

### **Cleome – Spider Flower**

*Cleome hassleriana*

Annual, often reseeds itself

Full Sun to part shade

Grows 3 – 6 feet tall,  
1-2 feet across.

- Showy upright plant/flower
- Fragrant, hummingbirds and butterflies like it
- Blooms summer through fall
- Has thorns that deter some animal browsing.

### **Euphorbia Glitz White-**

*Euphorbia graminea*

Annual

Plant height: 15-24"

Plant width: 15-20"

- Low maintenance
- Heat and drought tolerant
- Rebounds quickly from adverse weather - perfect for the landscape!

### **Bee Balm – Monarda**

Perennial

Full sun or partial shade;  
moist, rich soil

30-inch tall flowers with  
2-inch scarlet, pink, salmon  
and red shaggy blooms,

space plants 12-18 inches apart

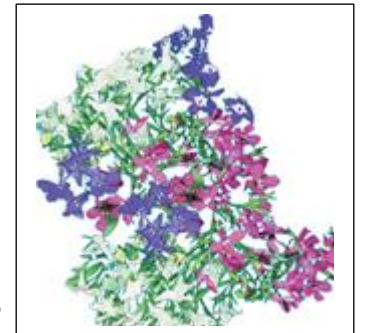

- Attracts bees, butterflies, hummingbirds
- Will flower from June to August
- Remove faded blooms to increase blooming

### **Rainbow Mix (Lobelia)-**

*Lobelia erinus*

Annual

Partial to full shade; requires  
lots of water during dry  
periods. Space plants 8 inches  
apart.

- Good for hanging baskets
- Should not be planted in acidic soil
- Brightens up dark corners

**Color Cascades Mix (Lobelia)–**

*Lobelius erinus pendula*

Annual

Partial to full shade; requires lots of water during dry periods. Space plants 8 inches apart.

- Good for hanging baskets
- Should not be planted in acidic soil
- Brightens up dark corners

**Perfectly Picasso -**

*Veronica*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 22 to 26 inches and spread 22 to 24 inches.

- Adaptable to heavy or light soils
- Deadheading will promote additional blooming
- Good for containers, cutting

**Sunshine Mix (Zinnia)-**

*Z. elegans*

Annual

Average 20 inches tall, with 4 inch blooms. Space plants 20 inches apart in warm soil.

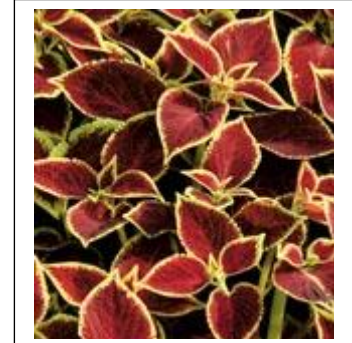

- Attracts butterflies and bees
- Suitable for cutting
- Colors do not fade in intense sunlight

**Premium Sun Crimson Gold –  
(Coleus)**

*Solenostemon scutellariodes*

Annual

Tolerant to sun and shade; space plants 8 inches apart.

- Suitable for pots
- Yellow and red patterned leaves

**Premium Sun Pineapple Surprise-  
(Coleus Pellets)**

*Solenostemon scutellarioides*

Annual

Tolerant to sun and shade; space  
plants 8 inches apart.

- Suitable for pots
- Green and burgundy patterned leaves

**Tomato – Chocolate Cherry**

- Harvest 70 days from setting out transplants.
- Indeterminate.
- One inch fruits, appearing in clusters of 8 all over this compact vining plant, they ripen delectably from green to lavender to richest mahogany!
- The plant reaches 5 to 6 feet high and about 3 feet wide, sometimes continuing to grow and set new fruit into autumn.
- It could work for a large container.

**Premium Sun Watermelon- (Coleus)**

*Solenostemon scutellarioides*

Annual

Tolerant to sun and shade; space  
plants 8 inches apart.

- Suitable for pots
- Green and red patterned leaves

**Kong Green- (Coleus pellets)**

*Solenostemon scutellarioides*

Annual

Tolerant to sun and shade; space  
plants 8 inches apart.

- Suitable for pots
- Green and cream patterned leaves

### **Easter Bonnet Mix- (Alyssum)**

*Lobularia maritima*

Annual

Plants average 6-10 inches in height and spread 12-14 inches.

Plant in fine soil low in pH

- Suitable for pots, containers, baskets, etc.
- Mix of 7 colors
- Fragrant

### **Million Suns- (Sanvitalia)**

*Sanvitalia speciosa*

Annual

Full sun or partial shade; heat tolerant and prefers well-drained, sandy soil. Space plants 5-6 inches apart.

- Blooms all summer long
- Attracts bees
- Suitable for containers, baskets

### **Gnome Mix- (Gomphrena)**

*G. globosa*

Annual

Space plants 10 inches apart in very warm soil.

- Good for drying and cutting

### **Imagination- (Verbena/trailing)**

*Verbena speciosa*

Annual

Plant in well-drained, sandy soil, thin seedlings to 8-12 inches apart. Keep well ventilated to avoid fungus.

- Suitable for cutting
- Suitable for small pots

### **Christmas Fern –**

*Polystichum acrostichoides*

Perennial

Partial to full shade; moist, well-drained soil. Plants reach 1 to 2 feet and spread 18 to 24 inches.

- This fern is evergreen through the winter
- Leaves can be used in cut flower arrangements

### **Luna Red- (Hibiscus)**

*H. moscheutos*

Perennial

Full sun; plants reach 2-3 feet, spread 2 feet. Does well in clay or other mineral-rich soil.

- Drought tolerant
- Need lots of light to flower
- Suitable for containers

### **Big Pink with Green Leaf- (Begonia pellets)**

*Begonia x benariensis*

Annual

Full sun; moist, well-drained soil. Plants reach 28 inches, and should be spaced 8-10 inches apart.

- Need lots of light to flower
- Suitable for containers, baskets

### **Bossa Nova White- (Begonia Pellets)**

*Begonia boliviensis*

Annual

Full sun to partial shade; rich, well drained soil. Plants reach 12-16 inches, and should be spaced 16-18 inches.

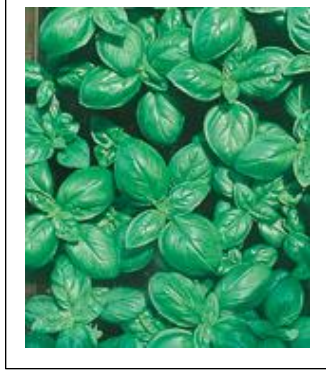

- Suitable for containers, baskets
- Heat tolerant
- Long flowering period

### **Genovese Basil-**

*O. basilicum*

Annual

2 inch dark green leaves; transplant seedlings 12 inches apart. Pinch off flowers to prolong leaf harvesting period.

- Fragrant
- Popular herb for flavoring

### **Di Genova Basil-**

*O. basilicum di serenti*

Annual

2 inch dark green leaves; transplant seedlings 12 inches apart. Pinch off flowers to prolong leaf harvesting period.

- Fragrant
- Popular herb for flavoring

### **Queen Red Lime Zinnia -**

*Zinnia elegans*

Annual

Full sun; plant in moist, well-drained soil. Space plants 6-12 inches apart.

- Heat tolerant
- Suitable for beds, containers
- Good for cutting

### **Speedy Mix Geranium –**

*Pelargonium peltatum*

Annual

Full sun to partial shade; tolerant of a variety of soil and moisture conditions. Space plants 12 inches apart.

- Suitable for containers, baskets
- Attracts butterflies
- Heat and humidity tolerant

**Crazy Daisy Shasta Daisy-**  
*Leucanthemum suberbum*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 2 feet, spread 18-24 inches.

- Suitable for pots, containers, cutting
- Distinctive blooms with many petals

**Sunrise Surprise Black-Eyed Susan-**  
*Thunbergia alata*

Annual

Full sun; moist, well-drained soil. Plants are tall at 5-8 feet, and should be spaced 1 foot apart.

- Shades of rose, salmon, apricot and ivory
- Climbing flowers, can be used to cover any small structure

**Park's Candy Lily-**  
*Pardancanda norrisii*

Perennial

Full sun to partial shade; normal, dry soil. Plants reach 3 feet and should be spaced 1 foot apart.

- Heat and drought tolerant
- Rainbow mix of colors

**Chocolate Flower-**  
*Berlandiera lyrata*

Perennial

Full sun to partial shade; well-drained, relatively infertile soil. Plants reach 12-18 inches, and spread 18-24 inches.

- Very hardy; resistant to drought, disease, deer, pests, cold, heat, and humidity.
- Attracts pollinators

**Georgia Pancake Creeping Blue Star –**

*Amsonia ciliata var. filifolia*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 4 to 6 inches, but spread 16 to 24 inches.

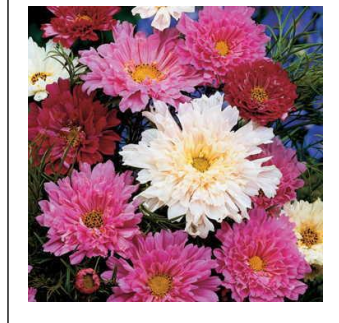

- Distinctive look with pale blue flowers and needle-like foliage
- Ideal for groundcover

**Double Click Mix Cosmos Flower -**

*Cosmos bipinnatus*

Annual

Full sun; well-drained, relatively infertile soil. Plants reach 4 feet and spread 18-24 inches.

- Pest resistant
- Profusely generates large, brightly colored blooms
- Good for cutting
- Easy to grow

**Goat's Beard -**

*Aruncus dioicus*

Perennial

Full sun to full shade; moist, rich soil. Plants reach 4 to 5 feet and spread 3 to 4 feet.

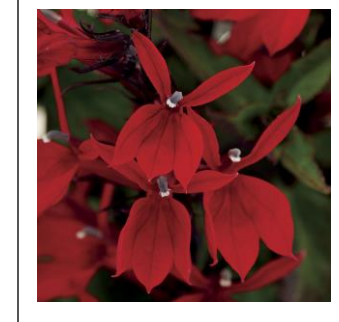

- Creamy white flower panicles can be up to a foot long
- Takes a couple seasons to become established, then increases flower production

**Starship Scarlet Lobelia –**

*Lobelia speciosa*

Perennial

Full sun to partial shade; moist, well-drained soil or clay. Plants reach 20-24 inches and spread 6-20 inches.

- Good for cutting
- Attracts hummingbirds

**Fire Dance Red Hot Poker –**  
*Kniphofia hirsuta*

Perennial  
Full sun; moist, well-drained soil. Plants reach 14-20 inches, spread 2 feet.

- Tolerates extreme temperatures
- Suitable for cutting

**Arizona Sunset Hummingbird Mint –**  
*Agastache Hybrida*

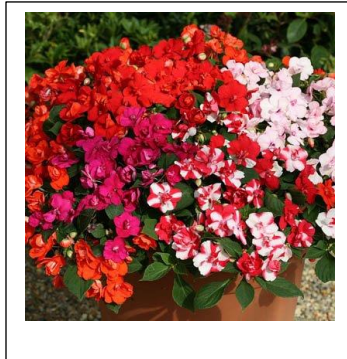

Perennial  
Full sun; moist, well-drained soil. Plants reach 8-10 inches and spread 10-12 inches.

- Good for beds and borders
- Attracts pollinators including hummingbirds

**Impatiens Athena Mix–**  
*Impatiens sp.*

Annual  
Plant height 10-12”  
Width – 14-16”

- Early flowering, semi-to fully double, carnation-looking blossoms on compact, semi-prostrate spreading plants

**Foam flower –**  
*Tiarella Fingerpaint*

Perennial  
Partial to full shade; rich, moist soil. Plants reach 9 inches and spread 12 inches.

- Often retains foliage through the winter
- Good for containers
- Ivory flowers appear just above the foliage in early spring

**Siberian Blues Dianthus –**  
*Diansus amurensis*

Perennial  
Full sun; moist, well-drained soil. Plants reach 6-12 inches and spread 12-15 inches.

- Vibrant blue color
- Heat and humidity tolerant

**Sparkle White Guara -**  
*Guara lindheimeri*

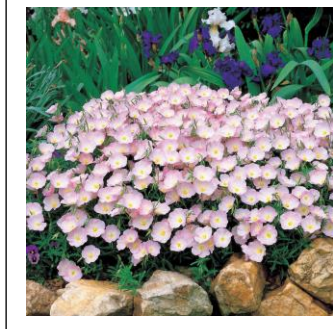

Perennial  
Full sun to partial shade;  
loamy, well-drained, soil.  
Plants reach 12-24 inches  
and spread 12-18 inches.

- Long taproot best suited to deep pots
- Good for borders
- Attracts butterflies and bees

**Evening Primrose -**  
*Oenothera speciosa*

Annual, will reseed itself  
Full sun; dry, poor soil. Plants  
reach 6-12 inches, and spreads  
6-12 inches.

- Drought and heat tolerant
- Long bloom period for soft pink blossoms

**Geisha Garlic Chives –**  
*Allium tuberosum*

Perennial  
Full sun to partial shade;  
moist, well-drained soil. Plant  
reaches 12-15 inches and  
spreads 8-10 inches.

- Aromatic and flavorful herb
- Flowers in late summer, allowing a long harvest time

**Centaurea –**  
*Centaurea montana*

Perennial  
Full sun; dry, well-drained soil.  
Plants reach 18 inches with 3  
inch blooms.

- Suitable for cutting
- Cold and drought tolerant
- Sparsely-set, deep blue petals

**Marvelette White Calamint–**  
*Calamintha nepeta*

Perennial  
Full sun to partial shade;  
dry, well-drained soil. Plants  
reach 8 inches and spread 12  
inches

- Blooms just 3 months after sowing
- Drought tolerant
- Broad leaves give off mint scent

**Sweetness Dianthus –**  
*Dianthus plumaris*

Perennial  
Full sun; moist, well-drained  
soil. Plant reaches 8 inches and  
spreads 12 inches.

- Suitable for beds, containers and baskets
- Disease and pest resistant
- Good for cutting and ground cover
- Blooms first year from seed

**Twinnny Mix Snapdragon -**  
*Antirrhinum majus*

Annual  
Full sun; normal, well-drained,  
loamy soil  
12 inches tall, with various color blooms space  
plants 6-8 inches apart

- Long bloom period
- Suitable for containers
- Tolerant to hot or wet conditions

### **Lady's Mantle –**

*Alchemilla mollis*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 15 to 18 inches and spread 18 to 24 inches wide.

- Great filler in flower bouquets or fall and winter arrangements
- Wide, soft velvety leaves and small star-shaped flowers

### **Millenium Onion –**

*Allium nutens*

Perennial

Full sun to partial shade; dry to moist, well-drained soil. Plants reach 15 to 20 and spread 10 to 15 inches.

- This ornamental onion produces purple, 2-inch clusters of flowers
- Leaves emit a slight onion odor when crushed

### **Columbine –**

*Aquilegia Canadensis*

Perennial

Tolerates a large range of soil conditions.

Full sun to shade.

- Early bloomer.
- One of the first plants to provide nectar in the spring for bees, butterflies, and hummingbirds.
- Colorful flowers are red flowing into yellow.
- Grows in pine tree areas
- Deer-resistant.

### **Pearl Deep Blue –**

*Campanula carpatica*

Perennial

Full sun to partial shade; moist, well-drained soil. Plants reach 8 inches and spread 12 to 24 inches wide.

- Deadheading prolongs bloom time
- Delicate blooms fare better with some shade

**Zahara Double Brilliant Mix**

**Zinnia –**

*Zinnia marylandica*

Annual

Full sun; moist, well-drained soil. Plants reach 12-18 inches and spread 12-18 inches as well.

- “Double” blooms
- Good for beds, cutting
- Mildew, heat, drought, and humidity tolerant

**Evening Scentsation Petunia –**

*Petunia atkinsiana*

Perennial

Full sun; moist, well-drained soil. Plants reach 5-8 inches and spread 2 feet 6 inches - 2 feet 11 inches.

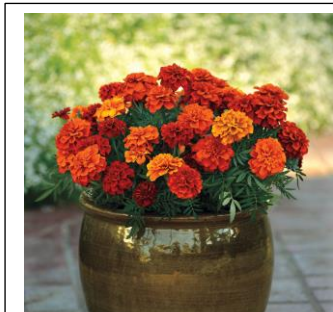

- Suitable for beds, baskets and containers
- Fragrance that intensifies in the evening

**Fireball Marigold –**

*Tagetes patula*

Annual

Full sun; moist, well-drained soil. Plants reach 10-12 inches, and spread 6-8 inches.

- Deer and pest resistant
- Good for containers and cutting

**Angelonia Serena Mix- P**

*Angelonia augustifolia*

Annual

Full sun; moist, well-drained soil. Plants reach 10-12 inches, and spread 12-14 inches.

- Suitable for containers
- Easy to grow from seed

**Maverick Mix Geranium—**  
*Pelargonium hortorum*

Annual

Full sun; well-drained soil or clay. Plants reach 14-16 inches and spread 12-14 inches.

- Very tolerant of heat and humidity
- Suitable for beds and containers

**Park's Picks Deep Red Zinnia –**  
*Zinnia elegans*

Annual

Full sun; moist, well-drained soil. Plants reach 3 feet 6 inches – 4 feet, and spread 10-12 inches.

- Great for cutting
- Avoid wetting foliage when watering to prevent mildew

**Alumia Vanilla Cream**  
**Marigolds –**  
*Tagetes patula*

Annual

Full sun; moist, well-drained soil. Plants reach 10-12 inches, and spread 12-14 inches.

- Good companion to tomatoes; roots contain a chemical that kills some soil-borne pests.
- Easy to grow from seed

**Rocket Hybrid Mix Snapdragon -**  
*Antirrhinum majus*

Annual

Full sun; moist, well-drained soil. Plants reach 2 feet 6 inches – 3 feet and spread 1-2 feet.

- Good for cutting
- Fragrant flowers come in a mix of vibrant colors

**BIG™ Red with Bronze Leaf  
Begonia –**

*Begonia benariensis*

Annual

Full sun to partial shade; moist, well-drained soil. Plants reach 20 inches and spread 24 inches.

- Good for baskets, beds, containers
- Glossy, oversized foliage has a bronze tint

**Janie Primrose Yellow  
Marigold –**

*Tagetes patula*

Annual

Full sun; moist, well-drained soil. Plants reach 8 inches, space plants 6-18 inches apart.

- Heat tolerant
- Attractive to butterflies, repellent to nematode pests

**Bombay Mix Cockscomb –**  
*Celosia argentea cristata*

Annual

Full sun; moist, well-drained soil. Plants reach 4 feet and spread 18 inches

- Long-lasting blooms are good for cutting
- Mix contains pink, wine-red, purple, yellow-gold, and gold

**Park's Legacy Tomato -**  
*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 10-12 oz. fruits.

- 69 days to harvest from transplant
- Resistant to a variety of tomato diseases
- Vining

**Pacifica Hybrid Mix Vinca  
Flower-**

*Catharanthus roseus*

Annual, may reseed itself in warm climates.

Full sun: moist, well-drained soil.

Plants reach 10-12 inches and spread 12 inches.

- Good for baskets and ground cover
- Heat and poor soil tolerant

**Divine Mystic Mix New Guinea  
Impatiens –**

*Impatiens hawkeri*

Perennial

Partial shade to full shade;  
moist, well-drained soil. Plants reach 10-14 inches and spread 10-12 inches.

- Good for baskets, beds, containers and ground cover
- Resistant to disease, pests and mildew

**Zinnia – Benary's Giant**

Annual

Full Sun

Grows 2 – 2 ½ feet tall

- Unique lime green color.
- Good for cut flower arrangements.
- Hardy, blooms all summer, cut dead blooms for more flowering.
- Attracts pollinators to the garden.

**Pirouette Red Petunia –**

*Petunia*

Annual

Full sun; moist, well-drained soil. Plants reach 10-15 inches and spread 10-12 inches.

- Good for baskets, beds, containers
- Attracts butterflies

**Whopper Tomato Hybrid-**

*Lycopersicon  
esculentum*

Annual with a vibrant red color!

Requires full sun and moist, well-drained soil

- Crack resistant
- Large, meaty fruit!

**Sweetie Pie Hybrid Bell Pepper –**

*Capsicum annuum*

Annual

Full sun; moist, well-drained soil. Plants reach 2 feet – 2 feet 4 inches and spread 2 feet 4 inches – 3 feet.

- 65 days to harvest from setting out transplants
- Up to 30 peppers on each plant

**Garden Sweet Burpless Cucumber -**

*Cucumis sativus*

Annual

Full sun; moist, well-drained soil. Fruits reach 10-12 inches long. Thin seedlings 12 inches apart.

- 55 days to harvest from sowing
- Resistant to mildew

**Early Girl Hybrid Tomato –**

*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil.

Produces 4 to 6 oz. fruits. If staking, space plants 1 ½ - 2 feet apart, otherwise 4-5 feet.

- 57 days to harvest from setting out transplants
- Starts bearing fruit early
- Tomatoes are good for slicing

**Cherokee Purple Organic Tomato –**

*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil.

Produces 1 lb. fruits. If staking, space plants 1 ½ - 2 feet apart, otherwise 4-5 feet.

- 80 days to harvest from setting out transplants
- Flavorful and juicy tomatoes

**Braveheart Hybrid Cherry Tomato–**

*Lycopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 1 oz. fruits.

- 60 days to harvest from setting out transplants
- Resistant to a variety of tomato diseases
- Produces dozens of flavorful tomatoes

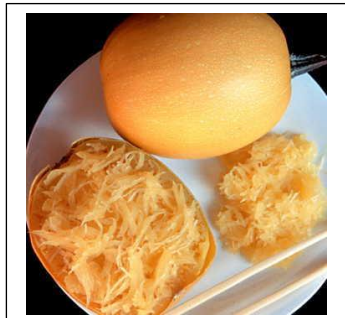

**Small Wonder Hybrid Spaghetti Squash-**

*Cucurbita pepo*

Annual

Full sun; moist, well-drained soil.

“Single serving” fruits should be harvested at 5-6 inches long and 3 lbs.

- 80 days to harvest from sowing
- Vining

**Harvest Moon Seedless Watermelon –**  
*Citrullus lanatus*

Annual  
Full sun; moist, well-drained soil.  
Produces 4-5 melons of 18-20 lbs. each.

- 90 days to harvest from indoor sowing
- Smaller vines mean each plant only needs 3-5 feet

**Fairy Tale Hybrid Eggplant –**  
*Solanum*

Annual  
Full sun; moist, well-drained soil.  
Produces dwarf eggplants of 2-4 inches long.

- 50 days to harvest from setting out transplants
- Displays attractive purple-lavender blooms

**Cocozelle Organic Squash –**  
*Cucurbita pepo*

Annual  
Full sun; moist, well-drained soil. Produces fruits 1-12 inches long. Harvest young for extra succulent baby squash.

- 45 days to harvest from sowing
- Picking early yields a longer harvesting season

**Shikou Hybrid Eggplant -**  
*Solanum melongena*

Annual  
Full sun; moist, well-drained soil. Eggplants reach 6-8 inches long and 1-1½ inches wide.

- 80 days to harvest from setting out transplants
- Japanese for “supreme” eggplant

**German Johnson Tomato –**  
*Lopersicon esculentum*

Annual

Full sun; moist, well-drained soil.  
Produces 1-2 lb. fruits all season  
long.

- 80 days to harvest from setting out transplants
- For best results, support with tomato cages or pens

**Artwork Hybrid Broccoli–**  
*Brassica oleracea Italica*

Annual

Full sun; moist, well-drained soil.  
produces sprouts 6-8 inches  
long.

- 85 days to harvest from sowing, 55 from transplanting
- Harvest central crown and side-shoots start continually producing

**Sweet Sunset Hybrid Pepper –**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained  
soil. Produces peppers about  
7 ½ inches long.

- 88 days to harvest from setting out transplants
- Resistant to disease, pests, drought, heat

**Garden Salsa Hybrid Pepper -**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained  
soil. Produces thin peppers 8-9  
inches long.

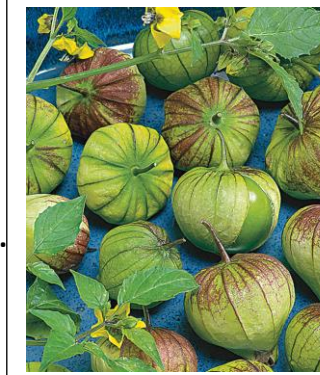

- 73 days to harvest from setting out transplants
- Peppers mature to bright red, but can be picked green for salsa

**Purple Tomatillo –**  
*Physalis ixocarpa*

Annual

Full sun; moist, well-drained soil.  
Fruits can reach the size of a baseball but are generally a bit smaller

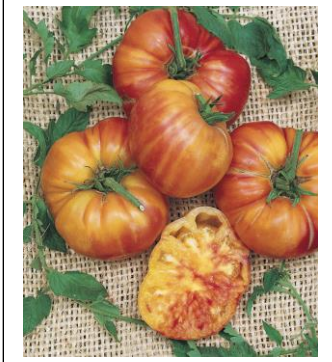

- 70 days to harvest from transplanting
- A mainstay of Mexican cuisine, tomatillos can also be used in salsas and sauces

**Big Rainbow Tomato –**  
*Lypersicon esculentum*

Annual

Full sun; moist, well-drained soil.  
Produces 2 lb. yellow and red fruits.

- 90 days to harvest from setting out transplants
- Resistant to a variety of bacteria and mildews

**Carmen Hybrid Pepper –**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained soil. Produces horn-shaped peppers with wide shoulders and a tapering body.

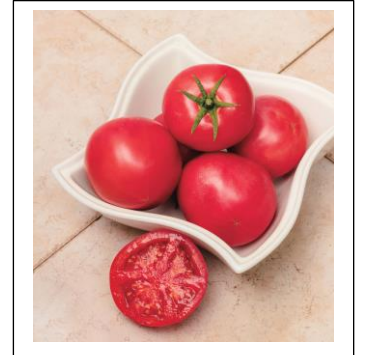

- 75 days to harvest from setting out transplants
- Versatile and sweet peppers increase in vitamin content as they redden

**Pink-a-licious Hybrid Tomato -**  
*Lypersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces 5-8 oz. fruits.

- 73 days to harvest from setting out transplants
- Adaptable to many conditions and resistant to diseases and pests

**Hot Sunset Hybrid Pepper –**  
*Capsicum annuum*

Annual

Full sun; moist, well-drained soil. Produces peppers 7 ¼ inches long.

- 85 days to harvest from setting out transplants
- Good all-around pepper

**Veronica Cauliflower –**  
*Brassica oleracea*

Annual

Full sun; moist, well-drained soil. Lime green heads are tightly spiraled with a crisp, rich flavor.

- 85 days to harvest
- Milder, sweeter flavor than white cauliflower

**Costoluto Genovese Tomato –**  
*Lopersicon esculentum*

Annual

Full sun; moist, well-drained soil. Produces approx. 7 ounce fruits.

- 78 days to harvest from setting out transplants
- High acidity gives this tomato an intense tangy flavor

**Pepitas Hybrid Pumpkin -**  
*Cucurbita pepo*

Annual

Full sun; moist, well-drained soil. Produces 9-12 lb. fruits.

- 90 days to harvest from direct sowing
- Packed with hull-less seeds that are easy to roast or bake.
- Disease resistant

**Rocky Top Tomato –**  
*Lypersicon esculentum*

Annual  
Full sun; moist, well-drained soil. Produces 7-7 ½ oz. fruits.

- 75 days to harvest from setting out transplants
- Highly resistant to a number of tomato diseases

**Sweet Dumpling Acorn Squash –**  
*Cucurbita pepo*

Annual  
Full sun; moist, well-drained soil. Each plant produces an average of 8 to 10 teacup sized squashes.

- 90 days to harvest from direct sowing
- Resistant to powdery mildew, heat, humidity

**Bonbon Hybrid Squash –**  
*Cucurbita pepo*

Annual  
Full sun; moist, well-drained soil. Produces fat, blocky 4 lb. squashes.

- 81 days to harvest from setting out transplants
- Grows quickly and stores well

**Lambkin Hybrid Melon -**  
*Cucumis melo*

Annual  
Full sun; moist, well-drained soil. Produces 2-4 lb. melons.

- 70 days to harvest from direct sowing
- This Piel de Sapo-type melon has a honey-sweet flavor

**Zefa Fino Florence Fennel –**  
*Foeniculum vulgare azoricum*

Annual

Full sun; moist, well-drained soil. Bulb reaches 3-5 inches across.

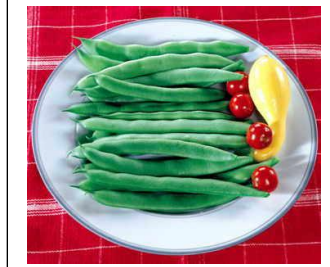

- 90 days to harvest from sowing
- Leaves and bulb are both edible

**Roma II Bean –**  
*Phaseolus vulgaris*

Annual

Full sun; moist, well-drained soil. Produces 5 ½ inch pods.

- 59 days to harvest from direct sowing
- Heavy producer due to longer producing season

**Capitano Bush Bean –**  
*Phaseolus vulgaris*

Annual

Full sun; moist, well-drained soil. Produces flat, yellow, 6 inch pods.

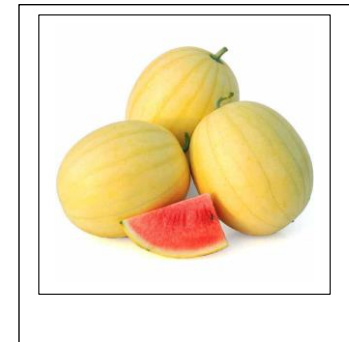

- 60 days to harvest from direct sowing
- Tender, tasty, and heavy-bearing

**Faerie Hybrid Watermelon -**  
*Citrullus lanatus*

Annual

Full sun; moist, well-drained soil. Produces 4-6 lb melons with a creamy yellow rind.

- 72 days to harvest from direct sowing, 60 days from setting out transplants
- Disease and pest resistant
- Generous yield
