Designing the Modern Violet

Optimara African Violet Breeding

Optimara's state of the art Saintpaulia breeding facilities in Germany and the USA has been producing amazing characteristics for more than 83 years. Three generations of Holtkamp family members have been bringing their visions for tomorrow's African Violet into reality. Our unwavering commitment to improving the African Violet is constantly producing both a stunning range of bloom characteristics as well as resilience in the supply chain and on the shelf.

Fresh Violet e-mail Alert

Enthusiastic and dedicated consumers establish their GEO-FENCE according to a set travel preference (5 mi, 10 mi, 15 miles, etc...). Whenever a shipment is delivered within the GEO-FENCE, myViolet sends a "Fresh Violet Alert" in the form of an E-mail Destination Recommendation (EDR) to alert the consumers. Excite your customers with FRESH African Violets!

The New Evolution of Space Violets

In a sensational effort that launched African Violets into a new frontier, the Optimara Space Violet program put more than 25,000 seeds into orbit for nearly six years. This unusual step, in the annals of potted and flowering plants, turned out to be one giant leap that has produced significant and exciting characteristics for African Violets. Now, for the first time, these characteristics are available in a series dedicated exclusively to Space Violets. The EverFloris series is comprised entirely of African Violets that have been developed from the Space Violet program. They're bigger and easier to grow, with larger, fuller blooms that flower continuously. Unless they're EverFloris, there's no place on Earth you will find African Violets like these.

- Each plant comes with a plant care tag and stake!
- Box and shipping charges still apply

50 cell tray provides larger plant.

15 weeks to finish in 6" pot.

10 weeks to finish in 4" pot.

EverFloris violet produces more than twice the bud count as compared to standard violet varieties.

Plants have thick curly leaves and larger plant mass than standard violet varieties.

This variety is considered a "Space Baby" since its genetic background is descended from seeds that were in outer space for 5 1/2 years.

Ideal plant for 6" production.

Violet Grower Program

Optimara now offers its customers an even greater selection of its already unsurpassed Violet program. The Optimara varieties are easy-to-grow and come in many captivating colors. With over 50 varieties available in four stages, Optimara offers a program no other grower offers to their customers. Holtkamp Greenhouses is the proud recipient of the 1999 SAF Gold Medal Award honoring the originator of a widely distributed plant that has become established as having an outstanding horticultural and commercial value.

Un-rooted Baby
Item # 29990:

A premium un-rooted baby (cutting) 2" to 2 1/2" in length, featuring a strong center heart, handpicked and graded for constant caliper. Six to seven weeks to potting. Only 9 to 10 weeks after potting for a premium finished product.

Starter / Liner
Item # 30000:

Only 9 to 10 weeks to finish. Large selection of over 50 varieties in the 4 inch series. Tray of 84 (4 tray min). Additional sizes: super-sized 6 inch series and the 2 inch miniature varieties.

Small Pre-Finished
Item # 40020

Only 3-4 weeks from Finished. Assorted Varieties. Vigorous growth with many visible buds. Set to final spacing.

Large Pre-Finished
Item # 40030

Only 2 weeks from finished. One to two open blooms with many visible buds ready to open quickly.
