GROWING INFORMATION

- Highly selected clone
- Tissue culture produces strong uniformity
- High yellow coloration
- Easily forms shoots
- Disease resistant
- Well developed root system because the Elle Pot allows an easy extraction when transferring the product from liner to pot. This is a critical situation for Gingers which do not like their roots disturbed
- This stable media system allows for less transplant shock and easier transport, which also reduces losses after planting

For more information, see 'Alpinia zerumbet & purpurata' Dave's Tips.

FEATURES

Our breeding partner, KP Holland, has improved upon “mother nature’s” rhizome production.

- Relatively disease and maintenance free
- Plants readily fill a pot with new shoots, providing uniform growth, predictable finish times and a good flower count
- Available in a wide array of colors, leaf shapes and sizes

PRODUCT USES

- Combo pots
- 6 -14” pots
- Cut flowers

GROWING INFORMATION

- Ideal temperatures range from 72-95°F
- Sun to part shade
- Plant in well draining soil and keep evenly moist; do not allow to dry out
