

Breeze®

Dianella caerulea 'DCNCO' (b)

STRAPPY LEAF PLANTS

Breeze® Dianella is a tidy, 'no cane' variety of *Dianella caerulea*.

- Common Dianella has tall, messy canes that fall. The Breeze® plant doesn't have above ground messy canes.
- Breeze® Dianella is a tough ground cover plant that is 40% larger than Little Jess™ Dianella. The Little Jess™ and Lucia™ plants are more drought tolerant than Breeze® Dianella. It also needs more nutrition in the soil compared to Little Jess™ and Lucia™ Dianella.
- It will discolour less than most *Dianella caerulea* types in winter in Canberra.
- It is very fast establishing and may need trimming after 1-3 years, then every 4-6 years after the first trimming.
- Its underground rhizomes spread well, filling out gaps and outcompeting weeds.
- Breeze® Dianella is good for erosion control and tolerates humidity, cold and is moderately drought tolerant.
- It needs adequate water through the summer months in WA and SA.

Description	Free flowering, dark green foliage
Density	4-6 plants per m ² 2-3 per linear metre
Height & Width	60-70cm x 60-70cm
Flowering	Pale blue flowers from Sep-Nov
Best Planting Time	March-October
