

Goldsmith Seeds GoldFisch® Vegetative

2012–2013 Catalog

syngenta *flowers*

Welcome

In these pages, you'll find a full lineup of top-quality breeding from our Goldsmith Seeds assortment of annuals and perennials, as well as our GoldFisch® Vegetative line of spring annuals. The Syngenta Flowers portfolio is even more complete with Yoder® garden mums, asters, pot mums and fleurettes; GoldFisch Vegetative poinsettias; and our new line of Syngenta-bred home garden vegetables. See page 2 for more details.

Count on Syngenta Flowers for innovative varieties, product solutions and superior technical expertise. Our holistic approach to your business seamlessly unites products and support to meet the needs of your growing seasons and help maximize your profitability.

We thank you for your business and look forward to partnering with you in the season ahead.

Yoder Garden Mums and Asters

The Yoder name is synonymous with quality garden mums. Look to Syngenta Flowers for well-rounded plant habits and incredible flower power in a range of traditional and unique colors. With Yoder garden mums and asters, consumers enjoy outstanding, low-maintenance performance.

GoldFisch® Poinsettias

From traditional reds, whites and pinks to unique marble and novelty types, the Syngenta Flowers poinsettia assortment has something for everyone. We strive to make production easy and efficient; look to us for tips to reduce energy and input costs with cold growing.

Yoder® Pot Mums and Fleurettes

Syngenta Flowers has re-invigorated the market with our pot-mum portfolio! Our progressive approach to breeding has yielded unique colors and flower forms, appealing to a new generation of consumers. Growers benefit from recent upgrades that make Yoder pot mums and fleurettes easier and more profitable to produce.

Home Garden Vegetables

New to the Syngenta Flowers assortment: Garden favorites for all seasons! Syngenta Flowers is pleased to offer a wide range of top-quality genetics to meet the needs of your retail-ready vegetable programs.

Technical experts at your service

The Syngenta Technical Services team is made up of 17 experts with decades of practical, hands-on experience to bring real-world answers to your business. We're ready to support you in all your growing decisions.

Our team offers industry-leading horticultural knowledge and rapid, relevant responses to help you grow your best crop. We provide you with cutting-edge information, including:

- **Disease management:** Many disease symptoms look alike. Our team coordinates accurate and rapid disease diagnoses through our own in-house and contracted laboratories to match the best control measures to the pathogen(s).
- **Growing media and plant nutrition:** When your crop is declining and production deadlines are looming, we use state-of-the-art laboratory equipment, as well as decades of experience to conduct and interpret soilless media, water, fertilizer and tissue analyses to resolve your crop problems quickly.
- **Crop production guidelines:** Our industry is constantly changing, with new information available daily on new crops, new growing recommendations and new science. We bring you the latest information on how to grow the highest-quality crop on schedule.
- **Insect and mite control:** Consistent pest control can be among your greatest challenges as a grower. The Syngenta team has the latest information on both traditional and biological control measures.

Contact the team any time at flowers.tech.help@syngenta.com or log on to the Technical Services web portal at GoldsmithSeeds.com for these and other resources:

White Papers — Get in-depth information on a broad range of subjects, including crop culture and production, diagnostics, analytics and more.

Video Library — Easily access and view time-lapse trials and detailed how-to videos.

Weekly Tech Tips — Check in often for timely tips and advice to help you grow better all year long.

Plant Width: 8–10"

Colors/Mixes: 4/1

Improved: White

Silverado Rose

Silverado Scarlet

Silverado White Imp.

Silverado Purple

Not Shown: Silverado Mix

Cyclamen varieties with pure white flowers, including Sterling™ White and Silverado™ White, have a tendency to blush when grown or planted in environments where temperatures fall below 57°F/14°C or rise above 75°F/24°C. To avoid issues with blushing, it's recommended to not plant these varieties where they will experience these conditions. Other white varieties in the Syngenta Flowers-Goldsmith Seeds assortment do not exhibit this trait and can be grown under a wider temperature range with less likelihood of blushing.

SilverHeart™

F1 CYCLAMEN PERSICUM—MINIATURE

MOUNDED / FALL / WINTER / SPRING / SCENTED

Beauty you can count on.

Maximize profits and drive retail sell-through with the optional Blooms All Summer™ guarantee program featuring Calliope® and Caliente® hybrid geraniums. No other product delivers a stronger value-added proposition.

Consumer research shows that color and size are the two most important factors customers look for when purchasing outdoor flowering plants.* Calliope and Caliente deliver both like no other! Additionally, our performance guarantee is proven to increase average price and retail sell-through.

For participating growers, Syngenta Flowers guarantees the retail purchase price for any consumer not completely satisfied with the performance of their Calliope or Caliente hybrid geraniums.** Contact your preferred sales representative to learn more.

“We’ve had more comments from customers who bought Calliope this year and loved it than any other flower we grow.”

Ontario, Canada Retailer

Consumers can’t resist Calliope and Caliente geraniums!

- Amazing color and size
- Worry-free performance
- Money-back guarantee

Calliope Geranium: pure inspiration

Innovation to reinvigorate a popular crop class is what breeder Mitch Hanes strived for when he envisioned a new type of geranium. The goal was twofold: to deliver greater heat tolerance and to lessen growers' challenges with edema. Fifteen years later, in the spring of 2008, Calliope® Dark Red made its debut. Calliope quickly became Syngenta Flowers' top-selling vegetative geranium and continued the hybrid-geranium craze.

Named after the Greek muse of epic poetry, Calliope geraniums represent a revolutionary breeding breakthrough. By combining the best features of ivy and zonal types, Calliope offers unparalleled features and performance. The series provides exceptional branching, superior vigor in both landscapes and containers, and best-in-class heat tolerance. Count on Calliope as well for continuous, season-long flowering in uniquely rich colors.

The velvet-red color of Calliope Dark Red is unmatched on the market and has garnered more than 15 performance-trialing awards in the past three seasons. Now, with three vibrant new colors joining the series, there's even more of this groundbreaking series to delight retailers and consumers.

Americana Geraniums: proven performance.

Americana®, as the name suggests, is a uniquely North American collection of geraniums. Developed at a time when the market was dominated by small, European-type geraniums that did well in high-density production but were lackluster performers in the home garden, Americana burst onto the scene in the spring of 1991. With a robust habit and lots of large, striking flowers, Americana geraniums make a big impression in the garden in a broad range of vivid colors, including one-of-a-kind “splash” types.

True to the North American spirit, Americana geraniums are extremely versatile and adapt easily to a variety of uses. Syngenta Flowers offers year-round availability on the Americana series due to their proven performance throughout North America. They are excellent in containers, working well by themselves or “playing nicely with others” in combination plantings. Americana geraniums also put on a stunning show in garden beds.

The Americana series is a great fit for busy consumers: once plants are established in a container or in-ground planting, Americana can go several days without watering and still look great. Americana geraniums will flower all summer long, and can even tolerate a minor frost. The series has a long history of award-winning garden performance across the US and Canada.

Geraniums have been a long-time favorite and well-recognized garden plant. The National Garden Bureau counts geraniums among “the easiest, prettiest and most adaptable flowering plants you can set in your garden!”** See for yourself why Americana geraniums have enjoyed high customer loyalty for more than 20 years.

Save time and resources with callused cuttings.

Our market-leading geranium portfolio is also available in callused form! We led the industry with our callused cutting program more than a decade ago, and our experienced program continues to deliver terrific value. In comparison to traditional URCs, callused cuttings slash propagation time in half and save transplant labor—callused cuttings can be direct-stuck into finished containers. Our callused cutting program is fully supported by our seasoned tech experts, available on-demand, 24/7 at flowers.tech.help@syngenta.com.

Lucas Greenhouses (Seasonal)
214 Whig Lane Rd.
Monroeville, NJ 08343
856-881-0234
856-881-2502 fax

Contact your preferred sales representative for additional details and pricing.

Syngenta Flowers is committed to customer success and has developed special packaging to ensure your cuttings arrive in the best condition.

Rooted Cuttings: Within the outer box shell is an inner locking tray with an adjustable locking pad that keeps the rooted cuttings firm in their trays during shipping. To minimize damage during shipping in extreme cold or heat, Syngenta Flowers uses the “Extreme Weather Box” which covers the normal shipping box containing the plants.

Unrooted Cuttings: Our unrooted cuttings are fully cooled and packed fresh at the farms. To protect the quality of our product, the bags of cuttings are packed into cardboard trays which nest inside a larger, insulated cardboard box. Ice packs are used in most boxes, except for the varieties which are susceptible to chill damage.

Ordering Minimums

Rooted Vegetative Annuals, Rooted Geraniums & NGIs
Pack per Box: 204
Order Minimum: 204
Variety Multiples: 102

Unrooted Vegetative Annuals

Unrooted New Guinea Impatiens
Pack per Box: 1,500
Order Minimum: 1,500
Variety Multiples: 100

Unrooted Geraniums
Pack per Box: 2,000
Order Minimum: 2,000
Variety Multiples: 100

Callused Geranium Cuttings
Pack per Box: 600
Order Minimum: 1,200
Variety Multiples: 100

simplified shipping

for GoldFisch® Vegetative

Take advantage of the numerous options for your temperature-controlled distribution from Syngenta Flowers. We're ready to collaborate, developing a cost-effective and efficient shipping solution to get your customers' cuttings delivered on time and in the best condition. We've created distribution options to manage the integrity of the product and keep your freight costs down. The result is the best price per cutting, delivered direct to your door.

- Temperature-controlled trucks
- P1 Priority overnight FedEx® deliveries
- Consolidated order programs
- Advanced shipping notifications
- On-time, reliable deliveries

We will customize a delivery program that fits your customers' needs!

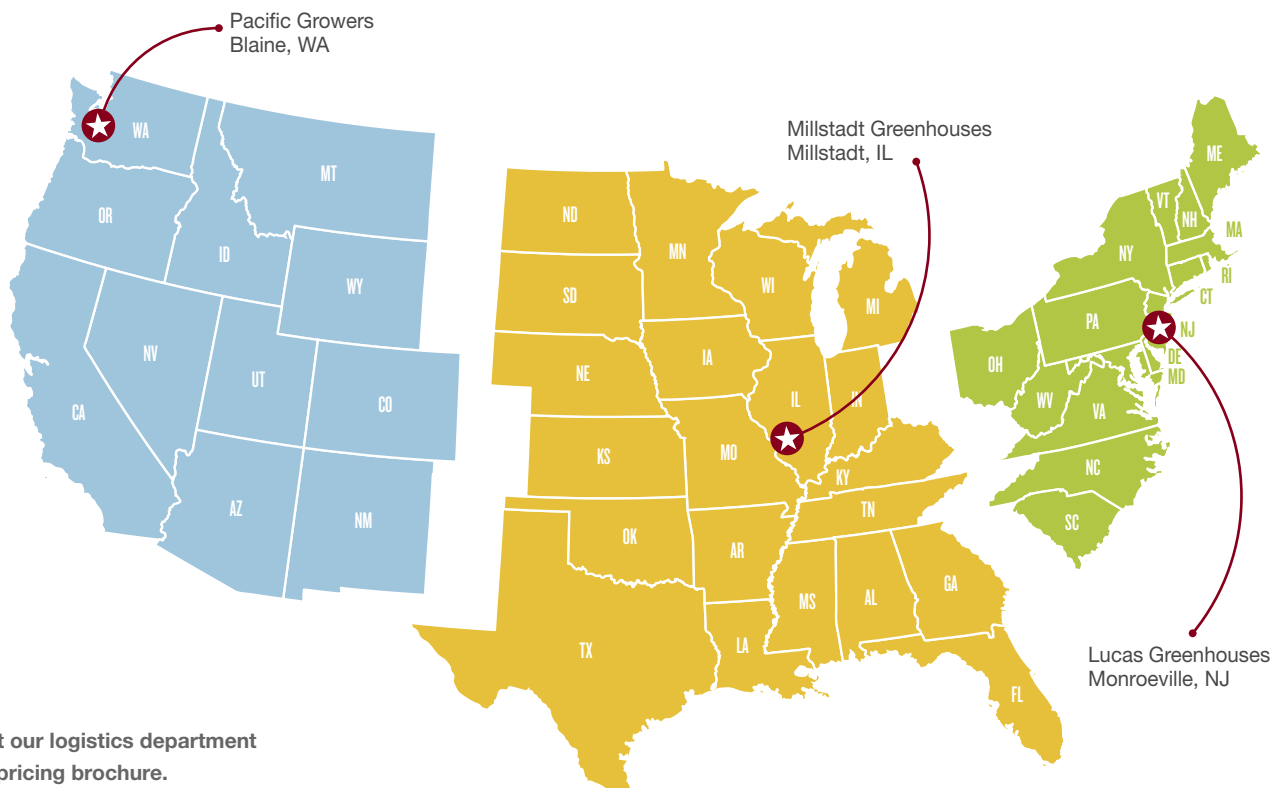

Shipments

- Routes developed based on volumes and destinations
- Special quoting on full truckloads and depot drops
- Door-to-door temperature control
- Consolidate customer orders into depot drops to achieve truck-delivery volumes

Trucking • FedEx Express • Hub Pickups • Airport Pickups • Depot Drops
