## Industry Gamechanger

### Basewell Calibrachoa

### Basewell Dahlia

### Basewell Lobularia

Basewell is an innovative new product that hybridizes the benefits of unrooted and rooted cuttings. With visible root development, it is more mature than a URC, making it possible to plant directly into a finish container.

## Save Costs

Basewell is an innovative product form which allows growers to bring in rooted cuttings from offshore at a fraction of the cost of rooted liners.

## Optimize Processes

Directly transplant into your finish container – no need for liner trays or propagation tunnels. Realize more production turns with less space.

## Save Labor

Transform your production from two steps into one. Without the need for labor intensive transplanting and moving trays, growers can direct stick Basewell rooted cuttings into their final container from the start.

## TRANSPLANT

- Plant Basewell young plants directly into the finished container. Avoid damaging roots during handling.
- Use the standard number of plants per container you normally use for that crop and pot size.

## GREENHOUSE ENVIRONMENT

1 – 7 days after transplant (until roots reach side of pot)	<ul style="list-style-type: none"> <li>• Avoid temperature extremes.</li> <li>• Maintain light levels at 500 (2500 footcandles)</li> </ul>
7 – 14 days after transplant	Increase light levels to 38,000 lux (3500 footcandles)
14 days after transplant	Adjust light level and temperature to the normal variety-specific finishing conditions.

## IRRIGATION

- Water in thoroughly after planting to moisten the growing medium and ensure there is a good soil to root contact.
- Continue with light irrigations until plant is fully hydrated and roots reach side of container. Then irrigate on normal finished plant schedule.

## FERTILITY

At planting	100 ppm N
After roots reach side of pot	Increase to finished recommended rate for genera and variety.
EC range	Start at 1.0 – 2.0 mS/cm based on Saturated Media Extract. Then increase as needed based on variety-specific finished production guidelines.
pH range	Genera-specific. Follow finished production guidelines.

### TIPS

1. Plant Basewell young plants upon receipt.
2. If you cannot plant upon receipt, keep Basewell young plants fresh by storing in cool conditions with high humidity until ready to transplant.
3. Avoid extreme conditions (high light and/or temperature) immediately after transplant through root development to the side of the container.
4. Once roots are to the side of the container, grow under normal finishing conditions for temperature, light, irrigation, fertilizer, pinching, and plant growth regulators.

# HOW TO PLANT BASEWELL™

## STEP 1

- ▶ Grab the stem above the cartridge to avoid damaging the roots. This ensures your fingers won't displace soil next to the roots during planting. This is critical to maximize root-to-soil contact.

## STEP 2

- ▶ Push the cutting into the media, with the top of the cartridge at soil level. Never use a pre-dibbled hole. This will cause air gaps between the roots and the media. Directly plant into the soil.

## STEP 3

- ▶ Drench plants thoroughly to ensure good root to soil contact. Plants should be protected with shade or misted for the first 3-5 days.

## THINGS TO AVOID

- ✗ **Do not create a dibble hole**, as it will leave too much air around the roots. Simply stick the cartridge into the soil like a dart.
- ✗ **Do not hold onto the cartridge.** Instead, grab the stem above the cartridge so that it makes direct contact with the soil and you avoid creating space around the cartridge.
- ✗ **Do not simply mist like a traditional unrooted cutting.** Soak in the plants so that the soil can penetrate the cartridge and adhere to the roots.

c o n f e t t i

G A R D E N

Get inspired for your next season of color and find the perfect combination of texture and tone to match. Perfectly designed for both containers and hanging baskets, look no further than our designer-inspired Confetti Garden combinations. Embrace an entire rainbow of options with trendsetting blends that work in sun, shade, or anywhere in between, and help your consumers create the stylish backyard staycation space that their yards deserve.

Confetti Garden combinations work together from the very beginning, allowing growers to stick cuttings together with perfectly matched cultural requirements. Then transplant your already combined rooted liners into the finished production container for an even blend of colors and textures that will continue to play well together.

## Bloomtastic

The Bloomtastic calibrachoa varieties have been numerous award winners as the most heat-tolerant calibrachoa available on the market today. These plants also boast excessive flower sizes and have a unique shimmer to the petals. Bloomtastic Blossoms and Summer Solstice are our top picks for summer-long flowering through the warmest summers.

### TikTok

The new TikTok calibrachoa lineup offers a fun and playful pattern with dark eye-catching centers topped with a bright sunny yellow starburst. These varieties have excellent vigor, making them well suited for combination containers and baskets where they will playfully mingle with each other, or our other top-performing annual varieties.

# POLLINATOR'S PARADISE

Today's consumers are looking for products that go beyond being simply neutral in their environment, but they crave products that will positively impact the nature around them. These eco-chic combination containers are a brilliant blend of annuals and perennials working in perfect harmony to naturally feed the pollinators in their gardens.

# Garden Party

## Pollinator's Paradise

One of the biggest consumer trends right now is purchasing products that have a positive impact on the environment around us. These Pollinator's Paradise combinations blend annuals and non-stop flowering perennials that actively feed the pollinating visitors in our gardens. Each combination is specifically designed to feed either bees, butterflies or hummingbirds.

# BETTER

Mix n'  
Match

# TOGETHER

The Better Together program from Dümmen Orange provides the easiest solution for growers to produce exciting combinations that offer a wide array of vibrant colors and go the distance for all-summer color.

Acting as an energetic anchor for the combinations, Great Falls coleus varieties blend seamlessly with 3 of our other top-performing heat-tolerant genetics for no-fail summer color. And with impeccable uniformity across all lines, growers can mix and match any varieties for combinations that turn out picture-perfect, time after time.

The following pages have some of our top recommendations for these easy duo combinations, but feel free to have fun and mix it up with any color combinations you enjoy.

# BETTER

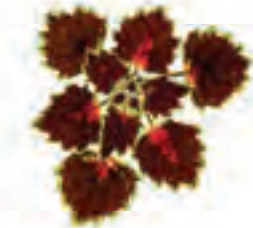

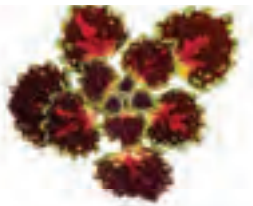

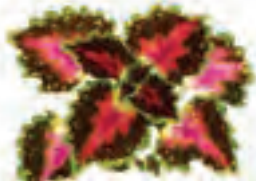

## Mix n' Match

### Big EEZE & Great Falls

# TOGETHER

## Big EEZE Geraniums + Great Falls Coleus love the sun

Big EEZE geraniums are an industry-leading interspecific series with outstanding flower size and all summer durability. They have a mounding habit perfect for hanging baskets and patio containers.

GERANIUM BIG EEZE Foxy Flamingo + COLEUS Great Falls Iguazu

GERANIUM BIG EEZE Dark Red + COLEUS Great Falls Yosemite

GERANIUM BIG EEZE Salmon + COLEUS Great Falls Angel

# I'CONIA Begonias + Great Falls Coleus love the sun and shade

I'CONIA begonias are an ideal choice for heat-loving combinations that thrive in both sun and shade locations. I'CONIA Miss varieties work best with Great Falls coleus for hanging baskets, with their cascading nature, while the Upright types are well suited for patio planters.

# I'CONIA

G A R D E N B E G O N I A

**I'CONIA begonias are the most luxurious series of hybrid begonias available for both sun and shade. Bred equally for foliage and flower, these exquisite plants make a dramatic statement in the garden, combination containers, and hanging baskets.**

**Now available in four distinct families to make programming and sizing your I'CONIA varieties easier.**

# I'CONIA

GARDEN BEGONIA

## A breakdown of the I'CONIA families by usage and size.

### I'CONIA BACIO

This is the newest family to the I'CONIA brand with naturally compact plants that are perfect for smaller container sizes. Compact plants with smaller, but with an abundance of, brightly colored flowers on dark, rich foliage.

*Ideal for 4-inch pots.*

### I'CONIA PORTOFINO

This is the most luxurious lineup of garden begonias available anywhere. Plants have a dark chocolate foliage color that provides a striking backdrop to the brightly colored double flowers. The plants have a mounded habit that works well in containers or in hanging baskets for dramatic statements in both sun and shade.

*Ideal for 6-inch pots.*

### I'CONIA UPRIGHT

Our most popular lineup for large containers and landscapes, these varieties have a distinctive upright habit with vivid colors on extremely dark foliage. They make fantastic additions to Garden Party combination planters, as well as mass landscape plantings where heat tolerance is needed.

*Ideal for 8-inch pots, upright deco containers, landscape.*

### I'CONIA MISS

This trio of Miss Malibu, Miss Montreal and the new Miss Miami are stunning additions for hanging basket programs. They have the rich fully double blooms of an I'CONIA begonia, but with an elegant cascading habit.

*Ideal for hanging baskets.*

# Begonia

## I'CONIA® Bacio

Bacio means “little kiss” and that’s exactly what these are, compared to our best-selling Portofino varieties. The I'CONIA Bacio lineup has the same vibrant blooms and exquisite foliage, but on naturally smaller plants, making them an ideal selection for quart containers or as a component in smaller combination planters.

### I'CONIA® Portofino

Portofino varieties are the most premium lineup of luxury garden begonias available. These interspecific varieties have plump, oversized double blooms, contrasted against the dark decadent chocolate foliage. These varieties are suitable in container sizes from quarts to 8-inch in the garden center, and will perform with ease in sun or shade for the gardener.

# Brachyschome

## Mauve Delight

This is the best mauve brachyschome and is a proven garden and landscape performer. It has a long flowering time, starting in very early spring and continuing throughout the entire gardening season. The plants start with a compact and rounded growth habit, but continue to send out suckering growth which helps it to be a more robust plant throughout the summer.

# DYNAMIC DAHLIAS FOR EVERY APPLICATION

## 1. Novation

Novation dahlias have innovated the early season market with a perfectly uniform series designed for grower programmability. All varieties flower within three days of one another and have full, very densely branched plants that are ideal for high-density production.

## 2. Starsister

The Starsister series are known for their visually striking blooms with bold bicolors and unique flower forms. These plants have a compact to medium vigor, ideal for quarts to 8-inch containers.

## 3. Temptation

Temptation dahlias are a real highlight with their jet-black foliage setting a dramatic background for the vividly colored and fully double flowers. The series is exceptionally uniform across colors with a mid-vigor for larger containers and combination planters.

# COMPACT >>

4

**4. Hypnotica**

The Hypnotica series brings growers a full range of colors on fully double flower forms. These medium to high vigor plants are ideal for larger container sizes and display fantastic garden performance throughout the summer.

**5. MegaBoom**

MegaBoom is our newest series that takes an extra-large flower size and places it right on top of the plant for an especially dramatic splash of color in large combination containers or in the front of the garden border.

6

**6. XXL**

XXL dahlias are an industry favorite with their oversized blooms towering above the plants on tall, elegant peduncles. These varieties are the most award-winning dahlias in summer trials across North America for their superior garden performance.

**7. Mystic**

The Mystic series is well-known for the rich black foliage accented with an abundance of single flowers, all with a dark disc, for maximum color contrast. Mystics have excellent vigor and are well suited for large landscape plantings.

7

> VIGOROUS

The Novation series of dahlias brings a new level of programmability and predictability for early flowering crops. The most uniform lineup of dahlias available today, all the Novation varieties flower within three days of one another and with perfectly matched habits and flower power across the series. These tidy and well-branched plants are excellent profit makers in high-density production capabilities and outstanding retail displays.

# Novation<sup>®</sup> Dahlias

**Compact plant structure is ideal for high-density production.**

**Very well-branched plants produce an abundance of color with loads of fully double flowers early in the season.**

**All varieties flower within 3 days of one another for a full color display at retail.**

**Rich dark green foliage makes flower colors pop on the bench.**

# GERANIUMS

Dümmen Orange offers a complete portfolio of geraniums with zonals, ivies, interspecifics, and novelties to fill every need. We're proud to provide the brightest colors, the most grower-friendly habits, and the best garden performance across these powerful lines.

Here are a few of our favorite series that we know you'll enjoy.

## **Big EEZE**

Hands down, the most impressive geranium for retail sales. This interspecific has the heat tolerance of an ivy, but with the classic look of a zonal with supersized flower power.

## **Brocade**

These AAS winning varieties have strong retail appeal with their unique foliage colors and lots of flower power. Use as an exciting component to combination containers and baskets.

## **Great Balls of Fire**

This is the most premium lineup of ivy geraniums available today. Large double flowers, rich glossy-green foliage, dense branching, and heat tolerance that cannot be beat.

### **Sarita**

This is our top pick for landscapers. The interspecific blood makes this our most heat-tolerant and weather durable series. The plants have a vigorous spreading habit to cover a lot of ground. The vibrant colors really pop against the dark green foliage.

### **Savannah**

A great pick for a premium zonal program, Savannah varieties have a deep dark-green foliage to set them apart on the bench. Savannah varieties are also recognized for their superior plant habits across the series.

### **Survivor**

The Survivor varieties are just that, a premium plant which will finish easily and lends itself to many container sizes and growing conditions. They have the classic lively foliage with the distinct zoning, showcasing the large flowers in bright colors.

These varieties are aptly named for their BIG blooms and EEZE production performance for the grower. The naturally well-branched plants produce a dense chassis and loads of flower power with colossal, oversized umbels, uniformly across the plant. While they have the interspecific breeding for intense heat tolerance, the breeding has maintained a very classic zonal look, providing a plant that consumers are familiar with, making more confident purchases in the garden center.

# Big EEZE<sup>®</sup> Geraniums

**The classic zonal habit and look that consumers are familiar with, making more confident purchases in the garden center.**

**Full canopy of flowers from the very beginning for stronger appeal at retail.**

**The biggest, most oversized blooms available on a geranium.**

**Interspecific breeding provides more heat and drought tolerance throughout the summer months.**

**SUN**   
**STANDING**  
*Outstanding Anywhere*

**The most uniform series of sun-tolerant impatiens, period.**

Uniformity across a series is something that all breeders strive for. With SunStanding Impatiens, we have achieved perfect uniformity for growers and gardeners through our innovative breeding techniques, creating new color expressions on genetically identical plants.

# Understanding the SunStanding Families

Our SunStanding series is organized into three families that are genetically identical across colors within each family, making predictability for the grower and landscaper a breeze.

*SunStanding Apollo*

## SUNSTANDING APOLLO

---

- Most adaptable family for all uses with the widest range of colors
- Excellent vigor appropriate for professional landscapers
- Quick Turn™ cuttings make production in small containers a breeze

This series is our most popular choice for large landscape installations, featuring intense pure colors on plants with exceptional vigor. Perfectly matched across the colors, landscapers can mix and match for designer and seasonal color combinations. The full sun and full shade tolerance of SunStanding varieties makes them a versatile option to use across all landscape beds.

*SunStanding Helios*

## SUNSTANDING HELIOS

---

- Compact habits are easy for smaller retail containers
- Innovative color options have high consumer appeal
- A profusion of flowers for maximum gardener satisfaction

For growers looking for varieties suitable to smaller containers, or landscapers needing a front-of-the-border option, the Helios family offers the same characteristics as Apollo varieties, but with a 20% smaller plant habit, smaller leaves, and smaller, but more prolific flowers.

*SunStanding Jazzy*

## SUNSTANDING JAZZY

---

- Vibrant tropical flair with variegated foliage
- Brightens up combination containers with both leaves and flowers
- Dramatic retail appeal on the bench

Jazzy varieties add dramatic flair to the program with a bright tropical look. With intense neon colored flowers on top of brilliant lemon-lime variegated foliage, these are showstoppers on the retail bench and in large combination containers. The decorative foliage of Jazzy varieties works equally well as an ornamental addition to combos, but with the added bonus of vibrant flowers throughout the summer.

IMPATIENS  
**SUNSTANDING® APOLLO**

## *Impatiens interspecific*

# SunStanding® Apollo

This series is our most popular choice for large landscape installations, featuring intense pure colors on plants with exceptional vigor. Perfectly matched across the colors, landscapers can mix and match for designer and seasonal color combinations. The full sun and full shade tolerance of SunStanding varieties make them a versatile option to use across all landscape beds.

Magnum New Guinea Impatiens set the standard for flower size and overall plant durability. The massive flowers come on early, allowing growers to ship well-toned crops with remarkable retail appeal. In the garden, these plants have a robust habit and continue to display masses of colossal-sized blooms throughout the summer.

# Magnum New Guinea Impatiens

**An astounding plant habit with numerous branches to provide maximum color in the garden.**

**Dark green ornamental foliage sets off the bloom colors in shady spaces.**

**Massive blooms are the largest on the market for maximum retail appeal.**

# *New Guinea Impatiens*

Simply put, the new Petticoat lineup is the most predictable and programmable new guinea series available on the market today. Combining the best and most uniform colors from the legacy series of Tamarinda and Petticoat and introducing many new genetics, this core series offers growers a full lineup of all standard colors and several unique novelty and star pattern varieties. These varieties respond early in the season to kickstart sales with an abundance of color on robust plant habits.

# Petticoat New Guinea Impatiens

**A wide range of unique novelties including frosted and star patterns adding excitement to the program.**

**An abundance of flower power early in the season for color packed plants at retail.**

**A robust plant habit suitable for all container sizes from quarts to gallons and even hanging baskets.**

**Full range of solid colors, including the best white and best red in the class, for big volume sales.**

# ROLLER COASTER

***NEW GUINEA  
IMPATIENS***

**A Wild Ride For  
Shade Gardens**

Roller Coaster varieties are a new and unique series of New Guinea Impatiens. They not only boast a large flower with double the petals, but each petal has a ruffled margin, like the tracks of a roller coaster. This creates a much more three-dimensional effect in the garden.

# New Guinea Impatiens

## Roller Coaster

These are just plain fun – this unique series boasts huge flowers with double petals, and each petal is ruffled up and down like the tracks of a roller coaster.

LANTANA  
**HEARTLAND Neon**

## *Lantana*

### Heartland

Heat loving, well branched Havana Heartland varieties bring 30% more vigor compared to standard Havana series. Same large umbels and dark, glossy foliage on a very uniform new series. Pollinator friendly, great for landscape as well, mixed with other genera for container plantings especially in Southern regions where gardening is an extreme sport.

# PETUNIAS SIZED TO PERFECTION

With the world's most extensive collection of petunia varieties, there is no shortage of options to build a dynamic petunia program.

**Potunia**

**Origami**

**Potunia Plus**

**Peppy**

**Pinkerbelle**

**Sweetunia**

**Surprise**

**Surprise Sparkle**

**DuraBloom**

COMPACT >>> VIGOROUS

With so many petunia options available, we wanted to highlight a few of our favorite new and best-selling varieties here:

### **Potunia Starfish**

Definitely one of our most popular varieties to be introduced in recent years, Starfish has a fun and playful pattern that always gets noticed at retail. This plant has a pot perfect habit with densely packed, strong branches that fill out containers and baskets beautifully.

### **Pinkerbelle**

This new one-off variety was a big hit in our summer trials with a fun display of bicolor semi-double blooms that stay looking fresh throughout the summer season. This mid-vigor variety will be perfect for containers or baskets.

### **Sweetunia Suzie Storm**

One of the top picks in our Sweetunia lineup known for their abundant flower power and mid-vigorous upright mounding habit. This variety makes quite a show on the bench or blended into combination containers.

### **Surprise Sparkle Red**

A real standout at retail, this is the first true red on the market with a stable, star-studded pattern. A more vigorous series, Surprise varieties are best suited for baskets or large combination containers.

### **DuraBloom Royal Pink**

The world's first interspecific petunia, DuraBloom is winning the hearts of growers and landscapers for the most unstoppable performance in its class. This plant is the perfect combination of tough and pretty for the most durable landscape plantings.

# DURA bloom

The industry's first interspecific petunia series. DuraBloom is the world's most durable and floriferous petunia series for year-round performance through a multitude of weather conditions. DuraBloom varieties are very vigorous, with mounding habits that can reach up to 2-feet in height in the landscape and will trail over the edges of baskets and containers. They are remarkable landscape plants and are outstanding in large containers. The interspecific cross-produced root system is unstoppable in summer conditions, taking on heat and drought stress with ease. And like any of the Dümme Orange family of petunias, DuraBloom varieties are daylength neutral, so year-round production and sales are feasible.

**Interspecific breeding yields the strongest root structure in its class for the best summer performance in any petunia**

**Daylength neutral for countless year-round blooms**

**The shrubby plant habit works as both a filler and spiller in large containers or in the landscape**

**Medium-sized blooms with extra-thick petals are not affected by rain or irrigation**

Sweetunia varieties have become a grower and retailer favorite with a full habit that boasts a profusion of brightly colored and uniquely patterned blooms. The series is known for medium upright habit and vigor, making them ideal for several container sizes and to be used as fillers in combination containers. The unique novelty bloom colors are sure winners on the retail bench.

# Petunia Sweetunia

**Full well-branched and upright habits display an abundance of flower power in containers and combinations.**

**Unique novelty flower patterns available in the series are big consumer favorites.**

**Medium-sized blooms hold up well to summer rains for great garden durability.**

Empress Sun are the most vigorous, heat-loving, and mildew-tolerant verbena available. While always great in containers, this interspecific series was truly designed for the most impressive landscape displays. The interspecific breeding has yielded a dark, glossy green leaf with best-in-class mildew tolerance, paired with exceptional vigor, to fill big spaces for long term performance.

# Empress<sup>®</sup> Sun Verbena

**An extremely vigorous horizontal plant habit; fills large spaces in the landscape.**

**Dark green foliage with the strongest mildew tolerance on the market.**

**Oversized flower umbels add rich color to large containers and landscapes all summer long.**

# Freaky Leaves

**Because flowers can't have all the fun, we've put together a collection of our favorite foliage and fillers to add drama and intensity to your combinations and**

**landscape plantings. Our Freaky Leaves varieties have superb durability, and you will be utterly amazed by the stunning garden performance they deliver from spring into fall.**

ALTERNANTHERA  
Little Ruby

## Alternanthera

### Various

We love alternanthera for its colorful foliage and its versatility both indoors and out. It's a popular groundcover and used in mixed combinations where hot weather durability is a must. But these varieties are also fantastic as interior foliage items. Outdoors, these low-growing varieties of alternanthera are useful as an edging plant, or the front of the border.

# Coleus

## Great Falls®

Great Falls coleus are the perfect addition for mixed containers and hanging baskets, in both sun and shade. The structure of these plants provides a great chassis for other annuals to blend with for a perfect balance of flowers and foliage. All varieties are mutations of one another, making them perfectly uniform across the series.

# BETTER TOGETHER

The easiest combinations you'll ever grow!

Time after time, our Better Together combinations of Great Falls coleus with Big EEZE geraniums, l'Conia begonias, or Magnum new guinea impatiens make an energetic blend of flower and foliage that goes the distance for the consumer.

Learn all about  
this dynamic  
mix-and-match  
program on  
page 72.

# Rich Color

**The Main Street series of coleus are the industry standard for garden and landscape performance. This is the only series available for full sun or full shade performance with large full-figured habits and very late flowering for maximum endurance in the garden.**

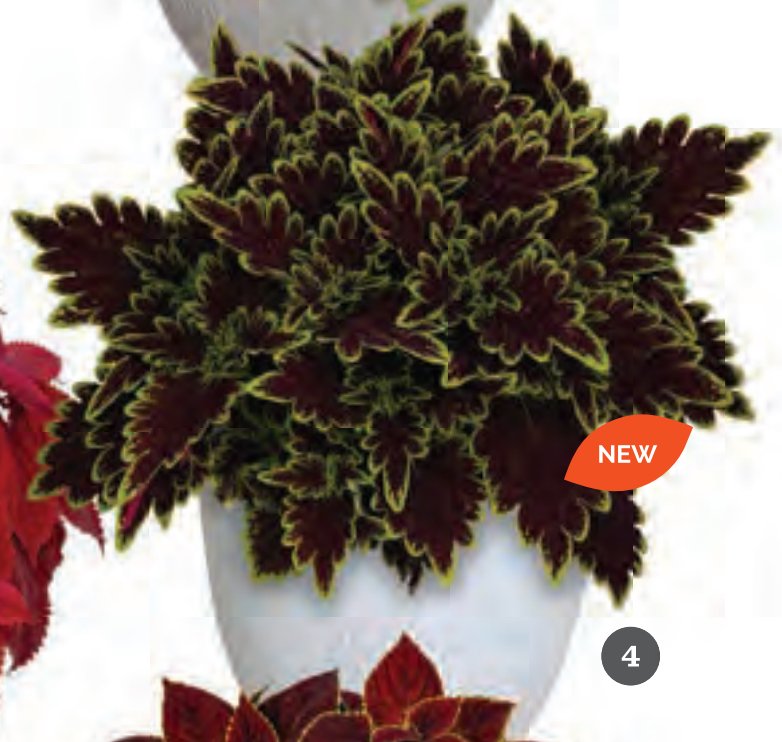

*“The first-ever coleus to be named an AAS Winner! Main Street Beale Street coleus is an outstanding variety exhibiting deep red foliage that holds its color extremely well in the garden. The rich color doesn’t fade, bleach or get spotty as the season moves into late summer. The lush, bushy plant grows uniformly and as a huge bonus, does not flower until very late in the season—up to 6 weeks later than the comparisons! A unique feature of this coleus is that it can be successfully grown anywhere from full sun to full shade, making it an ideal foliage item for anywhere in the garden. Growers, retailers, landscapers and homeowners will all appreciate the beautiful color and uniform height of this coleus.”*

# Tradescantia

Tradescantia  
**Tradescantia Sanna**  
 86609

## Sanna

Sanna is the goddess of the sea. This Tradescantia has attractive, green foliage striped with white veining. When planted in hanging containers, the beautiful foliage cascades down with an attractive trailing habit.

## Zebrina

With silver and burgundy bicolor foliage, Zebrina is beautiful and has a unique color and pattern, works well in all container sizes for all indoor plant programs.
