Azara: Illustrated details of this genus, we hold a National Plant Collection awarded by - Plant Heritage

Plant Heritage is a world leading garden plant conservation and research charity.

Their mission is conservation of cultivated plants in the British Isles.

**Azara lanceolata**

# Introduction

We are a small plant nursery in North Herefordshire specialising in growing and supplying plants from the Southern Hemisphere mainly Chile and Argentina.

The plants grown at the nursery are suitable for our geographical location, we are here to promote and reintroduce some unusual and rarely grown species and to help demonstrate their individual form and growth characteristics with a small arboretum open for visits.

To order a plant please contact us via email or phone. Plants are available for collection (North Herefordshire) or we can pack and post at cost, we usually send via Parcel Force.

## The Arboretum

Individuals and / or small groups are invited to book a guided tour around the arboretum allowing an opportunity to ask questions about individual species. The tour will give a brief explanation of their horticultural and historical background, touching on the plant explorers involved and how they were brought into cultivation. The Azara genus have National Plant Collection Status awarded by Plant Heritage. Please call or email to arrange a time / day that suits.

## A

<p><b>Araucaria araucana</b></p> <p>1L £10</p>		<p>Iconic medium to large tree up to Ht.20m. (<b>Monkey Puzzle</b>). Initially slow growing, an upright tree producing regular tiers of branches with rigid spine tipped, glossy green leaves. An endangered native of the Chilean and Argentinian Andes. Hardy and wind firm, grows best in moist, well drained soil.</p>
<p><b>Alstroemeria lutea</b></p> <p>P9 £ (not available at present)</p>		<p>A hardy perennial from northern Chile. Flower stems up to 80cm carry loose clusters of yellow flowers spotted or streaked with red in summer. Flowers are good for cutting. Needs a well-drained soil in sun or light shade.</p>
<p><b>Amomyrtus luma</b></p> <p>2L £12.50</p>		<p>A large, dense evergreen shrub, native of Chile. Dark green leaves with reddish stalks are conspicuously copper-coloured when young. Fragrant white flowers in May followed by berries that start red and ripen to black. Plant in a sheltered position in a moist, well-drained soil in partial shade. Hardy to -10C.</p>
<p><b>Aristolelia chilensis</b></p> <p>2L £10.00</p>		<p>An interesting evergreen shrub from the Valdivian rainforest of Chile and adjacent Argentina, up to 3m x 3m. Lustrous green leaves up to 13cm long with reddish petioles on reddened stems. Small black fruits in autumn. Best in mild areas or well sheltered sites, in full sun or light shade in moist, well-drained soil.</p>
<p><b>Astelia nervosa 'Red Devil'</b></p> <p>1-2L £7.50</p>		<p>A hardy clump-forming perennial with upright sword-like metallic-red leaves to 60cm. Plant in a moist, well-drained soil in sun or partial shade. A good container plant for the patio.</p>
<p><b>Austrocedrus chilensis</b> (not available at present)</p>		<p>A slow growing, small columnar tree Ht. 12 - 15m. A beautiful species with foliage carried on frondose sprays. Native of Chile and Argentina found throughout the transition zone between the temperate rain forests and the Patagonian steppe.</p>
<p><b>Azara dentata</b></p> <p>2L £12.50</p>		<p>A medium-sized evergreen shrub of 3m x 3m, native of Chile, for mild or sheltered gardens. The rigid leaves are matt-green above and grey-felted beneath. The fragrant yellow flowers are borne in late spring and early summer. Plant in a moist, well-drained soil in sun or partial shade in a warm, sheltered position or against a wall. Hardy to -5 - -7 C. A good conservatory plant.</p>

<p><b>Azara integrifolia 'Variegata'</b> <i>(not available at present)</i></p>		<p>A medium sized evergreen shrub of 3m x 3m with small, rounded dark green leaves edged pale- pink and cream, raised at Kew in about 1870. Clusters of fragrant chrome-yellow flowers in late winter and early spring followed by white berries. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Can be trained on a wall in colder areas. Hardy to -10C</p>
<p><b>Azara lanceolata</b> 2L £12.50</p>		<p>A medium - sized or large shrub of 4m x 3m, native to Chile and Argentina, with narrow, bright green foliage. Small vanilla-scented, mustard-yellow flowers borne in profusion in April and May. Grow in a moist, well-drained soil in sun or partial shade. Shelter from cold winter winds or grow as a well-shrub.</p>
<p><b>Azara microphylla</b> 2L £12.50</p>		<p>The hardiest species of Azara. Native of Chile and the borderlands of Argentina. An elegant, evergreen small tree or large shrub upto Ht. 6m. Clothen with sprays of very dark green small leaves. Clusters of deep yellow, vanilla scented flowers appear in spring. Requires a sheltered site in full sun or partial shade. Plant in any moist, well drained soil. Makes a good wall shrub.</p>
<p><b>Azara microphylla 'Albovariegata'</b> 2L £12.50</p>		<p>A variegated form of the hardiest species of Azara. An elegant evergreen shrub to 5m. The sprays of small dark green leaves are broadly edged white. Clusters of deep-yellow vanilla-scented flowers in spring. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained shrub.</p>
<p><b>Azara microphylla 'Gilt Edge'</b> 2L £12.50</p>		<p>A variegated form of the hardiest species of Azara. An elegant evergreen shrub to 5m. The sprays of small dark green leaves are broadly edged creamy-white with a pink tinge. Clusters of deep-yellow vanilla-scented flowers in spring. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained shrub</p>
<p><b>Azara microphylla 'Variegata'</b> 2L £12.50</p>		<p>A variegated form of the hardiest species of Azara. An elegant evergreen shrub to 5m. The sprays of small dark green leaves are edged creamy-white. Clusters of deep-yellow vanilla-scented flowers in spring. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained shrub.</p>
<p><b>Azara patagonica</b> 3L £12.50</p>		<p>A rare species of Azara found in Chile. An evergreen shrub Ht. 2.5 m x S 2.5m with glossy, tooth edged leaves, clusters of fragrant yellow flowers appear in late spring and summer. Needs a sheltered site in full sun or light shade. Any well drained moist soil. A good wall shrub or conservatory plant.</p>
<p><b>Azara petiolaris</b> 3L £12.50</p>		<p>An evergreen shrub to 2.5m from central Chile. (Hardy -7 to -10°C). Extremely fragrant small yellow flowers in spring. Leathery dark-green leaves with sharply pointed teeth with reddish petioles. Needs a sheltered site in sun or light shade and moist, well drained soil. Good as a wall shrub.</p>
<p><b>Azara serrata</b> 3L £12.50</p>		<p>Endemic to Chile. An evergreen shrub with shiny oval serrate leaves Ht. 2.5m x 2.5m. Dense spherical clusters of very fragrant yellow flowers appear over summer and autumn. Requires a sheltered site in full sun or light shade. Any well drained moist soil. A good wall shrub.</p>

For prices and availability please call 07966 580812 or email [info@paviouranddaviesplants.co.uk](mailto:info@paviouranddaviesplants.co.uk)

<p><b>Azara integrifolia</b></p> <p>2L £12.50</p>		<p>A medium sized evergreen shrub of 3m x 3m, native of Chile and Argentina. Clusters of fragrant chrome-yellow flowers in late winter and early spring followed by white berries. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Can be trained on a wall in colder areas. Hardy to -10C</p>
<p><b>Azara uruguayensis</b></p> <p>2L £12.50</p>		<p>A medium-sized to large shrub of 4m x 3m, native to Uruguay and Brazil. Leaves are oblong, up to 10cm long and bronze-tinted when young. Small yellow flowers in drooping spikes in early spring. Needs a warm, sheltered site or protection from a wall and moist, well- drained soil. Sun or partial shade</p>
B		
<p><b>Berberis chilensis</b></p> <p>2L £7.50</p>		<p>An evergreen shrub from central Chile. Elliptic to ovate lanceolate leaves 5cm long x 2.5cm wide with up to 5 spine-tipped teeth. Thorns up to 5cm singularly or in 3's. Racemes of lemon-yellow flowers are followed by spherical matt-blue fruits. Plant in a sheltered, sunny position in a moist, well drained soil. Protect from cold, drying winds. Hardy to -5 to -8C</p>
<p><b>Berberis darwinii</b></p> <p>2L £ <i>(not available at present)</i></p>		<p>A medium-sized evergreen shrub of 2m x 2m, native of Chile and Patagonia with dark glossy-green, toothed leaves. Drooping clusters of bright orange, tinted red flowers in spring and early summer are followed by clusters of blue berries. Grow in any reasonable soil in sun or partial shade. Discovered by Charles Darwin and introduced by William Lobb.</p>
<p><b>Berberis darwinii 'Compacta'</b></p> <p>5L £9.50</p>		<p>Evergreen shrub of 1m x 1m of compact, dense, bushy habit. 3-pointed dark shiny green leaves, drooping clusters of bright orange, red-tipped flowers through spring followed by blue-black berries. Plant in any reasonable soil in sun or partial shade.</p>
<p><b>Berberis empetrifolia</b></p> <p>2L £7.50</p>		<p>A dwarf semi-evergreen shrub of 0.4 x 1m, native of Chile and Argentina. Slender, arching stems bearing narrow leaves with rolled edges. Small golden yellow flowers in May followed by blue-black berries. Well suited to the rock or scree garden. Needs a well drained lime-free soil in sun or light shade.</p>
<p><b>Berberis microphylla</b></p> <p>2L £7.50</p>		<p>A medium-sized evergreen shrub endemic to the Patagonian regions of Argentina and Chile. Small dark-green spiny-tipped leaves. Flowers deep orange-yellow in April and May are followed by purple-blue berries. Moist, free-draining soil in full sun.</p>
<p><b>Berberis microphylla 'Pygmaea'</b></p> <p>2L £7.50</p>		<p>A slow growing, dense evergreen shrub to 60cm, with dark green rounded leaves, grey beneath Thorns are much reduced. Yellow flowers in spring followed by purple berries in autumn. Grow in any moist, well drained soil in sun or semi-shade.</p>
<p><b>Berberis sieboldii</b></p> <p>2L £7.50</p>		<p>A compact, suckering, deciduous shrub native to Japan (1.3 x 1.3m). The oval, mid-green leaves borne on reddish stems turn radiant orange and red in the autumn. Pale yellow flowers in April-May are followed by shiny orange-red fruits. Moist but well drained soil in full sun. Superb for autumn colour.</p>

<b>Berberis x stenophylla</b> 2L £7.50		
<b>Besconneria yuccoides</b> 2L £7.50		An evergreen yucca-like perennial . the sword-shaped leaves are grey-green. Tall, arching pink-red flower stems up to 2m carry drooping racemes of green flowers shading to red at the base on established plants . Plant in full sun in a free draining soil. Remarkably hardy given adequate drainage, or grow as a container plant and over-winter under cover.
<b>Besconneria yuccoides 'Quicksilver'</b> 2L £7.50		An evergreen yucca-like perennial . the sword-shaped leaves are grey-green with a silvery sheen. Tall, arching pink-red flower stems up to 2m carry drooping racemes of green flowers shading to red at the base on established plants . Plant in full sun in a free draining soil. Remarkably hardy given adequate drainage, or grow as a container plant and over-winter under cover.
<b>Bomarea edulis (syn. B. hirtella)</b> 2L £12.50		A tuberous, deciduous, twining perennial climber to 2m from Central and South America. Clusters of bell-shaped flowers, pale red or pink outside, green and yellow with dark red markings on the inside borne from early summer into autumn. Grow under glass in bright light but not full sun in a well-drained compost, or outside in a container and overwinter under cover.
<b>Bomarea salsilla</b> 2L £12.50		A tuberous, deciduous twining perennial climber to 2m from Chile. Clusters of dark pink or purple tubular flowers with blue and dark purple markings in early summer. Grow in a moist, well-drained soil over a support or through a shrub. A mulch applied once the stems have died down will help protect the crown and tubers. Alternatively in a conservatory or container and overwinter under cover.
<b>Buddleja globosa</b> 2L £12.50		An erect, large (4m x 4m) semi-evergreen shrub from the Andes of Chile, Peru and Argentina. Lance-shaped dark-green leaves are carried on quadrangular stems. Orange-yellow ball-like, honey-scented inflorescences 2.5 cm across are borne in profusion in early summer. Grow in a moist but well drained soil in sun or semi-shade.
<b>C</b>		
<b>Caesalpinia spinosa</b> 2L £15.00		A strong-growing shrub from northern Chile and Peru. Evergreen, with bi-pinnate mid-green leaves and spines on the stems. Elegant pea-like yellow-orange flowers with red flecking in 20cm long panicles in summer. A plant for a warm, sheltered site, best against a sunny wall in a well drained soil.
<b>Ceanothus papillosus</b> 2L £7.50		An upright evergreen shrub to 3m from California with comparatively long, narrow leaves with a warty surface and are sticky to the touch. Rich blue flowers in profusion during late spring-early summer. Discovered by David Douglas and introduced by William Lobb. Plant in a sunny position with shelter from cold winds in any reasonable free-draining soil. One of the less hardy species.
<b>Colletia hystrix (syn. C. armata)</b> 2L £12.50		A robust shrub of 2.5 x 2.5m, native of Chile and N. Argentina. An almost leafless shrub, the stems bear strong, stout spines. The branches are crowded with small, fragrant, white flowers during late summer and autumn. Plant in a well-drained soil in full sun and sheltered from cold winds.

<p><b>Colletia hystrix 'Rosea'</b> (syn. <i>C. armata</i> 'Rosea')</p> <p>2L £12.50</p>		<p>A robust shrub of 2.5 x 2.5m. An almost leafless shrub, the stems bear strong, stout spines. The branches are crowded with small, fragrant, white flowers opening from pink buds during late summer and autumn. Plant in a well-drained soil in full sun and sheltered from cold winds.</p>
<p><b>Colletia spinosissima</b></p> <p>2L £12.50</p>		<p>A spiny, almost leafless shrub to 2m x 2m, native to Chile, Argentina and Ecuador. Fragrant white flowers are produced in late spring and summer. Best in a sheltered sunny position in moist but well drained soil.</p>
<p><b>Crinodendron hookerianum</b></p> <p>2L £7.50</p>		<p>A large, dense evergreen shrub Ht. 5m x S. 3m. Native to the Valdivian rain forests of Chile. In May - June it becomes a wonderful spectacle, with it's long stalked, fleshy crimson flowers hanging like lanterns in abundance. Requires a lime free soil moist and free draining. It appreciates light shade.</p>
<p><b>Crinodendron hookerianum 'Ada Hoffmann'</b></p> <p>2-3L £7.50 Not available at present</p>		<p>A medium sized evergreen shrub with narrow, lanceolate leaves Ht. 3m x S. 3m. In May - June it becomes a wonderful spectacle, with it's long stalked, fleshy pale - pink flowers hanging like lanterns in abundance. A direct clone of the red Chilean Lantern tree selected in the wild within the Valdivian rain forests of Chile. Requires a lime free soil moist and free draining. It appreciates light shade.</p>
<p><b>Crinodendron patagua</b></p> <p>2L £7.50 5L £15.00</p>		<p>A medium sized evergreen shrub / small tree Ht. 3m x S. 3m. Dark green, glossy ovate leaves. Fragrant, fringed, bell shaped flowers borne in late summer. Hardy to -5 degrees C, best grown as a wall shrub. It requires a lime free soil, moist and well drained soil. Native of the Andes in central and southern Chile.</p>
<p><b>Cupressus dupreziana var. atlantica</b> (syn. <i>C. atlantica</i>)</p> <p>2L £15.00</p>		<p>A narrowly conical, hardy conifer, native of Morocco where it is now critically endangered, with some trees 2500 years old. Grow in any reasonable, well-drained soil in sun or partial shade with some shelter from cold, drying winter winds.</p>
<b>D</b>		
<p><b>Desfontainea spinosa</b></p> <p>2L £12.50</p>		<p>An evergreen shrub with small, holly-like leaves, slowly reaching 1.8m, from South America. First introduced from Chile by plant collector William Lobb. The pendent tubular flowers borne in the summer and autumn are scarlet with a yellow-orange mouth. Grow in a sheltered position in semi-shade in a lime-free, moist but well drained soil.</p>
<p><b>Discaria serratifolia (Vent.) B. &amp; H. ex Masters</b></p> <p>2L £12.50</p>		<p>A medium-sized deciduous shrub of 3m, native of Central and Southern Chile and Argentina. Lustrous green leaves on drooping branches with paired 2cm long thorns. Fragrant, white flowers in crowded fascicles borne on the previous year's wood in early summer. Plant in well drained soil in a sunny, sheltered position with shelter from cold, drying winds.</p>
<p><b>Drimys winteri</b></p> <p>2L £12.50</p>		<p>A small slender, conical tree Ht.7-8m. A native to the Magellanic and Valdivian temperate rain forests Chile and Argentina, where it is seen as a dominant species of the evergreen coastal forests. Evergreen leathery, aromatic leaves and clustered fragrant star shaped white flowers with yellow creamy centres are borne April - May. Sun or light shade, any moist well drained soil. Hardiness to - 10 degrees C</p>

# E

<p><b>Elymus magellanicus</b></p> <p>2L £5.00</p>		<p>A tufted deciduous grass, native to the mountains of southern Chile and Argentina. Slow growing, it forms dense clumps of vivid-blue to 40cm x 50cm. Plant in a moist, well-drained soil in full sun for best leaf colour. Good for rock gardens and raised beds.</p>
<p><b>Embothrium coccineum (Chilean fire tree)</b> not available at present</p> <p>3L £15.00</p>		<p>An erect semi-evergreen tall shrub or small tree introduced from Chile by first introduced by William Lobb. Brilliant orange-scarlet flowers in May – June. Needs a moist but well drained, lime-free soil, in a warm, sheltered position in sun or semi-shade with protection from cold winds.</p>
<p><b>Escallonia illinita</b></p> <p>5L £12.50</p>		<p>A tall evergreen shrub up to 3m high native to Chile with aromatic glandular shots bearing large glossy-green leaves. Panicles of fragrant white flowers during summer and autumn. Well drained soil in sun or light shade. Drought tolerant, but shelter from cold winds.</p>
<p><b>Escallonia 'Iveyi'</b></p> <p>2L £7.50</p>		<p>A strong-growing evergreen shrub of 3m x3m with glossy dark green leaves and large panicles of white flowers in summer and autumn. Originated as a seedling at Caerhays Castle, Cornwall and named for a gardener there. Grow in a fertile, well-drained soil in a sunny position sheltered from cold winds.</p>
<p><b>Escallonia pulverulenta</b></p> <p>2L £7.50</p>		<p>A fast growing evergreen shrub up to 2.5 m high from central Chile. Needs a mild, sheltered site (hardy -7 to -10°C) in full sun and shelter from cold winds. Can be grown as a wall shrub. Leathery glossy green toothed leaves and panicles of white flowers in late summer and autumn.</p>
<p><b>Escallonia resinosa</b></p> <p>5L £12.50</p>		<p>An evergreen shrub or small tree of 5m x 3m, although can be readily trimmed to size/shape from Chile and Peru. Reddish-pink pubescent shoots and shiny-green, sticky, toothed leaves. Notable for its curry- like aroma, particularly in humid conditions or following rain. White flowers in spring and early summer. Grow in moist, well-drained soil in a sunny position.</p>
<p><b>Escallonia revoluta</b></p> <p>5L £12.50</p>		<p>An evergreen shrub of 2-3m in cultivation, native to Chile. The shoots and toothed leaves are covered in a grey tomentum. Terminal racemes of soft-pink to white flowers are borne from August to October. Grow in a sheltered position or with wall protection in a moist but well-drained soil.</p>
<p><b>Escallonia rubra var. macrantha</b></p> <p>2L £7.50</p>		<p>A strong-growing evergreen shrub to 4m from Chile with glossy dark green, aromatic leaves. Panicles of rose-crimson flowers in summer. Grow in a fertile, well-drained soil in a sunny position sheltered from cold winds. Excellent as a coastal hedging plant.</p>
<p><b>Escallonia virgata</b></p> <p>2L £7.50 5L £15.00</p>		<p>A deciduous shrub Ht 2m x S 2m with graceful, arching branches bearing small glossy, dark green leaves. Raceames of pure white flowers appear June - July. A native of southern Chile and Argentina growing upto the tree line and found as far south as the Magellan Straits, it is the hardiest of the Escallonias. Not for chalky soil.</p>

# F

<p><b>Fabiana imbricata</b></p> <p>2L £7.50</p>		<p>An upright medium-sized heath-like evergreen shrub of 1.5 x 1.5m, native of Chile and Argentina. Plumes of white tubular flowers borne during the summer. Grow in a well-drained soil in a sunny position and with shelter from cold, drying winds.</p>
<p><b>Fabiana imbricata 'Prostrata'</b></p> <p>2L £7.50</p>		<p>A low-growing, mound-forming heath-like evergreen shrub of 0.6 x 1m. Plumes of pale mauve-tinted tubular flowers borne during the summer. Grow in a well-drained soil in a sunny position and with shelter from cold, drying winds. Hardier than the species and ideal for a larger rock garden or wall top.</p>
<p><b>Fabiana imbricata f. violacea</b></p> <p>2L £7.50</p>		<p>An upright medium-sized heath-like evergreen shrub of 1.5 x 1.5m, native of Chile and Argentina. Plumes of lavender-mauve tubular flowers borne during the summer. Grow in a well-drained soil in a sunny position and with shelter from cold, drying winds.</p>
<p><b>Fascicularia bicolor</b></p> <p>2L £7.50</p>		<p>An evergreen perennial forming rosettes of toothed, mid to dark green linear leaves, up to 50cm long. In summer, mature rosettes develop a dense central cluster of pale blue flowers surrounded by white bracts, at which time the inner-most leaves turn bright scarlet. Native of central Chile. Grow in full sun in a free-draining soil.</p>
<p><b>Fitzroya cupressoides</b></p> <p>2L £15.00</p>		<p>A graceful cypress like conifer with descending branches. Ht. 15m x 6m. Slow growing and hardy but best sheltered from strong winds. Any moist well drained soil. Endangered in it's native temperate rain forests of Chile and Argentina.</p>
<p><b>Francoa appendiculata</b></p> <p>2L £5.00</p>		<p>Hardy, evergreen clump-forming perennial (0.3 x 0.3m) with deeply-lobed leaves and tall spikes (90cm) of pale-pink flowers, each petal with a dark-pink central stain, throughout summer and autumn. Moist, well-drained soil in sun or partial shade. Endemic to Chile.</p>
<p><b>Francoa sonchifolia</b></p> <p>2L £5.00</p>		<p>Hardy, evergreen clump-forming perennial (0.3 x 0.3m) with deeply-lobed leaves. Tall spikes (70cm) of shell-pink flowers, each petal with a red-pink centre, throughout summer and autumn. Moist, well-drained soil in sun or partial shade. Endemic to Chile.</p>
<p><b>Fuchsia magellanica var. gracilis</b></p> <p>2L £5.00</p>		<p>A graceful shrub with slender, arching stems. The small scarlet and violet flowers are freely borne through summer and autumn, the sepals being unusually long and slender. Grow in full sun or partial shade in a moist, well-drained soil.</p>
<p><b>Fuchsia magellanica var. molinae</b></p> <p>2L £5.00</p>		<p>A hardy fuchsia with graceful arching branches and lance shaped soft green leaves Ht. 1m x 1m. Abundant pale pink flowers appear throughout late summer. Moist, fertile soil in full sun or light shade. Suitable for containers. Shelter from cold winds and apply a deep mulch pre-winter. First collected from the island of Chiloe, Chile.</p>

<p><b>Fuchsia magellanica 'Pumila'</b> 2L £5.00</p>		<p>A dwarf cultivar that makes a robust, dense plant up to 60cm high. Small, narrow red and purple flowers borne throughout summer and autumn are prominent against the dark green foliage. A good plant for the front of a border or path edge. Plant in any moist, well-drained soil in sun or partial shade.</p>
<p><b>Fuchsia magellanica 'Versicolor'</b> 2L £5.00</p>		<p>A small shrub of spreading habit with slender stems. The leaves are grey-green, rose-tinted when young and irregularly variegated with cream and pink when mature. The pendant flowers, borne through summer and autumn have a scarlet calyx and violet petals. Grow in full sun or partial shade in a moist, well-drained soil.</p>

## G

<p><b>Gaultheria insana</b> 2L £10.00</p>		<p>An upright evergreen shrub up to 0.5m. White flowers borne April- June. The flowers are hermaphrodite so self-pollinates to produce ornamental brownish-red fruits. A native of S. Chile and Argentina, it requires a moist, lime-free soil and grows best in dappled shade. First introduced by Standish &amp; Noble's nursery in the mid-1800's but has always been rare in cultivation.</p>
<p><b>Gaultheria mucronata 'Alba'</b> 2L £5.00</p>		<p>The Prickly Heath from the Magellan Straits of Chile is hardy, dwarf evergreen shrub with wiry stems to 60-90cm. Small bell-shaped white flowers in May and June are followed by white fruits with a faint pink tinge which deepens with age. Best planted in groups or with a male form for pollination. Plant in a lime-free, moist but well drained soil in sun or partial shade.</p>
<p><b>Gaultheria mucronata 'Cherry Ripe'</b> 2L £5.00</p>		<p>The Prickly Heath from the Magellan Straits of Chile is hardy, dwarf evergreen shrub with wiry stems to 60-90cm. Small bell-shaped white flowers in May and June are followed by large bright, cherry-red fruits. Best planted in groups or with a male form for pollination. Plant in a lime-free, moist but well drained soil in sun or partial shade.</p>
<p><b>Gaultheria mucronata 'Mascula'</b> 2L £5.00</p>		<p>The Prickly Heath from the Magellan Straits of Chile is hardy, dwarf evergreen shrub with wiry stems to 60-90cm. Small bell-shaped white flowers in May and June. This is a non-fruiting male form but is prolific in flower. Plant in a lime-free, moist but well drained soil in sun or partial shade.</p>
<p><b>Gaultheria mucronata 'Rosea'</b> 2L £5.00</p>		<p>The Prickly Heath from the Magellan Straits of Chile is hardy, dwarf evergreen shrub with wiry stems to 60-90cm. Small bell-shaped white flowers in May and June are followed by large light-pink fruits. Best planted in groups or with a male form for pollination. Plant in a lime-free, moist but well drained soil in sun or partial shade.</p>
<p><b>Gladiolus flannaganii</b> not available at present 1L £5.00</p>		

<p><b>Gunnera magellanica</b></p> <p>P9 £5.00</p>		<p>A dwarf, carpeting perennial from southern South America and the Falkland Islands. Cupped, kidney-shaped, scalloped, glossy dark-green leaves 5-9cm across on short erect stalks. Grow in partial shade in a humus-rich, permanently moist soil.</p>
---	--	---

## H

<p><b>Hebe macrantha</b></p> <p>2L £7.50</p>		<p>A small, compact, dome-shaped evergreen shrub (0.5 x 0.5m) from New Zealand with small grey-green leaves and short, dense racemes of white flowers in summer on established plants. Sun or partial shade in a moist but well drained soil.</p>
--	--	---

## I

<p><b>Ilex aquifolium 'Myrtifolia'</b></p> <p>2L £7.50</p>		<p>A small, dense, evergreen holly to 2.0 x 1.5m with purple shoots and small dark-green leaves some of which have soft spines and some entire. Grow in any fertile soil in sun or partial shade. A male clone but does very occasionally carry berries.</p>
--	--	--

## J

<p><b>Jovellana violacea</b></p> <p>2L £7.50</p>		<p>A beautiful small evergreen sub-shrub, native to Chile for a warm spot in a fertile, well drained soil, container or conservatory. Small, toothed leaves are carried on upright shoots which in May to August are clothed in pale lilac flowers with purple-spotted yellow throats.</p>
--	--	--

## L

<p><b>Lapageria rosea (Chilean Bellflower)</b></p> <p>not available at present</p> <p>2L £15.00</p>		<p>The national flower of Chile. A beautiful evergreen climber with strong, wiry, twining stems and leathery leaves. Rose-crimson, waxy, bell-shaped flowers 7.5 x 5cm during summer and autumn (and through winter if grown in a conservatory). Needs a cool, moist, lime-free soil in full or partial shade. Grow on a sheltered wall in mild areas, otherwise an excellent conservatory plant. Avoid direct sunlight.</p>
---	--	--

<p><b>Lapageria rosea 'Pink Panther'</b></p> <p>not available at present</p> <p>2L £20.00</p>		<p>A beautiful evergreen climber with strong, wiry, twining stems and leathery leaves. Very light pink flowers, slimmer than in the species, during summer and autumn (and through winter if grown in a conservatory). Needs a cool, moist, lime-free soil in full or partial shade. Grow on a sheltered wall in mild areas, otherwise an excellent conservatory plant. Avoid direct sunlight.</p>
---	--	--

<p><b>Lathyrus chilensis</b> not available at present</p> <p>2L £5.00</p>		<p>A hardy perennial climbing pea to 2.5m from the forest edges of southern Chile. Pale pink flowers carried on long stems from spring until late summer. Moist well drained soil in a sunny position.</p>
<p><b>Lathyrus davidii</b> not available at present</p> <p>2L £7.50</p>		<p>A very rare, hardy, perennial short climber to 1.3m from E. Asia. First collected by Père Armand David in 1863. Large pale-green leaves and cream coloured flowers that age to orange or toffee-brown after pollination borne in July and August. Best in semi-shade in a moist, well-drained soil.</p>
<p><b>Latua pubiflora</b></p> <p>2L £15.00</p>		<p>Rare, semi-evergreen shrub native to the Coastal Cordilleras of Chile and Chiloé island of 2.5 x 2.5m. Pendant magenta flowers borne in January- April followed by flattened spherical, pale-yellow fruits. Grow in a rich, moist, free-draining soil with some protection from cold winds. Hardy to -8°C. Can be grown as a wall shrub. An autumn-applied mulch may be beneficial. Toxic.</p>
<p><b>Lithraea caustica</b></p> <p>2L £15.00</p>		<p>A very rarely grown plant from the coastal ranges and Andean foothills of central Chile. An evergreen shrub in cultivation. Requires a free-draining, well sheltered sunny position in a mild location. <i>Poisonous sap - handle with care</i></p>
<p><b>Lobelia bridgesii</b></p> <p>2-3L £7.50</p>		<p>An upright perennial to 1m with winged stems and narrow, lanceolate, mid-green leaves and spikes of delicate pink flowers from mid-summer to late autumn. An endangered species endemic to Chile where it now only grows in an area of 10square Km. Grow in a sheltered position in a well-drained soil in sun or partial shade and some winter protection or in a container and over-winter indoors.</p>
<p><b>Lobelia excelsa</b></p> <p>2-3L £7.50</p>		<p>A tall, evergreen shrub to 2.5m from the coastal regions of central Chile with linear - lanceolate leaves to 25cm in length. Flowers begin yellowy-orange and age to orange-red, borne July-November and into winter under glass. Probably only hardy to -5°C so best grown as a conservatory plant or brought in for the winter. Best grown in sun and given a free-draining soil or compost.</p>
<p><b>Lobelia polyphylla</b></p> <p>2L £7.50</p>		<p>An unusual shrub from the coastal mountain range of northern central Chile that grows as a woody perennial with us. The upright, branching stems of 1.2 m terminate in racemes of burgundy-red to dark purple flowers in summer and autumn. Plant in a sunny, sheltered position in a moist but very well drained soil. Protect the base of the plant in the winter.</p>
<p><b>Lobelia tupa</b></p> <p>2L £7.50</p>		<p>A magnificent, clump-forming perennial reaching 2m x 1m. Native of Chile. Erect stems bearing lance-shaped, downy grey-green leaves up to 30cm long terminate in racemes of tubular bright red flowers in summer and autumn. Plant in a sunny, sheltered position in a rich, moist but well drained soil.</p>

<p><b>Luma apiculata</b></p> <p>2L £12.50</p>		<p>An evergreen large shrub or small tree to 3m in mild locations. Native to Chile, introduced by William Lobb. Dark green leaves and cinnamon-coloured bark that peels off in patches leaving cream-coloured contrasting areas. White flowers in late summer and autumn followed by black fruits. Grow in a sheltered position in a moist, well-drained soil in sun or partial shade.</p>
<p><b>Luma apiculata 'Glanleam Gold'</b></p> <p>2L £12.50</p>		<p>An evergreen shrub to 3m with attractive peeling cinnamon- coloured bark. The small leaves, margined with cream are tinted pink when young. Small white flowers borne in summer and autumn. Found as a seedling at Glamlean House, Ireland. Grow in a moist but, well drained soil in sun or semi-shade with shelter from cold winds.</p>
<p><b>Luma apiculata 'Saint Hilary'</b></p> <p>2L £12.50</p>		<p>An evergreen shrub to 2m x 2m. Variegated grey-green and cream leaves on deep - maroon coloured shoots, and cinnamon-coloured bark that peels off in patches leaving cream-coloured contrasting areas. White flowers in late summer and autumn followed by black fruits. Grow in a sheltered position in a moist, well-drained soil in sun or partial shade.</p>
<p><b>Luma chequen</b></p> <p>2L £12.50</p>		<p>A robust, medium-sized evergreen shrub or small leafy tree of 6m x 5m, native to Chile. Aromatic, bright-green, undulate leaves. Peeling bark on established plants. White flowers in summer and autumn are followed by black berries. Grow in a moist, well-drained soil in sun or partial shade and with shelter from cold, drying winds. Introduced by William Lobb</p>
<b>M</b>		
<p><b>Margyricarpus pinnatus (Pearl berry)</b></p> <p>2L £5.00</p>		<p>A prostrate evergreen shrub of 0.3 x 1m from the Andes from Colombia to Chile and Argentina, and Uruguay and S. Brazil, introduced in 1827. Finely cut deep-green leaves, virtually invisible flowers in July-August are followed by white berries through autumn. Any moist, well-drained soil in sun or partial shade. A good plant for the rock garden</p>
<p><b>Microbiota decussata</b></p> <p>2-3L £10.00</p>		<p>A hardy slow growing dense and bushy evergreen shrub from central China Ht. 1m x S. 1m. Glossy dark green leaves. Highly fragrant, creamy white flowers appear in winter followed by dark red-berried fruit. Any moist well-drained soil in partial to full shade.</p>
<p><b>Myrceugenia pyrifolia</b></p> <p>2L £15.00</p>		<p>Small evergreen shrub from Chile, narrow leaves</p>
<p><b>Mitraria coccinea</b></p> <p>2L £10.00</p>		<p>A low growing, spreading evergreen shrub or scandent climber introduced by William Lobb from Chile. With small, glossy, leathery leaves. Bright orange-scarlet tubular flowers from late spring - early autumn. Requires a warm, sheltered position in semi-shade and a moist, lime-free soil.</p>

<p><b>Mitraria coccinea</b> <b>'Lago Puyehue'</b></p> <p>2-3L £10.00</p>		<p>A low-growing, spreading evergreen shrub or scandent climber with small, glossy, leathery leaves. Rich scarlet flowers with a cream throat from late spring - early autumn. Requires a warm, sheltered position in semi-shade in a moist, lime-free soil. Considered hardier than the species. Introduced from near Lago Puyehue in Chile in 1963.</p>
<p><b>Mitraria coccinea</b> <b>'Lake Caburgua'</b></p> <p>2L £10.00</p>		<p>A low-growing, spreading evergreen shrub or scandent climber with small, glossy, leathery leaves. Bright deep-orange-scarlet tubular flowers from late spring - early autumn. Requires a warm, sheltered position in semi-shade in a moist, lime-free soil. Larger flowers and hardier than the species. Introduced from S. Chile</p>
<p><b>Myrteola nummularia</b></p> <p>1L £5.00 2L £7.50</p>		<p>A small spreading, prostrate evergreen shrublet. Wiry reddish stems with rounded lustrous green leaves. White flowers in May &amp; June followed by long persisting pink or red berries. From the Andes of Southern Argentina and Chile, the Fuegian Islands and the Falklands.</p>
<b>N</b>		
<p><b>Nothofagus alpina</b> not available at present</p> <p>2L £15.00</p>		<p>A fast growing, large deciduous tree with prominently veined leaves, native to the Coastal Cordilleras and Andes of Chile and adjacent Argentina. Leaves turn shades of yellow, orange and red in the autumn. Grow in a moist, well-drained soil.</p>
<p><b>Nothofagus macrocarpa</b> not available at present</p> <p>2L £15.00</p>		<p>An uncommon tall, elegant, fast-growing deciduous tree endemic to central Chile with broadly ovate, toothed, dark green leaves which turn orange and red in the autumn. Best in any deep, moist but well drained soil in a sunny position.</p>
<p><b>Nothofagus obliqua</b></p> <p>5L £15.00</p>		<p>A large, elegant, fast-growing deciduous tree of 20m x 15m, native to Chile and Argentina. Broadly ovate, irregularly toothed leaves turn shades of yellow and orange before falling. Plant in any deep, moist but well-drained soil in a sunny position and sheltered from cold winds.</p>
<b>O</b>		
<p><b>Osmanthus x burkwoodii</b> not available at present</p> <p>2L £10.00</p>		<p>An excellent medium-sized evergreen shrub of compact growth (2 x 2m) raised by Burkwood &amp; Skipwith, with dark green, leathery, toothed leaves. Clusters of tubular, white, fragrant flowers borne early-mid spring. Plant in a moist, well-drained soil in sun or partial shade.</p>
<p><b>Osmanthus decorus</b> not available at present</p> <p>2L £10.00</p>		
<p><b>Osmanthus delavayi</b></p> <p>3L £15.00</p>		<p>A beautiful, small, evergreen shrub, native of China, which will slowly attain 2m x 2m. Small dark glossy green, finely-toothed leaves. Fragrant white flowers are borne profusely in April. Plant in a moist, well-drained soil in sun or partial shade.</p>

# P

<p><b>Pherosphaera fitzgeraldii</b></p> <p>2L £15.00</p>		<p>A very rare small, semi-prostrate, densely branched conifer. Slender stems with tiny, olive-green, scale-like leaves. Found only at the foot of waterfalls in the Blue Mountains of New South Wales and threatened by habitat loss. Grow in a sheltered position in partial shade in a humus-rich, moist soil. (Dwarf mountain pine)</p>
<p><b>Phormium tenax 'Platts Black'</b></p> <p>1L £7.50</p>		
<p><b>Photinia davidiana</b></p> <p>3L £12.50</p>		<p>An erect evergreen shrub or small tree of 6m x 3m from W. China. Dark-green oblanceolate leathery leaves, the oldest turning scarlet in autumn. Corymbs of white flowers in spring are followed by large pendant bunches of crimson berries. Plant in a moist, well drained soil in sun or partial shade. Discovered by Père Armand David and introduced by George Forrest.</p>
<p><b>Photinia davidiana var. Salicifolia</b></p> <p>3L £12.50</p>		<p>An erect evergreen shrub or small tree of 6m x 3m from W. China. Dark-green narrow-oblong or narrow-lanceolate leathery leaves, the oldest turning scarlet in autumn. Corymbs of white flowers in spring are followed by large pendant bunches of crimson berries. Plant in a moist, well drained soil in sun or partial shade. Introduced by Ernest Wilson.</p>
<p><b>Photinia villosa</b></p> <p>3L £12.50</p>		<p>A deciduous large shrub or small tree of 5m x 3m, from Korea, China and Japan. Hawthorn-like corymbs of white flowers in spring are followed by small bright-red fruits. The leaves turn scarlet and gold in the autumn and is one of the most spectacular plants for autumn colour. Grow in a moist, well-drained soil in sun or partial shade.</p>
<p><b>Podocarpus salignus</b></p> <p>2-3L £15.00</p>		<p>An evergreen, small to medium upright tree to Ht. 15m. Arching branches, well furnished with sickle-shaped, glossy willow-like leaves. Endemic to Chile. Grow in a moist, well drained soil, sheltered from cold drying winds.</p>
<p><b>Prostanthera cuneata</b></p> <p>2-3L £7.50</p>		<p>A dwarf evergreen shrub (1m x 1m) from SE Australia and Tasmania with small, dark green, aromatic leaves. The flowers, borne May to September are white, flushed lilac and marked with purple inside. Grow in full sun in a moist, well drained soil.</p>
<p><b>Puya chilensis</b></p> <p>1L £7.50 2L £10.00</p>		<p>An evergreen perennial forming rosettes of strap-like leaves edged with hooked spines. Native to the arid coastal mountains of central-northern Chile to an altitude of 1200m. Yellow-green flowers are borne on erect stems of 2m on mature plants. Grow in full sun in free draining soil</p>

# R

<p><b>Rhaphiolepis umbellata</b></p> <p>2L £10.00</p>		<p>A slow growing small evergreen shrub from Japan and Korea. It has a rounded habit with leathery, broadly oval leaves and fragrant white flowers 2cm in width in terminal panicles in early summer, followed by small fleshy black fruits. Ht 1.2m x Sp 1.2m. Grow in a warm, sunny position in well drained fertile soil.</p>
---	--	--

<p><b>Rhaphithamnus spinosus</b> (syn. <b>R. cyanocarpus</b>)</p> <p>2L £15.00</p>		<p>A rare, dense, medium-sized, evergreen, myrtle-like shrub of 2m x 1.5m, native to Chile. Each pair of leaves is accompanied by 2-3 needle-like spines. Tubular, pale lilac-blue flowers in April are followed by deep-blue berries. Needs a warm, sunny position or wall and a free-draining soil. Introduced by William Lobb</p>
<p><b>Ribes x beatonii</b> (syn. <b>R. X gordonianum</b>)</p> <p>2-3L £12.50</p>		<p>A hardy, vigorous deciduous shrub 2m x 2m with aromatic lobed dark-green leaves. The flowers are deep red in bud, opening yellow with pale yellow, flushed red calyx. Raised in 1837 by Donald Beaton at Haffield, Herefordshire and originally named after his employer William Gordon. Any fertile well drained soil in full sun.</p>
<p><b>Rosa davidii</b> not available at present</p> <p>3L £10.00</p>		<p>A strong-growing medium-sized (3.5 x 3.5m) shrub first discovered by Armand David in W. Sichuan, China. Of erect, open habit with large corymbs of rose-pink flowers 5cm across followed by conspicuous bunches of ovoid, scarlet pendent fruits. Plant in any moist, well drained soil in sun or semi-shade.</p>
<p><b>Rosa elegantula 'Persetosa'</b> (Threepenny Bit Rose)</p> <p>3L £10.00</p>		<p>A charming deciduous shrub up to 2m with fern-like leaves. The small flowers borne in June are coral-red in bud, opening salmon-pink, and followed by bright coral-red fruits that last well into winter. These contrast well with the crimson and purple of the autumn leaves. Plant in sun or partial shade in any fertile soil.</p>
<p><b>Rosa forrestiana</b> not available at present</p> <p>3L £10.00</p>		<p>A strong-growing medium-sized shrub with arching stems to 2m from introduced from W. China by George Forrest. The rose-crimson, strongly fragrant flowers 4cm across are borne in clusters and followed by bright-red bottle-shaped fruits. Plant in any moist, well drained soil in sun or semi-shade.</p>
<p><b>Rosa macrophylla</b> not available at present</p> <p>3L £10.00</p>		<p>A vigorous medium to large shrub (4m x 4m), native of the Himalaya, with leaves are composed of up to 11 leaflets. Bright cerise-pink flowers 7.5cm across are carries singularly or in clusters of 2-3 and are followed by bright-red, bristly, pear-shaped fruits. Plant in any moist, well drained soil in sun or semi-shade.</p>
<p><b>Rosa sericea subsp. omiensis f. pteracantha</b> not available at present</p> <p>2L £10.00</p>		<p>A vigorous upright shrub grown for it's spectacular thorns Ht. 2.5m x S.2.5m. Encouraged by bi-annual pruning to encourage the large, crimson translucent thorns on the young growth. Neat fen-like foliage. Four petalled flowers of creamy white appear in summer followed by red pear shaped hips. A native of west China. Any moist and well drained soil. Sun or partial shade. Introduced by Abbe Delavay.</p>
S		
<p><b>Scopolia carniolica</b></p> <p>2L £7.50</p>		<p>A leafy deciduous perennial to 0.6m x 0.9m from C and S.E.Europe. The showy, bell-shaped pendant deep purple flowers with conspicuous green calyces are borne in April – June. Best in a well drained humus-rich soil. A good woodland garden plant. Toxic if ingested.</p>

<p><b>Scopolia carniolica 'Brevifolia'</b></p> <p>2L £7.50</p>		<p>A leaf deciduous perennial to 0.6 x 0.9m. Delightful bell-shaped, pendant yellow flowers with conspicuous green calyces borne April to June. Best in a well drained, humus-rich soil. A good woodland garden plant. Toxic if ingested.</p>
<p><b>Scopolia stramonifolia</b></p> <p>2L £7.50</p>		<p>A course upright perennial to 1.5m from Nepal and adjacent parts of China and India with branched stems and leaves which are white-downy beneath. Flowers pale green-yellow with a hint of purple during summer. Well drained, humus rich soil in semi-shade. Toxic if ingested.</p>
<p><b>Sisyrinchium patagonicum</b></p> <p>P9 £2.50</p>		<p>Small evergreen perennial with grass-like foliage 15-25cm high. Blue eyed, yellow flowers in summer. Plant in any reasonable soil in a open sunny situation. Suitable for rock gardens.</p>

## T

<p><b>Thamnocalamnus crassinodus 'Kew Beauty'</b></p> <p>4L £15.00</p>		<p>A very attractive bamboo forming a dense, arching clump up to 4 m high. Distinctive blue-grey canes which become red-brown with age with reddish branches. Plant in a moist, well-drained soil in light shade and shelter from cold winds. Suitable for growing in a container.</p>
<p><b>Thuja occidentalis 'Danica'</b></p> <p>2L £7.50</p>		<p>A slow-growing, dwarf conifer to 0.5 x 0.5m, of dense, compact, globular habit with the foliage held in erect, flattened sprays. Glossy bright emerald-green becomes tinted bronze in winter. Grow in a moist, well-drained soil with some shelter from cold winds when young.</p>
<p><b>Thuja occidentalis 'Sunkist'</b></p> <p>2L £7.50</p>		<p>A dense conifer of broadly conical, round-topped habit to 1.2 x 0.9m, with foliage in flattened sprays, golden-yellow in summer turning orange-yellow in winter. Grow in a moist, well-drained soil with some shelter from cold winds when young.</p>
<p><b>Thuja plicata 'Gelderland'</b></p> <p>2L £7.50</p>		<p>A strong-growing upright conifer of compact habit. The mid-green aromatic foliage takes on a bronze tinting in winter. Makes a fine specimen tree. Plant in a moist, well drained soil in a sunny position.</p>

## U

<p><b>Ugni molinae</b></p> <p>2L £7.50 5L £15.00</p>		<p>An evergreen, small to medium sized shrub (Ht. 2m x S 2m) with glossy leaves. Nodding pink tinged white flowers appear early summer followed by mahogany-red berries. Native of the temperate rain forests of Southern Chile. Grow in full sun or light shade in moist, well drained soil. Shelter from cold winds.</p>
<p><b>Ugni molinae 'Flambeau'</b></p> <p>2L £7.50 5-10L £15.00</p>		<p>A slow-growing, small to medium-sized evergreen shrub with leaves variegated with cream, green and pink (1.5 x 1m). Flowers are white flushed with pink and are followed by edible mahogany-red berries in the autumn. Grow in a moist, well-drained soil sun or partial shade and with shelter from cold winds.</p>

# V

<p><b>Vestia foetida</b> not available at present</p> <p>2L £7.50</p>		<p>A small, erect, evergreen shrub of 2m x1.5m, endemic to Chile. Foliage foetid when crushed. Nodding, tubular, pale yellow flowers borne in profusion from April to July followed by small yellow fruits. Grow in a warm, sunny position with shelter from cold, drying winds, in a well drained soil.</p>
<p><b>Viburnum cylindricum</b> not available at present</p> <p>5L - £15.00</p>		<p>A superb, large evergreen shrub from East Asia Ht. 5m x S. 5m. Hardy to -10 degrees c. Large finely toothed matt green leaves with a waxy upper surface. Small white flowers appear from July through to September. Requires a sheltered site with moist, well drained soil. Full sun to light shade.</p>

# AZARA

## Introduction

Azara is a genus of 11 species and several cultivars of evergreen trees and shrubs which are endemic to South America and in particular Chile. They produce delicately scented yellow flowers in spring and summer depending on the species and vary in height from the 1.5m Azara alpina to the 7m plus Azara microphylla.

Mark Paviour holds a National Collection of Azara sp. awarded by Plant Heritage. There is another collections in Exeter at the University.

The Azara collection is spread throughout our nursery site, where you can see the following:-

1. Azara alpina
2. Azara dentata
3. Azara integrifolia
4. Azara integrifolia 'Variegata'
5. Azara lanceolata
6. Azara microphylla
7. Azara microphylla 'Albovariegata'
8. Azara microphylla 'Gilt Edge'
9. Azara microphylla 'Variegata'
10. Azara patagonica
11. Azara petiolaris
12. Azara serrata
13. Azara serrata 'Maurice Mason'
14. Azara uruguayensis

# AZARA dentata

A medium-sized evergreen shrub of 3m x 3m, native of Chile, for mild or sheltered gardens. The rigid leaves are matt-green above and grey-felted beneath. The fragrant yellow flowers are borne in late spring and early summer. Plant in a moist, well-drained soil in sun or partial shade in a warm, sheltered position or against a wall.

# AZARA integrifolia

A medium sized evergreen shrub of 3m x 3m, native of Chile and Argentina. Clusters of fragrant chrome-yellow flowers in late winter and early spring followed by white berries. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Can be trained on a wall in colder areas. Hardy to -10C

# AZARA

*integrifolia* 'Variegata'

A medium sized evergreen shrub of 3m x 3m with small, rounded dark green leaves edged pale-pink and cream, raised at Kew in about 1870. Clusters of fragrant chrome-yellow flowers in late winter and early spring followed by white berries. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Can be trained on a wall in colder areas. As hardy as the species.

# AZARA

*lanceolata*

A medium - sized or large shrub of 4m x 3m, native to Chile and Argentina, with narrow, bright green foliage. Small vanilla-scented, mustard-yellow flowers borne in profusion in April and May. Grow in a moist, well-drained soil in sun or partial shade. Shelter from cold winter winds or grow as a well-shrub.

# AZARA

## microphylla

This is known as the hardiest species of Azara, it is a native of Chile and the borderlands of Argentina forming an elegant evergreen small tree or large shrub up to 6m in height. Dark green small leaves cover the plant.

In the months of April-May it has clusters of deep yellow, vanilla scented flowers. Like all plants it will prefer a sheltered site. It is fine in full sun and can cope with partial shade.

Plant in any moist, well drained soil. Lends itself to wall training or free standing shrub.

# AZARA

## microphylla

### 'Albovariegata'

A variegated form of Azara microphylla, the hardiest species of Azara. It will become an elegant evergreen shrub to 5m. The sprays of small leaves are broadly edged white. Clusters of deep-yellow vanilla-scented flowers in spring.

Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained or free standing shrub.

# AZARA

microphylla 'Gilt Edge'

A variegated form of the hardiest species of Azara. An elegant evergreen shrub to 5m. The sprays of small dark green leaves are broadly edged creamy-white with a pink tinge. Clusters of deep-yellow vanilla-scented flowers in spring. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained shrub or free standing shrub.

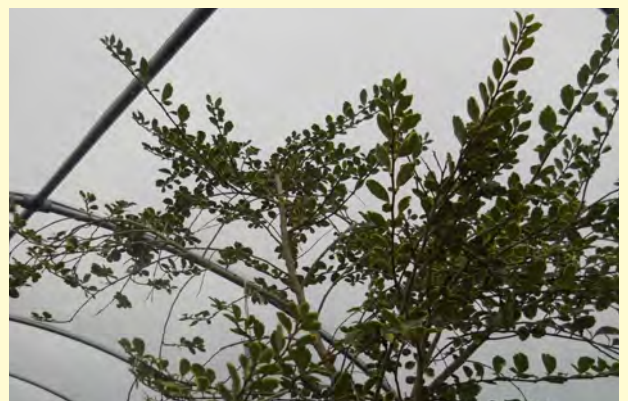

# AZARA

microphylla 'Variegata'

A variegated form of the hardiest species of Azara. An elegant evergreen shrub to 5m. The sprays of small dark green leaves are edged creamy-white. Clusters of deep-yellow vanilla-scented flowers in spring. Plant in a sheltered position in a moist, well-drained soil in sun or partial shade. Makes a good wall-trained shrub or free standing shrub..

# AZARA

## patagonica

A rare species of Azara found in Chile. An evergreen shrub Ht. 2.5m x S 2.5m with glossy, tooth edged leaves, clusters of fragrant yellow flowers appear in late spring and summer, followed in August - September by white berries. Needs a sheltered site in full sun or light shade. Any well drained moist soil.

# AZARA

## petiolaris

An evergreen shrub to 2.5m from central Chile. (Hardy -7 to -10°C). Extremely fragrant small yellow flowers in spring. Leathery dark-green leaves with sharply pointed teeth with reddish petioles. Needs a sheltered site in sun or light shade and moist, well drained soil. Good as a wall shrub.

# AZARA

## serrata

Endemic to Chile. An evergreen shrub with shiny oval serrate leaves Ht. 2.5m x 2.5m. Dense spherical clusters of very fragrant yellow flowers appear over summer and autumn. Requires a sheltered site in full sun or light shade. Any well drained moist soil. A good border and wall shrub.

White berries late summer

# AZARA

## uruguayensis

A medium-sized to large shrub of 4m x 3m, native to Uruguay and Brazil. Leaves are oblong, up to 10cm long and bronze-tinted when young. Small yellow flowers in drooping spikes in early spring. Needs a sheltered site or protection from a wall and moist, well- drained soil. Sun or partial shade

# AZARA care

Endemic to central Chile, often mountain foothills it does mean the plants are suitable to growing in UK and so far in North Herefordshire our plants have endured heavy snows, deep frost (beyond -12), prolonged wet months and drought conditions.

Tips to help the plant establish :- plant in a soil that can drain, sheltered aspect, mulch heavily over winter and over summer to stop competing weed. Stake against wind rock whilst establishing. protect against curious rabbits - thus far we have no evidence the Azara are to their taste.

Feed with a good around fertiliser and or well rotted manure. No pruning required.
