APRIL MEETING

Topic: Bifoliate Cattleyas
Speaker: Barney Garrison
8:00 pm Monday, April 13
Atlanta Botanical Garden, Day Hall

Lc Bethune 'Indigo' AM/AOS
Barney & Aileen Garrison,

The picture above is Barney's AOS awarded plant from November 2008. The picture below is a Cattleya named for Barney by Carter & Holmes.

Barney is originally from Thomaston, Georgia. As a member of the Atlanta Orchid club since 1974 and a grower also since 1974, Barney has a wealth of knowledge about orchid culture. He was elevated to a full judge with AOS in 1984 and while his main interests are cattleya alliance hybrids and species, with a preference for species, he also grown a number of other varieties as well. He will be talking about growing bifoliate cattleyas and will not have plants for sale.

**Atlanta Orchid Society Meeting Minutes
March 9, 2009**

The Atlanta Orchid Society Meeting was brought to order by President Jeff Whitfield. Visitors were welcomed and encouraged to join. New member Fred Pippin was announced.

The February meeting minutes were approved as published in the Newsletter.

Members were reminded that our Society Show is this week. Jeff and Roy Harrow reviewed setup, clerking and judging, plant registration, and breakdown schedules. Reba Herzfeld presented alphabetical sign-up sheets for members to bring food. Fred Missbach is donating a ham. Maureen Pulignano provided a new color brochure for recruiting members. Dues will be discounted \$5 for new members joining during the Show. There will be a Low Country Boil appreciation party for judges, clerks, and volunteers. Norman Fang donated Phalaenopsis plants to be given to new American Orchid Society members.

Fred reported that the Society plant auction will be Sunday, May 3 with details in the upcoming newsletter. He announced that next month's speaker will be our own Barney Garrison on the topic of bifoliate cattleyas. Also, Orchid Digest memberships are available.

The Green Growers at Marble Branch Farms will be in April, the International Phalaenopsis Alliance outing will be June 6, and Roy's auction will be July 25. The Mid-America Orchid Congress will be in Nashville in October, and Maureen has volunteered to do the Society exhibit.

Reba gave the Treasurer's Report, indicating that the checking account balance is \$9,198. She thanked Bill White for his computer help. Reba also indicated that membership cards have been distributed and that they provide a 10% discount at Hastings Garden Center.

David Kessler presented the monthly judging results and thanked all members who brought in plants. Jeff thanked members for their offers to help and concern for his collapsed greenhouse.

The speaker was Michael Sinn of Canaima Orchids who gave an informative and entertaining presentation on Venezuelan cattleya species. Canaima Orchids will be a vendor at our Show this week.

Our thanks go to the table award judges: David Kessler, James Van Horne, and Ron Kersey.

Our thanks go to those who brought plants for the raffle table: Helen Weil and Gene Gailhe.

Our thanks also go to those who brought refreshments: Geni Smith, Marianne Gilmore, Joe Stickney, Cameron Carter, Dan Schwartzberg, Cora Bell and Ken Ramborger, Maggie and Tony Kiss, Terry Glover, Bob Grzesik, Reba Herzfeld, and others.

Roy conducted the plant raffle, and the meeting was adjourned.

Respectfully submitted,
David Glass

Orchid-lover needs to downsize

I expect to put my house and greenhouse on the market next month. I still have many 100s of plants, dozens of books and lithographs, boxes of supplies and other things I need to downsize. If you - or anyone you know- are interested in the house *with 14'x22' greenhouse*, please let me know. I have also reconciled to selling this striking one-of-a-kind Paph and Phrag mahogany chest for \$900.

**Linda Wish, orchidwish@comcast.net

Commentary courtesy of Mark Reinke

Class I – Cattleya Alliance

Blue- *Rhyncolaelia* Aristocrat – Maureen Pulignano

This primary hybrid between *Rl. digbyana* and *Rl. glauca*, the only two species in the genus, is a thing of graceful beauty when, as in the blue ribbon example, it inherits the best of both parents and is well grown.

Though basically a pale, icy green flower, there is color variation in both species that sometimes results in a bronzy cast to the sepals and petals, especially on the reverse. Some will inherit the red throat spot of *Rl. glauca* while most will not, the amount and quality of lip fringe will vary, and many will have too

much reflex to the segments to please the judges. But a good example, despite bearing a single flower per inflorescence, and but once per year, is a real prize to orchid connoisseurs around the world. The fragrance is often outstanding, with lemony overtones. While both species involved have been used extensively as a parent and are present in the ancestry of many thousands of modern hybrids, *Rl. Aristocrat* has but 6 registered offspring to its name. While tolerant of cool to hot temperatures, this orchid must have high light to flower well, and mature plants must dry out between watering, so grow it mounted, in a basket, or a clay pot with large, porous media, and place it high in the greenhouse for the best results.

Rhyncolaelia Aristocrat

Red – *Guarisophleya* Ken Battle ‘Gold Crown’ HCC/AOS – David Glass

White – *Guarisophleya* Fire Dance ‘Patricia’ AM/AOS – David Glass

Class II – Cymbidium Alliance

Blue – *Cymbidium* Dorothy Rowe ‘Showoff’ Bronze/CSA x Candy Floss ‘Hyperdrive’ – Carl Quattlebaum

While multiple species and many generations of breeding go into this attractive rose purple *Cymbidium*, the color and pattern are dominated by *Cym. insigne*, a species that occurs in the mountains of south and central Vietnam, as well as northeast Thailand at elevations between two and five thousand feet. The

low temperatures in this region in winter do not generally go below the mid-50’s, and likely help make caring for this hybrid easier in this climate when compared to those whose dominant species come from higher elevations in the Himalayas, where winter nights routinely fall near freezing.

Cymbidium Dorothy Rowe ‘Showoff’ Bronze/CSA
x Candy Floss ‘Hyperdrive’

Red – *Cymbidium* Devon Wine ‘Burgundy’ – Carl Quattlebaum

White – *Cymbidium* Honey Bunny – Sugar Candy’ – Carl Quattlebaum

Dendrobium Oriental Smile 'Fantasy' AM/AOS

Class III – Dendrobium Alliance

Blue – *Dendrobium Oriental Smile 'Fantasy'* AM/AOS – Ellen Brand

At the Eighth Seiyu Nagahama Orchid Expo in February, 1997, *Dendrobium Oriental Smile* received the Award of Distinction from the American Orchid Society for “worthwhile new direction in color pattern.” Working with *Den. nobile* and five other species over 12 generations of breeding that started in 1876, hybridists were able to produce a stunning achievement of color and pattern that could scarcely be imagined when looking at the original genetic material involved. The ‘Fantasy’ clone went on to earn an Award of Merit from the AOS in Louisville, KY in 2006, but is certainly not the only strikingly colored cultivar from this cross. The *Den. nobile* hybrids prefer intermediate temperatures and benefit from nights in the 50’s during fall and winter resting season. While they like to be kept moist and well fed when

actively growing, fertilizing should be discontinued entirely during the rest period, and water reduced significantly, especially if the humidity can be kept above 50 to 60 percent. This treatment will help promote flowers rather than kiekies in the spring.

Red – *Dendrobium loddigesii* – Richard Hallberg

White – *Dendrobium Yellow Chinsai 'Little Joe'* HCC/AOS – David Glass

EVENTS OUT AND ABOUT

April 13 - AtIOS Meeting

April 11 - Atlanta Judging Center

April 12 - Easter

May 3 - Society Auction and Social, American Legion Post 140 near Chastain Park Noon until 4? Please bring a covered dish to share

Class IV - Epidendrum Alliance

No Entries

Class V – Oncidium Alliance

No Entries

Class VI – Cypripedium Alliance

Blue – *Paphiopedilum philippense* – Richard Hallberg

The multifloral, or 'strap-leaved' paphiopedilums, such as *Paph. philippinense* are generally considered more difficult to grow and bloom successfully compared to other members of the genus. They prefer much brighter light (moderate 'cattleya' light) and need a more marked drop in night time temperatures in order to bloom well. *Paphiopedilum philippinense*, as its name implies, comes from the Philippines, as well as NE. Borneo, where it grows as a lithophyte on limestone outcroppings (often among the roots of *Vandopsis lissochiloides*!) on the edges of evergreen jungle. It therefore wants a higher pH than the mottled leaved types which grow instead in the forest leaf litter. The addition of some crushed oyster shell or other source of lime to the mix can help achieve this requirement. The extra effort is definitely worth it, as well grown examples of this species and other multifloral 'paphs' can be truly spectacular sights. Primary

crosses between this and other multifloral species make up a veritable pantheon of magnificent hybrids bearing numerous high awards each. First and foremost is the historic cross of 1901, *Paph. Saint Swithin* (x *Paph. rothschildianum*), which has racked up an amazing 211 AOS awards in the last four decades!

Red – *Paphiopedilum* Bel Royal – Cora Ramborger

White – *Paphiopedilum appletonianum* variety *hainanense* – Maureen Pulignano

Paphiopedilum philippense

Join the Atlanta Orchid Society

Membership in the Atlanta Orchid Society is \$30 for individuals or \$45 for households. Yearly membership runs January 1 through December 31. Anyone joining in the third quarter will get a 50% discount on the current year's membership. Anyone joining in the fourth quarter will purchase a membership for the following year. You can join at one of our monthly meetings, or contact the society's Treasurer (see page 2) for a membership application.

For directions to the Atlanta Botanical Garden, please visit their website at www.atlantabotanicalgarden.org

JOIN THE ORCHID DIGEST CORPORATION

Don't let the name fool you, the Orchid Digest is a non-profit membership-based organization dedicated to orchids. Designed to appeal to the mid-range to advanced grower nothing beats the *Orchid Digest*. For just \$32 per year you get 4 issues of full-color, in-depth articles about orchids. The magazine is large format and the fourth issue of the year is always an extra-special issue devoted to a single genus.

**For membership application forms contact
Fred Missbach (404-237-1694)**

Phalaenopsis unknown

Class VII – Phalaenopsis Alliance

Blue – *Phalaenopsis unknown* – Geni Smith

Unfortunately, this attractive pastel *Phalaenopsis* with a bright orange lip and diamond dust texture has lost its correct identification. The tag said *Phal. Margarita*, but there is no registrations under that name. There is a *Phal. Margarithe*, but it was a white hybrid registered in 1976.

Red – *Doritenopsis Tzu Chiang Prince ‘C#16’* – Bob Grzesik

White – *Phalaenopsis Auspice Neihum x lueddemanniana* – Bob Grzesik

Jumellea arachnantha

Class VII – Vanda Alliance

Blue – *Jumellea arachnantha* – Cora Ramborger

Jumellea arachnantha is an attractive, compact Angraecoid originating from the Comoros Islands, in the Indian Ocean between the northern tip of Madagascar and the African mainland. It likes to grow in conditions similar to *Phalaenopsis*, preferring moderate light, warmth, and very good humidity. The leaves are arranged in a neat fan shape from a nearly stemless plant, which sends up several to many, wiry, single flowered inflorescences at once in spring. Each pristine white flower carries a long nectary, and lives up to its ‘spidery’ epithet, especially when viewed in profile. They are highly fragrant at night, like many other members of this orchid sub tribe, which are all moth pollinated. There are but two registered hybrids for this species, both with other members of the same genus.

Red – *Vanda Crownfox Velvet* – Gene Gadilhe

White – *Vanda coerulesecens* – Geni Smith

Margie@callkbs.com

Class IX – Miscellaneous

Blue – *Clowesia* Grace Dunn ‘Chadds Ford’ AM/AOS – David Glass

Cl. Grace Dunn is an older hybrid (1959) that is beautiful, yet far too infrequently seen these days. It is a primary hybrid between *Cl. rosea* and *Cl. warczewitzii* (this is the RHS spelling, Kew spells it *Cl. warzewiczii*), two of the six species in the genus whose range runs from Mexico in the north, to Venezuela in the south. *Clowesia* are vegetatively similar, and closely related to *Catesetum*, but differ in having ‘perfect’ flowers, rather than separate ‘male’ and ‘female’ ones. If you manage to find a *Clowesia* plant to add to your collection, water and fertilize heavily when in active growth in late spring and summer, then gradually lessen the amount of both until plants are dormant in late fall, at which time little or none is generally needed until plants resume active growth after flowering. *Clowesia* produce inflorescences from low on the pseudobulb so that the flowers generally lay across the media and over the edge of the pot in an attractive cascade.

Red – *Zygopetalum* Jumpin Jack ‘Big Beans’ AM/AOS – Gene Gadilhe

White – *Lycaste cambellii* – Richard Hallberg

JOIN THE AMERICAN ORCHID SOCIETY

For \$60.00 per year, you reap the following benefits:

- 12 issues of *Orchids*, the Society’s monthly full color magazine chock full of insightful articles and tempting ads for plants and supplies.
- 10% off on purchases from the Society’s Bookstore and Orchid Emporium. Reduced or free admission to participating botanical gardens.

For a limited time, if you join for two years (\$108) you will also get a \$30 gift certificate (good on an order of \$100 or more) at any one of 13 commercial growers who advertise in *Orchids*. **JOIN TODAY.** For information, contact Evan Dessasau (404-241-4819)

Clowesia Grace Dunn ‘Chadds Ford’ AM/AOS

May Speaker Preview

By Fred Missbach

In May, we will have Mr. Steve Champlin, General Manager of Floralia Orquidarios Reunidos in Brazil, which is one of the most famous and largest orchid nurseries in Brazil. The history of Floralia in Brazil is long and prestigious. Steve and Floralia are known the world over and we are very lucky to have him revisit Atlanta.

He will be bringing plants for the Redland Show which is at the end of that week. Plants for sale in Atlanta can be ordered up until the 15th of April and I have attached his 2009 price list which has quite an offering. (see last page of this issue)

Steve's e-mail address is florbra@attglobal.net. I would suggest that those who want plants send an e-mail directly to Steve and he can bring the plants with him. By ordering from Steve, those not going to Redland will have access to his plants and in addition will also have first pick on what he might be bringing. I saw the quality level of his 2009 offerings at the recent Santa Barbara Show and it is outstanding.

The subject of his talk will be "AN OVERVIEW OF BRAZILIAN ORCHID SPECIES".

SHOW NOTES

From Chairman, Roy Harrow

A Thank You from Chairman Roy

All I can say is WOW! This year's show was a wonderful success thanks to all of you. Our vendors were thrilled with the sales and traffic. Our visitors were thrilled with the orchids and the beauty of the displays. Everyone outdid themselves this year and I am grateful to you.

Thank you.

We were presented with some challenges this year - the power went out for several hours and worst of all, Aileen Garrison was injured the morning of the show and had to undergo surgery. But we prevailed. Everyone kept their good humor and handled the curves thrown at them.

Thank you.

I would like to list everyone and the wonderful work they did, but I know I would forget someone or some good work they did. I won't risk that. Plus I know that several folks took it upon themselves to fill in, pitch in and handle those little surprises you just can't plan for. I am grateful for every one of you. Without you the show would have been small, dark and unsuccessful.

Thank you.

Sincerely,
Roy Harrow

A note from Hospitality

Dear Friends:

Where do I begin to say thank you for all of the help you gave me during our recent orchid show! Beforehand, if your name is not listed, I do apologize. It's very hard to remember everyone who brought food, or helped me out [since I didn't keep a list]. The efforts of everyone who helped, regardless of what you did; brought food or helped in our hospitality area; were very much appreciated.

I could not do hospitality on the scale that it is done, without each one of you. **Barbara, Ellen, Cheryl** [who was my right hand for several days], **E-van, Gene and Nan** [whose wonderful garden pasta salad recipe [hopefully] will be in the next newsletter], **Marianne, David, and Terry** [you've helped me for several years], **my wonderful husband Bennett** [for putting up with me when I was not at home much], **Elaine, Ron, and Margie** [even when you took my picture "flashing my Spoiled Rotten T-shirt], **Maggie, and Maureen for opening her lovely home for our Low Country Boil, Cora, and Dan** [who helped move tables and chairs to set up the Judge's Luncheon], **Geni** [dear Geni, you also have been by my side consistently for several years, and even helped me cater the Judge's Luncheon this year], **Khanh** - [one of our newest members offered so much help, moving tables and chairs to set up for the Judge's Luncheon - anything that needed to be done, you did with a big smile], **James and Wayne**, last but not least **Helen**. Whew.....I think I named everyone...

Many, many thanks to all of you for a job very well done!

In my opinion, this was the best show I've ever been a part of. Thank you to Roy, Jeff, Bill and all who made this such a success.

Reba

Heart of Dixie Show

The Atlanta society exhibit took best society exhibit (Classes 5 - 7), and was awarded the AOS Show trophy for best exhibit at the Heart of Dixie Orchid Show in Huntsville, Alabama. Thanks to David Mellard for these photos!

Here's the description that the judges wrote for AOS show trophy:

Twenty-five square foot table top exhibit beautifully arranged with 33 high quality plants set in a naturalistic arrangement of lush green moss-covered logs with multiple tiers that achieved a balanced flow of color and foliage that gives the exhibit an element of depth which allows the observer to fully appreciate the varied genera from 360 degrees.

Atlanta Orchid Show

WOW! The Atlanta Orchid Society made a strong showing at the Atlanta Orchid Show. The Society Exhibit won Best Society Exhibit, the AOS Trophy, Best Exhibit and the Orchid Digest Trophy. Thanks to everyone who contributed plants and helped to build the exhibit.

Be sure to check out the special Atlanta Orchid Show edition of the newsletter for all of the pictures and news!

The Atlanta Judging Center meets and review plants on the second Saturday of every month in the basement at the Atlanta Botanical Gardens. Exhibitors and visitors are allowed to sit in the training sessions and to observe the judging. This is a great way to learn more about orchids and the entire judging process.

THINGS YOU MIGHT HAVE MISSED IN MARCH

At last!! Proof!!! Just kidding! Love you Reba!

Maureen Pulignano fills out the entry slips for her plants.

Speaker Michael Sinn of Canaima Orchids had some beautiful plants for sale during the meeting. I know I brought some home with me!!

Show chair, Roy Harrow certainly deserves the blue ribbon he is wearing! And I am sure new member, Hal Morrison is finding that out right now....
