habit.

heterolepis	green/pink	24-36"	Aug-Oct
h. 'Tara'	green/pink	12-24"	Aug-Oct
50ct Deep	1.00 (50.00/flat)		
32ct.....	1.38 (44.16/flat)		
18ct.....	2.20 (39.60/flat)		
#1 container.....	6.30		
#2 container.....	12.85		
#3 container.....	17.25		

All varieties are not maintained in all sizes, but these and other sizes can be grown upon request.

Perennials

RECOMMENDED PLANT SPACING:

<u>Spacing</u>	<u>Common plant sizes</u>	<u>Square feet per plant</u>
6" centers	32ct.	.25 sq. ft.
8" centers	32ct.	.44 sq. ft.
10" centers	32ct., 24ct., 18ct.	.69 sq. ft.
12" centers	32ct., 24ct., 18ct., 10ct.	1.00 sq. ft.
15" centers	18 ct., 10ct.	1.56 sq. ft.
18" centers	#1, #2, #3 container	2.25 sq. ft.
24" centers	#1, #2, #3 container	4.00 sq. ft.

Generally perennials are spaced 12-24" apart. The distance between the plants is based on the size of the plants used, the expected growth rate, and the budget that the installer has to work with.

$$\text{sq. ft. of job} \div \text{sq. ft. per plant} = \text{number of plants required}$$

Example: 1,000 square feet using 32ct flats planted on 6" centers

$$1,000 \text{ sq. ft.} \div .25 = 4,000 \text{ plants}$$

$$4,000 \text{ plants} \div 32 = 125 \text{ flats}$$

Achillea**Zone 3-8**Yarrow 

Fragrant, fern-like foliage with showy flower heads. Excellent for use in dried flower arrangements. Yarrow does well in hot, dry conditions.

'Moonshine'	yellow	12-24"	Jun-Sep
'Oertel's Rose'	rose-pink	12-15"	Jun-Sep
millefolium 'Paprika'	red	18-24"	Jun-Sep

#1 container..... 5.10

Other sizes can be grown upon request.

Agastache**Zone 5-9**Giant Hyssop, Anise Hyssop, Purple Giant Hyssop, Hummingbird Mint  

Fragrant foliage and plentiful flowers attract butterflies right through the heat of summer. Drought and heat tolerant. Needs good drainage. May have questionable hardiness in Zone 5.

'Blue Fortune'	lavender blue	24-36"	Jul-Sep
----------------	---------------	--------	---------

38ct..... 1.25 (47.50/flat)

#1 container..... 5.10

Other sizes can be grown upon request.

Alchemilla**Zone 3-7**Lady's Mantle  

Fuzzy green leaves trap morning dew in reflective droplets. Can self-seed and works well in mass plantings or even as a groundcover.

mollis 'Thriller'	yellow green	12-24"	June
-------------------	--------------	--------	------

18ct..... 2.20 (39.60/flat)

#1 container..... 5.10

Other sizes can be grown upon request.

Allium	Native	Zone Varies
--------	--------	-------------

Ornamental or Wild Chives/Onions/Garlic, Nodding Onion

Useful in rooftop applications for their drought tolerance while adding height and character above the typical *Sedum*. Gaining popularity in at-grade landscape applications as well.

A. cernuum (nodding onion, hardy to Zone 4), is native to North America. Also known as Nodding Onions, they are showy in the landscape.

‘Chivette’ (hardy to Zone 4) is an introduction from Brent Horvath of Intrinsic Perennial Gardens. Its season-long kelly green foliage that starts upright and relaxes as the season progresses. Lavender flowers have a dark purple stripe on each petal. Mostly sterile. Both foliage and flowers are edible.

‘Millenium’ (hardy at least to Zone 5) is nearly identical to ‘Summer Beauty’ but we have found it usually blooms a few weeks later making them excellent choices to plant together for extended bloom time. Perennial Plant of the Year® in 2018.

‘Summer Beauty’ (hardy at least to Zone 5) has become the standard in *Allium* plantings due to its vigorous and reliable performance. Combines nicely with ‘Millenium’ (see above) due to similarity, but differing bloom times for extended color.

A. thunbergii ‘Ozawa’ is a fall blooming Japanese onion with purple-pink flowers.

‘Windy City’ (hardy at least to Zone 5) is an introduction by Brent Horvath of Intrinsic Perennial Gardens with deeper purple blooms.

All varieties are not maintained in all sizes, but these and other sizes can be grown upon request.

‘Big Beauty’ (PPAF), & stellatum: Twixwood has started production of these cultivars. May have limited or late availability in 2022.

Amsonia	Native	Zone	Varies
---------	--------	------	--------

Narrow Leaf Blue Star, Blue Star

'Blue Ice' (hardy to Zone 4) is similar to the native *tabernaemontana* with willow-like leaves that are wider than the *hubrichtii* and *ciliata* species. The *hubrichtii* and *ciliata* species (considered hardy to Zone 5) are native to the south central United States and feature fine, needlelike leaves that turn golden with hints of orange in fall. 'Storm Cloud' is a Proven Winners® cultivar with stems that emerge near black in the spring. Leaves are dark green with silver veins. 'Halfway to Arkansas', 'Midway to Montana', and 'Fontana' are Brent Horvath introductions from Intrinsic Perennial Gardens.

A. *ciliata* var. *tenuifolia* 'Verdant Venture' (PP# 33,415): Twixwood has started production of this cultivar. May have limited or late availability in 2022.

Anemone	Native	Zone	Varies
---------	--------	------	--------

Windflower, Japanese Anemone, Snowdrop Windflower

Prefers rich, well-drained soil in moist, semi-shaded areas. Anemones are spreading perennials that make great groundcovers, especially the North American native *canadensis* species (Zone 3) and the European native *sylvestris* (Zone 4). 'Honorine Jobert' (Zone 4) is also known as 'Alba' and is sometimes sold under the species name *japonica* instead of *hybrida*. It features single white flowers. 'Robustissima' (Zone 4) is commonly called Grapeleaf Anemone and features single light pink flowers.

<i>canadensis</i> *	white	12-24"	Z3	Apr-Jun

* Early availability is limited in 2022

Aralia**Zone 4-8**Japanese Spikenard, Mountain Asparagus, Udo 

An herbaceous perennial native to Japan, Korea, and China. Young shoots are considered a culinary delicacy in Japan and taste similar to asparagus. 'Sun King' is a yellow-leaved variety. Reddish-black berries are inedible but loved by the birds. *Aralia* 'Sun King' was the 2020 Perennial Plant of The Year®. Reportedly deer resistant.

cordata 'Sun King'	white	36-72"	Jul-Sep
#1 container.....		8.70	
#2 container.....		17.75	

Artemisia**Zone 4**Russian Wormwood  

New from Darwin Perennials®, SunFern™ features fern-like foliage that thrives in full sun. Can tolerate up to half a day of shade. Drought tolerant once established. Makes an excellent accent plant, works well in containers and as a groundcover in the landscape. Plants can be trimmed to maintain shape if needed but are non-invasive and won't spread.

Asclepias	Native	Zone 3-9
-----------	--------	----------

Butterfly Weed, Butterfly Milkweed, Swamp Milkweed

An important food source for Monarch butterflies.

A. incarnata is the tall pink milkweed commonly called Swamp Milkweed. ‘Cinderella’ is similar, but may be a bit shorter and with pinker blooms. As the common name implies, prefers moist soil, but is surprisingly tolerant of average, well-drained soils.

A. sullivantii is commonly called Prairie or Smooth Milkweed. This native prefers moist prairie areas such as river bottomlands and is similar in appearance to Common Milkweed.

A. syriaca (Common Milkweed) has larger blooms and smooth stems. This native grows in drier areas and is even somewhat drought tolerant.

A. tuberosa (Butterfly Milkweed) has yellow-orange flower heads in summer and the ‘Gay Butterflies’ cultivar is even more colorful. This species is native to the uplands and is more drought tolerant.

A. verticillata (Whorled Milkweed) has needle-like leaves in whorls at each node along the stem. This native also prefers drier native areas and is drought tolerant.

All varieties are not maintained in all sizes.

Aster - See Eurybia

Astilbe**Zone Varies**

False Spirea

Feathery flower heads provide color from spring into summer. Astilbes prefer moist, semi-shady conditions and are great with hostas and ferns. Some varieties such as 'Fanal' and 'Maggie Daley' are considered hardier (Zone 3.)

We have chosen to alphabetize this list by cultivar name rather than species and to abbreviate the species names: a = *arendsii*, c = *chinensis*, j = *japonica*, s = *simplicifolia*. There is often disagreement over the species name and it may be best to leave them off altogether. We have also chosen to use the English names with the German in parentheses in most cases. 'Pumila' should probably be categorized as a subvariety, not a cultivar: *A. chinensis* var. *pumila*.

a. 'Bridal Veil' ('Brautschlezer')	white	18-36"	Z3	June
j. 'Deutschland'	white	18-24"	Z4	May-Jun

All varieties are not maintained in all sizes.

Continued on the Next Page

Echinacea (Continued)

These patented hybrids receive a lot of marketing, so are often requested by customers. Some are unique colors or double bloomers, but they may not perform as well in the landscape as some of the native, traditional varieties. In some cases they also appear not to be as effective with pollinators. The ones below are the ones that stand out in our trials.

The Kismet® Series comes from the Terra Nova Nursery breeding program. With their large, showy blooms and extended bloom time, we think they are particularly adapted to both the landscape and retail markets.

The performance of the Sombrero® Series stands out above the others in trials and in our own experience. Sombrero® Baja Burgundy even won the first ever All American Selections (AAS) performance award for perennials in 2020 (See also Rudbeckia American Gold Rush).

Eupatorium (Eutrochium)**Zone 4-8**

Joe-Pye Weed

These plants are being reclassified. 'Little Joe', along with the native *E. purpureum* (Joe-Pye Weed), is now going under the genus name *Eutrochium* with the *dubium* species. 'Summer Snow' is a white-flowered cultivar developed by the Chicago Botanic Garden.

'Milk & Cookies' has chocolate red foliage with milky white flowers. 'Polished Brass' foliage emerges red like its seed parent 'Milk & Cookies' but the leaves are glossy and it is a larger plant.

dubium 'Little Joe' (PP# 16,122)	mauve-purple	48-60"	Jul-Sep
maculatum 'Summer Snow' (PP# 31,128)	white	48-60"	Jul-Aug
perfoliatum 'Milk and Cookies'	white	36-42"	Jul-Aug

Ferns	Native	Zone Varies
-------	--------	-------------

Ferns  

Athyrium filix-femina (Lady Fern) has lacy green leaves. Grows in tall clumps. Native.

Athyrium nipponicum 'Pictum' (Japanese Painted Fern) produces fronds that are soft silvery-gray with hints of red and blue. Probably more accurately named *A. nipponicum* var. *pictum*. May be hardy to Zone 3.

Dryopteris erythrosora (Autumn Fern or Japanese Shield Fern) has coppery fiddleheads which open to golden-green fronds turning a coppery color that deepens in fall.

Dryopteris marginalis (Leatherwood Fern) is very adaptable and has evergreen foliage. Also called Marginal Wood or Marginal Shield Fern. Native.

Dryopteris remota (Remote Wood Fern) is a vigorous grower. The species name, *remota*, means scattered. As *Dryopteris* ferns are often given common names of Wood, Shield or Buckler it could also be called Scattered Wood Fern, etc.

Matteuccia struthiopteris (Ostrich Fern) is a popular large, vase-shaped fern with tall, erect, gracefully arching, dark green fronds. Typically 2-3', but can reach 6'. Native.

Osmunda cinnamomea (Cinnamon Fern) has yellowish green fronds with cinnamon colored fibers at the base of the plant which are used in potting Orchids. Native.

Polystichum acrostichoides (Christmas Fern) is an evergreen fern with glossy fronds. Native.

Athyrium filix-femina	(Lady Fern)	12-36"	Zone 4-8
Athyrium nipponicum 'Pictum'	(Japanese Painted Fern)	12-18"	Zone 4-8
Dryopteris erythrosora	(Autumn Fern)	18-30"	Zone 5-8

#1 container..... 9.80

Due to low availability, high demand, and a longer lead time for full maturity, some varieties may have late or limited availability.

See also SunFern® under Artemisia.

Geranium	Native	Zone	Varies
----------	--------	------	--------

Hardy Geranium, Cranesbill, Spotted Geranium

Dependable perennials that work well as groundcovers or individually. Foliage is green and often turns reddish in fall. The *maculatum* species is native as are the parents of several others.

‘Rozanne’ was the 2008 Perennial Plant of the Year®. It continues to be in high demand because of its excellent performance. Sometimes also called ‘Gerwat’ or ‘Jolly Bee’.

Heuchera**Zone Varies**

Coral Bells, Alum Root

Semi-evergreen, clump forming foliage plants. Foliage color can vary depending on sun exposure. Some do better with more shade, especially the lighter colored varieties.

The cultivars in the first groups of lower priced *Heuchera* are the standard, tried and true varieties you can count on. 'Autumn Bride' is a large, green plant similar to the *villosa* species.

The higher priced, patented varieties have unique features. These include specialized colors, more specialized growth habits, and other desirable characteristics. They may not be as hardy or adaptable as some of the more familiar ones, however. We do not have room for descriptions that do justice to each variety so we encourage you to look them up online or ask us for more information.

Iris	Native	Zone	Varies
------	--------	------	--------

Siberian Iris, Southern Blue Flag

Siberian Iris are as hardy as the name suggests (Zone 3). 'Caesar's Brother' is a deep blue.

The native, *virginica shrevei* (hardy to Zone 5), occurs naturally in sunny marshes, wet prairies, and savannahs. This fragrant flower grows in water up to 1' deep. Great for edges of ponds and streams.

Red-Hot Poker, Torch Lily

Bred from a South African native, these exotic looking perennials have grass-like foliage with tall flower spikes. Tie the leaves over the crown to prevent water pooling and freezing inside. May need additional protection in Zone 5.

High Roller (PP# 32,295)	gold/orange	36-48"	May-Jun

*May have limited or late availability in 2022.

Lavandula**Zone 5-9**English Lavender 

An exquisite plant for the herb garden or sunny border. Its silvery-green foliage creates a desirable accent. Prefers light soil and fairly dry conditions. 'Phenomenal' was named a 'Must-Grow Perennial' by Better Homes & Gardens. Reportedly handles heat and humidity better than other varieties. May even be hardier (Zone 4). In northern climates, it typically stays shorter than sometimes advertised.

angustifolia 'Munstead' lavender-blue 12-18" Jun-Aug

50ct Seed..... .90 (45.00/flat)

#1 container..... 6.30

Nepeta**Zone Varies**

Catmint

Gray-green foliage is complimented by soft lavender-blue flowers. The taller varieties tend to fall over and spread across the ground unless staked. Trim to rejuvenate and extend flowering. ‘Walker’s Low’ was the Perennial Plant of the Year® in 2007.

There is some variation on the species names for the different varieties. ‘Walker’s Low’ and ‘Blue Wonder’ should probably be *racemosa* species, but are often sold as *faassenii*. *Faassenii* is a sterile hybrid of *racemosa* and *nepetella*, so should be designated *x faassenii* on ‘Kit Cat’.

Little Trudy® is truly a dwarf catmint, one of the most compact and consistent we’ve seen.

The Prelude™ Nepeta have a mounding habit that, unlike the other varieties, stay upright and feature very large flowers that are excellent for pollinators.

‘Blue Wonder’	dark blue	9-18”	Z3	May-Sep
‘Early Bird’	lavender	12”	Z3	May-Sep

All varieties are not maintained in all sizes.

Rudbeckia

Zone Varies

Black-Eyed Susan, Coneflower

One of the best perennials for long life, ease of care, disease resistance, and season-long beauty and color. The cut flowers and dried seed heads are second to none. Twixwood recommends 'Summerblaze'. It has narrower leaves like 'Viette's Little Suzy' and is more resistant to black spot (Septoria) than 'Goldsturm'.

'Goldsturm' (fuldiga var. sullivantii)	yellow	24-36"	Z3	Jun-Sep
'Summerblaze'	yellow	24-30"	Z3	Jul-Sep

#1 container..... 6.30

All varieties are not maintained in all sizes.

Salvia**Zone Varies**

Meadow Sage, Wood Sage

Great for sunny borders, cutting beds, and dried arrangements. The textured foliage is often aromatic. Prefers full sun in a light acidic soil. Cutting plants back halfway at the end of June improves blooming and appearance.

Wood Sage (*x sylvestris*) is the result of a cross between *nemorosa* and *pratensis*. It is sold under various synonyms including *S. x alpestris*, *S. x asperula*, *S. x collina*, and *S. x superba*.

nemorosa 'Caradonna'	blue-violet	12-24"	Z4	Jun-Sep

Sedum**Zone Varies**

Stonecrop

Succulent-type perennials that prefer sunny, hot areas in a loose soil with good drainage. Sedum are especially susceptible to variations in color, habit, height, etc. depending on growing conditions, light, temperature, etc. They may change color frequently throughout the season.

The Sedum genus is so large it is being subclassified or reclassified. As these come into general use, Twixwood will note them as alternate names. Other genus or subgenus names you will see include *Hylotelephium*, *Petrosedum*, *Phedimus*, *Rhodiola*, and *Sinocrassula*.

Stachys**Zone 4-8**Lamb's Ear, Betony 

Twixwood grows two quite different forms of the genus *Stachys*, each represented by different common names.

Lamb's Ear forms a clump of large fuzzy leaves and rarely flowers in the landscape. 'Helene von Stein', sometimes called 'Big Ears', belongs to this type.

Betony forms a clump of glossy green foliage and flowers profusely. Sometimes classified as *S. betonica* or *Betonica officinalis*. 'Hummelo' and Brent Horvath's two introductions from Intrinsic Perennial Gardens, 'Summer Crush' and 'Summer Romance' belong to this type. *Stachys* 'Hummelo' was the 2019 Perennial Plant of the Year®.

Both types of *Stachys* make excellent groundcovers in mass plantings.

Stokesia**Zone 5-9**Stokes' Aster 

Stokesia is a North American perennial native to the wet bottomlands and pine woods of the south. Peachie Saxton of Mississippi selected this cultivar for its longer bloom time which can be expanded by deadheading. May require winter protection in Zone 5.

laevis 'Peachie's Pick'	blue	12-18"	Jun-Sep
#1 container.....	8.70		

Teucrium**Zone 5-7**Spreading Germander 

A slow-spreading, dense groundcover. Purplish-pink flowers reach 3" above foliage. 'Pride of Georgia' is a Chicagoland Grows® introduction from a Chicago Botanic Garden seed collection trip to the Republic of Georgia. Half of the royalties benefit the Institute of Botany at the Ilia State University, The Republic of Georgia.

chamaedrys ssp. nuchense	purplish pink	5-7"	Jul-Sep
'Pride of Georgia' (PPAF)			
#1 container.....	7.40		

May be late or limited availability

Vernonia**Zone 4-9**Ironweed 

This is an upright perennial that typically grows 2-4' tall on stiff, leafy stems which branch at the top. Narrow, linear to lance-shaped leaves up to 5" long have serrated margins. Flowers give way to rusty seed clusters. Blooms late summer to fall. Their purple flowers contrast nicely with the bright yellow of *Solidago* blooms. Excellent pollinator plants.

The *lettermannii* species of Ironweed is sometimes called Smooth Ironweed. Generally grows taller in moist soils. The Summer Series are Chicagoland Grows® introductions selected for better performance and disease resistance.

Twixwood Sales Yard

Twixwood Nursery maintains a Sales Yard at our main location for local (and sometimes not so local) customers who enjoy the one-stop shop experience. The Yard is stocked with a wide selection of Perennials, Groundcovers, Grasses, and Shrubs. We stock with a focus on popular items and our best looking Bud and Bloom, providing a small snapshot of what is available from our other farm locations. Many landscapers have designed for their jobs while shopping the Sales Yard and left with what they needed the same day.

Contact your local sales rep for more details on current yard availability. Walk-ins are always welcome.

yard@twixwood.com

Terms & Conditions

THIS LIST CANCELS ALL OTHERS.

PRICES

All prices are F.O.B. Berrien Springs, Michigan. All advance orders are booked subject to prices and availability at the time of shipment. Prices are subject to change without notice.

CREDIT ACCOUNTS

Orders are accepted on a cash, company check (personal or third party checks may not be accepted), or credit card basis only, unless a confidential credit application has been submitted and approved by Twixwood Nursery. Terms for approved credit applicants are Net 30 to customers with established credit. Allow 4-6 weeks for processing the credit application. First orders for all new customers are by pre-payment only. A surcharge of 1.5% per month (18% per year) will be applied to unpaid accounts after terms from date of shipment. Payment on account may be applied to finance charges first.

DELINQUENT ACCOUNTS

Accounts not in good standing or significantly past due may have payment terms removed. Payment terms are not automatically reinstated and may require a new credit application process.

NON-SUFFICIENT FUND (NSF) CHECKS

A \$30 charge will be assessed for NSF checks.

CREDIT CARDS

Payment by Visa, Mastercard, and Discover is accepted. Please call the accounting department during normal business hours. Credit card information is not maintained for future use unless a form is filled out and signed by the customer allowing such information to be maintained through the end of the calendar year.

CREDIT BALANCES & WRITE OFF AMOUNTS

Twixwood reserves the right to write off any unclaimed credit balances under \$10 at the end of the calendar year.

LIMITED WARRANTY*

We warrant our plants to be true to name and to be in good living condition at the time of shipment. All other warranties are specifically excluded, including but not limited to the warranty of merchantability or fitness for intended use and any warranty regarding future

Phone: 269-471-7408

www.twixwood.com

growth. Our warranty is limited to the seven day period immediately after delivery. All liability for incidental and consequential damages are excluded from this limited warranty. The following remedy applies and is your exclusive remedy: Limited warranty claims will be resolved by the replacement of defective plants only. All orders are accepted and shipments made subject to crop conditions and may be cancelled, prorated or changed based on availability at the time of shipment. (See Boxwood/Pachysandra note below.)

CLAIMS*

All plants become your property at the time of delivery. Plant claims that are covered by our limited warranty (see above, and Boxwood/Pachysandra note below) must be submitted in writing within 7 days of shipment. All honored claims will be resolved by the replacement of defective plant material only. Replacement plant material will be provided by Twixwood Nursery as soon as production plans permit and will be shipped at cost.

CHOICE OF LAW FORUM

It is agreed to by both parties that any contract for sale of goods and services made between Twixwood Nursery, LLC and the buyer is made in Michigan and shall be governed by Michigan law. Any action pertaining to such sale shall be venued in Berrien County, Michigan.

The buyer also agrees that in the event of non-payment of an overdue account, they shall be liable for collection charges, including reasonable attorney fees.

***BOXWOOD BLIGHT & PACHYSANDRA**

Twixwood is a participant in the Boxwood Blight Compliance Agreement. Our stock is regularly inspected and is clean. However due to these concerns, all Boxwood sales are final and Twixwood cannot accept returned or refused plants. Pachysandra is a host plant for Boxwood Blight although the blight apparently does not adversely affect the Pachysandra itself. However because of its ability to host the blight, Twixwood may also not accept refused/returned Pachysandra.

See additional information under the Shipping Information Section

Earned Volume Discounts

EARNED VOLUME DISCOUNT PROGRAM

Twixwood's Volume Discount Program is based on payment history and on purchases of the previous year. To qualify for these volume discounts your account must be kept current and there cannot be any outstanding finance charges. Discounts removed on delinquent accounts are not automatically reinstated.

Purchased Amount	Discount
\$7,500	6%
\$15,000	9%
\$25,000	12%
\$50,000	15%
\$100,000	18%
\$150,000	21%

As noted above, discounts may be reduced for historically delinquent accounts at Twixwood's discretion.

Shipping Information

FUEL SURCHARGE

Twixwood reserves the right to add a fuel surcharge to cover costs if the need arises.

ROUTING & SPECIAL REQUESTS

All deliveries are subject to the scheduling of full trucks to a particular area and are routed according to the most efficient route. We make every effort to meet your requested needs, but we appreciate your understanding that this is not always possible. Please inform your customer service rep of your delivery needs, and any flexibility that will enable us to ship efficiently and keep our prices low for you.

RACKS

Twixwood primarily delivers on metal rolling racks. Racks are dropped (left on site) only at the discretion of Twixwood and with the understanding that they will be picked up with the next delivery or at another pre-determined time. Extending rack pick up as well as loss or damage to the racks can result in charges up to \$750/rack.

DETENTION FEE

Twixwood instructs our drivers to assist the customer in getting the plant material to the back of the truck for unloading. We do ask that the unloading be carried out efficiently so the driver can continue on his or her route without delaying other customers. Delays of more than 2 hours on site can result in detention charges up to \$100 per hour.

SHIPPING DAMAGE CLAIMS

All shipping damage must be noted at the time of receipt of the goods. Note any obvious damage or shortages in writing on the truck driver's invoice.

See Previous Pages for Warranty & Damage Claim Information

DELIVERY NOTIFICATION

We will attempt to notify you of deliveries one day in advance. Due to safety concerns and trucking regulations it is not always possible for drivers to notify you closer to delivery.

PICKUP

Twixwood maintains a sales yard beside the main office at 2759 East Shawnee Road, Berrien Springs, Michigan 49103. We attempt to keep it stocked with our better looking and more common items and encourage local wholesale customers to come and shop. To assure availability of specific items, please call and place an order according to the order deadlines noted on the next page. Orders not picked up within 7 days are subject to a restocking fee up to 20%.

ORDER DEADLINES

To ensure and maintain efficient and affordable freight and quality plants upon delivery, Twixwood maintains the following order deadlines. While we make every effort to service our customers, outside of these deadlines it does become much more difficult if even possible, at least without additional charges. Trucks are not routed to all areas every day. Your Customer Service Rep can assist you with determining which days are most likely to have full trucks for your area.

All Times are Eastern Standard Time

Delivery Date	Order Deadline	Additions* Accepted Until**
Monday	1 pm Thursday	6 pm Thursday
Tuesday	1 pm Friday	6 pm Friday
Wednesday	1 pm Monday	6 pm Monday
Thursday	1 pm Tuesday	6 pm Tuesday
Friday	1 pm Wednesday	6 pm Wednesday

*Additions to existing orders. Adding new stops to a routed truck may not be possible.

**Additions are only accepted if we have enough time to get them ready and there is enough room on the truck.

PLANT LABELS & TAGS

We will put one variety tag in each flat, #1 and larger container. Additional tags may be available for an additional charge. Please notify your customer service representative of additional tag needs. Custom UPC sticker printing is available for an additional charge.

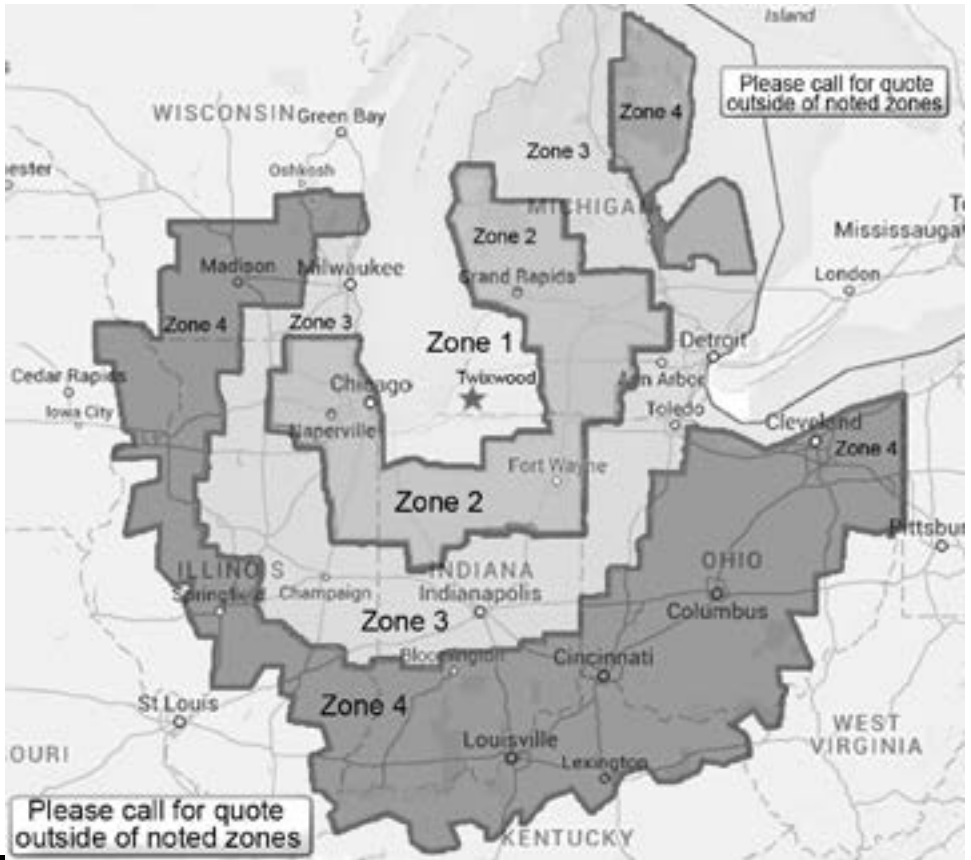

RESTOCKING*

Cancellations, adjustments or postponements to orders after the order deadlines noted above can result in restocking fees up to 20% of the order.

*See previous pages regarding Boxwood Blight & Pachysandra

See additional information under the Terms & Conditions Section

Shipping Zone Map

Shipping Zones

Zone	% Charge	Minimum Freight
1	6%	\$100 for Orders Under \$500
2	9%	\$100 for Orders Under \$500
3	13%	\$150 for Orders Under \$750
4	17%	\$250 for Orders Under \$1000

Freight percentages calculate on the order subtotal, after earned volume discounts are removed and before tax is added.

Shipping Zone Information Continued From Previous Page

Please refer to the map for shipping zones. Twixwood maps zones by County and Zip Code. Please call for your exact shipping zone.

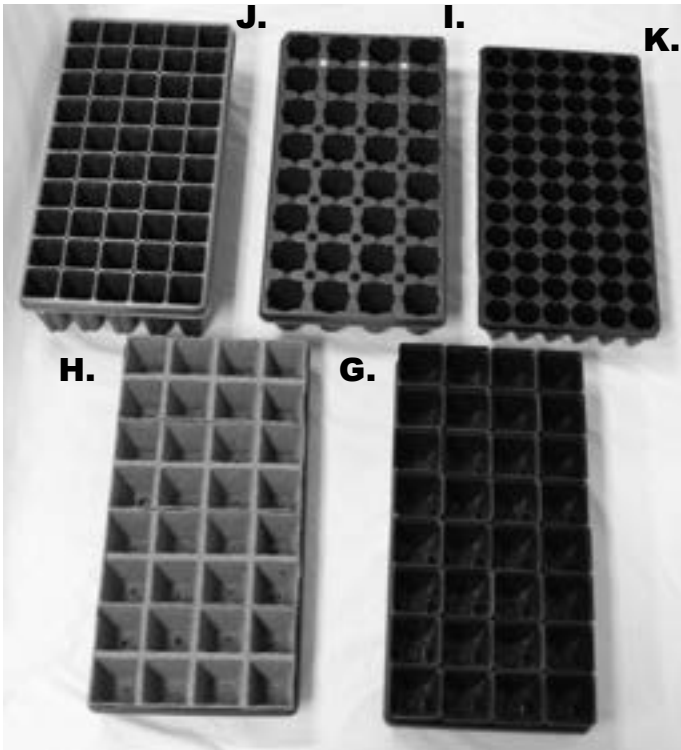

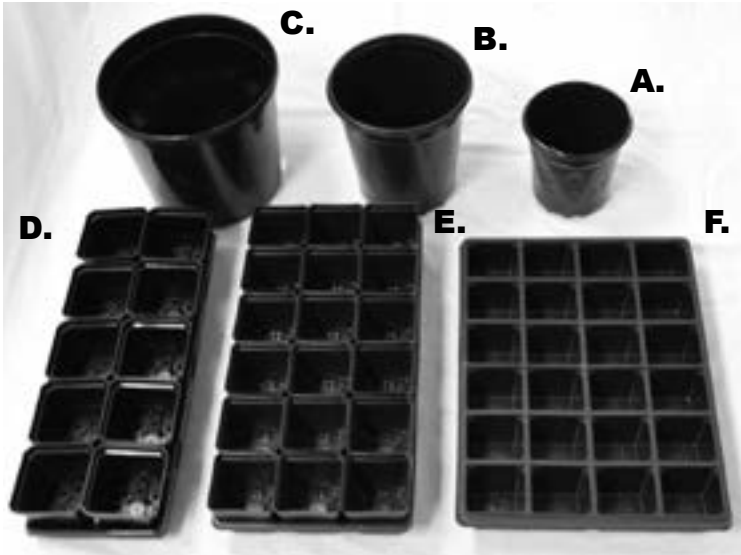

Zone	% Charge	Minimum Freight	Key Cities
1	6%	\$100 for Orders Under \$500	<p>Michigan: Holland, Zeeland, Kalamazoo, Dowagiac, Cassopolis, Niles, Saint Joseph, Benton Harbor</p> <p>Indiana: South Bend, Elkhart, Goshen, Mishawaka, Portage, Gary, La Porte, Valparaiso, Michigan City</p>
2	9%	\$100 for Orders Under \$500	<p>Michigan: Ludington, Lansing, Grand Rapids and Battle Creek</p> <p>Indiana: Fort Wayne, Lafayette</p> <p>Illinois: Kankakee, Greater Chicago and suburbs, Joliet, Dekalb, Waukegan</p>
3	13%	\$150 for Orders Under \$750	<p>Michigan: Traverse City, Saginaw, Bay City, greater Detroit and suburbs, Ann Arbor</p> <p>Indiana: greater Indianapolis and suburbs, Terre Haute</p> <p>Illinois: Urbana, Champaign, Bloomington, Peoria, Dunlap, Rockford</p> <p>Wisconsin: greater Milwaukee and suburbs</p> <p>Ohio: Toledo</p>
4	17%	\$250 for Orders Under \$1000	<p>Indiana: Bloomington, Evansville</p> <p>Illinois: Springfield, Galesburg</p> <p>Wisconsin: Madison, Fond du Lac</p> <p>Ohio: Cleveland, Youngstown, Columbus, Dayton, Cincinnati</p> <p>Kentucky: Lexington, Louisville</p> <p>Iowa: Davenport, Dubuque</p>

All Areas Beyond: Calculated per order on a truckload, LTL, UPS or Fed-Ex basis.

Once your order minimum is reached (\$500 in Zones 1 & 2, \$750 in Zone 3 and \$1000 in Zone 4), freight will calculate just on the percentage basis, not the percentage plus the minimum. This is an incentive to reach the minimum order amount.

FedEx: These delivery zones and rates are based on full trucks. If trucks are not full, or for smaller orders, we may be able to send your order through FedEx and bill you accordingly.

Package Sizing

Information

Container Specifications

	Size	Description	Approximate Dimensions				Legal Volume
			Cell			Tray	
			Diameter	Width	Depth		
A	#1	#1 Pot	6.50"	round	6.50"		2.50 qt / 2.37 L / Pot
B	#2	#2 Pot	8.50"	round	8.50"		6.00 qt / 5.67 L / Pot
C	#3	#3 Pot	10.41"	round	9.50"		11.16 qt / 10.60 L / Pot
D	10ct	10ct Flat	3.75"	3.75"	3.50"	7.5" x 19.9"	18.4 fl oz / 544 mL / Pot
E	18ct	18ct Flat	3.25"	3.25"	3.50"	11.0" x 20"	16.0 fl oz / 473 mL / Pot
F	24ct Standard	24ct Standard Flat	2.75"	2.75"	2.50"	13.5" x 18"	5.8 qt / 5.49 L / Flat
G	32ct	32ct Flat	2.63"	2.63"	3.50"	10.8" x 21.2"	9.50 fl oz / 250 mL / Pot
H	32ct Peat	32ct Peat Flat	2.25"	2.25"	2.25"	10.8" x 21.2"	5.49 fl oz / 162 mL / Cell
I	32ct Plug	32ct Plug Flat	2.00"	round	4.00"	11.0" x 21.5"	5.58 fl oz / 165 mL / Cell
*	38ct*	38ct Plug Flat	2.25"	round	5.00"	10.8" x 21.2"	6.70 fl oz / 195 mL / Cell
*	50ct Seed	50ct Plug Seed Flat	1.75"	1.75"	2.25"	11.0" x 21.2"	2.88 fl oz / 85 mL / Cell
J	50ct Plug Deep**	50ct Plug Deep Flat	2.00"	2.00"	5.00"	10.9" x 21.4"	6.59 fl oz / 195 mL / Cell
K	72ct Plug	72ct Plug Flat	1.50"	round	3.25"	10.8" x 21.2"	2.30 fl oz / 68 mL / Cell

Other sizes and variations on these tray configurations are used primarily for internal production purposes but may also occasionally be offered for sale. Weights and measures of those can be provided upon request.

*38ct and 50ct Seed flats are not pictured.

**Several 50ct Plug Deep tray styles are currently in use. The one pictured and described is the one preferred by Twixwood and generally offered for sale.

Notes

Map and Directions

Directions to Twixwood: 2759 East Shawnee, Berrien Springs, MI 49103

From Chicago take I-94 East to Bridgman, Michigan. Take exit #16 (“Red Arrow”), turn right (North) and go to the traffic light. Turn right (East) onto Lake Street and go 8 miles (Lake Street will change to Shawnee Road.) The Nursery is on the left (North) after Garr Road.

From Indianapolis take US-31 North of South Bend, Indiana. Take Michigan Exit 13 for Berrien Springs. At the end of the ramp, turn right (West) onto East Snow Road. Go 1.2 miles. Turn right (North) onto Red Bud Trail. Go 1.5 miles. Turn left (West) onto East Shawnee Road. The Nursery is on the right (North), 0.6 miles. The drive is just in front of the big gray barn.

From Detroit take I-94 west to exit #30. Turn left (East) onto U.S. 31 South/East Napier Avenue. Go 2 miles. Turn right (South) onto U.S. 31 South (“South Bend”). Take Berrien Springs exit #15. Turn right (Northwest) and go to the traffic signal. Turn left (South) onto Red Bud Trail. Go 2 miles to the 4-way stop. Turn right (West) onto Shawnee Road. The Nursery is on the right (North), 0.6 miles. The drive is just in front of the big gray barn.
