BELLADONNA LILY HYBRIDS

AMARYLLIS multiflora
'Serendipity Swarm'

We have been playing around with these impressive forms of Belladonna Lilies. They differ from the common Belladonna in that the flowers are borne radially atop the stem rather than on one side.

Another 60 metre row is to be lifted to be shared and we are offering unidentified large offsets and bulbs in a range of colours from the hybrid swarm of our breeding efforts. There is a remarkable diversity of colours, shapes, flowering time and stature. Some examples pictured. Satisfaction guaranteed.
