

FLORABUNDA SEEDS

2024

OUR HISTORY

When you're a landscaping expert and a third generation Dutch seedsman, it just seems natural that you'd operate a company like Florabunda Seeds.

Although Florabunda Seeds celebrated its 20th anniversary in 2019, you could say its "seeds" were planted well over 100 years ago in Holland. Owner Dirk Berghout's grandfather (also named Dirk) established a successful seed supply company in Pernis, The Netherlands. When Grandfather Berghout died, the company was taken over by his son, also named Dirk.

*Pernis, The Netherlands
approx. 1948*

*Dirk and sister Linda.
(Check out Dirk's
wooden shoes)*

Dirk Sr. was a farmer and market gardener who immigrated to Canada in 1953 when the Dutch government expropriated his land to enlarge the harbour in Pernis.

The family of five settled in Odessa, Ontario, although their dreams of having a farm in Canada were never realized. Dirk Sr. spent several years working for other farmers, as was the requirement in those days for new immigrant farmers.

Dirk and his older brother Leen eventually moved into the construction trade but established a successful side business operating greenhouses and vegetable gardens for 15 years for the wholesale market.

Following in his ancestral footsteps, Dirk Jr. purchased Florabunda Seeds with his late wife Jeri-Lynne. Jeri-Lynne was also an avid gardener and had a dream of preserving old species. Today, Florabunda Seeds is a company dedicated to preserving old species of flowers, vegetables and herbs, many of which are the parents of today's modern hybrids. As well, Florabunda Seeds ever-growing fundraising program has helped many schools and other organizations raise funds for their projects.

During a trip to Holland in 2000, Dirk and Jeri-Lynne were given a treasured item: a ledger from Grandfather Berghout's seed company. The ledger dates back to 1896, giving detailed records of customer names, dates, amounts of each sale, running totals on each customer, along with the purchased seed types. All is written by hand in pencil, and of course, in Dutch. The well-worn and yellowed pages hold a great part of history for Dirk and his family, as well as Holland. It is a great family treasure to cherish and preserve for handing down to Dirk's son Jon.

Dirk's grandfathers' ledger - 1896

WELCOME TO THE 2024 CATALOGUE

Another year has passed and the world is in greater turmoil today than last year. The war in Ukraine continues and a new conflict has started in the Middle East. We are very fortunate to be living in a country as safe and stable as ours. Our complaints and grievances are trivial compared to what is happening in the rest of the world.

With all the uncertainties, it is time to look forward to another growing season. For me it is relaxing to be in the garden, prepare the soil and planting the seeds and wait with great anticipation to see the seedlings emerge. It is amazing to see that such a little seed can grow and provide us with delicious fruits, vegetables and beautiful flowers. The weather can play a big role in gardening success but ever the optimist I think to myself, I can always learn from my mistakes and do better next year.

We sincerely appreciate the loyalty of our customers; offer only the best quality seeds and the best value for their money.

As always, we encourage you to use and check our website www.florabundaseeds.com as it is always up to date on seed varieties and availability.

We thank you for choosing Florabunda Seeds and wish everyone a safe and successful 2024.

Dirk and Leanne

If our printed catalogue serves you best let us know by sending us the form by mail or e-mail and we will update our records. However, you can help keep the cost of seeds down by ordering through our website or printing a copy of our catalogue off our website. Thanking you in advance for your help. *Dirk*

CITY: **PROVINCE:** **POSTAL CODE:**

FINDING YOUR WAY AROUND

Annuals are plants, which complete their life cycle, flowering and going to seed in their 1st year. They have the longest bloom season.

Biennials grow strong plants in their 1st season which bloom in their 2nd season and self-seed, then die providing their own replacements for the next year. Self-perpetuating.

Perennials' leaves die back in winter and renew growth each spring. Some bloom 1st year from seed and others start in their 2nd year. They often live for decades. Bloom time is generally shorter.

CLIMATE ZONES

Although we are based in Ontario, our seeds go Canada wide so we have chosen varieties that will thrive in a wide diversity of climates. Annuals generally do not require zoning but rather have cultural requirements, which you will see with the listings. Perennials will have their zones indicated as a guide. We welcome any input on your findings. Zones go as follows, indicating lowest temperature in winter:

	F°	C°		F°	C°
Zone 1	below -50°	below -45°	Zone 6	-10° to 0°	-23° to -17°
Zone 2	-50° to -40°	-45° to -40°	Zone 7	0° to 10°	-17° to -12°
Zone 3	-40° to -30°	-40° to -34°	Zone 8	10° to 20°	-12° to -7°
Zone 4	-30° to -20°	-34° to -29°	Zone 9	20° - 30°	-7° to -1°
Zone 5	-20° to -10°	-29° to -23°	Zone 10	30° - 40°	-1° to 5°

A NOTE ON BEES AND BUTTERFLIES

In many parts of North America bees and butterflies are disappearing at an alarming rate due to lack of food supply because of habitat destruction.

We carry many bee and butterfly friendly varieties. Our website has a page designated to them. Be sure to check it out.

A NOTE ON BIRDS

There are so many other winged and feathered creatures that we can invite into our gardens. By not deadheading your entire garden you leave food to help them survive. By us helping them they will give in return the enjoyment of their company throughout the year.

PRICING

Individual packages \$3.80, Mixtures \$5.45, Collections \$16.50, all others as stated.

All pricing is subject to change without notice. Please check our website for current pricing.

SEED COUNTS:

We package by measurement and our seed counts are approximate. We ensure that every package contains a very generous seed count.

REACHING OUT

Please let us know of your gardening experiences and feel free to recommend other flowers with pleasing characteristics. We will consider including them in our catalogue.

SAFE SEED PLEDGE

We pledge that we do not knowingly buy or sell genetically engineered seeds

HEIRLOOM & UNUSUAL ANNUALS

ASTERS:

callistephus

Asters have a strong disease resistance and make excellent cut flowers. They tolerate hot, dry conditions.

Light: sun, part shade Soil: rich, well drained Space: 30cm Height: 90cm Season: summer to fall

A263 – Approx. 450 seeds

China

Queen of the Market

Starts blooming earlier than most asters, providing long-lasting bouquets of large double flowers on strong stems in a rich array of colours.

A264 – Approx. 400 seeds

Montezuma Mix

The 10cm multi coloured pompom flowers held on strong upright stems are one of the earliest blooming asters.

A541 – Approx. 400 seeds

Tall Mix

This upright plant carries 5-8 incurved flowers per stem in a beautiful mix of colours.

A538 – Approx. 300 seeds

Baby Black Eyes – Pennie Black

Nemophila discoidalis

A Victorian garden favourite. Radiant little cupped black purple flowers with white edges on feathery light green foliage.

Light: sun to part shade Soil: moist enriched Spacing: 15cm Height: 10cm Season: summer

A266 – Approx. 400 seeds

BABY BLUE EYES

nemophila mesziesii

This is a Victorian garden favourite. Radiant little 2.5cm cupped flowers of sky blue with white centres bloom freely on this low growing, spreading plant.

Light: sun to part shade. Soil: rich Spacing: 15cm Height: 20cm Season: summer

A267 – Approx. 400 seeds

BABY'S BREATH

gypsophila elegans

Tiny, star-shaped, frothy flowers smother the delicate green foliage. They are useful as garden fillers or in floral arrangements, dried or fresh.

Light: full sun. Soil: well drained Spacing: 30cm Height: 60cm Season: summer to fall

A268 – Approx. 200 seeds

BACHELOR'S BUTTONS

Jubilee Gem

centaurea cyanus

An older, dwarf, double variety of the well known cornflower with the mesmerizing colour of blue glass.

Light: sun to part shade Soil: well drained Spacing: 20-30cm Height: 40cm Season: mid-summer to frost

A269 – Approx. 150 seeds

BALSAM

Lady's Slippers - Mixed Colours

balsaminia

These long blooming dense, bushy plants with long serrated leaves carry sumptuous 5cm double rose-like blooms.

Light: part shade Soil: rich, moist Spacing: 40cm Height: to 90cm Season: summer to fall.

HEIRLOOM & UNUSUAL ANNUALS

A270 – Approx. 150 seeds

BASKETFLOWER

Aloha

centaurea americana

Like giant bachelor's buttons, these cornflower relatives bear striking 10cm rose-lilac blooms. Good cut flowers, fresh or dried
Light: semi-shade Soil: well-drained Spacing: 15cm Height: 60 cm Season: summer

A271 – Approx. 100 seeds

BELLS OF IRELAND

molluccella laevis

Tiers of green bells cradling tiny white or pink flowers grow along hollow erect stems. . The bells emerge green in late summer and fade to papery brown when dry.

Light: full sun Soil: moist well drained Spacing: 30cm Height: 45 - 90cm Season: late summer

A272 – Approx. 300 seeds

BISHOP'S FLOWER

Queen Anne's Lace

ammi majus

A tall naturalistic annual with tall stiff stems topped with 15cm wide flower heads smothered with tiny, white florets.

Light: sun to shade Soil: fertile, moist Spacing: 30cm Height: 100cm Season: late spring-early summer

A273 – Approx. 150 seeds

BLUE BIRD

nolana paradoxa

A seldom seen, though excellent, bedding or container/basket plant was popular in Victorian gardens. This variety has vivid blue 7cm outward-facing flowers with cream throats. Very heat tolerant.

Light: sun to part shade. Soil: fertile, well drained. Spacing: 25cm. Height: 20cm. Season: early summer

A274 – Approx. 40 seeds

BLUEBONNET LUPINE

lupinus angustifolius

This annual lupine has dense spikes of mostly indigo blue flowers. It is inclined to naturalize and appear perennial.

Light: sun Soil: light, well drained Spacing: 20cm Height: to 60cm Season: summer

A276 – Approx. 250 seeds

BUR MARIGOLD

bidens aurea

A versatile plant with its abundance of golden yellow flowers and fern-like foliage looks equally good in your garden in containers or hanging over a garden wall.

Light: sun Soil: good garden Space: 15cm Height: 70cm Season: early summer to fall

CALENDULAS:

calendula officinalis

Calendulas are one of the easiest, hardiest players in the garden. Frost and drought tolerant, quick to bloom, cheerful and undemanding, will last and last. They are great self-seeders. Note: Will survive repeated light frost.

Light: full sun to half shade Soil: not fussy Spacing: 20cm Height: 60cm Season: summer to late fall

A277 – Approx. 200 seeds

Cut Flower Mix

Bright, mix of double flowers ranging from cream, gold yellow, orange and apricot.

A278 – Approx. 200 seeds

Gold Emperor

The gold-yellow coloured, double flowers last and last, refreshing colour option.

A279 – approx. 200 seeds

Orange King

These deep orange, vigorous growing heirlooms have survived despite modern breeding. The 'king' dates back to mid 1800's, said to be the oldest strain of double calendula.

HEIRLOOM & UNUSUAL ANNUALS

A542 – Approx. 400 seeds

CALIFORNIA POPPY

Mission Bells

eschscholtzia californica

This multi-coloured variety has semi-double, fluted petals. Flowers of gold, white, red and orange dazzle the senses as they dance among the lacy, grey-green foliage. They are easy to grow and a good self-seeder.

Light: sun Soil: well-drained Spacing: 15 to 20cm Height: 30cm Season: summer to late fall

A281 – Approx. 300 seeds

CANDYTUFT

Giant Hyacinth-Flowered

iberis amera

The queen of all candytufts, this variety produces multiple 15cm heads of bright-white flowers that bloom over a long period. Lightly scented and an easy bedmate for most other flowers.

Light: part shade Soil: well-drained Spacing: 15cm Height: 30cm Season: late summer to frost

CASTOR BEANS:

ricinus

This impressive, exotic erect shrub is a real conversation starter. Makes an attractive and fast-growing screen plant. Grows rapidly. **NOTE:** Poisonous if ingested. All parts are toxic. Erratic germinator

Light: full sun Soil: fertile, well-drained Space: 100cm Season: summer to fall

A283 – Approx. 15 seeds

Green

ricinus communis

Try this impressive, exotic erect shrub like plant with branching stems that sport enormous green leaves.

Height: up to and over 4m

A282 – Approx. 15 seeds

Red

ricinus communis gibsonii

Try this impressive, exotic shrub like plant that sports dark red leaves and red seedpods.

Height: up to 3m

A284 – Approx. 300 seeds

CHINESE PAGODAS

collinsia heterophylla

Bands of lilac/white bi-lobed flowers grow around the stems at intervals like a pagoda high rise. This wildflower from northern California was a popular choice in Victorian times for children's gardens.

Light: shade oil: moist, well drained Spacing: 15cm Height: 30cm Season: July to first frost

CLEOMES:

cleome hasslerana

Of Mediterranean origin Cleomes are a member of the caper family. The flowers are open and airy and always look graceful. Make wonderful cut flowers. Flowers are 15–20cm across. Cleome is heat loving, easy to grow, and good self-seeders.

Light: sun Soil: well drained, good soil Space: 45cm Height: 100-125cm Season: summer to frost

A286 – Approx. 400 seeds

Cherry Queen

The Striking deep red flowers

A285 – Approx. 400 seeds

Colour Fountain

Mix of violet, deep rose, pink & white.

A287 – Approx. 300 seeds

Violet Queen

Pale bluish-purple hues make a frothy show.

A288 – Approx. 400 seeds

White Queen

The flowers are white.

HEIRLOOM & UNUSUAL ANNUALS

A289 – Approx. 500 seeds

COCKSCOMB

celosia cristata tall

What is more reminiscent of the Victoria age than these plush rooster combs of velvety bloom? Tight 7-9cm clusters of red, pink or yellow in this mixture will give you unique cuts for your fresh or dried bouquets.

Light: full sun Soil: rich, moist Space: 20cm Height: 20 to 30cm Season: summer to fall

A290 – Approx. 200 seeds

COLEUS

Rainbow Mix

solenostemon blumei

Coleus arrived to North America from Java via England in 1825. The ultimate in foliage plants, they can provide colours of green-yellow, bronze and red to any area in your garden although the colours are more vibrant in the shade.

Light: sun to full shade. Soil: good garden Spacing: 30cm Height: 50cm Season: summer to fall

CORNFLOWERS:

centaurea cyanus

Originating in Britain and Europe these classic easy to grow are a great addition to any wildflower meadow. These self-seeders are suitable for beds and as a cut flower. Mix a few colours together for a beautiful show. Combines well with field poppies. Deadhead to encourage blooming.

Light: sun to part shade Soil: well drained Space: 20cm Height: 40-80cm Season: early summer to fall

A409 – Approx. 150 seeds

Artistic Mix

They are all bi colours and frosted flowers. The colours range from whites to reds, pinks, blues and blacks.

A293 – Approx. 150 seeds

Black Boy

They are a deep shade of purple almost black.

A292 – Approx. 150 seeds

Blue Boy

This standard cornflower is a dazzling shade of blue.

A294 – Approx. 150 seeds

Red Boy

This stunning cornflower is a deep shade of red.

A295 – Approx. 150 seeds

Snowman

This is the white version of the classic blue cornflower.

COSMOS:

cosmos bipinnatus

Kosmos is Greek for beautiful. Cosmos is one of the most adaptable and versatile annuals. They are easy to grow as well as heat tolerant. They produce masses of flowers on the airy ferny foliage. A true "cut and come again" flower. Bees and butterflies love them

Light: sun Soil: well-drained Space: 30cm Season: summer to frost

A296 – Approx. 150 seeds

Dazzler

This variety boasts masses of crimson red flowers.

Height: 120cm

A297 – Approx. 200 seeds

Psyche

The semi-double petals of purple and pink circle a yellow center to give a ruffled look.

Height: 100cm

HEIRLOOM & UNUSUAL ANNUALS

COSMOS CONT'D:

A298 – Approx. 200 seeds

Purity Superior

A very select white offering from Europe developed from the white component of "Sensation Mix"

Height: 120cm

A299 – Approx. 200 seeds

Radiance

Deep rose petals encircle the rich crimson center.

Height: 120cm

A300 – Approx. 200 seeds

Sea Shells

The fluted foxglove-like petals are in colours of red, pink and white.

Height: 100cm

A301 – Approx. 150 seeds

Sensation

This Gold Medal winner in 1936 has daisy-like flowers in shades of pinks, red and white.

Height: 125cm

A464 – Approx. 50 seeds

Veloutte

This variety has large flowers of dark red with white stripes.

Height: 60-80cm

A303 – Approx. 250 seeds

CREEPING ZINNIA

sanvitalia procumbens

Tiny 2.5cm bright yellow "sunflowers" with a black centre bloom tirelessly for months. These low-growing plants branch out and are great as an edging plant or in containers and baskets. An absolutely great plant!! We call them "Happy Faces"

Light: sun Soil: well-drained Space: 20cm Height: 15cm Season: summer to frost

A304 – Approx. 200 seeds

CUP FLOWER

Purple Robe

nierembergia hippomanica

This flower will produce masses of rich purple blooms. Dark green ferny foliage supports these tidy cup shaped flowers with yellow throats. Perfect for edging, rock gardens or containers.

Light: full sun, part shade Soil: moist, well-drained Space: 30cm Height: 20cm Season: summer to fall

A305 – Approx. 100 seeds

DAHLIAS

dahlia variables

With a rainbow of colours ranging from light pastels to gaudy neon and everything in between these dahlias are sure to turn heads. An easy to grow annual that produces tubers that if lifted and stored in the fall for next year.

Light: full sun Soil: good garden Space: 30cm Height: to 60cm Season: summer into fall

A548 – Approx. 100 seeds

DAISY - AFRICAN

arctotis

These easy to grow plants with large gazania like flowers. A mix of many colours on long stems.

Light: sun Soil: sandy, well-drained Space: 30cm Height: 35cm Season: summer through autumn

HEIRLOOM & UNUSUAL ANNUALS

A468 – Approx. 80 seeds

DESERT STAR

amberboa muricata

These wonderful airy flowers are a must in your cottage garden. Elegant lilac flowers have a creamy center. Looking a lot like cornflowers. These are true bee and butterfly magnets. They are easy to grow and great as cut flowers.

Light: sun to part shade Soil: well drained garden Space: 20cm Height: 80-120cm Season: July through autumn

A529 – Approx. 200 seeds

DUSTY MILLER – Silver Dust

cineraria maritime

This is a great edging or accent plant. A mounding plant with finely divided silvery white leaves and fussy texture.

Light: sun to part shade Soil: well drained Space: 30cm Height: 20cm Season: Late spring to frost

Height: 20cm

FLAX:

linum grandiflorum

Victorian oldies are back by popular request.

Light: full sun Soil: well-drained Space: 15cm Height: 30-45cm Season: early summer to frost

A356 – Approx. 200 seeds

Scarlet

The deep rose-red saucer-shaped flowers are 4cm across.

A544 – Approx. 200 seeds

Bright Eyes

These saucer shaped flowers are white with red center and 4cm across.

A307 – Approx. 500 seeds

FAIRIES' TOADFLAX

Fairy Bouquet

linaria morrocana

A dainty cottage variety, developed in England in 1872. Tiny snapdragon-like flowers in pastel shades cover the branching stems in early summer. Delicate foliage. They are good self-seeders.

Light: sun Soil: well-drained Space: 15cm Height: 20-30cm Season: early to late summer

A311 – Approx. 500 seeds

GLOBE GILIA

gilia capitata

The violet blue flowers grow in thick spheres on long, wiry stems of this North American wildflower. The flowers are 3-4cm across and are a stunning sight in your border gardens or as cut flowers.

Light: part to full sun Soil: good garden Space: 15cm Height: 40 to 70cm Season: summer to frost

A310 – Approx. 500 seeds

GLORIOSA DAISY

Mixed

rudbeckia hirta

One of our favourite cut flowers, this variety is in shades of yellow, mahogany and often bi-coloured. Cut back hard to encourage second blooming.

Light: sun Soil: well-drained Space: 30cm Height: 90cm Season: summer to fall

A511 – Approx. 200 seeds

GODETIA

grandiflora

This drought tolerant North American native is also known as Satin Flower. It is a relative to Evening Primrose and Fuchsia. Double flowers 5-7 cm across in a mix of colours of Lavender, pink, red, salmon and white. Will reseed.

Light: sun to part shade Soil: good garden, well-drained Spacing: 40cm Height: 60cm Season: June – July

HEIRLOOM & UNUSUAL ANNUALS

A312 – Approx. 40 seeds

HIBISCUS

Flower of an hour

trionum

This fast growing easy to grow plant is prized for their large 5cm showy trumpet like flowers. The pale-yellow flowers have a dark chocolate center. The flowers are short-lived, but they produce new ones continuously.

Light: sun to part shade Soil: rich garden Space: 100cm Height: 35cm Season: summer to fall

A313 – Approx. 100 seeds

HOLLYHOCK

Indian Spring

althaea rosea

Although in fact a perennial 'Indian Spring' has been grown as an annual since the 1930's. A good vertical accent in any garden sporting large 12cm single, ruffled flowers in shades of rose, red and white.

Light: sun to part shade Soil: not fussy Space: 30cm Height: to 200cm Season: summer to fall

HOLLYHOCK – PERENNIALS

See Perennials – page 22

A314 – Approx. 15 seeds

HONEYWORT

cerinthe major purpurescens

The clusters of purple flowers look like nodding bells and are loved by bees and butterflies. They look especially good in containers when combined with other purple and pink flowers. It is a very unusual flower.

Light: sun to part shade Soil: well drained Space: 10 - 30cm Height: 30 - 40cm Season: early summer to frost

A411 – Approx. 300 seeds

KINGFISHER DAISY

feliccia heterophylla

The spreading growth makes this an excellent plant for front borders and patio containers. It has a mass of sky blue flowers, which contrast beautifully with the yellow centers.

Light: sun part shade Soil: good garden Space: 30cm Height: 15 to 30cm Season: June until fall

A414 - Approx. 100 seeds

KISS ME OVER THE GARDEN GATE

persicaria orientalis

This is the plant for a cottage garden 'must have'. Bell-shaped bright rose flowers on dense spikes droop invitingly from thick, arching stems. Perfect for framing a gate or doorway they also make a handsome specimen for the border.

Note: Germination rate is erratic. Once established, it is a good self-seeder.

Light: sun, part shade Soil: moist, rich Space: 20cm Height: 80 to 200cm Season: July to October

LARKSPURS:

delphinium consolida

These are on our "highly recommended" list for beauty, ease of culture, and length of bloom time. A great cut flower both fresh or dried. This easy to grow plant produces numerous dense spikes of double flowers. A great self-seeder.

Poached Egg Flower

limnanthes douglasii

A delightful 15cm beauty that is covered by fragrant yellow buttercup type flowers with white rims. It originated as a wild flower on the west coast. This popular Victorian English garden flower is a good self-seeder.

Light: sun Soil: moist Space: 10cm Height: 15cm Season: early summer to well after the first frost.

HEIRLOOM & UNUSUAL ANNUALS

A332 – Approx. 100 seeds

MEXICAN SUNFLOWER

Red Torch

tithonia speciosa

Dazzling scarlet red petals surround yellow centers on this bushy, dark-leaved plant. The 8cm flowers bloom profusely atop of tall stems. One of our favourites, this drought tolerant plant attracts birds, bees, butterflies and hummingbirds.

Light: full sun Soil: any light Space: 90cm Height: 160cm Season: summer to frost

A334 – Approx. 400 seeds

MEXICANUM DWARF BALL (AGERATUM)

Blue Ball

ageratum

Low growing mounding plant with frothy, blue flowers. This great border plant has been a garden staple for the last 75 years. Easy to grow and long lasting.

Light: full sun to light shade Soil: not fussy Space: 15cm Height: to 20cm Season: June to frost

NASTURTIUMS:

tropaeolum

Nasturtiums have been cultivated for over 300 years. The leaves and flowers are edible of this easy to grow plant.

Light: sun to part shade Soil: average to poor Spacing: 15cm Height: 30cm Season: summer to fall

A335 – Approx. 30 seeds

Alaska

tropaeolum nanum

An heirloom variety “Alaska” has light green leaves with streaks of cream. The flowers are single in cream, mahogany, yellow and orange.

A336 – Approx. 30 seeds

Empress of India

tropaeolum nanum

This heirloom variety dates from 1884. Velvety deep scarlet flowers bloom against dark green lily pad shaped leaves.

A337 – Approx. 30 seeds

King Theodore

tropaeolum nanum

Rich velvet crimson flowers and very dark green foliage adorn this very old variety.

A340 – Approx. 30 seeds

Trailing

tropaeolum lobbianum

This trailing variety has large round leaves and long-stemmed, long spurred flowers in oranges and red shades.

Height: Trailing 1m

A338 – Approx. 15 seeds

Troika Mix

tropaeolum majus

This is a single flower, semi-trailing variety in a striking array of colours from cream, orange, red, and yellow mix.

A436 – Approx. 500 seeds

NEMESIA

Carnival Mix

A great little annual border plant and a real showstopper. The two lipped tubular flowers range in colour from yellow, orange, pink or white. Flowers are 2.5cm across.

Light: sun Soil: moist, well drained Spacing: 30cm Height: 30 to 40cm Season: summer to autumn

A341 – Approx. 100 seeds

ORNAMENTAL KALE

brassica oleracea

When Jack Frost has destroyed the rest of your garden the Kale comes into its prime. The purples, reds, greens and whites become more vibrant and will last until the snow finally covers them.

Light: full to art sun Soil: well drained Spacing: 30-60cm Height: 30cm Season: late summer and fall

HEIRLOOM & UNUSUAL ANNUALS

A342 – Approx. 200 seeds

PAINTED TONGUE

salpiglossis sinata

This cheery showstopper will produce 5cm across funnel-shaped flowers in rich shades of yellow, purple, mahogany and red. Like petunias, they are long flowering, drought-tolerant and cold hardy.

Light: sun to part shade Soil: good, moist garden Space: 30cm Height: 30cm Season: summer to fall

A344 – Approx. 150 seeds

POOR MAN'S WEATHER GLASS

anagallis arvensis

Masses of bright gentian blue flowers close up when rain is threatening; hence the name. A prostrate hardy annual well suited to rock gardens or areas where low, spreading long-flowering varieties are desired. It is also great in hanging baskets. This trailing airy groundcover will self-seed.

Light: sun Soil: well-drained Space: 25cm Height: 15cm Season: summer to frost

POPPIES:

papaver

Stunning when grown in a mass. Cutting down spent stalks may induce another flush of blooms. They are great self-seeders.

Light: full sun Soil: not fussy Space: 20cm Season: June through September **Note:** Despise transplanting.

A406 – Approx. 500 seeds

Bridal Silk

papaver rhoes

This variety has delicate pure white flowers with creamy yellow centers.

Height: 40-60cm

A346 – Approx. 900 seeds

Danish Flag

papaver somniferum

This variety sports a large white center surrounded by blood red ruffled petals.

Height: 60-90cm

A347 – Approx. 900 seeds

Double Shirley

papaver rhoeas

This variety with two to three layers of petals in each flower, in glorious shades of salmon, rose, scarlet, white and bi-coloured.

Height: 80cm

A354 – Approx. 900 seeds

Florabunda Mix

This is a colourful mix of all the varieties we carry at Florabunda Seeds.

A348 – Approx. 900 seeds

The Giant

papaver somniferum

One of the tallest varieties of poppy we carry in our poppy selection. Large 10cm flowers range in colours from reds, pinks, and mauves to white. The large blue-green seedpods are great for dried arrangements.

Height: 100cm

A349 – Approx. 900seeds

Hens and Chickens

papaver somniferum

Very large seed heads surrounded by clusters of smaller ones makes this variety perfect for collecting the seedpods for floral arrangements. It is a mix of colours.

Height: 125cm

HEIRLOOM & UNUSUAL ANNUALS

POPPIES CONT'D:

A465 – Approx. 900 seeds

Hungarian Blue

papaver somniferum

This heirloom bread seed poppy has single purple-blue flowers that sit on silvery cut foliage. When the flowers fall they leave seed pods filled with grey-blue seeds for baking. Bees love them.

Height: 70-90cm

A350 – Approx. 700 seeds

Peony

papaver somniferum

These sumptuous, richly coloured heirlooms resemble double peonies. Huge 10cm blooms in lavender, red, white and pink.

Height: 80-100cm

A352 – Approx. 900 seeds

Red Legion (Field Poppy)

papaver rhoeas

This original blood red poppy with the black centre commemorates the fallen soldiers of Flanders fields.

Height: 80cm

A549 & P550 – Approx. 900 seeds

Perennial – Mixed Colours

papaver orientale

The only perennial poppy we carry. Does well in Zones 4–9. A mix of colours in red, orange, rose.

Height: 90cm

A355 – Approx. 700 seeds

PORTULACA

portulaca grandiflora

This native of Brazil is a great ground cover. Old-fashioned single rose-like flowers are scarlet, purple, carmine, yellow, apricot pink and white. Flowers are 2-3cm.

Light: full sun Soil: dry, well-drained Space: 15cm Height: 10cm Season: summer to fall

A470 – Approx. 300 seeds

SCARLET SAGE

salvia coccinea

Spikes of scarlet flowers emit from a bushy attractive dark green plant. Is similar to the cardinal flower but much less demanding. Bees and hummingbirds love it.

Light: sun Soil: well drained Space: 20cm Height: 60-100cm Season: summer to fall

A412 – Approx. 300 seeds

SIBERIAN MOTHERWORT

leonurus sibiricus

This tall and naturalistic vigorous annual has whorls of pinkish flowers on long stalks.

Light: sun Soil: well drained garden Space: 30cm Height: 1.5m+ Season: June to September

A438 – Approx. 900 seeds

SILENE

Rose of Heaven

Green-gray leaves compliment the clusters of spreading 25cm white centered rose-pink flowers. They make great cut flowers.

Light: sun Soil: well drained Space: 20cm Height: to 50cm Season: summer to fall

HEIRLOOM & UNUSUAL ANNUALS

A368 – Approx. 600 seeds

SNAPDRAGONS - TALL

antirrhinum majus maximum

Ruffled snapdragons bloom in gorgeous hues along thick sturdy stems. Will self-seed.

Light: full sun to part shade Soil: well-drained, rich Space: 15cm Height: 90cm Season: summer to fall

A358 – Approx. 500 seeds

STRAWFLOWERS

Mixed

helichrysum bracteatum

This popular flower is a favourite by many as a dried flower. Ranging in colours from white to yellow and to scarlet reds.

Light: light sun Soil: well drained Space: 20cm Height: 90cm Season: late spring to autumn

A359 – Approx. 25 seeds

STURT'S PEA

swainsona formosa

A real gem found growing wild in the Australian desert. The silky grey-green foliage rises from prostrate stems. The flowers are arranged in clusters of 6 to 8. The blooms are blood red with glossy black swellings. Although a perennial in Australia we treat it here as an annual.

Light: full sun Soil: well drained Space: 30cm Height: 15-20cm Season: summer

SUNFLOWERS:

helianthus annus

We carry a wide selection of varieties, something to please all gardeners. This easy to grow flower put smiles on the faces of the young and the old. As well the birds, bees and butterflies love them.

Light: full sun to light shade Soil: fertile, well-drained Space: 20-30cm Season: summer to fall

A360 – Approx. 100 seeds

Autumn Beauty

This is an older variety with branching and multi-flowers with colours ranging from golden through deep red.

Height: 240cm

A510 – Approx. 30 seeds

Bambino

This dwarf variety matures to a robust plant with a medium sized sunflower with a brown center. It is great for containers.

Light: full sun to light shade Soil: fertile, well-drained Space: 20-30cm Height: 40cm Season: summer to fall

A484 – Approx. 50 seeds

Distinto Mix

This dwarf variety has a mix of bright red, orange and yellow flowers.

Height: 50-60cm

A363 – Approx. 50 seeds

Ice Cream

helianthus debilis

This choice variety has multiple, white to pale yellow flowers with dark centres.

Height: 300cm

A364 – Approx. 40 seeds

Mammoth

Sunny single yellow faces some up to 30cm across.

Height: 300cm

A485 – Approx. 60 seeds

Maximilian

helianthus maximiliani

The only perennial sunflower we carry is good in zones 4-9. This first-year blooming sunflower has many bright yellow 10cm flowers with lance shaped, grey-green foliage.

Height: 3m

HEIRLOOM & UNUSUAL ANNUALS

SUNFLOWERS CONT'D:

A539 – Approx. 25 seeds

Moulin Rouge

This has a branching habit with large flowers. Flowers are burgundy-red with dark center.

Height: 160cm

A365 – Approx. 50 seeds

Teddy Bear

This heirloom dwarf variety is compact and bears double, golden yellow flower heads to 15cm across.

Height: 60cm

A367 – Approx. 300 seeds

SWAN RIVER DAISY

brachycome Iberidifolia

A native to Australia they are an easy to grow airy plant. They bear masses of dainty daisy like flowers, a mix with shades of blue, pink and white with yellow eyes.

Light: sun, part shade Soil: rich, well drained Space: 5cm Height: 20-40cm Season: summer to autumn

A413 – Approx. 200 seeds

TASSEL FLOWER

Irish Poet

emilia javanica

This annual has long stems and small fluffy light orange flowers in clusters.

Light: sun, part shade Soil: good garden Space: 20cm Height: 40-60cm Season: June to fall

TICKSEEDS:

coreopsis tinctoria

This easy to grow Native to North America is long blooming and a great self-seeder. They make great cut flower.

Light: sun, part shade Soil: not fussy Space: 30cm Season: summer to late fall

A407 – Approx. 400 seeds

Roulette Mix

This mixture has double and semi double flowers in golden yellows and mahogany.

Height: 60-80cm

FA428 – Approx. 10 seeds

White

FA89 – Approx. 300 seeds

BLUE WOODRUFF

asperula orientalis

A mounding plant, forming a wonderful ground cover with fragrant lilac-like flowers. Thrives in moist wooded areas.

Type: Annual Light: semi shade to shade Soil: moist, fertile Space: 20cm Height: 20cm Season: summer to fall

FA507 – Approx. 100 seeds

COMMON TARWEED

madia elegans

This fragrant annual has an intoxicating fragrance resembling a tropical fruit cocktail. It will surely delight anyone coming close to it on a warm summer evening or early summer morning. This night flower plant attracts insects at night. The fringed flowers are bright/lemon yellow with a maroon ring around the centre.

Type: Annual Light: part shade Soil: not fussy Spacing: 30cm Height: 60 – 80cm Season: June - September

FA90 – Approx. 25 seeds

DATURA

Single White

datura metel

Large 15 to 20cm long trumpets festoon this annual, drought-tolerant plant. Very fragrant

Type: Annual Light: full sun Soil: fertile, well-drained Space: 90cm Height: 90-120cm Season: summer to fall

Note: All parts of plant are toxic.

FA91 – Approx. 800 seeds

EVENING SCENTED STOCK

matthiola longipetala ssp. bicornis

These lilac coloured wildflowers, though unassuming by day their evening fragrance has been held in high regard.

Type: Annual Light: sun, part shade Soil: well-drained Space: 20cm Height: 45cm Season: summer to fall

FA408 – Approx. 30 seeds

FOUR O'CLOCKS

Marbles Mix

mirabilis jalapa

Four o'clock alludes to the flower's habit of opening up and releasing its scent when the sun sets. The bushy plant produces 6cm trumpeted bi coloured blooms in rose, red, yellow and white. In fall, dig up the tubers and store in a cool, dry, dark place.

Type: Annual Light: full sun Soil: light, moderately rich Space: 200cm Height: 60-90 cm Season: summer to frost

FRAGRANT

FA92 – Approx. 60 seeds

HELIOTROPE

heliotropium arborescens

This native of Peru was a very popular plant in Victorian times. It flowers profusely boasting trusses of rich purple sweetly scented blooms. It is great for attracting bees & butterflies.

Type: Annual Light: sun, part shade Soil: good garden Space 30cm Height: 40cm Season: Summer to frost

FA94 – Approx. 500 seeds

LACY PHACELIA

phacelia tanacetifolia

Showy pale lavender-blue clusters with protruding stamens uncurl like a fern's fiddlehead. Deadheading to encourage blooming. With the fragrance of grapes, the bees love them.

Type: Annual. Light: sun Soil: well-drained Space: 50cm Height: 50cm Season: mid-summer through fall

FA95 – Approx. 200 seeds

LEMON BERGAMOT

monarda citriodora

Whorls of pink-purple flowers grow in clusters 10cm up the stems at intervals. Entire plant scented of lemon and mint.

Type: Annual Light: sun, part shade Soil: good garden Space: 30cm Height: to 100cm Season: summer to fall

NICOTIANAS:

Known as one of the most fragrant flowers. It comes into its best after the heat of the day has passed. White trumpet shaped flowers pour forth their lavish scent. The will self seed. Not for smoking.

Type: Annual Light: sun, part shade Soil: moist Space: 25cm Season: summer to autumn

FA93 – Approx. 500 seeds

Jasmine Tobacco

nicotiana alata grandiflora

The 15cm white trumpet-shaped flowers pour forth their lavish jasmine scent.

Height: 90-120cm

FA537 – Approx. 500 seeds

Sensation Mix

nicotiana alata

A sweet scented variety in a mix of colours of white, pink, and red.

Height: 75cm

FA103 – Approx. 500 seeds

Woodland Tobacco

nicotiana sylvestris

This is one of the oldest varieties of Nicotiana, similar to Jasmine Tobacco but a much larger plant.

Height: 150cm

FA97 – Approx. 200 seeds

PHLOX

drummondii grandiflora

Clusters of sweetly scented flowers are produced on well-branched, sturdy stems. Blooms of soft pastel shades with small white eyes make them an appealing addition to the garden. They are a magnet for hummingbird and butterfly.

Type: Annual Light: sun, part sun Soil: light, rich Space: 30cm Height: 40cm Season: late spring to autumn

FA98 – Approx. 300 seeds

PINCUSHION FLOWER

scabiosa artropurpurea

Lavender, pink, red, yellow and white double flowers are borne in profusion.

Hundreds of honey-scented florets produce a pincushion effect. Bees and butterflies love them.

Type: Annual Light: full sun Soil: fertile, well-drained Space: 30cm Height: 90cm Season: mid-summer to fall

FRAGRANT

FA99 – Approx. 200 seeds

SWEET ALYSSUM

Violet Queen

lobularia maritimum

A heady scent of honey will fill the air near this low-growing variety that bears tiny, rich violet flowers that are excellent in beds or planted out in containers. They are a good self-seeder.

Type: Annual Light: sun, light shade Soil: not fussy Space: 20cm Height: 20cm Season: early summer to frost

SWEET SULTANS:

centaurea imperialis

Mounded tufts of flowers are borne on long stems. They make excellent cut flowers. They have a sweet vanilla fragrance.

Type: Annual Light: full sun, partial shade Soil: fertile, well drained Space: 20cm Season: early summer to frost

FA101 – Approx. 100 seeds

Mixed

The 8cm mounded tufts of multi coloured flowers. The colours range from white and rose to lilac pink and purple-violet.
Height: 60cm

FA100 – Approx. 100 seeds

The Bride

A pure white variety of 8cm mounded tufts of flowers.

Height: 60cm

FA102 – Approx. 300 seeds

TIDY TIPS

layia platyglossa

Lemon yellow, single daisy-like flowers fringed with tidy white tips are drought-tolerant. Although native to the Pacific coast, it is a more familiar sight in English gardens. There is a minty fragrance to the entire plant.

Type: Annual Light: sun Soil: well-drained, fertile Space: 20cm Height: 30cm Season: mid summer till frost

Note: Does not like to be transplanted.

FP105 – Approx. 400 seeds

DAME'S VIOLET

Sweet Rocket

hesperis matronalis

It became a popular cottage garden biennial 500 years ago. Large spikes of multi colour blooms on tall branching stems. This favourite of the swallowtail butterfly has a sultry evening fragrance.

Type: Perennial Zone: 3-9 Light: sun Soil: moist, sandy loam Space: 30cm Height: 80cm Season: early summer

DIANTHUS:

The botanical name means "divine bearded flower" Great cut flowers, very fragrant and a favourite of the swallowtail butterfly.

Type: Perennial Zone: 4-10 Light: sun Soil: tolerates poor, dry Space: 30cm Season: early summer

FP104 – Approx. 500 seeds

Black Sweet William

dianthus barbatus oeschberg

Large heads of carnation-scented flowers of the deepest violet purple (almost black) rise up from leafy mounds.

Height: 50cm

FP106 – Approx. 500 seeds

Holborn's Glory

dianthus barbatus

Trusses of purplish-red flowers with a white ring bloom on straight, stiff stalks.

Height: 50cm

FRAGRANT

FP107 – Approx. 250 seeds

ENGLISH LAVENDER

lavandula augustifolia

This is the true blue English lavender, famous for its perfume quality. "Lavare" is Latin for "to wash", denoting lavender's age-old use in toiletries. Used in aromatherapy as a calming scent.

Type: Perennial Zone: 5-9 Light: sun Soil: good garden Space: 50cm Height: 40cm Season: summer to fall

FP423 – Approx. 500 seeds

PRAIRIE EVENING PRIMROSE

oenothera lamarckiana

This wildflower is a must for your garden. The golden yellow cup like flowers close during the day and open at night emitting a heady perfume. Drought tolerant. Note: Rich soil will increase foliage but decrease flowering.

Type: Biennial Zone: 3-7 Light: sun, part shade, Soil: not fussy Height: up to 120cm Spread: 30cm Season: June into autumn

FP467 – Approx. 100 seeds

SOAPWORT

saponaria officinalis

Also known as bouncing bet, crow soap, wild sweet william, and soapweed. This old variety was used in making soap. This first-year flowering, fast growing perennial has a display of single, pink, fragrant flowers. It attracts bees and butterflies. Good self-seeder.

Type: Perennial Zone: 3-9 Light: sun to light shade Soil: well drained Space: 30cm Height: 40-60cm Season: July to autumn

FP496 - Approx. 200 seeds

WALLFLOWER

Fair Lady

cheiranthus cheiri

The botanical name comes from the Greek words for hand and flower. To mask the odours of poor sanitary habits, many once carried this fragrant flower. Cheery pastel shades of lemon, cream gold, apricot, purple, pink, salmon rose and mahogany on 30cm stems make this biennial perfect for the edge of the border.

Type: Biennial Zone: 3-7 Light: sun Soil: poor to fertile well drained Spacing: 30cm Height: 45cm Season: spring to summer

FP532 – Approx. 60 seeds

WILD BERGAMOT

monarda fistulosa

A showy plant with pink to lavender flowers. For continuous blooms deadhead periodically.

Type: Perennial Zone: 5 Light: sun to part shade Soil: good gardening Space: 60cm Height: 90cm Season: summer to frost

VINES

TCV129 – Approx. 20 seeds

BIRDHOUSE GOURDS

lagenaria siceraria

These bottle shaped gourds are suitable for carving. Make birdhouses, dippers or decorative carving.

Type: Annual Light: sun. Soil: fertile garden Space: 100cm Height: Trailing Season: harvest before frost.

TCV128 – Approx. 40 seeds

BLACK EYED SUSAN VINE

thunbergia alata

Introduced from Africa in 1827, this lover of cool temperatures with funnel-shaped blooms in orange shades and dark throats.

Type: Tender Perennial (treat as Annual) Light: full sun to part- shade. Soil: well drained, fertile. Space: 30cm

Height: up to 175cm Season: summer to fall **Note:** Germination is erratic.

TCV434 – Approx. 50 seeds

CHILEAN GLORY FLOWER

eccremocarpus scaber

This fast-growing climber has green to grey tinted leaves with tubular 2.5cm mix coloured flowers.

Type: Perennial (treat as an Annual) Zone: 9 Light: sun, part shade Soil: moist rich Space: 50cm Height: 2m

Season: summer to autumn

TCV133 – Approx. 30 seeds

CUP & SAUCER VINE

cobea scandens

These flowers are quite exotic with frilly green 'saucers' and mauve 'cups'. As it matures, the entire flower changes in colour from pale green to a deep velvet blue. Branched tendrils at the end of each leaf allow this fast grower to climb unassisted.

Type: Annual Light: sun soil: well-drained, sandy with plenty of water Spacing 60cm Height: 300cm Season: summer to frost

TCV134 – Approx. 10 seeds

CYPRESS VINE

Ipomoea quamoclit

Introduced to Northern gardens in 1629, this vine sports exotic feathery foliage and intensely red tubular flowers.

The hummingbirds love it.

Type: Annual Light: full sun Soil: good well-drained Space: 30cm Height: 3m Season: mid-summer to frost.

TCV135 – Approx. 30 seeds

EXOTIC LOVE

mina lobata

This annual climber has showy flowers, ranging from scarlet-red upon opening to orange, yellow and cream in full bloom.

Type: Annual Light: sun, part shade Soil: well drained Space: 30cm Height: to 2m Season: summer to fall

TCV439 – Approx. 50 seeds

HOPS

humulus lupulus

The rampant climber with deeply lobed foliage will quickly cover unsightly structures. It bears light green flower clusters, which can be used in making beer.

Type: Perennial Zone: 3-9 Light: sun to light shade Soil: well drained Space: 250cm Height: 3-5m Season: autumn

TCV497 – Approx. 12 seeds

HYACINTH BEAN

dolichos lablab

Purple and white bicoloured 2 cm sweetly fragrant flowers reminiscent of wisteria cluster along this vigorous vine. An added bonus is the dark purple pods that decorate the vine after flowering. Offered in an 1827 Toronto Nursery Catalogue.

Type: Annual Light: full sun Soil: well-drained Space: 25 cm Height: 3m Season: summer to fall

VINES

TCV137 – Approx. 20 seeds

LOVE IN A PUFF

cardiospermum

Also known as balloon vine, a perfect white heart can be found on the seeds inside the green capsules, which appear to have been inflated like a balloon. This truly unusual vine with lacy, shiny green foliage will climb up just about anything.

Type: Annual (tender Perennial) Light: semi-shade Soil: rich Space: 30cm Height: 2-3m Season: summer to fall

TCV151 – Approx. 15 seeds

MIXED RUNNER BEAN

phaseolus coccineus

This terrific dual-purpose plant provides oodles of edible young pods. The beans are brown, purple, red flamed, and white. This skyward climber will be covered in scarlet, white, and bicolour red and white flowers. The hummingbirds love it.

Type: Annual Light: sun Soil: well-drained garden Space: 15cm Height: 2-3m Season: summer

TCV150 – Approx. 20 seeds

PASSION FLOWER VINE

passiflora coerulea

This fast-growing vine produces a mass of 10cm dark blue and white star like flowers. Taken to Rome in the early 1600's. Papal scholars quickly interpreted the flower parts to have meaning in the crucifixion of Jesus.

Type: Perennial (Treat as Annual) Light: sun Soil: rich, well drained Space: 30cm. Height: 2m. Season: early summer to frost.

Note: Erratic germination. Hint: Bring plant indoors for the winter

TCV169 – Approx. 15 seeds

VEGETABLE SPONGE

luffa cylindrical

Make you own luffa. Soak ripe luffa gourds for 24 hrs. Remove skin, wash well with water and bleach. Air dry.

Type: Annual Light: sun Soil: good garden Space: 90cm Height: over 200cm Season: summer to autumn

VINES

MORNING GLORIES:

Annual morning glories are a nostalgic symbol of the cottage gardens of the “new world”. For twining up a fence, these heat-loving beauties are indispensable. The bloom time of morning glories depends on temperature. Blooms will unfurl as the temperature climbs and then close up if the sun get too hot. **Note:** Does not bloom well in rich soil.

Type: Annual Light: sun Soil: garden Space: 15 cm Season: summer to frost

TCV140 – Approx. 50 seeds

Early Call

ipomoea nil

With a mix of colours this large and early-flowering variety blooms 3-4 weeks earlier than most.

Height: 150cm

TCV141 – Approx. 25 seeds

Flying Saucer

ipomoea tricolor

This variety has large white funnels with lilac blue veins that whirl open every morning to reveal a pale yellow center.

Height: 300cm

TCV142 – Approx. 50 seeds

Grandpa Ott's

ipomoea purpurea

This old heirloom variety produces small deep-violet blue flowers with a purple star and a glowing pearly red throat.

Height: 300cm

TCV143 – Approx. 40 seeds

Heavenly Blue

ipomoea tricolor

Truly a favourite with iridescent sky-blue 8cm trumpets with white-yellow throats.

Height: 300cm

TCV144 – Approx. 50 seeds

Imperial - Scarlet O'Hara

ipomoea nil

This spectacular variety has deep red flowers gracing the entire vine all season.

Height: 250cm

TCV472 – Approx. 40 seeds

Imperial Mix

ipomoea tricolour

This variety sports a mix of blue, red, pink and white flowers.

Height: 300cm

TCV145 – Approx. 20 seeds

Black Beauty

This heirloom variety is dark green with white flesh. This is a prolific variety that matures early and will continue to produce if picked regularly. Matures 48 days

GENERAL INFORMATION

HOW LONG WILL IT TAKE?

Upon receipt of your order we can usually have it filled and mailed within 4-5 business days. Orders received at high-volume times could take longer. If you are in a rush, please indicate it on your order.

PRICING:

Individual packages \$3.80, Mixtures \$5.45, Collections \$16.50, all others as stated.

All pricing is subject to change without notice. Please check our website for current pricing

POSTAGE INFO

Canadian orders of \$25.00 before tax will be mailed – Canada Post - First Class Mail

Orders over that will be mailed – Canada Post - Expedited Parcel Post with a tracking number

All orders outside of Canada will be mailed – Canada Post - Expedited Parcel Post with a tracking number

SEED COUNTS:

We package by measurement and our seed counts are approximate. We ensure that every package contains a very generous seed count.

CONDITION OF SEED

All seed is untreated and non-GMO. A very few varieties are untreated hybrid but are noted as such. Our seeds are fresh, and you should expect good germination and a bountiful yield, given the right growing conditions.

EDIBILITY

Please note that it is advisable to research any plant before ingesting it. Many plants and seeds are toxic, so please be careful.

SEED STORAGE

Store seeds away from heat and moisture, in a dark, cool place.

SUBSTITUTIONS

We keep ample quantities of seed on hand. In the event that we run out of a variety, we will either substitute with what you indicate on the order form or give credit.

MAILING LIST

We respect your privacy and we do not sell or lend our mailing list to anyone.

RETURNS

Any returns must be authorized by Florabunda Seeds and must be returned prepaid. A refund will be issued upon receipt of seeds in unopened, undamaged packets.

FOREIGN ORDERS

Some foreign orders may require a phytosanitary certificate. A surcharge is made to orders requiring this certificate.

Thank you for choosing Florabunda Seeds. We are growing and are glad to have you as our growing partner! Our hope is for you to experience success and joy with your gardening ventures. Your letters, stories, suggestions and photos are a joy to receive.
