

Register of Chrysanthemums in Australia

2016

1st January, 2016

NOTES:

Not all of the Duke of Kent sport colours are recorded. More information is needed re the colours being grown in Australia. They are often known only as "Cream Duke" or "Pink Duke" etc, without being given their full names.

In the singles there is a similar situation with Woolmans Glory. Some other cultivars fit into the same category. In this case each local organisation should advise exhibitors of the acceptance of the sports if they are not recorded in this Register.

The Secretary of the ACC would appreciate information re the sports known so that they can be included in future editions of this Register. There are still some cultivars that are grown in Australia and need to be added to the register. Please advise the secretary if you know of any.

While it has been the practice, in the past, to "NAS" cultivars not in the register, groups are requested to be flexible at the local level when a grower indicates that they have a cultivar that is not in the register.

The **Register of Judges** is not included in this website edition of the overall register. This list is provided to affiliated groups in printed form and on disk. Any queries re judges should be referred to the Secretary.

BRIEF DESCRIPTION OF CLASSIFICATIONS

Large & Medium Exhibition: (Sections 1 & 2)

Provided that the form of the cultivar is either incurving or reflexing, or any variation of these two forms, and can reach 160mm or over, it is classified as Large or Medium Exhibition, dependant on its size potential.

Incurved Decorative: (Sections 3a & 3b)

Cultivars are firm, neat and globular. Florets are close together and the visible parts, in most cases, pointed upwards and inwards in tight formation.

Reflexed Decorative: (Sections 4a & 4b)

Florets generally turn outwards and downwards. There are two types; one with neatly reflexing florets, and second with stiff, more spikey florets not forming a smooth shoulder, but developing blooms with a generally reflexing form.

Intermediate Decorative: (Sections 5a & 5b)

Types of blooms that are neither fully incurved nor reflexed, but somewhere in between. The most usual type being the open loosely incurving type. This Section also includes blooms loosely incurving in the upper parts and with reflexing lower florets.

Anemone-centred: (Sections 6a & 6b)

Blooms have a dome-like cushion in the centre that is surrounded by one or more rows of florets of a different nature.

- **Formal blooms** have florets that are broad, flat and even in length.
- **Informal blooms** have sharply pointed florets, uneven in length.

Single: (Sections 7a & 7b)

Simple, daisy-like flowers with up to five or six rows of florets radiating from a central disc.

Pomponé; (Section 8)

These have short tubular florets. A well grown disbudded bloom can be likened to a golf ball.

Spray: (Section 9)

A group of blooms, preferably at least four, evenly placed in a coned shape emanating from a single stem

Spider and Quill (Fantasy): (Sections 10a & 10b)

Florets long, narrow and tubular. The main difference between the two forms is:

- **Spiders** have hooks or coils at the tips of the florets
- **Quills** are straight to the ends of the florets.
