2018 Indoor Foliage & Landscape

Dear Customer,

Thank you for taking the time to open our Indoor Foliage & Landscape Catalogue. In it you will find a comprehensive range of high quality indoor foliage and landscape varieties available as plugs. Highsun Express is proud of its plug quality and strives to also bring that quality to every facet of its operations. Whether you are looking for technical or sales service, Highsun Express will endeavour to assist.

At Highsun we are determined to 'exceed your expectations' with 1st class plant quality and customer service.

We look forward to hearing from you.

Brad Skinner
Managing director

Young Plants from Seed and Tissue Culture

Wholesale Seed Distribution

If you need more information about products in this catalogue please contact our friendly sales team who will be happy to assist you.

We also propagate a huge range of other plants, many of which can be found in our following Catalogues:

- Vegetables, Herbs and Fruit
- Cut Flowers
- Growers Flowers

As a division of Highsun Express, our Proptec catalogue contains details of our propagation materials that we supply. Why not check out our website www.proptec.com.au, email us or give us a call.

NEW NEW RELEASE

These are produced by hand pollination of a very select clone with red flowers, compact fat caudices and rounded fuzzy leaves.

Adenium **Follage**
arabicum
Arabicum 6571

Adenium **NEW Follage**
obesum
Double Star Mix 7242

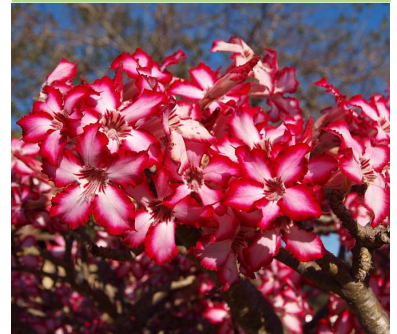

Adenium **NEW Follage**
obesum
Double Yellow Mix 7243

Deep pink flowers with a broad white to light pink border. Plants are compact with shiny, bluish-green leaves.

Adenium **Follage**
obesum
India Bicolour 6572

Over the years we have come to realize that certain specific crosses will give a very high percentage of plants with deep red flowers. They are fast and robust growers.

Adenium **Follage**
obesum
India Deep Red 6573

These are hand pollinated crosses that will give pure white flowers, with a very few having a very light pink tint or pink edge.

Adenium **Follage**
obesum
India White 6574

Adenium **NEW Follage**
obesum
Single Purple Mix 7244

Adenium **NEW Follage**
obesum
Yellow Star Mix 7273

Adenium — Agapanthus

Adenium **Foliage** It is a mix of single flowered varieties. Garden Height 40-60cm.
obesum

Thai Mix 5958

Agapanthus **Landscape** 'Charlotte' is a compact, clump-forming, half-hardy, deciduous to semi-evergreen perennial with broad, strap-shaped, mid-green leaves, and, in summer, sturdy, erect stems bearing rounded umbels of star-shaped, pale blue to blue flowers with a dark violet-blue stripe down the centre of each petal.
africanus

Charlotte 6382

Agapanthus **Landscape** A dwarf africanus type of Agapanthus. Commonly known as Lily of the Nile, now grown all over the world for its beautiful flowers. These tough plants are great for rock gardens, borders, containers or mass plantings. Getty White has dense clusters of white flowers on erect 36cm stems that rise above the evergreen foliage. The plant forms large clumps of bulbs that eventually produce multiple stems of flowers.
africanus

Getty White 1004

Agapanthus **Landscape**
africanus

Orientalis White 1008

Agapanthus **Landscape** Exceptionally dark indigo purple flowers, almost black. the flower buds are quite erect, as the flowers open they are semi-hanging showing the plant has inapertus parentage. deciduous leaves.
africanus

Black Magic 6381

Agapanthus **Landscape** Evergreen, dark green strap like arching leaves. Bicolour flowers from blue in the throat to white on the petal's edge. Grows up to 50cm in height. Requires full sun and moist but well drained soil.
africanus

Enigma Bicolour 3981

Agapanthus **Landscape** Orientalis is an extremely hardy and versatile plant that has striking blue star burst flowers in summer. Blue trumpet like flowers. Garden Height 100cm.
africanus

Orientalis Blue 1007

Agapanthus **Landscape** Agapanthus "Purple Cloud" is widely acknowledged as one of the most attractive varieties. It grows to a height of approximately 130cm and produces large purple-blue flowers.
africanus

Purple Cloud 7002

Agapanthus — Agave — Aglaonema

Semi-dwarf Lily of the Nile. Bright blue blooms. Garden Height 100cm.

Agapanthus **Landscape**
africanus 
Queen Anne **5816**

Snowball is a dwarf Agapanthus with a compact clump of strap-like medium green foliage to 45 to 50cm tall. Large white flower heads rise above the foliage. Great to accent garden borders, rock or container gardens.

Agapanthus **Landscape**
africanus 
Snowball **6384**

Agave attenuata is a native Mexican plant that forms rosettes of succulent-like, soft fleshy, lime green to bluish leaves. The 60cm leaves are somewhat translucent, with no spines. It will clump to about 0.9 to 1.2m tall and wide. Flowers are greenish yellow on dense arching spikes 3-7m long which has a fox tail shape. Blooming appears in spring or summer. It may take up to 10 years for the Agave attenuata to bloom.

Agave **NEW Landscape**
attenuata  
Agave **4013**

An interesting leaf pattern where the new leaf takes on a different colour or pattern depending on the conditions at the time.

Aglaonema **NEW Foliage**
commutatum  
Chameleon **7321**

Aglaonema Eileen has broad lanceolate to ovate cream leaves pointed and come marked with green. Most of the time it is tinged with pink in the upper surface.

Aglaonema **Foliage**
commutatum  
Eileen **6386**

Aglaonema **NEW Foliage**
commutatum  
Katrina **3621**

Variegated smooth-textured pink. Height: 45-60 cm

Aglaonema **Foliage**
commutatum  
Lady Valentine **6387**

Available Dec 2018.

Aglaonema **NEW Foliage**
commutatum  
Red Emerald **2881**

Aglaonema

Aglaonema **Foliage** Striking red central rib
commutatum contrasts nicely with yellow and green leaf.

Red Fire 6391

Aglaonema **Foliage** Red 'Valentine' is a slow-growing cultivar with foliage variegation that is simply irresistibly attractive!

Red Valentine 6392

Leaves are painted in appealing tones of rose-pink and randomly splashed with dark green blotches, creating such diversity in its pattern. The midrib, margin and petiole are all dark green. It has an erect and compact growth when young which gradually becomes more outwardly spreading with a green creeping stem as the plant develops.

Aglaonema **NEW Foliage** A new and distinct cultivar of Aglaonema also named 'Siam Majesty' characterized by red venation on dark green ovate leaves, compact, and well-branched growth habit.

Red Vein (Siam Majesty) 6393

Aglaonema **Foliage** Siam Aurora is a lovely houseplant that has lance-shaped leaves edged and veined in rich red.

Siam Aurora 4165

Aglaonema **Foliage** One of the most common cultivars is 'Silver Queen' (Aglaonema "Silver Queen") lance-shaped leaves are dark green with silver variegation and appear on multiple stalks, usually grown as a houseplant.

Silver Queen 6394

Variable Availability (Possibly Summer 2018).

Aglaonema **NEW Foliage** Available May 2018.

Siti Nurhaliza 2911

Aglaonema **Foliage** Aglaonema Snow White has green lanceolate foliage with silver grey stripes along its lateral veins. Its delicate snow-white stems give it an elegant feel.

Snow White 6395

Aglaonema **Foliage**

Spitfire 6396

Aglaonema — Alocasia

Aglaonema Super White is an amazing looking plant with leaves that are absolutely white with green veins that enhance its looks. It grows best in indirect/filtered sun and places that have bright natural light.

Aglaonema **Foliage**
commutatum
Super White 6389

Aglaonema 'Wishes' is a less common cultivar that features heavy pink splotching on its green outlined leaves.

Aglaonema **Foliage**
commutatum
Wishes 6390

Bebe is a sort of Alocasia Polly. It now outsells Polly two to one overseas. Suitable for 125 - 140mm pots.

Alocasia **Foliage**
lowii
Bebe/Bambino 6397

A stunning black velvety leaved variety with white veins. Suitable for 140mm - 200mm pots.

Alocasia **Foliage**
sanderiana
Black Velvet 6398

Compact -Tall upright, fast grower with large rounded leaves used for outdoor landscaping. Best in 200mm pots.

Alocasia **Foliage**
lowii
Calidora Dwarf 6399

This small elephant ear eventually grows to about 1 metre with multiple stems. Heart shaped leaves have prominent veining on the underside. Fairly cool tolerant, and handles light frost.

Alocasia **Foliage**
cucullata
Cucullata 2967

Alocasia 'Ebony' is a fast growing, well branched cultivar with an upright growth habit. The deep green arrow shaped leaves are highlighted with light green to silver veins. Contrasting deep ebony colored petioles make this cultivar very unique and attractive. Perfect for 10,15 and 20cm container production in close spacing.

Alocasia **Foliage**
lowii
Ebony 6796

Satiny deep green to black leaves and glowing white veins on 18-inch-long leaves make this elephant's ear great in containers, in a shady border, at the edge of a pond, or as a house-plant. It also has pale stalks with purplish banding. Is tolerant to a range of soil pH, heat, humidity, and heavy soil. It can even take about a half day of sunlight.

Alocasia **NEW Foliage**
lowii x amazonica
Green Velvet 6692

Available Apr 2018.

Alocasia — Alpinia

Alocasia
lowii
Ivory Coast **6795**

Foliage 'Ivory Coast' is fast growing, well branched with an upright growth habit. The arrow shaped leaves are highlighted with light green veins overlaid with a touch of silver hue. Contrasting light pink petioles with brownish-green streaks make this cultivar very unique. Perfect for 15-20cm container production in close spacing.

Alocasia
macrorrhizos
Macrorrhiza **6400**

Foliage Broad arrow shaped leaves of mid green. Native of South East Asia. Good for landscaping tropical gardens.

Alocasia
lowii
Morocco **5808**

Foliage 'Morocco' will amaze with its abundance of glossy dark green leaves with light green veins and burgundy undersides. Now add those beautiful leaves to rich pink petioles with delicate streaks of green and you have an unbeatable combination. 'Morocco' is a strong, fast growing cultivar excellent for 15-20cm pots.

Alocasia
lowii
Polly amazonica **6401**

Foliage Smaller, more compact version of Alocasia Amazonica.

Alocasia
wentii
Wentii **6403**

Foliage Dark green, heart shaped leaves on a sturdy upright plant. Suits 140mm - 200mm pots.

Alocasia
lowii x amazonica
Yucatan Princess **6693**

Foliage This black form of Alocasia took our breath away! Shiny, dark-green to black pucker and command interest. Tall and Amazon-like a Yucatan Princess.

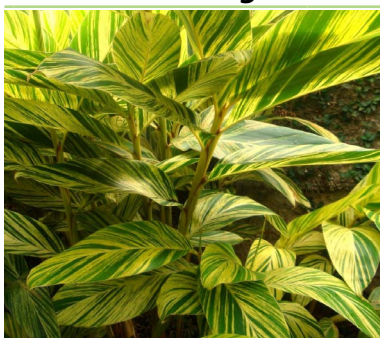

Available 2019.

Norwood Label Code:
51-4624

Alpinia
zerumbet cv Variegata
Zerumbet Variegata **6404**

Foliage Ornamental ginger with variegated yellow and green leaves. Ideal houseplant of tropical landscape specimen. Suitable for 140mm - 200 mm pots.

Alpinia **NEW**
luteocarpa
Red Rubin **2509**

Foliage Red Bamboo Ginger. This fragrant ginger looks like a dwarf bamboo bush. This Ginger boasts dark green leaves with red undersides. Bamboo Ginger has a great clumping habit. Perfect patio container plant. Prefers some shade. Mature height of 60-90cm. Zones 7 and higher. Produces flowers.

Small flowers - The Princess Alexia Ruby has deep-red, chic flowers and a wonderful, full and compact build. The spadix is white with a clear yellow tip. The leaves are sturdy, shiny and dark-green. This gives a beautiful contrast together with the deep-red flowers. Flowers 9 -12cm

Anthurium (Small) **Foliage**

andreaeanum

Felicita 6509

Felicita® stands out for its beautiful red lipstick coloured flowers. The spadices are cream and do not have a yellow tip, but a pastel coloured pink tip.

Anthurium **Foliage** It is a special variety of the
andreaeanum

Maine 6413

highest quality. Maine® fits the 'Big-American series' and suitable for the large pot sizes. Maine® has a bright pink colour, an excellent shelf life and the flowers are nicely hammered.

Anthurium **Foliage** Proud, elegant and in an
andreaeanum

Otazu 6508

almost black, dark brown colour Otazú is a jewel. The plant attracts the attention because of its shining flowers, which rise above the leaves like a flower field. The white spadix with the yellow top gives a nice contrast. In short, a promising, chic and trendy addition in the assortment.

Anthurium **Foliage** Purple arc anthuriums are
andreaeanum

Purple Arc 6846

purple tulip anthurium. Tulip anthuriums are smaller and not so wide as red anthurium. These small beauties add to any Hawaiian Flower arrangement. They are also used for bridal bouquets and for our anthurium corsage.

Bred for large flowers and a bold look, 'Pumpkin' is fast growing producing fewer but larger flowers than most "andrecola" varieties. It is a larger structured plant, ideal for larger pot sizes. 'Pumpkin' produces a large beautiful orange spathe with a contrasting yellow spadix.

Anthurium **Foliage**
andreanum
Pumpkin 6811

'Red Heart' combines a compact growth habit and large flower size with excellent Anthurium blight resistance. The large spathes are bright red enhanced with a red spadix. Similar to 'White Heart', the leaf petioles are shorter than most 6 and 8 inch Anthurium varieties, making it more compact.

Anthurium **Foliage**
andreanum
Red Heart 6812

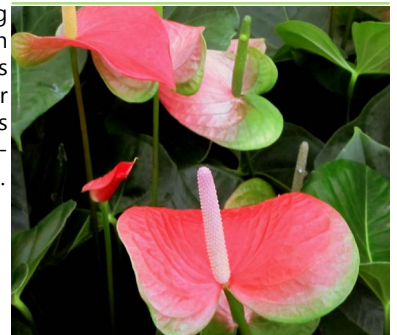

Anthurium **NEW** **Foliage**
andreanum
Red Victory 5184

'Rose Blush' produces large rose colored flowers. It is considered an obake Anthurium type (obake is Japanese meaning "a thing that changes") since with maturity the flower colors and shape changes. Older plants will display spathes with pale green "ears" adding to the flowers appeal.

Anthurium **Foliage**
andreanum
Rose Blush 6815

'Small Talk' Pink is an early blooming hybrid that will consistently flower and perform in pot sizes as small as 8cm up to 15cm in diameter. Flowers are abundant and graduate in size with maturity. Most old flowers don't have to be removed as they pass gracefully to shades of pink, white and green.

Anthurium **Foliage**
andreanum
Small Talk Pink 6816

'Small Talk' Red is a very early blooming hybrid that will consistently flower and perform in smaller pot sizes. Flowers are abundant and graduate in size with maturity, measuring up to 10cm in length. Most old flowers do not have to be removed as they pass gracefully to shades of red, white and green.

Anthurium **Foliage**
andreanum
Small Talk Red 6817

Medium sized flowers. The Snow King® has beautiful snow white flowers that contrast greatly against the nearly black/green leaf. A very unique and most desired colour combination. The flower keeps its white colour for a long time and as it ages, pink veins develop around the base of the spadix. Later on the flowers get a sort of pink/green dotted pattern.

Anthurium **Foliage**
andreanum
Snow King 6414

Small Flowers - Combines an excellent growth with very long shelf life. Flowers 9 -12cm.

Anthurium **Foliage**

Sugar Love 6415

Anthurium — Aralia — Begonia

Anthurium **NEW** **Foliage**
andreaeanum

Success Red 6071

Anthurium **NEW** **Foliage** Turenza® is the popular glossy red Anthurium. The flower retains its colour for a long time and the position of the leaves makes the plant stylish.

Turenza 6505

Anthurium **NEW** **Foliage**
andreaeanum

White Winner 6416

Begonia **Foliage** Beautifully scalloped leaves that begin with green spots and mature to black. Hosts small insignificant pink flowers

Black Fancy 6699

Anthurium **Foliage** A beautiful new Anthurium with flowers that start out dark lavender maturing to vibrant, florescent pink with lavender overtones. Commercial growers will find 'Tickled Pink' a vigorous grower, with excellent tolerance to common Anthurium diseases.

Tickled Pink 6818

Anthurium **Foliage** 'White Heart' combines large flower size with excellent Anthurium blight resistance. The large spathes are shiny white with a splash of green and enhanced with a contrasting dark pink spadix. The petioles are shorter, providing a more compact, full pot of dark green foliage.

White Heart 6829

Aralia **Foliage** False Aralia has slender leaflets that grow in a circle at the tops of stems so that they look like fingers, giving this house plant another common name: Finger Aralia. New coppery brown foliage turns a dark, blackish-green as the plant matures. Its narrow, serrated leaflets give this small tree a lacy appearance, making it a graceful addition to a collection of tropical house plants.

Elegantissima 1133

Begonia **Foliage** Hot pink markings

Kotobuki 6420

Begonia — Bromeliad

This glistening silver hybrid combines good looks with an easy-to-please personality. Its large, shiny leaves have olive-green veins and cranberry underneath. An angel wing cane type that grows to 75cm under partial sun.

Begonia **Foliage**
rex  
Looking Glass **6792**

With plum colour on mature leaves, they accent the silver of the new leaves. Silver spots dance in the dark-green and black margin and highlights the colours. Blooms are rose pink.

Begonia **Foliage**
rex  
Plum Paisley **6701**

This beautiful hex type begonia has blood-red, heart shaped leaves. It also hosts the great contrast of a black margin and a black centre.

Begonia **Foliage**
rex  
Red Robin **6702**

This dark-red giant can span over 1.5 meters in ten years. The tough, leathery leaves tinge a deep red in bright light. The thick, red flower spike can grow 2.5 meters high, producing hundreds of lightly fragrant, white flowers. Prefers bright light and can withstand relatively cool temperatures.

Bromeliad **Foliage**
alcantrea   
Rubra **7003**

Alcantarea 'Silver Plum'. A giant bromeliad that doesn't mind sun or shade, with fantastic burgundy coloring.

Scarlet Belle 3616

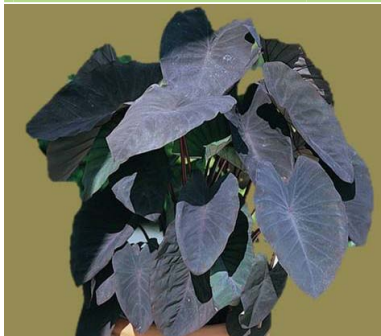

The Chamaedorea seifrizii, also known as the "Bamboo Palm" or "Reed Palm", is a relatively small, graceful palm growing to an average of 7 feet. Each stem is long and slender with "nodes" similar in appearance to bamboo. Commonly used as an indoor potted palm for its exotic look and anti-pollutant abilities. According to NASA's Clean Air Study, it removes formaldehyde, xylene, and toluene from the air. Plugs are sown to give 6-8 plants per cell.

Dracaena — Epipremnum — Farfugium — Fatsia

Dracaena NEW **Foliage** *massengeana* ☐☐
Burley **1414**

A very good Dracaena for draughty spots and cold areas. A particularly wide plant, it will give a great impact in wider spaces. The name is fitting to the habit.

Dracaena NEW **Foliage** *deremensis* ☐☐
Lemon Lime **1437**

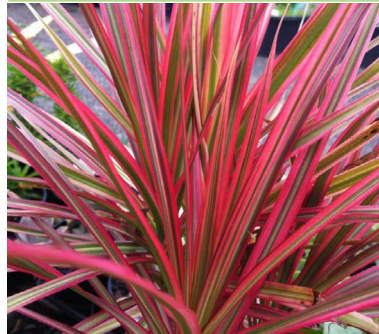

The tri-colored foliage of 'Lemon Lime' corn plant is bright lime green with thin central stripes of cream and dark green. It is slower growing and shorter than non-variegated corn plants but still performs well in low light. Admired for its toughness and easy culture, corn plant is commonly grown as both a houseplant or tropical landscape plant.

Dracaena NEW **Foliage** *massengeana* ☐☐
Marley **2842**

Marley has a pronounced and wide, yellow central stripe while the leaf is narrower than Burley. The finished plant in the pot is smaller in stature than Burley.

Dracaena NEW **Foliage** *marginata* ☐☐
Tricolour Colourama **7316**

Dracaena marginata is the classic houseplant for most locations. Very cold sensitive, dragon tree is grown in the landscape in only the warmest regions. The leaves are long, linear, narrow, attached to the stem without a stalk. The cultivar 'Colorama' has green leaves with red-pink stripes on the margins, midrib and either side of the midrib.

Dracaena NEW **Foliage** *deremensis* ☐☐
Warneckii **1412**

Dracaena deremensis "Warneckii" is a green dracaena cultivar with white stripes along the edges of its leaves. It is a shorter dracaena that matures to a height of only 4 feet tall. While its low light requirements make it easy to grow indoors, it can also be grown in shady sites outdoors.

Epipremnum NEW **Foliage** *pinnatum* ☐☐
Pinnatum **3105**

Fits into the climbing category and is similar to climbing philodendrons. The leaf starts as a whole then begins to split as the plant ages. Can look good as a small pot but comes into its own as a bigger pot when the plant starts to really climb and the leaf is split.

Farfugium NEW **Foliage** *japonicum gigantea* ☐☐
Leopard Plant **2913**

This is a great evergreen perennial for the shade garden. Although somewhat slow to grow into a sizable clump this is very easy to grow. This plant has been formerly known as Ligularia tussilaginea and Ligularia kaempferi. It is primarily grown for its handsome glossy, round leaves, but there is a rather significant yellow stalked flower that appears in the fall.

Fatsia **Foliage** *japonica* ☐☐
Japonica **6463**

Fatsia plants are a type of evergreen plant that can be grown both indoors as a houseplant and outdoors in frost-free areas. A Fatsia Plant has shiny, leathery, medium green palmate (hand-shaped) leaves that grow at the ends of stiff stems. Fatsia Plants are compact upright plants that can grow up to 6ft. Tall even indoors. Prune a Fatsia Plant aggressively to help keep the growth under control and the shape attractive.

Large, tropical looking leaves emerge frosted in white patterns like silver webbing that fades to a more subdued green as they age. This unusual type of variegation changes from leaf to leaf and with the seasons giving each leaf a unique appearance.

Norwood Label Code:
51-4492

Fatsia **Foliage**
fatsia
Spiders Web 6928

A beautiful shaped form of Asplenium nidus especially bred for its compact symmetrical form and wide leaves. Suitable for 140mm - 200mm pots.

Fern **Foliage**
asplenium
Nidus Avis 6567

As the plants mature, the ends of the fronds become branched or crested forming a very unique look. 'Crissy' has a more open look and larger structure.

Fern **Foliage**
asplenium
Crissy 6599

As the plants mature, the ends of the fronds become branched or crested forming a very unique look. 'Leslie' is more compact and upright in its growth habit.

Rabbit Foot 6452

Delicate flat fronds with white rabbit - paw shaped creeping rhizomes. Good basket fern, free form loosely shaped. Small - medium.

Fern **Foliage**
humata
White Rabbit Foot 6476

Fern

Fern	Foliage	The name says it all: the tough, leathery fronds of this recently launched cultivar look very similar to crocodile hide. Its size also makes 'Crocodyllus®' a stunning plant: in the large pot sizes leaves of up to 3 feet (100cm) in length are no exception. Like the kangaroo fern this product is also perfect for project planting. The plant is also grown for cutting its striking leaves.
<i>microsorium musifolium crocody</i>	■	
Crocodyllus	6483	

Fern	Foliage	An attractive, cool-climate fern distinguished by its firm fronds, which grow to various lengths. Height at maturity is about 60cm with a spread of 1m. It's sometimes grown as ground cover. Because of its unusual growth habit and oddly shaped leaves, this shade and moisture-loving plant has earned the moniker of kangaroo paw fern.
<i>microsorium diversifolium</i>	■	
Kangaroo Fern	6486	

Fern	Foliage	True Boston type. Classic proportions. Bright green. Medium size.
<i>nephrolepis</i>	■	
Blue Bell	6490	

Fern	NEW	Foliage	Nephrolepis exaltata is a very finely divided variety of "Boston Fern". The segments are so fine it looks like cotton candy. It is sometimes called "Cotton Candy" fern. It is so soft and fluffy you can't help touching it. Don't let water collect between the fronds as this will cause rotting. This fern likes a little extra humidity. It will grow well in a terrarium, or cool garden room.
<i>nephrolepis</i>	■		
Cotton Candy	2253		

Fern	Foliage	'Glossy fronds with leaf cresting' is a superior and vigorous selection of <i>Microsorium punctatum</i> which originated in Europe. The fronds are broad, succulent, glossy and have abundant leaf cresting. With the added upright growth habit, this fern is a true retail "eye catcher". Growers benefit too from excellent bench space utilization. Market for both indoor & patio beautification.	
<i>microsorium punctatum green fl</i>	■		
Green Flame	6484		

Fern	Foliage	A dream come true: fast growing, tough, dark green, no leaf loss and a typical Boston growth habit (horizontal fronds), extremely strong and suitable for a wide range of pot sizes. It seems that we have finally come up with the ultimate Boston!
<i>nephrolepis</i>	■	
Ariane	6489	

Fern	Foliage	Boston Fern is distinguished by its vigorous growth. It will fill up the pot quickly and keeps doing this even after older leaves start drooping. For many decades this fern, better known as True Boston has been the number 1 fern for the US. Fronds do grow a little more hanging than most, for some basket growers this could make the difference to choose True Boston.
<i>nephrolepis</i>	■	
Boston Fern	6491	

Fern	Foliage	'Duffii' is a densely covered, compact fern with unique looks. It takes its ornamental value from the straight, sometimes forked, erect leaf stalks, which are covered with tiny, knot-like leaflets 1 to 2 cm in length. One of the great advantages of 'Duffii' is its tolerance of warm, dry environments.
<i>nephrolepis</i>	■	
Duffii	7017	

A compact cultivar with sturdy, erect leaf stalks that reach a length of up to 30 cm (12 inch) and stand close together. The leaflets are an intense dark green and have an almost leathery texture. Despite this the leaflets are soft to the touch. 'Fluffy Ruffles' grows more rapidly than 'Corditas' and is somewhat hardier although not fully hardy. The plant will thrive outdoors from late spring to early autumn.

Fern	Foliage
<i>nephrolepis</i>	■
Fluffy Ruffles	6492

This fern has an open habit of growth similar to western king but improved characteristics. It has broad leathery leaflets and is used both as a house plant and for landscaping gardening. It is extremely strong variety. Large coarse fern.

Fern	Foliage
<i>nephrolepis</i>	■
Macho	6494

Named after the shape of its growth habit looking like a cheerleaders' Pom pom.

Fern	Foliage
<i>nephrolepis</i>	■
Pom Pom	6591

A tropical fern with beautiful deep bluish green fronds. This blue fern fills out a pot giving it a spectacular display. It can cope with drier air and is suitable for a pot or basket. Can be used as cut foliage.

Fern	Foliage
<i>phlebodium</i>	■
Blue Star	6529

Well known for pots or baskets. Very tough.

Fern	Foliage
<i>nephrolepis</i>	■
Kimberley Queen	6493

Murano has sturdy upright fronds with a typical wavy frond. It has a more open growing habit. When the fronds reach a length of 3 feet (1 m) or more, they start to hang down, making this fern suitable for use in hanging baskets.

Fern	Foliage
<i>nephrolepis</i>	■
Murano	7018

Boston Teddy Junior most famous of the nephrolepis ferns, classic proportions, conspicuous wavy margins. Attractive and strong, full shape. Bright green Med-large.

Fern	Foliage
<i>nephrolepis</i>	■
Teddy Junior	6496

A form of elkhorn with silvery coloured fronds.

Fern	Foliage
<i>platycerium</i>	■
Netherlands	6534

Fern — Ficinia — Ficus

Fern **NEW** **Foliage** This large polypody is evergreen and has long, broad, pinnatifid fronds (up to 40cm). It will make quite a dramatic clump in time and grows well on well drained soils. Easy to grow, good ground cover and ultra hardy. Drought tolerant once established. Very little maintenance required. Unusually harsh winters can cause damage to older fronds and these are simply removed with secateurs.

polypodium

Whiteley Giant 7237

Fern **Foliage** Flat, glossy pinnate leaves, leathery in texture. Suitable for hanging baskets, landscape and as cut foliage. Suits 200mm hanging baskets. Leather leaf ferns are also useful in landscape as a ground cover, tolerate both shade and dapple shade.

rumohra adiantiformis

Leather Leaf 6535

Ficus **Foliage** Ficus elastica 'Abidjan' is grown primarily for its large, thick, glossy green leaves which when grown in bright light have a dark burgundy color.

elastica

Abidjan 6464

Ficus **Foliage** From TC. Large burgundy coloured leaves growing from a branching clump. Great tub plant. Best 200mm- 300mm pots.

elastica

Burgundy 6465

Fern **NEW** **Foliage** Dainty fern with feathery, variegated fronds. Requires warm, humid air for best growth. Provides graceful texture to a mixed planting. Can easily be grown indoors if soil is consistently moist. Protect from wind. Prefers slightly alkaline (sweet) soil.

pteris ensiformis

Evergemiensis 7251

Ficinia **Landscape** Knobby club-rush is an evergreen sedge of 0.7m height spreading to 0.5m.

nodosa

Ficinia 1420

Ficus **NEW** **Foliage** Alii is a great choice for areas in your home where the light levels are lower, as it will not shed its leaves in lower light, or when it is moved around. It is drought tolerant and only needs watering when 50% of the soil has become dry.

elastica

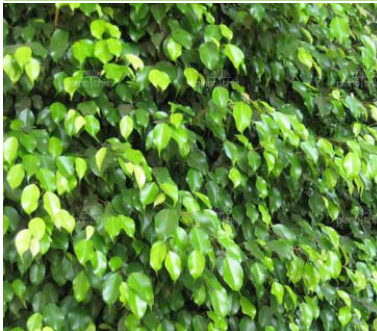

Binnendijkii Alii 3982

Ficus **NEW** **Foliage** The standard benjamina type commonly known as Baby Ben.

benjamina

Evergreen 6418

Bambino is well suited for growing in pots as an attractive foliage plant. The leaves are uniformly green with light venation and lack variegation. The leaves also are smaller and thicker than those commonly exhibited by Ficus lyrata. Additionally, the petioles are extremely short when compared to Ficus lyrata.

Ficus **Foliage**
lyrata
Lyrata "Bambino" 6466

The fiddle-leaf fig. Great as a large pot plant for foyers in well lit positions and outdoor areas in warm climate. Suits 250mm - 300mm pots.

Ficus **Foliage**
lyrata
Lyrata 6467

An attractive slower growing Ficus that should find a place amongst any Ficus growers' assortment.

Ficus **Foliage**
elastica
Marble 3615

Ficus Melanie leaves are oblong, elliptical downward slightly bent pointed tip, much smaller in size than robusta. Melanie is also more compact and exhibits lighter green leaves that are a lovely garnet red upon opening. Melanie has a strong decorative glossy shine on the upper surface.

Ficus **Foliage**
exotica
Melanie 1953

Natasja is a dwarf green leaf benjamina type. Ficus benjamina 'Natasja' grows upright, well-branched and can reach an average height of 60 - 80 cm and a spread of 30 - 40 cm

Ficus **Foliage**
benjamina
Natasja 6418

The Rock fig is a very unique tree. First, it is known for its green velvety leaves with purplish pink veins that are very soft to the touch. Ideal use is as a house plant and bonsai.

Ficus **NEW Foliage**
petiolaris
Petiolaris 3626

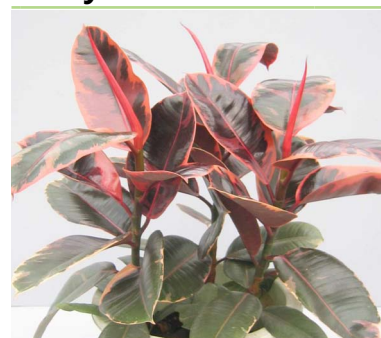

Ficus elastica is a robust plant and has long been used as a reliable decorative houseplant. Large, fleshy leaves with a high glossy finish are carried on a stout trunk. Is useful as a houseplant because ficus elastica cleans the air, and purifies by removing chemicals, such as formaldehyde or other toxins.

Ficus **Foliage**
elastica
Rubusta 6691

A stunning plant with red/ pink, cream and green leaves. Suitable for pots and tubs, 140mm - 300mm.

Ficus **Foliage**
elastica
Ruby 6468

Ficus — Fittonia

Ficus
elastica
Tineke **6469**

Foliage This is a relatively new selection of the rubber tree that sports interesting green and white variegated leaves with overtones of burgundy. The new born leaves appear more burgundy and eventually turns to yellow and green variegated. The quantity and intensity of yellow and green makings diminish as the leaves get old.

Fittonia
verschaffeltii
Flaming Fire **6793**

Foliage Flaming Fire features by its deep green leaves and crimson venation. Leaves are slightly lanceolate with wavy margins.

Hakonechloa - Hedera - Homalomena - Hoya - Juncus - Kangaroo Paw - Liriope

Selected as the 2009 Perennial Plant of the Year. One of the most gorgeous of ornamental grasses, also one of the few that prefers shady sites. This forms a low mound of arching stems, with cascading layers of narrow leaves striped with bright yellow and green. The graceful effect is similar to a dwarf bamboo but without any invasive tendencies. Clumps are slow to grow, but eventually makes a spectacular border edging.

Hakonechloa **NEW Foliage**
macra
Aureola **7236**

The heart shaped leaves are rich, midnight green and have a natural shine as if waxed. Exhibiting a compact growth habit that produces a full and symmetrical appearance, 'Emerald Gem' is easy to grow and pest free. Best when grown in 6 to 10 inch containers.

Homalomena **Foliage**
homalomena
Emerald Gem **5695**

A densely tufted rush with stems 1-2mm diameter and up to 1m tall. Common in heathland and scrub in damp places.

Juncus **Landscape**
usitatus
Juncus **5291**

Upright evergreen perennial plant with 2-3 feet tall sword-like foliage and 4-5 feet tall wands of yellow flowers with reddish stems in spring-fall. Plant in a sunny and open position in the garden in well drained soils.

Kangaroo Paws **Landscape**
anigozanthos **NEW**
Yellow Gem **1340**

English ivy is a self-clinging climber or trailing perennial with almost flat, palmately 5-lobed leaves. Cultivars are available with varying leaf form, color, and variegation, as well as use and climbing habit. Variegated cultivars prefer more light, and darker green varieties tolerate shade.

Hedera **NEW Foliage**
helix
Hedera Helix **7327**

Available 2019.

Hoya carnosa, commonly called wax plant or honey plant, is a climbing or trailing perennial. It is typically grown as a houseplant. Plants feature glossy, elliptic, fleshy, dark green leaves and tight rounded clusters (umbels) of fragrant flowers.

Hoya **Foliage**
carnosa
Pink **5813**

An evergreen perennial with fuzzy rich red flowers that look like claws that rise high above the iris-like foliage from spring through autumn. Grows up to 2m tall and 1m wide. Plant in a sunny and open position in the garden in well-drained soils.

Kangaroo Paws **Landscape**
anigozanthos
Big Red **2078**

Deeper green, with just a hint of blue to it if fed properly compared to Evergreen giant. Extremely dense when mature, and forms a nice, tight evergreen grasslike clump. Throughout the summer months, Big Blue will put forth a display of numerous blue colored flower spikes, each one followed by a generous collection of bluish/black colored berries in the fall season. Height to 60cm with flower stems.

Liriope **Landscape**
muscari
Big Blue **6477**

Liriope — Lomandra

Liriope **Landscape** A tufted perennial with grass-like leaves, growing to 60cm tall. Purple flowers are carried in dense spikes. This plant prefers a somewhat shady spot in the garden.

muscaria

Evergreen Giant **6478**

Liriope **NEW Landscape** This grass-like clump grower at 12-15" tall, with 3/8" wide leaf blades produces deep purple flowers in late summer followed by black berries in the fall. With a moderate to fast growth rate, 'Royal Purple' will fill in quickly and require little maintenance. Fertilize and cut back old foliage in early spring. Liriope is tough plant that holds up to summer heat and humidity.

muscaria

Royal Purple **7101**

Liriope **Landscape** 'Variegata' features medium green leaves which are variegated with creamy yellow margins.

muscaria

Variegata **7016**

Lomandra **Landscape** Best suited to controlled garden situations where they can be maintained and weeds removed. Used in mass plantings, they are more susceptible to being overtaken by weeds.

confertifolia

Little Con **6480**

Liriope **Landscape** An attractive variant with very pale almost white younger leaf blades that mature to darker shades.

muscaria

Green & White **6479**

Liriope **NEW Landscape** 'Samantha' is a vigorous, early-flowering selection with pretty pink flowers. Its dark green leaves are long and narrow and grow in lax, fountain-like, fast-spreading clumps. In mid-summer, a mature plant may produce a dozen or more spiky flower stalks densely clothed with small pink flowers. These are followed by small, round, black fruits that are attractive to birds.

muscaria

Samantha **7102**

Lomandra **Landscape** Lomandra hystrix types can better handle wet soils and humidity. They can also tolerate dry conditions but will perform better with some summer watering when it is dry.

hystrix

Hystrix **5818**

Lomandra **Landscape** Lomandra longifolia is a very dry tolerant plant and will also tolerate cold and frost well. It can be quite variable and will naturally occur in sandy soils or free draining heavier soils.

longifolia

Longifolia **5819**

Maranta — Monstera — Murraya — Nandina — Peperomia

A stunning low growing species with dramatically coloured leaves. A great ground cover plant for the shade and always looks great and grows quite flat to the ground. Ideal for low maintenance gardens

Maranta **Foliage**
amabilis
"Burle Marx" 6482

Maranta leuconeura is a small tropical plant with broad oval leaves, up to 20cm long by half as wide. The leaves fold upwards at night, hence the common name. Maranta leuconeura need full shade and warm temperatures. Water regularly; do not overwater.

Maranta **Foliage**
leuconeura
Erythroneura 6481

Fascinating plant mounding to 15-20cm high. Marks like rabbit tracks turn from red-brown to dark green on grey-green leaves. Prefers diffused sunlight or shade; humid air.

Maranta **Foliage**
leuconeura
Kerchoveana 6837

Monstera deliciosa Tauerii was originally found in rainforests in the middle- and south America. You've got different types of Monstera, but the deliciosa Tauerii is most popular. This special selection develops the holes in the leaves earlier and has less tendency to "sag". Monstera only available supply Nov-Jan.

Monstera **Foliage**
deliciosa
Tauerii 4624

Murraya, commonly called Jasmine, current spelling is Jessamine, is a tropical, evergreen plant bearing small, white, scented flowers, which is grown as an ornamental tree or hedge. Garden height 2 metre+

Murraya **Landscape**
exotica
Exotica 5820

Firepower is a low-growing shrub, reaching 60cm tall. It works well as a ground cover or as a border plant. "Firepower" has bushy foliage that changes color with the seasons. Its leaves are lime green during warmer months, turning brilliant red or burgundy as the weather becomes cooler.

Nandina **Landscape**
domestica
Firepower 6487

Gulfstream is a vigorous variety of dwarf compact Nandina. Foliage is slightly flatter and delicate looking than many other compact versions, and winter color is a very good red color. The winter colors intensity will vary from an intense red color, to a mixture of reds, greens, yellows, and oranges. Summer foliage is a dark metallic blue-green color, and extremely dense.

Nandina **Landscape**
domestica
Gulf Stream 6488

Peperomia obtusifolia 'Albo' has a spreading, rather scrambling growth habit and in cultivation it is usually seen as a lovely house plant because of its fleshy smooth textures, emerald green leaves.

Peperomia **Foliage**
obtusifolia
Albo-marginata 6500

Note: This product is PBR'd

Peperomia — Philodendron

Peperomia **NEW** **Foliage** Emerald has a similar habit to Jade or Red Edge with darker green glossy leaves.

clusiifolia  

Emerald **3614**

Peperomia **Foliage** Peperomia Jade has large round, shiny green leaves within which there is a slight concave shape forming a small 'bull's eye' at the junction of the petiole and leaf blade. Jade produces thin, white flower spikes for several months each year.

obtusifolia  

Jade **6501**

Peperomia **NEW** **Foliage** Peperomia caperata 'Lilian', from South America, is an original ornamental plant. A dark green, waffled, fleshy foliage, and numerous stick-shaped inflorescences that sport white flowers are its main features. It is sometimes called "white sticks plant". Each specimen can reach 25 cm.

caperata  

Lilian **3620**

Peperomia **Foliage** Peperomia Red Edge is similar in growth habit and leaf shape to Jade except the plants are slightly larger and the leaves more elongated. The dark green, oval-shaped leaves have a dark red margin.

clusiifolia  

Red Edge **4156**

Philodendron **Foliage** A hybrid, low growing, clumping tender perennial shrub, this philodendron is "self heading", meaning it does not climb or sprawl like a vine. The leaves are broadly oval or truly lance-shaped, emerging light orange or bronze. They slowly mature to a deeper, truly dark green with inclination to nearly black.

selloum  

Black Cardinal **6518**

Philodendron **NEW** **Foliage** Philodendron Brasil is a hybrid that looks a bit like a cross between heart-leaf philodendron and pothos. Its leaves have a variable broad central band of chartreuse.

cordatum  

Brazil **6698**

Available Nov 2018.

Philodendron **Foliage** Chinese Congo has similar traits to the original Congo but has shorter petioles. Grows to 1m. Is a good alternative for when Congo is in short supply.

tatei  

Chinese Congo **2629**

Philodendron **Foliage** A very long life variety which has a free branching habit and large glossy dark green leaves. Indoor in bright light or shade positions or protected outdoor positions, filtered light. Suits 150mm to 350mm pots. Height to 1.5m

tatei  

Congo **6765**

Norwood Label Code: 51-3677

Philodendron

Philodendron Cordatum has heart-shaped, green leaves that are typically about 5-8cm across although they will grow much larger outdoors. A trailing or a climbing plant, Philodendron Cordatum is the Philodendron variety most often used as an interior houseplant.

Philodendron **NEW Foliage**
cordatum
Cordatum 7221

Lime is an eye catching Philodendron **NEW Foliage** neon lime cultivar for climbing or trailing applications.

cordatum
Cordatum Lime 6576

Available 2019.

A Philodendron with compound, green leaves arranged in an open, circular form.

Philodendron **Foliage**
goeldii
Goeldii 4158

This plant sported from Xanadu several years ago. It has been trialed in our nursery since 2015 and has proven to be quite vigorous and clumps well with a similar habit to Xanadu. The leaf texture is somewhat softer with less serration on the margins. The perfect position for this plant is indoors and full shade in the garden. It grows to a metre in 2.5 to 3 years from potting.

Philodendron **NEW Foliage**
selloum
Heather May 6899

Excellent landscaping plant for semi shaded situations or as a tub plant for patios and verandahs. Suits 200mm - 300mm pots.

Philodendron **Foliage**
selloum
Hope 6520

Indoor pot plant. Green leaves. Needs no support. Grows slightly slower than the red. Needs abundant indirect light.

Philodendron **Foliage**
selloum
Imperial Green 6523

Indoor pot plant with reddish cast to leaves. No need for support. Slow growth. Reaches up to 40+cm. needs abundant indirect light.

Philodendron **Foliage**
selloum
Imperial Red 6524

Voted Favorite New Foliage Plant at TPIE 2015 'Lickety-Split' has highly fingered foliage that develops it's mature split-leaf characteristics earlier than most varieties. Lickety-Split is a vigorous, self-heading variety. Ideal for 15 to 20cm or larger pot sizes.

Philodendron **Foliage**
selloum
Lickety Split 6809

Philodendron

Philodendron
bipennifolium

Lynette **6521**

Foliage Self-heading types form short, broad plants with leaves radiating out from a central point. P. 'Lynette' grows to 30cm high and 60cm wide, with 30cm long, bright green leaves that are strongly patterned by deeply sunken veins; good tabletop plant.

Philodendron
selloum

McColley's Finale **6697**

Foliage This hybrid from Mr. McColley has the same characteristics as 'Moonlight', but has a beautiful cinnamon colour new leaf that fades to green as it matures.

Norwood Label Code:
51-4870

Philodendron
selloum

Moonlight **6522**

Foliage Low growing, clumping perennial, this philodendron is "self heading", meaning it does not climb or sprawl like a vine. Leaves are broadly oval or truly lance-shaped, emerging light yellow or bright chartreuse. They slowly mature to a deeper yellow-green, oldest leaves on the lowest part of the plant are a duller mid-green.

Philodendron **NEW** **Foliage**
erubescens

Pink Princess **2912**

The black to deep burgundy, glossy, heart-shaped tropical foliage is splashed and flecked with white and pink. An easily grown indoor or tropical plant that is sure to make a statement. This is a slow growing vine-like philodendron which can be trained to a support or allowed to trail.

Philodendron
tatei

Rojo Congo **6525**

Foliage Its leaves appear from a root clump on long, dark red, firm but fleshy stems. The leaf blade is long and lanceshaped, first red when young and deepening to reddish dark green. The leaf petiole stems remain red to dark red.

Norwood Label Code:
51-3676

Philodendron
selloum

Selloum Roystonii **6526**

For a shaded situation this evergreen adds variety to the garden with its spreading lush-green leaves. Also an ideal indoor or patio plant planted in a large tub or wine barrel. Compact form of selloum.

Philodendron **NEW** **Foliage**
hastatum

Silver Sword **6083**

Foliage Philodendron "Silver Sword" is an easy house-plant that has a silvery or pale pastel look to its leaves. It grows with a philodendron's usual vining habit. It is a philodendron hybrid. Silver Sword is an interesting addition to a philodendron collection. Leaves take on the long angular shape as they age, turning from a silvery grey tone to a greenish grey colour.

Philodendron
bipennifolium

Super Atom **6527**

Foliage A super dwarf selection of Philodendron in the P. selloum clan. It has a tight shrubby habit, the leaves are slightly curled. Grows no more than 8cm around, it's quite slow. Best in bright shade, frost free. This makes a great house plant, or mass planting ground cover in the shade. It forms a bushy clump.

Philodendron — Phormium — Pogonatherum — Pothos

Xanadu grows very compact, in the shape of a mushroom cap. The deeply divided, usually drooping, dark grey-green leaves grow up to 40cm long and 20-30cm wide, appearing on long, smooth petioles. Each leaf can be divided into 15 to 20 lobes.

Norwood Label Code:
31-0323

Philodendron **Foliage**
bipennifolium
Xanadu 6528

Black Beauty has stunning slender black sword shaped leaves that arch forming a mound appearance. A superb architectural plant. It grows to 1m adding form and structure to the landscape. Suited to an exposed position and is drought resistant.

Phormium **Landscape**
cookianum
Black Beauty 7008

Standing at only 60cm tall, 'Bronze Baby' is perfect for containers or the front of the border. It is grown for its attractive bronze leaves which arch over at the tips. In frost-prone areas, put on a deep, dry mulch in winter.

Phormium **Landscape**
cookianum
Bronze Baby 3984

Phormium 'Evening Glow' is one of the recent, compact and highly coloured cultivars of New Zealand Flax. It has a graceful, arching, widely-spreading habit and incredible multi-coloured leaves, bright pink-red in the centre, bronze-green on the margins and streaked with brown, red and copper.

Phormium **Landscape**
cookianum
Evening Glow 6530

Pothos **Foliage**
epipremnum aureum
Golden 2970

'Marble Queen' has creamy white foliage, flecked or mottled with green. Marble Queen requires more light than other Pothos or it may revert back to all green.

Pothos **Foliage**
epipremnum aureum
Marble Queen 6805

'Neon' has solid coloured, bright yellow-green leaves that darken with age.

Pothos **Foliage**
epipremnum aureum
Neon 6806

Pothos — Radermachera — Rhaps — Schefflera

Pothos **Foliage** Pothos 'Pearls and Jade' is an induced mutation from Pothos 'Marble Queen'.

epipremnum aureum

Pearls and Jade **6807**

'Pearls and Jade' is a small, compact plant compared to other Pothos cultivars. Mature leaves reach an average of 3-5cm wide by 3-5cm long. Variegation in each leaf varies slightly, but the overall effect is pleasing, uniform variegated appearance.

Pothos **Foliage** A slow-growing evergreen twiner to 1m or more, with dark green ovate leaves

scindapsus pictus

Satin **6981**

to 10cm in length, spotted with silver on upper surface.

Radermachera **Foliage** Radermachera Sinica is an evergreen tree in the family Bignoniaceae, native to the subtropical mountain regions of southern China and Taiwan. It can reach heights of up to 30m tall and a trunk diameter of 1 meter.

sinica

China Doll **2790**

Rhapis **NEW** **Foliage** Rhapis excelsa is unlikely to grow indoors more than 1.2m tall. It grows in multi-stemmed clumps with glossy, palmate leaves.

excelsa

Rhapis Excelsa **7234**

The thin stems of Rhapis excelsa can reach 25cm in height and up to 2cm thick forming clusters of foliage. Plugs sown to give 3-4 plants per cell.

Schefflera **Foliage** 'Alpine Jr.' has a columnar shape with tight internodes and short petioles requiring less horizontal space, it's more economical to grow and adaptable to more interiorscape uses. Derived from Amate, it maintains all the best characteristics such as mite and disease resistance, deep green glossy leaves and excellent foliage retention under lower light. Recommended: 15-25cm pots.

actinophylla

Alpine Jr. **3622**

Schefflera **Foliage** Amate has good tolerance to Alternaria leaf spot and spider mites. Interior landscapers have found that Amate's bold, tough and naturally glossy leaves hold tightly even under low light interior environments. A properly grown Amate always has a uniform appearance with a natural, high gloss and deep green color.

actinophylla amate

Amate **6536**

Schefflera **Foliage** Schefflera arboricola is also known as the dwarf umbrella tree. It is one of the most popular types of bonsai trees for use as indoor bonsai. They're easy to grow and difficult to kill!

arboricola

Arboricola **5762**

Schefflera **Foliage** Fast-growing, evergreen tropical shrub or tree. Height 3-6m. Shade or indirect light. Hardy to about 0°C. Regular watering. Good patio and indoor plant or use near swimming pools, in containers.

Tupidanthus calyptratus

Tupidanthus **6537**

Spathiphyllum

7th Heaven combines tough, dark-green foliage with beautiful, clean white flowers and outstanding performance. Aesthetically beautiful and it improves indoor air quality. Height to 50cm. Suits 150mm - 200mm pots.

Yucca **Landscape** 'Color Guard' bears bright
filamentosa   creamy-yellow leaves with
Colour Guard **6555** green edges. During the
cooler months of fall and
winter, the light leaf centers
take on rose overtones. From
early to midsummer, spectacular
sturdy flower stalks rise 1 metre
tall from the center of the plant.

Yucca **Landscape** Adam's Needle is a terrific
filamentosa   plant for problem sunny
Bright Edge **7315** areas with dry soil. This
selection forms a large
evergreen rosette of leathery
sword-shaped leaves, grass-green
in the center with bright gold
edging. When mature, the
rosettes produce a very tall
spike loaded with large, fragrant
creamy-white flowers in late
summer. An excellent specimen
plant for difficult sites.

Yucca **Landscape** From New Zealand and
filamentosa   even brighter, the narrow
Garland Gold **7314** shafts of this 0.5-1m spiky
clumper have a wide center
of creamy-gold... very eye-
catching.

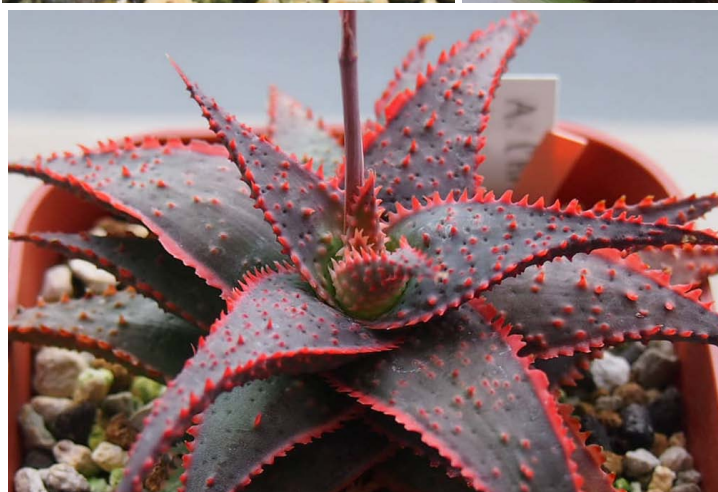

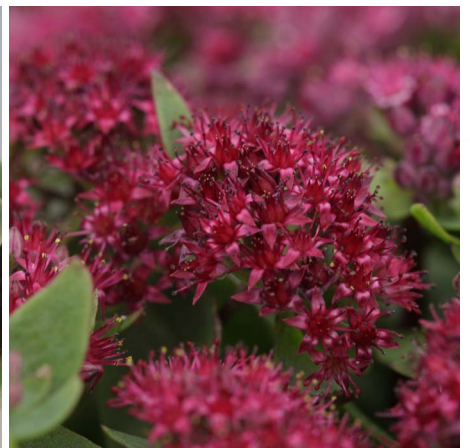

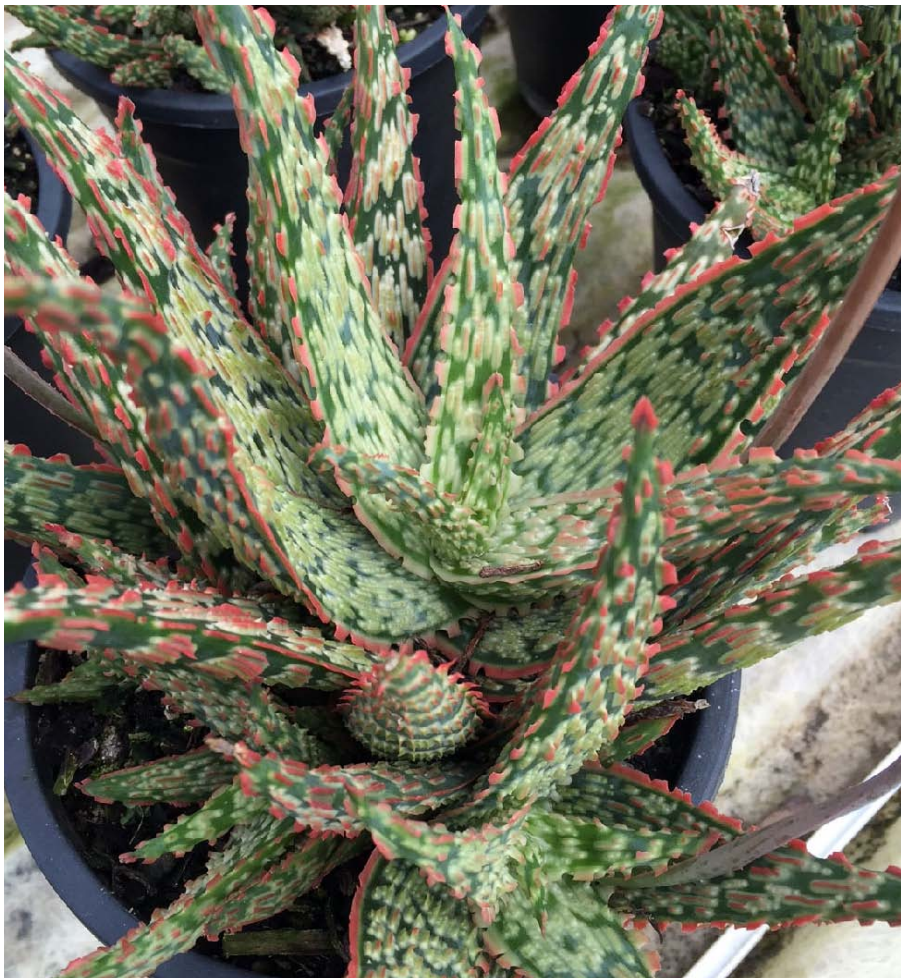

Yucca **Landscape** Yucca 'Silver Star' is a var-
elephantipes   iegated form with a silver
Silver Star **6556** streak down the leaf.

Zantedeschia **Foliage** Compact habit with large
aethiopica   broad white flowers. Best
Santa **4959** in 15cm pot.

Aloe

Aloe	Foliage	South Africa. 'Lace Aloe'.
<i>arista</i>	<input type="checkbox"/>	A beautiful species with dense rosettes to 30cm wide of dark green leaves marked by small white tuberculate bumps and the leaf margins are armed by soft white teeth. The underside of the leaves bear white stripes. Orange-red bells in summer.

Surplus Plants

Highsun predominantly grows plugs to contract order but often have surplus stock available. The Excess Stock List is published on a Thursday for delivery of plants the following week, while the Inventory List is published on a Monday and forecasts surplus plants potentially available for despatch in 2-3 weeks time.

Please note that all excess stock is allocated on a first in, first served basis so please order early to avoid disappointment.

You can receive the Inventory and/or Excess Stock Lists by weekly email or fax. Please access the lists directly from our website www.highsun.com.au or contact Customer Service to be placed on an automated list.

Orders

Order Early!
Place your requested product Quantity and requested delivery Month as Early as possible.

Lead Times
Long lead times are required from the Tissue Culture Labs.

At All Times
Product is subject to availability from the supplier; therefore not all products will be available at all times.

Pricing
For pricing and tray sizes refer to Indoor Foliage & Landscape price list.

Delivery
At most times delivery will be in cartons or carts are available for larger orders.

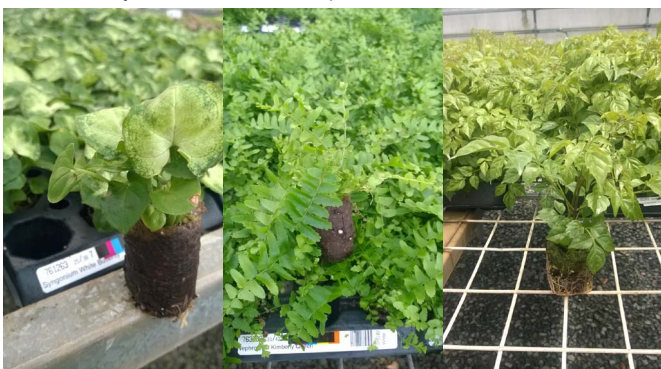

Refer to Terms and Conditions of Sales for Highsun Express.

PaperTec Trays

Many of our Foliage lines are grown in PaperTec propagation trays.

Tray sizes - 72, 102, 128 & 209 tray cells

- 72 Cell Tray = 2 x 36 Strip -PaperTec 30mm
- 102 Cell Tray = 2 x 51 Strip -PaperTec 25mm
- 128 Cell Tray -PaperTec 25mm
- 209 Cell Tray -PaperTec 20mm

Highsun Express Claim Procedures - Plugs, Seeds and PropTec

Highsun is committed to maintaining the highest level of customer service and product quality. If you have an issue with our products, we want to know about it as soon as possible so that we can work to resolve the issues both internally and with our vendors and distribution channels.

Please determine the type of claim/claims you would like to make and follow instructions below:

Delivery: A delivery claim may include late or non-delivery of product, visible damage to a shipping container, material damaged by temperature, missing items, trays or cartons, unordered material included in a shipment or any other delivery issues

- Contact Highsun within 24 hours of receipt
- Include:
 - Photos clearly identifying the issue
 - Batch and item number of the goods
 - Con-note number and/or delivery time
 - Order or Invoice number

Invoice: An invoice claim may include incorrect pricing, incorrect freight charge, incorrect miscellaneous charge or other price or invoice issue.

- Contact Highsun within 48 hours of receipt of invoice

Plugs Quality and Growing Claims

Quality: A quality claim may include suspected disease issue, suspected fertility issue, poor root development, incorrect plant size or tray size, pest issue or any additional quality issues

- Contact Highsun within 48 hours of receipt
- Include:
 - Photos clearly identifying the issue
 - Batch and item number of the goods
 - Con-note number and/or delivery time
 - Order or Invoice number

Growing: A growing complaint may include plants not performing to type, incorrect or deformed flowering or other growing issue which appears after the initial receipt of the goods.

- Contact Highsun as soon as the problem becomes apparent
- We will request that photos are provided to help diagnose the problem as best as possible
- Issues to be discussed at the time of lodging the complaint:
 - Conditions of the growing area
 - Environment of the growing area
 - Water quality and media quality
- We may require further plant or media testing to help determine the growing problem at hand

Seeds Quality Claims

Quality: A quality claim may include poor germination or vigour, incorrect plant type to the variety ordered, or other quality issue

- Contact Highsun as soon as the problem becomes apparent. Time limits may apply:
 - Vigour and Germ: Up to 3 months from the delivery date
- We may request that photos and samples from the product in question are provided to help diagnose the problem as best as possible
- Issues to be discussed at the time of lodging the complaint:
 - Conditions of the seed storage
 - Some particulars on growing conditions

Proptec Quality Claims

Quality: A quality claim may include suspected disease issue, suspected fertility issue, poor expansion of coir, or any additional quality issues

- Contact Highsun as soon as the problem becomes apparent. Time limits may apply:
 - Jiffy disc expansion: Up to 6 months from delivery date
 - Papertec Fertiliser and Media quality: Up to 2 months from delivery date
- We may request that photos and samples from the product in question are provided to help diagnose the problem as best as possible
- Issues to be discussed at the time of lodging the complaint:
 - Conditions of the storage area

Please ensure that you send all requested photos to info@highsun.com.au and quote your claim number where applicable so we can match the photos to your complaint.

For further assistance contact us on 1300 137 584 or alternatively info@highsun.com.au

Tray Types

Tray sizes are categorised by the number of cells per tray and range from large 30mm plugs in 72 trays, medium 25mm plugs in 102 and 128 trays, through to smaller 20mm plugs in 209 trays.

See the Highsun Express price list for detail on tray sizes and prices by product.

102 Cell Plug Trays

128 Cell Plug Trays

209 Cell Plug Trays

Highsun Express Plugs, Seed, Tissue Culture - Terms and Conditions of Sale

Ordering

Place all orders in writing. Where possible order by email info@highsun.com.au or free fax 1800 644 015, stating product tray size, quantity and date required. A four week lead time from placement of order to seeding is required to ensure timely scheduling and planting of your order. For tissue culture products, a four to eight month lead time is required from the tissue culture laboratories. You may change your order (in writing) up to the time of seed and and tissue culture purchase.

Minimum Seed Order Quantity

The sum of the individual items must be equal to or greater than \$50 nett. Individual varieties are offered as a minimum nett \$20. Where the quantity ordered does not meet the minimum required, Highsun Express reserves the right to supply and charge for a greater quantity to meet the minimum stated.

Deposits Confirmation

In some cases, deposits will be required, e.g. custom seeding / planting, new customers and large orders. Upon processing of your order an "Order Confirmation" will be forwarded. Orders should not be taken as accepted unless an "Order Confirmation" is received, whereupon the terms and conditions of trade shall be deemed to have been accepted and understood. All information you will need when making an inquiry into an existing order will be found on the Order Confirmation. Due date is approximate only. Please allow for this when ordering.

Order Cancellation

Order Cancellation - Seed or Plugs: You may cancel prior to the seed date only if the seed has NOT been purchased and only with the consent of the seller. Under no circumstances will cancellations be permitted after the seed date, as listed in the "Order Confirmation", has passed. An invoice will be raised for the amount as shown on the "Order Confirmation" once your plants are ready. ALL CHANGES / CANCELLATIONS MUST BE IN WRITING. By customer request, Highsun will endeavour to "On Sell" plants on the customer's behalf. **The customer will incur an "administrative fee" of 15% of all goods on sold for this service.**

Order Cancellation - Tissue Culture: You may only cancel pre-ordered Tissue Culture if the Tissue Culture Laboratory allows us to cancel and only with the consent of the seller. Under no circumstances will cancellations be permitted once the Tissue Culture Laboratory has begun its internal processes. Additionally, Highsun Express utilizes both domestic and international Tissue Culture laboratories to supply the listed varieties, as such, variations may occur in the ability of the laboratory to cancel an existing order. An invoice will be raised for the amount as shown on the "Order Confirmation", once your plants are ready. ALL CHANGES / CANCELLATIONS MUST BE IN WRITING. By customer request, Highsun will endeavour to "On Sell" plants on the customer's behalf. **The customer will incur an "administrative fee" of 15% of all goods on sold for this service.**

Substitutions

Substitution could occur in the event of seed supply problems, UNLESS WE ARE ADVISED OTHERWISE.

Shipping Information

Freight is added to the invoice. We arrange shipment by air, road or rail. In some cases the customer is required to arrange pickup and transport from the airport/depot to nursery. All shipments go forth at customer's risk.

Seed Shipping Information

Orders under \$500 will have freight added to the invoice. We will arrange shipment via Express Post. All shipments go forth at customer's risk.

Seed Freight Liability

Highsun Express accepts no responsibility for damage or delay following delivery to the original carrier. We will however, claim on the customer's behalf the cost value of the damaged goods provided Insurance has been taken out.

Customers Responsibilities

Respond within 24 hours to the call from the transport company to pick up the goods. It is a good precaution to contact the transport company if you have not heard from them within 48 hours of stock having left our company. In the event of a missing consignment, 1st contact should be made to your receiving depot, advising them of the consignment note number and date the goods left the nursery. Receive shipment and sign for it. Inspect shipment in carrier's presence; if damage is evident, contact Highsun Express within 24 hours.

Highsun Express Responsibilities

Your plants, seeds and propagation supplies will be packaged to the best of our ability to withstand handling and movements on regular transport routes to all major centres in Australia.

Property & Risk

Property in and title to the goods shall remain with Highsun Express which reserves the right to dispose of the goods until such time that all moneys owing by the Buyer to Highsun Express have been paid in full. The risk in the goods purchased shall, unless otherwise agreed in writing, pass to the Buyer immediately upon the goods leaving Highsun Express premises.

Pick Up

Orders may be picked up if you prefer. Please allow 24 hours lead-time.

Pick Up hours are

Summer period: 9 a.m. - 4 p.m. Tuesday to Thursday. 9 a.m. - 12 noon Friday. All other seasons: 9 a.m. - 4 p.m. Monday to Thursday. 9 a.m. - 12 noon Friday. Closed Weekends & Public Holidays. To ensure optimum plant quality, orders MUST be picked up on the day agreed upon by the customer.

Holding Stock Past Due Date

We can only hold plants if space permits. Due to the nature of our plants we cannot guarantee the plants will remain at our normal shipping standard. No credits for oversize and subsequent

problems will be given for plants that are held in our nursery beyond the original shipping date, as we accept no responsibility for the quality of held plants.

Payment

All new customers' orders are to be prepaid. Payment can be made by:

- Direct Deposit to our Bank Account (please fax or email receipt of bank deposit).
- Credit Card: Visa, MasterCard.
- Cheque or Cash.

Payment is to be received by us by 12 noon the day before dispatch. Customers will remain on prepaid trading terms until an application for credit is approved. Highsun Express will require an original completed, signed and approved Credit Application form, before a credit account is opened.

Terms for Approved Customers

Net 30 days from date of statement. After 90 days outstanding, credit will be stopped. Interest will be charged on accounts over 90 days, at 1.5% per month.

Product Claims

Customer Service must be called within 48 hours of receipt if claim is to be honoured by Highsun Express. If you are not satisfied with the product/s and would like to request a credit, photos of the products must be emailed to info@highsun.com.au, or posted Atten: Customer Service, with complete details of the claim. Short count claims must be made within 48 hours of receipt of plants. Before you call, please check:

- Be sure you receive the number of plants you were invoiced for.
- Time goods left our nursery and time you received them.

Limit of Liability for Seeds & Plugs

Seed or Plugs: Highsun Express states and the customer acknowledges that any variety or descriptive information furnished in relation to the seed or seedlings (plugs), is based upon information received from the seed breeders or distributors, and is provided as a guide only. The customer accepts responsibility in relation to any delays in accepting the seeds or plants ordered, and recognises that significant variations may occur in the particular plants due to geographic location, climate, soil type, soil conditions, cultural management practices and other growth factors. No liability will be accepted by Highsun Express, or its Directors, for any inaccuracy in the information provided. Highsun Express gives no further warranty, express or implied, and all other or further warranties, including any warranties of merchantability or fitness for a particular purpose are excluded. We shall not be responsible for loss of any product, profit or any other indirect special or consequential damages. Any mis-labelled product is subject to our limit of liability i.e. to the extent of the purchase price.

Limit of Liability for Tissue Culture

Highsun Express states and the customer acknowledges that any variety or descriptive information furnished in relation to the Tissue Culture product or plugs, is based upon information received from the Tissue Culture breeders or distributors, and is provided as a guide only. The customer accepts responsibility in relation to any delays in accepting the Tissue Culture or plugs ordered, and recognises that significant variations may occur in the particular plants due to geographic location, climate, soil type, soil conditions, cultural management practices and other growth factors. Additionally, Highsun Express utilizes both domestic and international Tissue Culture laboratories to supply the listed varieties, as such, variations may occur in the quality and performance of the Tissue Culture and or plugs as a result. No liability will be accepted by Highsun Express, or its Directors, for any inaccuracy in the information provided. Highsun Express gives no further warranty, express or implied, and all other or further warranties, including any warranties of merchantability or fitness for a particular purpose are excluded. We shall not be responsible for loss of any product, profit or any other indirect special or consequential damages. Any mis-labelled product is subject to our limit of liability i.e. to the extent of the purchase price.

Force Majeure

If Highsun is unable wholly or in part by reason of force majeure to carry out any of its obligations under these Terms and Conditions, at the option of Highsun:

- (a) That obligation will be suspended for so long as it is affected by force majeure during the continuance of the force majeure; or
- (b) The contract for the supply or sale of the Goods pursuant to these Terms and Conditions will be terminated.

If Highsun elects to terminate the contract for the supply or sale of Goods pursuant to these Terms and Conditions Highsun must notify the Buyer of the termination. The Buyer acknowledges that Highsun is not liable for any breach of these Terms and Conditions, or any failure to supply the Goods, or for any delay in supply of the Goods, or for the termination of a contract for the supply of the Goods pursuant to these Terms and Conditions caused by force majeure. The Buyer acknowledges that if Highsun elects to terminate the contract for the supply of the Goods, Highsun will be under no obligation at any future date to deliver the Goods the subject of the terminated contract. In this clause "force majeure" means an act of God, strike, labour dispute or other interference with work, War, blockade, disturbance, flood, explosion, governmental requirement, intervention or embargo, unavailability or delay in availability of raw materials, equipment or transport and any other cause whatsoever (whether or not similar to those specifically enumerated above) which is not reasonably within the control of Highsun

Prices

Prices shown in the catalogue of Highsun Express may be varied without notice to the customer at any time. Highsun Express reserves the right to correct errors on invoices. Prices quoted in our catalogue do not include GST. Confirmation prices do not include freight.

Vegetative Products

Customers who have purchased or will purchase any vegetative cuttings from Highsun Express will only use said plants for cut flower or pot production and shall refrain from any type of propagation of these plants. Propagation shall mean to increase or reproduce the supplied plants. Highsun Express can commence legal proceedings against offenders of this provision for damages and costs. Every endeavour will be made by Highsun Express at all times to ensure that plants are propagated from reliable stock to accepted industry standards of quality and performance.

Disclaimer: Significant variations in seed & tissue culture, variety and crop performance, in results and in crop outcomes may occur depending upon geographic location, climate, soil type, soil conditions, cultural and management practices and other growth and development factors. Any cultural and descriptive information or other advice, recommendation, information, assistance or service provided by Highsun Express is intended as a general guide only and should not be relied upon and is provided without liability or responsibility (including for negligence) on the part of Highsun Express. It is recommended that in all cases a small scale trial production is undertaken in order to test local conditions and circumstances that may affect the crop.
