# CONTAINER GARDEN IN A BAG

**PRICE RANGE: \$50-\$85** | Sometimes the hardest part of gardening is creating a design, but with Container Garden in a Bag we've already taken care of that! These grab-and-go collections have been specifically selected by our horticulturists to create stunning container displays. Below, you'll find the color palettes and light requirements of this year's collections. Specific plants in the collections will be finalized closer to the sale based on current availability. Each collection will include planting and care instructions.

\*Selections may vary based on availability

## ALPENGLLOW

FULL SUN 

Shades of pink, purple, oranges and silvers evoke the ethereal feeling of the hidden sun illuminating the mountains. Bicolor *Dahlias* seem to be lit from the inside as silvers and purples swirl like the dusky sunset. Filled with little details and funky selections, this combination is classic yet contemporary.

## CANNANOVA

FULL SUN 

Need a colorful design for your palazzo? This design features black velvet leaves and saturated blooms as festive as any costume at Venice Carnival. We couldn't resist having a bit of fun and asserting that if the carnival's famous reveler Casanova were a plant, he would be the centerpiece of this design — an elegant canna with dark-veined leaves and a headdress of flashy orange flowers. "Andiamo!" that dashing 'Cannanova' would say. It is time to celebrate!

## LADY IN RED

FULL SUN 

Remember in the film "The Woman in Red," when Gene Wilder's Teddy casts a wandering eye on sultry Charlotte and her red dress billows up above a steam grate? One look at the canna in this design and you'll see where we got the name Lady in Red. *Canna Cannova*® Red Shades glows from across the yard and could easily hold her own, but we think she looks even better accessorized. Add in four flattering plants (and an earworm of Chris de Burgh's iconic love song) and let the infatuation begin!

## LIFE OF THE PARTY

AFTERNOON SHADE 

What happens when an interspecific red begonia walks into a bar and meets a coleus drunk on delight? You end up with a very lively matchup. This combo may not have a punchline, but add in three more fun-loving plants and you've got a winning lineup. All five were chosen for their ease of growth and when grouped together, become the life of the party. (What's an interspecific begonia, you ask? A begonia bred to tolerate extreme weather conditions and grow with abandon.)

# CONTAINER GARDEN IN A BAG

\*Selections may vary based on availability

## PINK LEMONADE

FULL SUN 

Sip, sip—ahh! Just like that icy glass of sweet pink lemonade, these cheery yellows and pinks are the perfect companion to a sweltering summer day. The only thing missing is the back-drop of a Colorado bluebird day and the bright summer sun reflecting off the surface of the pool before you dive in!

## RAINBOW SHERBERT

AFTERNOON SHADE 

Both pretty and fun—just like the classic dessert! Orange dreamsicle begonias swirl with apricot pinwheels and lacy lime ferns while raspberry tails of chenille plant drip over the edge. Unlike a summer ice cream cone, this stunning shade-tolerant combination will not melt away!

## TWIST AND SHOUT

FULL SUN 

You know you look so good! Corkscrew rush is sure to catch some eyes as the centerpiece of this design—but it's only a supporting actor for the other funky stars shaking it up in this sensory design. Hummingbirds and humans alike are sure to be delighted by this unusual cast!

# FRUITS AND BERRIES

**PRICE RANGE: \$21-\$200** | You don't need a full orchard to grow a little something sweet! Shop a wide selection of fruit trees and shrubs, citrus, melons and berries today, and your future, pie-making self will thank you.

# WATER-SMART

**PRICE RANGE: \$6-\$40** | Water-smart plants are not just drought-tolerant, they thrive in dry soils and, in many cases, only need to be watered 6-12 times per year. Don't assume that less water yields duller gardens: Water-smart plants offer a huge variety of bright, colorful blooms. Shoppers focused on sustainable gardening practices should make this division a priority.
