PINE

JAPANESE BLACK PINE

Each year we produce a variety of native conifer and hardwood seedlings and transplants along with ground covers, landscaping shrubs, perennials and ornamental grasses. We offer the broadest selection of plant material available from one nursery. Musser Forests grown plants are shipped throughout the entire United States.

AMERICAN RED PINE ☀️ *Pinus resinosa* • Zone 2-5 • Also known as Norway Pine. Excellent timber tree. Height to 75 feet with a spread of 15 to 20 feet. Needles are medium to dark green and soft; 4 to 6 inches long. Bark is reddish-brown. Ordinary to poor soil. Can withstand dry, windy, rocky conditions. A fine ornamental tree as a specimen due to its dense, spreading growth habit, with a broad pyramidal head. Good for naturalizing and as a screen or windbreak.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE
ARPIN33	3-Yr. Seedlings	3-0	6-12"	\$2.86	\$2.06	\$1.46	\$.83	\$.74	\$.45

AUSTRIAN PINE ☀️ *Pinus nigra* • Zone 3-7 • Growth 50 to 60 feet. Spread 20 to 40 feet. Stiff, dark green needles 3 1/2 to 6 1/2 inches long. Dense, pyramidal growth. Ordinary to poor soil. Does equally well in limestone or acidic soil. Can take dry, rocky, windy conditions. Will tolerate seaside conditions and limited amounts of highway salt. Excellent specimen tree for naturalizing. Also good for thick screen or windbreak. Good timber tree.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

NEW! BRISTLECONE PINE ☀️ *Pinus aristata* • Zone 4-7 • Sometimes called Hickory Pine or Foxtail Pine. This pine rarely grows over 20 feet. This tree is a dwarf, growing very slowly; 1 to 2 inches per year. Its dark bluish-green needles, 5 in a bundle, are usually less than 1 1/2 inches long. Likes ordinary to poor soil, good drainage. A unique specimen in a garden or island planting. Excellent bonsai subject.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE
BRPIN12	2-Yr. Seedlings	2-0	2-4"	\$2.53	\$1.73	\$1.13	\$.65	\$.58	\$.35

JAPANESE BLACK PINE ☀️ *Pinus thunbergii* • Zone 5-8 • Medium growth 20 to 80 feet. Stiff, dark green needles are 2 in a bundle and 3 to 5 inches long. Grows best in moist, fertile, well drained soil. A dense spreading pine with pendulous branches and a broad pyramidal head. The best evergreen for planting along the seashore in the northeastern United States. Withstands seashore conditions. Good for windbreaks, screens, Japanese gardens, bonsai.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

NEW! MUGHO PINE ☀️ *Pinus mugo pumilio (Most Dwarf Strain)* • Zone 3-7 • Mugho Pine is also known as Swiss Mountain Pine. Height to 2 feet. Spread to 5 feet. A dwarf prostrate, low growing, spreading pine. Dark green, stiff needles, in pairs, 2 to 3 inches long. Ordinary soil. Can tolerate poor, rocky, dry, windy conditions. This plant is widely used in foundation plantings. Excellent for rock gardens and Japanese gardens. An excellent bonsai subject.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

NEW! SCOTCH PINE ☀️ 🌲 *Pinus sylvestris 'Macedonian Strain'* • Zone 4-7 • **FAST GROWING** • This conifer should grow 60 to 70 feet in height, with a spread of 15 to 20 feet. Short, pointed green to blue-green foliage. Good winter color. Branches are stiff and durable. Best in well drained soils, but tolerates poor soils such as sandy, rocky and even heavy clay very well. Extremely hardy. Disease resistant. Drought tolerant. Plant in full sun. Valued as an ornamental and landscape plant. Widely used in parks, gardens, windbreaks and for erosion control. Scotch Pine is the most common Christmas tree in the United States.

SPANISH SCOTCH PINE

EASTERN WHITE PINE ☀️🌱 *Pinus strobus* • Zone 3-8 • **FAST GROWING** • Fast growing 90 to 100 feet. Spread 25 to 40 feet. A five needled pine, with soft, light green-blue needles, 4 inches long. Can tolerate dry, rocky soil. Grows in normal moisture conditions but can tolerate wet, swampy areas. Excellent ornamental tree for specimen, naturalizing, windbreak or dense screen. Also widely used for Christmas trees and timber.

BLACK HILLS SPRUCE ☀️🌱 *Picea glauca densata* • Zone 2-6 • Slow growth to 40 feet. Spread 15 to 25 feet. One of the most tolerant spruces as it withstands wind, heat, cold, drought and crowding; best in full sun. Short, stiff, bluish-green needles. An excellent, dense evergreen screen that will not get rangy and out of control as it matures. Ordinary soil. Good bonsai subject. Provides dense shelter for wildlife. Make excellent farmstead windbreaks.

NORWAY SPRUCE ☀️🌱 *Picea abies* • Zone 4-7 • **FAST GROWING** • Fast growth to 75 or 80 feet in height. Spread 35 to 40 feet. Dense, dark green needles never get longer than 1 inch. Thrives well in average soil conditions, but prefers moisture in the soil to maintain its deep green color. Highly valued ornamental and timber tree. One of the best conifers for shelters and windbreaks. Branches droop gracefully as tree matures, making this a very attractive ornamental.

WHITE SPRUCE

NEW! RED SPRUCE ☀️ 🌑 🌒 🌓 *Picea rubens* • Zone 3-5 • Also known as Yellow Spruce. Red Spruce grows at a slow to moderate rate to a height of 60 to 80 feet. Spread 20 to 25 feet. It has a narrow, conical shaped crown. The needles are yellow green in color, shiny and tend to curve upward. The chestnut brown cones are 1 to 2 inches long and hang down from the branches. The bark is grayish brown on the surface and more reddish brown beneath. The wood is soft, light, has narrow rings and has a faint reddish tinge. Red Spruce is suitable for Christmas trees. Also, it is an important wood in making paper pulp and because of its resonance is used in many higher end acoustic guitars and violins, as well as musical sound board and organ pipes. This conifer prefers moist but well drained, sandy loam. Very shade tolerant when young. At home at high altitudes. Native to North America. Often used for reforestation. The buds and seeds provide food for grouse, red squirrels, pileated woodpeckers and crossbills. Porcupines feed upon the bark. It is an important cover tree for various mammals, deer, moose and birds.

SERBIAN SPRUCE ☀️ 🌑 🌒 🌓 *Picea omorika* • Zone 4-7 • Medium, symmetrical growth to 50 feet. Stays compact and dense with very little shearing. More narrow than most spruces; mature width about 15 feet. Needles are short and soft; glossy dark green on top, silver underneath. Branches droop gracefully as tree matures. Probably the most beautiful and most adaptable of the spruces.

DOUGLAS FIR

NEW! COOKS BLUE BALSAM FIR ☀️ 🌑 🌒 🌓 *Abies balsamea 'Cooks Blue'* • Zone 3-5 • A North American native fir growing to a height of 50 to 75 feet. Spread 25 to 30 feet. Needles are soft, bluish-green in color with a silver flash on the underside. Plant in sandy, loamy or heavy clay soil. Prefers well drained acidic, moist soil. Proven to be more heat tolerant than other species of Balsam. Grows in sun or partial shade. Great for cooler climates. Commonly used for timber and pulp wood. Valued as a Christmas tree due to its excellent fragrance and good needle retention. Also, suitable bough material.

ITEM NO.		2-2	2-4"	5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

CANAAN FIR ☀️ 🌑 🌒 🌓 *Abies balsamea var. phanerolepis* • Zone 4-7 • Also known as West Virginia Balsam Fir. Native to isolated pockets in the mountains of the Canaan Valley in West Virginia. Relatively dense, pyramidal conifer with a spire-like tip growing to a height of 40 to 55 feet. Spread 20 to 25 feet. Short, soft needles tend to be lustrous, dark green to bluish-green with silvery bands on the underside. Resistant to spring frost injury due to its tendency to break bud late. Strong, uniform, short ascending branches are good attributes for a cut Christmas tree. Highly adaptable to many soil conditions even wet, poorly drained areas. Thrives in cooler climates. Plant in shaded areas or direct sunlight. Suitable as an accent plant, screen or group planting.

DOUGLAS FIR ☀️ 🌑 🌒 🌓 *Pseudotsuga menziesii* • Zone 4-6 • **FAST GROWING** • Seed source Lincoln National Forest, New Mexico. This seed source has proven to be highly resistant to Gypsy Moth. Grows to 60 feet. Short, soft blue-green needles. Grows best in moist, well drained soil. Will not do well in heavy, wet, clay soil. Largest timber producing tree in North America. A popular Christmas tree because of its color, symmetrical form and needle retention.

FRASER FIR

REDCEDAR • REDWOOD • CEDAR • CYPRESS • HEMLOCK • LARCH • HOLLY

EASTERN REDCEDAR ☀️ *Juniperus virginiana* • Zone 3-9 • A dense pyramidal evergreen growing 40 to 50 feet. Spread 8 to 20 feet. Medium green needles are flat and scale-like. Exfoliating handsome grayish to reddish-brown bark is considered part of its ornamental interest. Should grow in almost any soil and does well in poor gravelly soils. Due to its fast, dense growth, this tree is a good choice for an evergreen screen or hedge. No shipments to CA.

ITEM NO.				5 RATE	10 RATE	25 RATE	50 RATE	100 RATE	300 RATE

NEW! CEDAR OF LEBANON ☀️ *Cedrus libani* • Zone 5-7 • Best known for its historic stands in Lebanon. Stately tree with a thick, massive trunk. Should grow 40 to 60 feet. Wide spreading branches reaching 80 to 100 feet. Dark or bright green foliage. Bark is gray-brown to brown forming a pebble-like appearance. Produces upright barrel-shaped cones purple-brown in color, requiring two years to mature. Prefers good, deep, well drained loam. Plant in open, sunny, dry location. Does not tolerate shade. Disease and insect resistant. A specimen tree of unrivaled distinction. Its dark green foliage, stiff habit, and rigidly upright cones give this tree a popular interest. This tree becomes more picturesque as it matures.

PAPER WHITE BIRCH ☀️ 🌑 *Betula papyrifera* • Zone 2-6 • **FAST GROWING** • Often known as Canoe Birch. Grows 50 to 70 feet. Open green foliage turns bright yellow in fall. The bark, which turns snow white, peels off in paper-thin sheets. Grows best in cool, moist localities. Can tolerate wet conditions such as along stream banks and lakes. Most popular birch for ornamental use because of its good foliage, fall color and white bark. It is less susceptible to insects and disease. Bark should turn white in 4 to 6 years. Plant 3 to 5 seedlings together to create a clump.

NEW! RED BUCKEYE ☀️ 🌑 *Aesculus pavia* • Zone 4-8 • Also known as Scarlet Buckeye or Firecracker plant. A handsome deciduous clump forming shrub or small tree growing 10 to 20 feet in height. With a spread of 12 to 15 feet. Produces abundant hard shiny, orange-brown inedible nuts. This tree gets its name from the whitish scar found on each brown seed, giving it the appearance of a deer's eye, hence the name Buckeye. Does well in all soils but grows best in average, moist, acidic well drained soil in full sun to part shade. Native to North America. A hummingbird and butterfly favorite, plant where you can watch the flurry of activity. Typically planted for the visual interest and beauty it can bring to your landscape. Use as a specimen, ornamental, screen, hedge or in a rain garden.

NEW! NEW HAMPSHIRE GOLD FORSYTHIA ☀️🌑 *Forsythia x intermedia 'New Hampshire'* • Zone 3-9 A finely branched compact shrub growing to a height of 4 to 5 feet with equal spread. Its habit is mounded and drooping. Outstanding colorful yellow flower display early in the spring before the dark green foliage appears. Prune after blooming, as their flower buds develop during the summer and fall for the next years flowers. Attractive, handsome maroon fall color. This deciduous, fast growing shrub is very easy to grow as it adapts well to most soils that are well drained. It is an excellent cold hardy selection. Grows best and flowers most prolifically in full sun or light shade. Deer resistant. Use in mixed borders, foundation plantings and cutting gardens. Especially spectacular when planted in a mass. Also an ideal choice for hedges, a specimen or privacy screen.

NEW! GOLDEN RAIN TREE ☀️ **Koelreuteria paniculata** • Zone 5-9 • A small, deciduous, open branching, flowering ornamental shade tree growing to a height of 30 to 40 feet tall. Spread 30 to 35 feet. In early spring showy 4-petaled yellow flowers appear in airy panicles 12 to 15 inches long. Some say the falling blossoms resemble 'Golden Rain'. The flowers give way in late summer to interesting, deep rich orange 3-sided air filled capsules that look like golden-orange paper lanterns and contain hard, black seeds. Attracts bees. Disease and pest resistant. Can tolerate heat, harsh climates and air pollution stress. Grows in a wide variety of soil types. A very effective landscape focal point, street tree and ideal for parkways.

DWARF ROSE HEDGE 'SANDY' ☀️ **Rosa rugosa 'Sandy'** • Zone 2-8 • Height 6 to 8 feet. Spread to 4 feet. This strain of Rosa Rugosa was developed for salt spray tolerance, beach and sand dune stabilization and tolerance for hot, dry areas with poor soil conditions. This strain is also found to have excellent growth and survival rate, high level of insect and disease resistance and good fruit production. Berries attract birds and the plants provide cover for birds and animals.

GROUND COVER

CROWN VETCH ☀️🌑 *Coronilla varia Penngift Crowns* • Zone 4-9 • Grows 12 to 18 inches in height in any climate, sun or partial shade. Coarse, strongly branched stems grow 2 to 6 feet in length. Perennial ground cover. Pinkish-white flowers June until frost. Beautifies problem slopes and banks. Extra hardy; never needs mowing. Chokes out weeds, resists drought, disease and insects. Space staggered on 2 foot centers. Closer spacing will yield coverage sooner. Because of its long root, crownvetch requires about one year to become fully established. No significant top growth should be expected until second year after planting. Grows in any soil, clay, sandy or shale.

PURPLE CONEFLOWER 🌑🌑 *Echinacea purpurea* • 1998 PERENNIAL PLANT ASSOCIATION PLANT OF THE YEAR • Zone 3-9 A very robust perennial that is native to the midwestern and southeastern United States. This plant grows to a height of 24 to 36 inches tall with a spread of 12 to 18 inches. The large, daisy-like flowers grow on sturdy stems ranging in height from 3 to 5 feet. The flower petals range in color from purple to lavender. The seed center is a large, orange-copper colored cone that is hard and prickly. Blooms all summer and into autumn. Plant in full sun or partial shade. Prefers well drained fertile soil, but is drought tolerant and adaptable to heat, poor soils and high humidity. Maintenance free. Great for cutting and drying. A butterfly favorite. Goldfinches and other birds love to feast on the seeds in winter. One of the most dependable flowers lending color to a garden, in the height of the summer. Stunning in mass plantings!
