

"Hot Off The Potting Bench" Feature ~ BBC Gardeners World Live 2023, Floral Marquee

Number	Image	Plant	Introduced by	Description
1		Cuphea Sweet Talk Lavender Splash	Ball Horticulture	Cuphea Sweet Talk Lavender Splash is a real solution for consumers staying floriferous and colourful all summer long. A garden winner in a hot dry summer as this variety thrives under these conditions but grows equally well in a normal British summer – a real climate change winner and star performer when there is a hosepipe ban! Pollinators love Sweet Talk too as this plant is rich in nectar and a real attraction for bees and butterflies, turning you're the home garden into a really healthy environment for beneficial insects! This is just one of three striking colours in the new Sweet Talk series of Cuphea.
2		Cuphea Sweet Talk Deep Pink	Ball Horticulture	Cuphea Sweet Talk Deep Pink is a real solution for consumers staying floriferous and colourful all summer long. A garden winner in a hot dry summer as this variety thrives under these conditions but grows equally well in a normal British summer – a real climate change winner and star performer when there is a hosepipe ban! Pollinators love Sweet Talk too as this plant is rich in nectar and a real attraction for bees and butterflies, turning you're the home garden into a really healthy environment for beneficial insects! This is just one of three striking colours in the new Sweet Talk series of Cuphea.
3		Cuphea Sweet Talk Red	Ball Horticulture	Cuphea Sweet Talk Red is a real solution for consumers staying floriferous and colourful all summer long. A garden winner in a hot dry summer as this variety thrives under these conditions but grows equally well in a normal British summer – a real climate change winner and star performer when there is a hosepipe ban! Pollinators love Sweet Talk too as this plant is rich in nectar and a real attraction for bees and butterflies, turning you're the home garden into a really healthy environment for beneficial insects! This is just one of three striking colours in the new Sweet Talk series of Cuphea.
4		Nemesia Lady Zara	Ball Horticulture	The Lady™ series is one of the first Nemesia series to come into flower in the spring and flowers throughout summer without setting seed, so no need for dead-heading. Lady Zara is outstanding planted alone but looks equally impressive when used in a combination planting. The plant is freely branching, highly floriferous, does not stretch and is designed to create a shapely plant in the garden continues yet continues to grow whilst covered in continuous bloom. Height and spread 25-30cm (10-12")
5		Begonia Hula™ Red	Ball Horticulture	Hula™ is the world's first spreading Begonia from seed and being daylength neutral is also the earliest interspecific hybrid Begonia to flower in the spring. Hula is highly branched, it spreads and trails, filling hanging baskets, mixed containers and the garden border fast with a blanket of high-impact colour from its petite flowers. Begonia Hula™ Red is a bright red colour and cannot be missed in this brand-new five coloured a series. There is little to no maintenance needed with this self-cleaning variety which makes it super-super easy for gardeners! Snails stay far away from your Begonia Hula™, a perfect product, all season long. Height: 25-41cm (10-16"), spread: 30-36cm (12-14")
8		Granvia Glace White	MNP Flowers	Wow ! another winner from the Granvia stable, the crispy touch ! Huge paper like flowers smother this plant throughout the season, an amazing plant for pots or directly planted into the garden. The bees & butterflies love Granvia & children will love touching these crispy paper flowers. Blooms can be cut & dried. A real easy plant to grow & care for.

9		Petunia Trailing Big Pink	MNP Flowers	Lovely large pastel pink flowers adorn this plant all season long. True classic Surfinia habit, strong, robust & easy to grow make this a perfect plant for pots, tubs or baskets. Great weather tolerance.
10		Petunia Trailing Hot Pink Cherry	MNP Flowers	Beautiful hot pink cherry veined flowers smother this plant all season long, a great addition to the existing classic hot salmon & hot pink. Real true Surfinia weather tolerance & vigour make this plant perfect for pots, planters or baskets.
11		Petunia Trailing Big Red	MNP Flowers	A really great new introduction into the No 1 selling Petunia brand "Surfinia". Huge vibrant red flowers smother the plant all season long, robust, strong & great weather tolerance, this new red Surfinia is a truly great addition into the classic trailing range. Easy to & care for this is new red is perfect to pots, planters or baskets.
13		Sundaville Mandevilla Double Blush Pink	MNP Flowers	The worlds first true Double Mandaville, stunning double blush pink flowers smother this plant from early Spring throughout the summer until autumn arrives. Although this is a tender plant it is very happy growing outside during the summer months to give a real tropical feel to the patio ! A superb pot plant & summer garden plant that climbs & twines up any support it is given. Bring it inside in the autumn to use as a house plant and see it grow bigger & better year on year.
14		Petunia Bridal Blush	Kerley & Co	NEW for 2024 Petunia Designer Bridal Blush – This very free flowering new Petunia has a lovely habit for hanging baskets and the edges of pots. Flowers are large with ruffled edge overlapping petals, white, blushed pink with a dusky vein and large dark centres. Blooms and remarkably weather resistant especially given their petal size and the plant is also tolerant of cold and mildew. A stunning new development in Petunia breeding, bringing all the strengths from the best of the genus and overcoming many of the issues of traditional varieties. Like all Petunias, grows well in full sun or partial shade. Dead head, feed and water regularly to extend flowering period over the summer.
15		Petunia Tumbelina Nicola	Kerley & Co	The latest member to join the Tumbelina family, the flower type is best described as an open double, with a unique colour combination of magenta and white outer petals with deep coloured centres and shows good weather tolerance. Perfect for planting in hanging baskets and patio pots where they can tumble over the edges. Thrive in either full sun or part shade, flowering for over six months, until the first frost in November. Its compact habit yet prolific outdoor flowering makes this 'must have' in every summer garden.
17		Lily Sabor	Marshland Flower Bulbs	Over the last decade or so hybridisers have introduced many new hybrid crosses. This new double variety epitomises all the fantastic improvements that they have achieved during that time with one major additional characteristic, that this new generation is totally pollen free. It carries up to 8 flower buds even from small sized bulbs. As the large buds develop they change from green to pink making them very attractive even before the the first flower opens. As the large flowers open revealing layers of petals reminiscent of Roses. NO POLLEN is produced during the life of the flower. Giving it many advantages 1. A longer flowering period; 2. No staining of blooms; 3. No mess; 4. Safe for Cats
18		Lily Accolade	Marshland Flower Bulbs	This unique double pollen free has stunning blooms that when grown in the border or pot produces pink and white flowers. Under trial last year Linda Clark's comments were:- "This is my absolute favourite. It is beautiful in every way, and looks like someone has actually hand-painted the petals. I particularly like the way the flower heads seem to be layered, rather than just a

				long stem with the heads at the top. The fragrance is great too, especially when we sit outside on the patio in the evenings.”
19		Lily King Solomon	Marshland Flower Bulbs	This Lily beetle resistant variety has shown total resistance to the Lily beetle over the last three growing seasons. It’s a very easy variety to grow due to its high vigour and strong green foliage. A truly dazzling bi-colour Oriental Lily. Elegant large sized flowers measuring up to 25cm in diameter that provide a stunning eye-catching display to your garden. Sweetly scented – Lilium King Solomon exhibits a soft sweet scent to provide a beautiful fragrance to your garden and outside living area. Easy to grow - highly vigorous and easy to grow. King Solomon is renowned for its luscious dark green foliage and will provide a top quality display in varying conditions and soil types. Can be grown in either Patio Pots or Garden Borders. Lilium King Solomon is a true perennial and bulbs will bulk up to provide continued flowering year after year.
20		Sunflower Red Desire	Simon Crawford/Burpee	Sunflower Red Desire A truly stunning, compact red sunflower, with an attractive dark foliage. Perfect for the garden and patio pots, this variety flowers for a period of 8-10 weeks.
21		Basil Batik	Simon Crawford/Burpee	Fragrant Thai basil with stunning burgundy flower spikes. This singularly attractive plant yields an extended harvest of aromatic leaves ready to flavour soups, salads, curries and even ice cream. With significant cold tolerance 'Batik' flowers late in the season, but the autumn show is worth the wait.
22		Ipomea Tutu	Simon Crawford/Burpee	Tutu is the perfect companion for our Morning Glory 'Party Dress'. A spectacular introduction for 2023 Tutu combines early flowering with a long season performance, blooming from June to September. The light pink, semi-double flowers are attractively marked with light-magenta blotches. Ideal for plantings on a trellis or fence to provide an explosion of summer colour.
23		Tomato Black Moon	Simon Crawford/Burpee	The combination of outstanding taste and texture make this variety a special treat The wonderfully complex flavour of this tomato even beats the legendary “Sungold” during taste tests at Burpee’s Fordhook Farm/ Fruits have a firm and juicy texture but dripless interiors. ‘Black Moon’ sets a new standard in black fruited tomatoes
25		Tomato Toddler	Simon Crawford/Burpee	One of the most elegant tomatoes we have bred. ‘Toddler’ bears exceptionally well proportioned trusses with around 12-16 mid-sized cocktail tomatoes on each truss. The crack resistant fruit are exceptionally tasty with Brix levels of around 10% and a pleasing acid tang. The exceptional disease resistance package will help provide trouble-free production all season long.
26		Rose Peter's Persica	Wharton's Roses	Seen for the first time last year, but launched as a new variety and available for sale from this autumn. Peter's Persica was selected as an outstanding variety at rose grower Chris Warner's trial grounds in 2021 and named in his honour. This new climbing Persica hybrid is a vibrant yellow with a red eye, repeat flowering patio climber. It's compact habit means it could be grown in a large pot up a trellis or obelisk or could be trained over a low wall or fence.

27		Cherry Felicita®	FP Matthews	Felicita® is a new self-fertile cherry. Ripening mid-season in early July this cherry is very large and produces high yields from an early age. The fruit is bigger than most cherries, a very dark red, firm, crunchy and juicy with a sweet, aromatic, true cherry taste. Grafted on Gisela 5 to produce a naturally dwarf tree, this cherry can be grown in a patio pot as well as in an open setting. Very disease resistant and the perfect choice for gardeners that would like superior quality fruit in their gardens. No pollinating partner is necessary and the flowers are attractive to bees and other pollinating insects. If the fruit is not harvested it can also be left as a natural bird feeder.
28		Prunus Starlight®	FP Matthews	Prunus Starlight® has exceptionally attractive and unusual pure white star shaped flowers (similar to Magnolia stellata). The flower type is a great innovation in plant breeding unlike any Prunus to come before it and is a stunning floral display against a spring blue sky. It's profuse flowering habit in late March often extends well into April. A strong growing tree that will do well in all soil types and regions of the UK. Glossy foliage and graceful habit. Height at 10 years approx 3 - 4m
29		Clematis Tumaini	Guernsey Clematis	A beautiful light violet large flower with a complimentary dark pink bar. The centre of the flower holding deep red cropped anthers. Flower size is 10 to 12cm in diameter. The first flush of flowers appear in late April and build in quantity throughout May and June. A second, smaller flush will be produced in September. Being compact in habit and extremely free-flowering, lends it to being the perfect plant for growing in a container or supported in the front of border. Height, 90-120cm. Prune back to 15cm to strong buds in February.
30		Agapanthus orientalis 'Black Jack'	Allensmore (Fairweathers Hilltop Nurseries)	Inky buds open to reveal intense violet-black rounded flowerheads, packed densely with individual florets. Dark vigorous evergreen leaves. Evergreen perennial. Hardy to -10°C. Suitable for growing in pots.
33		Fuchsia cultivars Leonita SD Rose-White	Volmary	New addition to the Leonita series, which stands for early flowering Fuchsia varieties suitable for premium containers and hanging baskets.
34		Lantana camara Evita® Fire	Volmary	New addition to our successful Lantana series Evita®. Clusters of vivid coloured flowers from June to October. Very popular with pollinators. Compact and easy to grow, making it an ideal tub plant. A tender perennial so will need winter protection or treat as a summer annual.
35		Fuchsia cultivars Leonita SD Blush-Violet	Volmary	New addition to the Leonita series, which stands for early flowering Fuchsia varieties suitable for premium containers and hanging baskets.
36		Coreopsis verticillata Chorasán Burgundy & White	Volmary	New variety to the Corasan-series with larger flowers blooming all summer long. Mildew tolerance. The variety is suitable for larger pots and containers
38		Dianthus Morello Star	Whetmans	A compact hardy dianthus flowering at 15cm with a profusion of striking deep maroon single flowers dappled with an attractive white pattern borne over compact grey/green foliage. It will flower from May to September and attracts insects and bees.
39		Dianthus Sugar Coral	Whetmans	From our award winning hardy Scent First® range comes Sugar Coral PBR with wonderfully deep coral wavy petals edged with white on dark grey green compact foliage. Insect friendly and highly scented, flowering at 28cm from May to September, ideal for pots or your border.

40		Dianthus Sugar Raspberry	Whetmans	<p>From our award winning hardy Scent First® range comes a sister plant of Sugar Coral PBR , Sugar Raspberry PBR . A profusion of beautiful raspberry 2 tone wavy petals with dark crimson buds that are a great feature over compact grey/green foliage. Insect friendly and highly scented, flowering at 28cm from May to September, ideal for pots or your border.</p>
41		Rose Andre Rieu	New Leaf Plants	<p>Inspired by André Rieu’s superb music that touches the heart, we created a rose with intense red flowers and a strong, refreshing fragrance. Fragrant notes of lemon, orange and mint with a musky base give this rose an irresistible, refreshing, gentle fragrance. This beautiful rose with a graceful form and intense red-pink colour will enrich any garden regardless of its style and size. It blooms intensively and the double, vivid red flowers with huge number of petals really take your breath away. It is quite a healthy plant and does not require any special maintenance. The rose is nature’s ultimate art and a perfect partner to music.</p>
42		Rose Pure Aroma	New Leaf Plants	<p>Rose Pure Aroma™ boasts the characteristic warm, deep pink color of the petals. Its full flowers form large clusters, and the strong branches with healthy, dark green leaves make this rose ideal for rich bouquets of luxurious fragrance. Elegant, full blooms release a powerful floral-fruity scent as a unique blend of raspberry, lemon, bergamot and sweet fennel. It is a medium-sized shrub, suitable for luxurious rose gardens or flower beds in combination with silver-leaved perennials. It blooms throughout the season and attracts bees and butterflies. Their divine perfume scent will turn any sunny garden into a heavenly oasis of fragrance and beauty in times to come</p>
43		Rose Adore Aroma	New Leaf Plants	<p>Rose Adore Aroma™ will enrich your garden with its beautiful, seductive bright purple flowers and long stems. The striking colour and multi-flowered habitus make this rose perfect for landscaping. It combines well with roses of similar growth, but also with medium-sized perennials. This rose can also be grown in pots where it forms a compact, round appearance. Fragrant notes of mint, grapefruit, orange and coniferous resin give this rose a refreshing, pleasant, medicinal, herbal scent. It forms a medium-sized bush that spreads a wonderful fragrance throughout the season.</p>
44		Rose Unique Aroma	New Leaf Plants	<p>This beautiful rose has an unusually strong floral fragrance dominated in top notes by the aroma of anise in combination with apple and lemon. Bright pink flowers that change to a soft, light pink during the season. It forms a strong bush of upright growth covered with rich clusters of flowers and spreads a wonderful fragrance to the surroundings throughout the season. As a compact medium-sized shrub it is perfect for planting in the middle of a flower bed or in smaller groups in a prominent place. It is also suitable as a potted plant for planting in larger pots.</p>

47		Lavendula x intermedia Exceptional	Hilliers	<p>Developed at Hillier Nurseries and exclusively launched this spring, Lavandula x intermedia 'Exceptional' (hilllav) is the ideal, easy-to-grow, drought tolerant plant for the garden. 'Exceptional' has wonderful silver foliage on long stems that are brilliant for cutting and a rich aroma that attracts bees and butterflies alike. This unique hybrid is particularly hardy and holds its bright silver foliage, making it attractive all winter. Strong, hardy, drought- and heat-resistant, well-branched and a long blooming period. This unique hybrid has broad, thick leaves that combine beautifully with the large, dense flower panicles with pure white flowers that spread a fragrance adored by pollinators. With a remarkably strong root system and insensitivity to leaf- and root diseases, Exceptional is a one-of-a-kind Lavender that will continue to amaze with its performance. A great garden plant that will also thrive in patio containers or as a cut flower. Lavandula Exceptional is particularly hardy and flowers from mid-summer into autumn. Exceptional grows up to 80 cm high and wide and prefers well-drained soil and a spot in (full) sun. This evergreen plant is hardy to -20 °C.</p>
48		Cordyline Magic Star	Hilliers	<p>Launched for the first time in the UK, the unusual Cordyline 'Magic Star' is a simple-to-grow, drought-tolerant foliage plant selected for its striking green and pink colouration. Bringing an exotic feel to any garden. The 'Magic Star' is an excellent feature plant, bringing an architectural feel to any mixed patio container. Planted alongside Dahlias and Crocosmia, the dramatic 'Magic Star' can create a bold and fiery display in the garden.</p>
49		Geum Orange Pumpkin	Hilliers	<p>Orange Pumpkin will take the market by storm with its vibrant orange, double, ruffled flowers. An innovative and truly unique flower shape. And the best is yet to come: Orange Pumpkin is a reblooming variety which will continuously flower from spring into early autumn, producing more flower stems than you've ever seen. The unique flower shape gives gardens a natural, breezy look from late spring to mid-autumn. The short internodes make Orange Pumpkin very compact, growing up to 40 - 50 cm high and 30 cm wide. It has a mound-forming habit with upright flower stems, making it the perfect fit for pond edges, natural gardens, cottage gardens, borders and containers. Plant Orange Pumpkin in well-drained, moist soil. Cut old stems back after flowering to stimulate more flowers. Orange Pumpkin thrives in full sun or partial shade and is hardy to -23 °C.</p>
50		Nemesia Melody Lilac Blue	Hayloft	<p>A new series of fragrant Nemesia combining toughness with beauty! Mounding, well branched plants are great for pots and baskets. Exceptionally long flowering period, producing clouds of highly scented flowers continuously right through from March into the Autumn. Frost tolerant and bred to perform in the cold so can be overwintered. RHS AGM Winner</p>
51		Nemesia Melody Morello Ice	Hayloft	<p>A new series of fragrant Nemesia combining toughness with beauty! Mounding, well branched plants are great for pots and baskets. Exceptionally long flowering period, producing clouds of highly scented flowers continuously right through from March into the Autumn. Frost tolerant and bred to perform in the cold so can be overwintered. R</p>
52		Nemesia Melody Raspberry	Hayloft	<p>A new series of fragrant Nemesia combining toughness with beauty! Mounding, well branched plants are great for pots and baskets. Exceptionally long flowering period, producing clouds of highly scented flowers continuously right through from March into the Autumn. Frost tolerant and bred to perform in the cold so can be overwintered.</p>

53		Nemesia Melody Swansong	Hayloft	A new series of fragrant Nemesia combining toughness with beauty! Mounding, well branched plants are great for pots and baskets. Exceptionally long flowering period, producing clouds of highly scented flowers continuously right through from March into the Autumn. Frost tolerant and bred to perform in the cold so can be overwintered.
54		Nemesia Melody Pink	Hayloft	A new series of fragrant Nemesia combining toughness with beauty! Mounding, well branched plants are great for pots and baskets. Exceptionally long flowering period, producing clouds of highly scented flowers continuously right through from March into the Autumn. Frost tolerant and bred to perform in the cold so can be overwintered. RHS AGM Winner
55		Philadelphus Pearls of Perfume	Hayloft	The first Philadelphus that will flower on new seasons growth as well as last year's growth to give you flowers from late April to August. Starry shaped intensely scented double flowers all along its branches from the bottom to top. The flowers are large. 8cm across (twice the size of Philadelphus Snowbelle) and fully double with starry shaped petals. A compact columnar plant growing 120cm tall 60cm wide also presents a unique shaped cultivar. Grow in full sun to part shade in well drained moist soil. Regular pruning is not necessary but prune immediately after flowering to tidy the plant shape if required. Hardy to minus 20°C
56		LaBella Dahlia Maggiore Fun Pomegranate	Beekenkamp	Extraordinary explosion of colour (hard pink with bright yellow) – reminiscent of a Pomegranate. Place the plant in full sun. Remove spent flowers to encourage new ones and water 2 to 3 times a week. Very attractive to wildlife such as bees & insects and other pollinators. Requires winter protection. 70 cm high. Ideal in pots or borders. Long flowering season. Plant in full sun.
58		Trollius Full Moon	Allensmore (breeder Syngenta)	Clumps of attractive palmately lobed, mid green leaves, from which tall stems emerge, displaying beautiful large, cup-shaped light yellow/cream semi-double blooms. Suitable for wet soil in full sun/partial shade. Suitable for tubs or borders.
59		Dahlia Sincerity Bronze Orange	Allensmore (breeder Syngenta)	Huge amber double flowerheads radiate out from the bronze tinted foliage of this bushy and compact Dahlia. Suitable for tubs or borders.
60		Dahlia Sincerity Coral Pink	Allensmore (breeder Gootjes-AllPlant BV)	Big, bold and beautiful; the large double coral pink flowerheads stand proud above lush, mid green foliage. Suitable for tubs or borders.
61		Ajuga Best Buddies 'Toffee'	Kernock Plants (InnovaPlant GmbH & Co KG)	Robust habit and a distinctive, vibrant colour makes this low growing, hardy perennial a great addition to hardy containers, border and rock garden displays. This range works well in containers or bedding situations.
62		Ajuga Best Buddies 'Caramel'	Kernock Plants (InnovaPlant GmbH & Co KG)	Robust habit and a distinctive, vibrant colour makes this low growing, hardy perennial a great addition to hardy containers, border and rock garden displays. This range works well in containers or bedding situations.
63		Ajuga Best Buddies 'Lime'	Kernock Plants (InnovaPlant GmbH & Co KG)	Robust habit and a distinctive, vibrant colour makes this low growing, hardy perennial a great addition to hardy containers, border and rock garden displays. This range works well in containers or bedding situations.

64		Petunia Vista™ Jazzberry	Kernock Plants (Proven Winners)	Vista™ Petunia are simply one of the best garden plants that you could wish for. They are large, mounding and spreading plants. They simply flower their socks off!... This variety absolutely covers its foliage in bright magenta pink flowers right through summer. Vista™ are so easy to grow, not fussy in their requirements, just plant and watch them grow. Great weather tolerance: likes heat and sunshine, but equally doesn't mind cooler summers and rain. What more could you wish for!? Great for large containers, baskets and even for landscaping beds and borders due to their vigour and inclination to flower.
65		Caryopteris 'First Blue'	Kernock Plants (InnovaPlant GmbH & Co KG)	A compact and hardy shrub, with upright stems with serrated foliage. Clusters of small, detailed deep blue flowers rise upwards during summer months. Can be used either as a feature in a border, or a container during its first season before being planted out to enjoy for future years.
66		Euphorbia amygdaloides 'Xenia'	Kernock Plants (InnovaPlant GmbH & Co KG)	Euphorbia 'Xenia' is a smaller, bushy, fully hardy plant that produces intricate yellow flowers over contrasting dark foliage. Very versatile for any garden situation. Smaller than many other Euphorbia, so perfect for compact plantings. Will survive winters with ease to be enjoyed year after year.
67		Nemesia Fairy Kisses™ 'Cassis'	Kernock Plants (InnovaPlant GmbH & Co KG)	Two-tone purple and white flowers with a contrasting yellow eye over a mounding habit. Produces abundant scented flowers throughout the summer period. Perfect for containers and window box displays. Ideal container plant, but will also thrive in patio pots and annual window box displays.
68		Osteospermum SummerSmile™ 'Crème'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out into the garden. A very flexible plant suited to containers, patio pots and borders.
69		Osteospermum SummerSmile™ 'Magenta'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out into the garden. A very flexible plant suited to containers, patio pots and borders.
70		Osteospermum SummerSmile™ 'Soft Violet'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out into the garden. A very flexible plant suited to containers, patio pots and borders.
71		Osteospermum SummerSmile™ 'Sunrise'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out into the garden. A very flexible plant suited to containers, patio pots and borders.
72		Osteospermum SummerSmile™ 'Yellow Punch'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out into the garden. A very flexible plant suited to containers, patio pots and borders.
73		Osteospermum SummerSmile™ 'White'	Kernock Plants (Proven Winners)	Specifically chosen to provide improved blooms from spring through summer, six new varieties are available in a wide and vivid colour range. Consumers can expect excellent results from the range, especially in summer containers or when planted out

				into the garden. A very flexible plant suited to containers, patio pots and borders.
74		Sedum 'Dark Canyon'	Kernock Plants (InnovaPlan t GmbH & Co KG)	A brand-new Sedum with a lovely compact nature, with sumptuous dusty almost blue-black succulent foliage. Plentiful flower clusters emerge revealing delicate, pink flowers. Its well-behaved nature allows this variety to excel in pots. With good weather resistance and tight habit this Sedum is well suited for use in pots or smaller, well drained containers.
75		Sedum 'Rocky'	Kernock Plants (InnovaPlan t GmbH & Co KG)	A classic cushion-forming, compact partner variety to 'Dark Canyon'. Light rosy-red starflowers with darker centres cover the glaucous grey-bronze, fleshy foliage. With good weather resistance and tight habit this Sedum is well suited for use in pots or smaller, well drained containers.
76		Echeveria 'Devotion'	Kernock Plants (Plantipp BV)	Echeveria 'Devotion' is real cracker, pronounced vibrant velvet-burgundy colour as the plant develops. It has to be seen to be believed! Perfect for any patio pot or rockery. It loves the heat of summer and will repay with rich luxuriant colour! Colour that cannot be appreciated in a picture! Good weather resistance and tight habit make this specimen suited for use in pots or smaller containers.
77		Hibiscus Walberton's ® Lunar™ Eclipse	Farplants (Walburton Plants)	'Walberton's® Lunar™ Eclipse' has a much larger flower compared to other hardy <i>Hibiscus</i> on the market. The unique two-tone deep pink pollinator friendly flowers bloom from July to September make an exotic statement. The upright habit means 'Walberton's® Lunar™ Eclipse' will work equally well in a garden border or patio container but will thrive best in a sunny, well-drained position. 'Walberton's® Lunar™ Eclipse' is hardy and will thrive in UK gardens – delivering year-on-year garden performance and excellent value for consumers.
78		Hibiscus Walberton's ® Lunar™ Rhapsody	Farplants (Walburton Plants)	'Walberton's® Lunar™ Rhapsody' has a much larger flower compared to other <i>Hibiscus</i> on the market. The unique deep magenta flowers which bloom from July to September make an exotic statement. The upright habit means 'Walberton's® Lunar™ Rhapsody' will work equally well in a garden border or patio container but will thrive best in a sunny, well-drained position. 'Walberton's® Lunar™ Rhapsody' is hardy and will thrive in UK gardens – delivering year-on-year garden performance and excellent value for consumers.
79		Hibiscus Walberton's ® Lunar™ Flare	Farplants (Walburton Plants)	'Walberton's® Lunar™ Flare' has a much larger flower compared to other <i>Hibiscus</i> on the market. The striking white flowers with deep crimson centre will bloom from July to September and make an exotic statement. The upright habit means 'Walberton's® Lunar™ Flare' will work equally well in a garden border or patio container but will thrive best in a sunny, well-drained position. 'Walberton's® Lunar™ Flare' is hardy and will thrive in UK gardens – delivering year-on-year garden performance and excellent value for consumers.
80		x Petchoa hybrida Beauticol® Red Maple	Sakata	An exceptional new colour break in the Beauticol® series. Excellent outdoor performance. Intergeneric hybrid with compact-medium mounding habit. Large showy flowers till end of the Summer. Better mildew resistance than 'normal' Petunia: long lasting till end of the Summer. Suitable for cultivation in 10.5-12 cm pots and mix containers. Highly suitable for patio, terrace, balcony and garden beds. Self-cleaning and less sticky than other petunias.

86		Erysimum Taffeta Gold	Chris Wiley - Sow Successful	This highly fragrant, brand new series of double wallflowers beats the traditional single wallflowers hands down. Bred in the UK from plants now extinct and crossed with modern, early-flowering hybrids, these flower from February right through to late summer. Hardy and very attractive to bees with nectar rich flowers!
87		Erysimum Taffeta Red	Chris Wiley - Sow Successful	This highly fragrant, brand new series of double wallflowers beats the traditional single wallflowers hands down. Bred in the UK from plants now extinct and crossed with modern, early-flowering hybrids, these flower from February right through to late summer. Hardy and very attractive to bees with nectar rich flowers!
88		Erysimum Taffeta White	Chris Wiley - Sow Successful	This highly fragrant, brand new series of double wallflowers beats the traditional single wallflowers hands down. Bred in the UK from plants now extinct and crossed with modern, early-flowering hybrids, these flower from February right through to late summer. Hardy and very attractive to bees with nectar rich flowers!
89		Sempervivum Saxon	W & S Lockyer	The first red, white and pink coloured sempervivum. Not been shown elsewhere else, launching at GWL 2023. It was Bred in North Korea and has taken 10 years to bulk up enough plants to sell. An easy to grow perennial that need little attention. Does well growing in shallow pots, filled with free draining soil.
90		Sweet Pea Lilibet	Somerset Sweet Peas	After 7 years of breeding we are pleased to release 'Lilibet'. New and exclusive to Somerset Sweet Peas, and pays homage by taking its name from the childhood nickname of Queen Elizabeth II. 'Lilibet' is a superb sweet pea with large well ruffled flowers, on long stems with deep lilac standards fading to a soft lilac on white in the centre, with lilac feathering to the throat. The well ruffled wings open soft lilac gradually darkening with age, above the white keel. A vigorous grower with a super smooth scent, with a hint of Dolly Mixtures on the finish. Ideal for floral arrangements, garden decoration, and bouquet's for high society weddings.
91		Lily Arosa	Marshland Flower Bulbs	Lily Arosa is the newest double flowered totally pollen free even when grown under stressful conditions. Being white you are more aware of no staining on the flowers from the pollen, either in the garden or in the vase. This variety also makes a stunning patio plant.
92		Lily Best Regards	Marshland Flower Bulbs	Is the best for the home, this variety has been bred to be totally pollen free for the commercial cut flower market. The plant produces stamens and a stigma but no pollen. No Pollen; No Staining; No Mess. It is perfectly suited for the home gardener to grow in the border. With no pollen being produced obviously no staining of the blooms will take place during rain or wind. Over the years bulbs will naturally multiply to create a stunning focal feature. No staking is required as the strong stems are self supporting.
93		Weigela Camouflage		A stunning new Weigela launched at Chelsea Plant of Year 2023, ' Camouflage ' is the first to pair deep red flowers with variegated green/purple foliage. Generous clusters of trumpet-like, ruby-red flowers are set against foliage splashed bright green with purple-bronze margins.
94		Hydrangea serrata Euphoria Pink		The first Hydrangea to match vivid flowers with vivid foliage colour, Hydrangea 'Euphoria Pink' is the result of dedicated work by specialist Japanese breeders that is now available to UK gardeners. The tricolour foliage is exceptional – splashes of silvery green surrounded by a bold white margin and flushed with pink tints in spring.

95		Vriesea Chocolate Girl	Don Billington	Bred by Deroose Plants Belgium, never been displayed before. Plants hopefully will be available later this year. One of several new Vrieseas that will be on my stand and shown for the first time. All newly name by me. Name based on Don Billington's musical preference's! Keep soil in pot very very dry and only water through the top always making sure there is water in the cups of the leaves.
96		Lobelia Techno® Blue Ears	Syngenta Flowers	It's perfect mounding habit, combined with the early and all over the plant flowers, makes this a Lobelia for the future. It can be used for baskets as well as pots. Compact doming habit.
97		Pelargonium Mojo Pink Ice	Syngenta Flowers	Dark foliage contrasts beautifully with the striking vivid pink flowers. The plant grows well making plenty of side shoots, producing an abundance of flowers. Remove flowers as they go over to encourage long flowering period right into autumn.
98		Petunia hybrida Dekko Pinwheel Purple	Syngenta Flowers	It's exceptional garden performance sets this striking Petunia apart from the crowd. A unique colour which is perfect for adding the "wow" to mixed combinations and baskets. Minimal dead heading required.
99		Petunia hybrida Shortcake Raspberry	Syngenta Flowers	Something to sweeten up your garden! The eclipse shapes work well in small pots and combinations but will size up for impressive displays in the garden. Very little dead heading required
100		Petunia hybrida Itsy Light Pink	Syngenta Flowers	Itsy has an abundance of tiny blooms which form a blanket of colour providing undeniable garden appeal. Very little dead heading required.
101		Echinacea Pink Shimmer	Burpee	A dazzling, upright, clump-forming perennial with roughly-hairy foliage and long-flowering, rose-pink blooms up to 12 cm (6") with a prominent golden cone. 'Pink Shimmer' has a free flowering, compact but branching habit and blooms consistently throughout the summer, attracting pollinating insects to the garden. Like all <i>Echinacea</i> , the daisy-like flowers are useful for cutting and can be used either fresh or dried from positions in cottage garden borders, wildlife areas and coastal planting schemes.
