VISCARIA OCULATA 'BLUE ANGEL'

Welcome!

Possibly the world's only catalogue selling this year's fresh seeds!

The last mild winter was kind to Plant World, with plant sales here breaking all previous records, so not everyone is concreting over their plots! This was further helped by the fact that much of our old dilapidated nursery area had been demolished, making way for new easy-to-use waist-height sales tables, and comprehensive coloured information boards for every one of the countless unusual plants sold here. With one of the largest number of seeds offered in the world, our website continues to expand, presently offering more than three thousand different items, many of them exclusive to ourselves, so if you have never yet visited it please give it a try. Exciting plant trips to The Himalayas, Patagonia and Crete wound up the year.

Some of our new discoveries....

- ❖ **Cosmos atrosanguineus** - Rich, almost-black, chocolate-scented flowers vary in colour, size and habit. Probably the first ever seed offering. Sorry, only one packet per customer.
- ❖ **Viscaria 'Blue Angel'** - The "Blue Champion" a rare and fantastic dwarf cottage garden plant, with masses of wide-open, large, two-tone mid blue flowers smothering it.
- ❖ **Dierama 'Pink Fairies'** - Our most spectacular new dwarf hybrid has short stems carrying heavy sprays of large, pendulous, brightest pink bells in spring.
- ❖ **Penstemon confertus** - This rare species bears densely crowded spikes of a true lemon-yellow, making it probably the only genuinely yellow Penstemon.
- ❖ **Aubrieta 'Snowdrift'** - This is possibly the first ever seed offering of this rare pure white form which makes dense cushions studded with creamy white flowers.
- ❖ **Echium 'Red Rocket'** - This back-cross of *E. wildpretii* with "Pink Fountain" results in an incredible dense column of strawberry-red flowers above a rosette of grey narrow leaves.

As I approach 70 and Tessa 60, we finally decided to give up running marathons for worthy causes. In April this year my dear younger brother Derek died suddenly after two painful years of treatment for Non Hodgkins Lymphoma. So we decided to enter the 2015 Great North Run half marathon to raise funds for the Lymphoma Association and although we had little time to collect funds, we have sent this organisation a fair pile of cheques. Our grand total for the last 14 yearly runs for different charities now totals just over £40,000. Thank you to all who donated!

Ray Brown

*Plant World Gardens,
Newton Abbot, Devon*

A perfect day out for Garden Clubs and Plant Societies.

Plant World, situated between Torquay and Newton Abbot in beautiful South Devon, offers an outstanding collection of rare and exotic plants from around the world. Indeed, the four acres of landscaped gardens, the first ever planted and constructed as the five continents, has been called 'Devon's Little Outdoor Eden'. We are a popular destination for visiting groups and offer a cordial welcome so please get in touch!

Established in 1985, Plant World is the culmination of a plantsman's vision and has been featured several times on BBC's Gardeners' World as well as on other TV programmes. The extensive collection of rare and unusual plants is complemented by the mature cottage and Mediterranean gardens.

Rare Plant Nursery

Inspirational 'gardens from around the world' contain a selection of rare and exotic plants rarely seen outside their native lands. Choice specimens seen in the gardens are sold in the Plantsman's Nursery, a treasure trove of sought-after plants. So if you are passionate about plants and gardens, Plant World is a definite 'must-see' during your visit to beautiful South Devon.

Viewpoint Café

Our modern hilltop shop and café provide light lunches, cream teas and delicious home-made cakes. Visitors can enjoy one of the best views in the West Country with unforgettable views over the Teign Valley from Dartmoor to the sea. We provide free parking and entry into the plant nursery and also have a scenic picnic area. A modest entrance charge is made for adults visiting the gardens whilst children are free.

Nursery & Gardens Opening Times

**9:30 a.m. to 5:00 p.m. 7 days a week. From late March to early October.
Please ring before visiting early or late in the season to check on opening times**

How To Sow Your Seeds

- ❖ Sow all seeds as soon as you receive them unless otherwise advised on the packet.
- ❖ Use sterile compost. We recommend John Innes.
- ❖ Sow seed thinly and cover to about twice the depth of the seed size with fine grit or coarse sand.
- ❖ Do remember mousetraps and slug pellets. (Note: Please be careful if you have children or pets).
- ❖ Sow cold-germinating seeds in a cold frame or unheated greenhouse.
- ❖ Do be patient. Some seedlings appear in a few days whilst others may take several months, or even a year or more. DO NOT throw the seed tray away!
- ❖ Store warm-germinating seed in a fridge and sow in March or April in a heated greenhouse or propagator or in a well-lit spot on a window sill.
- ❖ Do not leave seedlings in a seed tray for too long. They often simply stop growing.

Have you discovered something new? A new Meconopsis perhaps?!

Please let us know if anything new, unusual or variegated appears in your garden. And do keep writing to us if you have any suggestions or advice, as we are always pleased to hear how you are doing. And thanks for buying and growing our seeds!

Ornamentals

ABIES KOREANA

£2.90 Pinaceae HP 4.0-12.0 (8 seeds)

This exceptionally handsome, easily grown and disease-resistant tree produces extremely ornamental, violet-purple cones even on small trees. It also has highly aromatic foliage, which, when crushed, has a strong fruity orange smell.

ACONITUM CARMICHAELII

£2.45 Ranunculaceae HP 1.2-1.5m

(Aconitum Wilsonii Fischeri) A grand and imposing plant. Stout stems hold very late (Aug-Sept) spikes of rich violet-blue hooded flowers. Rich green divided foliage. Valuable late season flowers when most else has gone.

ABUTILON (VITIFOLIUM) X SUNTENSE

£2.70 Malvaceae HHS 1.8m

This frost hardy plant is surely the most desirable of all mallow relatives. Clusters of large, bowl-shaped, pale to deep purple flowers, with the occasional white flowered form, open from late spring to summer over a foil of felted grey-green leaves.

ACONITUM NAPELLUS

£2.60 Ranunculaceae HP 90cm

The true "Monkshood" flowers from earliest spring, producing indigo-blue hooded flowers on strong stems clad in shiny green leaves. This is one of the earliest, easiest and most rewarding flowers you can grow in the garden and is totally trouble-free.

ACANTHUS MOLLIS

£2.90 Acanthaceae HP 1.0-1.5m (5 seeds)

This hardy, statuesque, handsome plant has large ornamental glossy leaves and strong spikes of very lovely 'hooded' pink and cream flowers which over the years makes impressive clumps. A superb, long-lived plant that makes a perpetual statement.

ACONITUM VULPARIA

£2.80 Ranunculaceae HP 1.0m (4 seeds)

Long-lived clumps produce very dense sprays of pale sulphur yellow hooded flowers in spring and early summer, above attractive, bright green shiny foliage. If dead-headed flowering will continue into the autumn.

ACIS AUTUMNALIS

£2.80 Amaryllidaceae HHB 25-30cm

These delightful, dainty gems are bulbous perennials with linear leaves and nodding, bell-shaped, pure white or occasionally pink, fragrant flowers, which open with or before the leaves in late summer

ADENIUM OBESUM

£3.95 Apocynaceae GP 30-40cm (15 seeds)

Extremely beautiful, large and showy, white-throated carmine flowers open in succession all summer on this astonishing specimen. One of the world's most amazing plants, it makes a thick, fleshy trunk, the spreading branches bearing dark green, pointed leaves.

ADENOPHORA POTANINII

£2.85 Campanulaceae HP

1.0-1.2m

Blooming, incredibly, from late spring to autumn, this rare, non-running, clump-forming "Ladybells", native to West China, produces countless tall flowering stems which support a mass of rich, flaring, lavender bells.

AGASTACHE BOLERO

£3.15 Labiatae HP, HBi 40-50cm (20+ seeds)

Above bronze-coloured, aromatic foliage, arise branching flower spikes which are packed full of rose-purple, tubular blooms which flower into late autumn. They will flower the first year from seed and in a dry, sheltered spot they will excel for many years.

AGAPANTHUS 'HEADBOURNE HYBRIDS'

£2.95 Liliaceae HP

60cm

Huge true blue globular heads flower freely on stout stems above strap-shaped leaves. This seemingly completely hardy variety forms thick established clumps which improve over the years.

AGASTACHE FOENICULUM 'GOLDEN JUBILEE'

£2.90 Labiatae HP 40-60cm

Discovered here and given the 'All America Award'. Early spring crowns of purplish, crinkled leaves transform into sweetly aromatic golden rosettes, with tubby terminal spikes of fluffy lavender flowers. Superb in a well-drained spot.

AGAPANTHUS LILLIPUT

£2.85 Liliaceae HP

40-50cm

Above neat tufts of narrow leaves stand rounded heads of rich-blue, star-shaped flowers, showing dark central veins, and blue stemmed stamens. Seedlings grown from seeds collected from this diminutive "African Lily" may vary a little but will all be lovely.

AGASTACHE 'GREEN CANDLES'

£2.35 Scrophulariaceae HP 60-90cm

Closed ranks of long green pokers bearing pale yellow flowers will make a striking feature in any border. This unusual, fragrant-leaved "bubble mint" will produce a truly dramatic effect when grown as a solitary clump.

AGAPANTHUS 'SNOWBALL'

£2.95 Liliaceae HP

60-90cm

Balls of delicate, pure white flowers arise on long stout stems in mid and late summer amidst vigorous clumps of bright green strap-like leaves. The pure white flowers occasionally have the slightest shade of blushed pink at the tips of the petals.

AGASTACHE 'LIQUORICE BLUE'

£2.25 Labiatae HP 60-75cm

Blue flower spikes, adored by bees and butterflies, arise in profusion above aromatic, aniseed and liquorice-scented leaves. In a well-drained and preferably sheltered spot this gorgeous plant is soundly perennial.

AGASTACHE AURANTIACA

£2.40 Labiatae HP

38-45cm

Massed sprays of flaming orange tubular flowers arise above fragrant leaves for a very long period, right into late autumn. These delightful flowers will excel for many years in a well-drained position.

ALCEA MAROON FRILLS

£2.60 Malvaceae HP 1.5-2.0m

A solitary, deep maroon, fig-leaved plant in our cottage garden produced much larger than normal flowers with prettily serrated and frilled edges. Seedlings may vary but they will all be lovely.

ALLIUM CHOICE MIXTURE

£2.40 Alliaceae HB

20-45cm

A bumper bag of these trouble free ornamental plants. Displaying a range of colours including white, yellow, pink and purple. Includes *Allium aflatanense*, *cyaneum*, *carolinianum*, *farreri*, *flavum*, *fragens*, *karataviense* and other rarities.

ALLIUM CHRISTOPHII

£2.65 Alliaceae HB

45cm

Magnificent, ten inch, spherical heads composed of glossy amethystine violet stars (which can be dried to give pleasure all year) will turn heads for years to come. Undoubtedly one of the most flamboyant members of this enormous family of plants.

ALLIUM HOLLANDICUM 'PURPLE SENSATION'

£2.75 Alliaceae HB

90cm

This AGM winner, native to Iran, produces a stiff, upright stem bearing a sizeable, tight, circular, purple flower head with umbels three inches across, of 50 or more star-shaped, deep violet flowers that appear to float through the perennials in any hot dry garden.

ALLIUM NARCISSIFLORUM

£2.85 Alliaceae HB

15-20cm (20 seeds)

This highly superior species produces large, pink-magenta, open-mouthed flowers each in the shape of a hand-bell, held in a cluster at the top of the stem. This really is one of the treasures of the genus, with neat, tidy growths and a non-invasive habit.

ALLIUM SCHUBERTII

£3.45 Alliaceae HB,HP

45-60cm (8 seeds)

This astonishing plant bears the largest flowers of all the alliums, with absolutely enormous beach-ball heads producing hundreds of rose-pink flowers on radiating stems of different lengths, resembling an exploding firework.

ALONSOA MERIDIONALIS REBEL

£2.70 Scrophulariaceae HHP

38-45cm

Strong, branching stems with dark green shiny leaves produce a very long succession of dazzling crimson/scarlet flowers. This vigorous plant, perennial in warmer countries, will flower in as little as 12 weeks from sowing.

ALSTROEMERIA AURANTIACA

£2.70 Alstroemeriaceae HP

60-90cm

We offer a generous packet from our sizeable stock beds of "Peruvian Lilies". These hardy and trouble-free spectacular plants form slowly expanding clumps of orchid-like orange and yellow blooms which improve unattended over the years.

ALSTROEMERIA HUEMULINA

£2.95 Alstroemeriaceae HP

30-45cm (10+ seeds)

The most dazzling lipstick scarlet red of any alstroemeria, with golden flame-like slashes in the throat. A choice and spectacular introduction from Chile.

ALSTROEMERIA LIGTU HYBRIDS

£2.95 Alstroemeriaceae HP

60-80cm

These famous hybrids come in all shades of orange and red. The large, sumptuous flowers, resembling orchids, are easy to grow, and the clumps improve over the years making them an invaluable addition to every garden.

ALTHAEA CANNABINA

£2.95 Malvaceae HP

1.8-2.4m (10 seeds)

Flowering in September and October when most other flowers have finished, cupped, dark eyed, rosy pink flowers open on long stalks, clad in small, soft cannabis-like (so we are told) leaves. Sumptuous, and always coveted by late season visitors.

AMARANTHUS CAUDATUS PONY TAILS

£1.90 Amaranthaceae HHA 1.0-1.2m

A selection of these lovely flowers bearing long, pendulous, flowing tails in many shades from green to red. These plants are often used to striking effect in many parks, gardens and stately homes!

**ANTHRISCUS SYLVESTRIS 'GOLDEN FLEECE'**

£3.45 Umbelliferae HP 70-90cm (10 seeds)

A fabulous new plant with bright, lemony-yellow, fern-like leaves in early spring making shining, golden mounds which are totally resistant to burning by the sun, with sprays of fluffy white flowers opening later. Few seeds collected but comes almost 100% true from seed.

**AMARYLLIS VITTATA 'RED GIANT' (HIPPEASTRUM)**

£3.15 Amaryllidaceae HHP 45-60cm (10 seeds)

Seeds from the largest flowered amaryllis we have ever grown here, with 20 absolutely gigantic blood-red flowers on multiple stems as the bulbs double up yearly. Seedlings should produce their first flowers in year 2 and bulbs increase in size constantly.

**ANTHRISCUS SYLVESTRIS 'RAVENSWING'**

£2.90 Apiaceae HP 60-90cm (30+ seeds)

This exciting recent discovery produces basal sprays of darkest mahogany-bronze, finely divided ferny foliage, making a perfect foil for the airy umbels of white heads. Ever since being revealed at Chelsea this has been an essential plant in modern gardens.

**ANEMONE CANADENSIS**

£2.45 Ranunculaceae HP 30-45cm

This outstandingly attractive introduction bears large ivory waxy petalled flowers, which have both blue backs to the petals and blue anthers. A delightful combination.

**AQUILEGIA 'WILLIAM GUINNESS' (VULGARIS)**

£2.55 Ranunculaceae HP 60-90cm

Dense clouds of puckered deepest blue and white flowers open over a long season, especially if plants are dead-headed. This is one of the most distinctive and best-known of the old fashioned forms and was rescued from obscurity here.

**ANEMONE LEVELLEI**

£2.60 Ranunculaceae HP 40-45cm

This one of the easiest and long-lived of the clump-forming anemones which improves with age, bearing dense sprays of white waxy-petalled flowers with a blue reverse. An exceptionally beautiful flower from China.

**AQUILEGIA ATRATA**

£2.80 Ranunculaceae HP 30-60cm

Dark purple to black flowers with unusually prominent yellow stamens open from May to August. This lovely, long-lived, true alpine species, grows in high rocky places, sometimes in limestone areas, but makes a superb garden plant.

**ANGELICA GIGAS**

£3.15 Apiaceae HP 1.0-1.2m (10+ seeds)

This magnificent angelica bearing thick shiny leaves has rapidly become a cult plant, with globular, solid heads of dark crimson florets, which erupt on strong stems from inflated purple sheaths, providing a feast for pollinating insects.

**AQUILEGIA 'BLACK BARLOW'**

£2.75 Ranunculaceae HP 60-75cm

The sprays of deeply doubled, darkest purple flowers quite amazingly become invisible any time after dusk here! As black as you can get in aquilegias, or any flower for that matter.

AQUILEGIA 'BURNISHED ROSE'

£2.45 Ranunculaceae HP

45-60cm

Selected here many years ago, sprays of icing pink pom-poms hover gracefully above the burnished, bright golden foliage. This lovely form looks fabulous as a massed planting and is completely trouble-free, improving yearly.

AQUILEGIA FORMOSA

£2.70 Ranunculaceae HP

45-60cm (20 seeds)

This soundly perennial plant bears delightful deepest orange-red and yellow flowers in spring and early summer. If planted away from others seedlings it will come perfectly true.

AQUILEGIA CLEMATIFLORA

£2.35 Ranunculaceae HP

45-60cm

Large, flared, outward-facing pink flowers, almost identical to those of a clematis, are held proudly facing outwards on our most admired aquilegia. We have heard visitors disputing that these lovely plants were in fact aquilegias.

AQUILEGIA 'FRAGRANT FANTASY'

£2.95 Ranunculaceae HP

60-75cm

A new and lovely range of columbines bred from some of the most fragrant species in cultivation. The perfumed flowers come in all shapes and sizes, from tight pom-poms to long-spurred singles and in a wide variety of colours.

AQUILEGIA COTTAGE GARDEN MIX

£2.45 Ranunculaceae HP

45-90cm

A selection from the range in our catalogue plus other colours and forms collected from our cottage garden. This well-filled generous packet must surely be the biggest ever offered by any seed company.

AQUILEGIA 'HONEYDEW'

£2.80 Ranunculaceae HP

60cm (20+ seeds)

The very rare fragrant Aquilegia moorcroftiana, is difficult and short-lived. So we crossed it with a lovely bi-coloured Japanese aquilegia to produce these fascinating long-lived plants with its sprays of delicate bi-coloured flowers, all deliciously perfumed.

AQUILEGIA 'DOUBLE RUBIES'

£2.45 Ranunculaceae HP

45-60cm

Dense sprays of quilled, fully double, deepest ruby red flowers, creating spectacular large groups. This is one of the really exceptional doubles.

AQUILEGIA 'PERFUMED GARDEN'

£2.65 Ranunculaceae HP

60-90cm

These are the culmination of our breeding programme using both large flowered and fragrant aquilegias. Amongst these will probably be the largest perfumed columbines ever seen. Our bees are very disobedient so expect the occasional amazing freak hybrid!

AQUILEGIA 'FIREWHEEL'

£2.45 Ranunculaceae HP

60cm

Another magnificent variation of the clematiflora form. This sport that appeared here many years ago bears doubled, darkest pinky-red petals, resembling licking tongues of flame on branching stems.

AQUILEGIA 'ROYAL PURPLE'

£2.40 Ranunculaceae HP

45-60cm

This specially selected spurless form produces flowers almost identical to double clematis and in the most deep and rich royal purple. One of the most outstanding new forms we have recently produced.

AQUILEGIA SNOWBALLS

£2.40 Ranunculaceae HP

60-75cm

Bunches of bobbing, pure white pom-pom flowers on branching stems make a delightful sight in May and June. Will self-seed and come true if grown away from other forms.

AQUILEGIA VULGARIS 'ORANGES AND LEMONS'

£2.40 Ranunculaceae HP

60-90cm

This completely new colour range has bicoloured flowers in all shade of reds, oranges and yellows. The occasional 'plum' pops up but adds to the colour scheme! Unlike many aquilegias which give a once-off burst of bloom, these will flower on and on.

AQUILEGIA YABEANA

£2.80 Ranunculaceae HP

60-75cm

A most amazing and vigorous plant from the mountains of Japan, carrying deepest inky blue, long spurred flowers on long stems. When planted 'en masse' it creates an unforgettable sight.

ARGEMONE SUBFUSIFORMIS

£2.70 Papaveraceae HHA

40-60cm

This Chilean plant is quite new to cultivation and is a most imposing annual. It easy to grow, and spectacular with its big yellow flowers and thorny, silvery leaves. Once established, it will resow each year but only growing where it is happy, and never being a nuisance!

ASPHODELUS ALBUS

£2.50 Asphodelaceae HB,HP

60-90cm (10+ seeds)

These lovely plants, which surprisingly are completely frost-hardy, produce clumps of linear basal leaves, and leafless stems bearing racemes or panicles of star-shaped, white or pink flowers, each tepal with an attractive green or brown central vein.

ASTRANTIA INVOLUCRATA 'SHAGGY'

£2.90 Umbelliferae HP

60cm

This most popular and much improved form of Astrantia major has a much larger "collar", with beautifully coloured tips darkly etched in attractive green shades. It is very long lived indeed and will grow under almost any conditions.

ASTRANTIA MAJOR

£2.45 Umbelliferae HP

60cm

This long-flowering and very long-lived plant displays showy star-like heads with radiating bracts in shades of green, pink and white. Excellent cut flowers are a bonus.

ASTRANTIA MAJOR HADSPEN BLOOD

£2.95 Umbelliferae HP

60cm

Stout stems hold aloft a level sheet of flowers of probably the deepest, darkest, blood-red form of this plant. It makes very long-lived and rewarding clumps which are completely hardy and need no maintenance.

ASTRANTIA MAJOR 'RUBY WEDDING SERIES'

£2.90 Umbelliferae HP

60cm

Seed from the darkest ruby and maroon forms in our garden. Invaluable, very long flowering period (May-October).

ASTRANTIA MAXIMA

£2.90 Umbelliferae HP

60cm

Exquisite, upwards facing, green bracted, pure rose pink flowers are held above compact clumps of bold tripartite foliage. This is the most desirable of all of the astrantias with a rewardingly long flowering period. "A very beautiful plant." (Graham Stuart Thomas)

AUBRIETA SNOWDRIFT

£2.90 Cruciferae HP

8-15cm (20+ seeds)

this is possibly the first ever offering of seed of this pure white form of aubrieta. A very rare plant in cultivation, it makes dense cushions of evergreen foliage, studded with creamy white flowers in earliest spring. It does best in poor soil or even on a dry wall.

CALCEOLARIA BIFLORA

£2.60 Scrophulariaceae HP

15-25cm

Native to Chile and Argentina, this lovely alpine forms low, compact rosettes of hairy leaves from which arise wiry stems each bearing a pair of red spotted, golden flowers. It grows well in moist but well-drained soil, e.g. a rock garden alpine trough, or gravel scree.

BAPTISIA AUSTRALIS

£3.15 Leguminosae HP

1.0-1.2m

Flowering from June to August, this is one of the most beautiful early-summer perennials, with trifoliolate leaves and erect, lupin-like racemes of rich violet-blue, pea-like flowers, followed by conspicuous inflated pods. They do best in deep, well-drained soil.

CALENDULA 'KABLOUNA'

£1.65 Compositae HA

38cm

This remarkable, quite new cottage garden delight has large, strikingly-crested, slowly darkening blooms of gold, lemon, orange and apricot with a dark, contrasting, pin-cushion boss of tightly-quilled petals. Easily grown by simply broadcasting the seeds.

BEGONIA 'MIDNIGHT BEAUTY ORANGE'

£2.95 Begoniaceae HHP

20-30cm (30 seeds)

A cascade of darkest chocolate, almost black foliage, is crowned with masses of fully double rich orange blooms. This is one of the most amazing recent achievements from seed and is absolutely stunning whether in the garden or in a container.

CAMPANULA COTTAGE MIXED

£2.60 Campanulaceae HP

1.5m

A bumper bonus bargain packet of all of the upright forms in our gardens, including some rarities we do not list. You can start your own nursery with this lot!

BLUEBELL

£1.95 Liliaceae HB

30-45cm (100 seeds)

(Scilla non-scripta) Drifts of fragrant, nodding blue bells are one of the most enduring sights of spring in English woods. These seeds were collected from the wild plants on Devon banks surrounding our gardens.

CAMPANULA LATIFOLIA 'BRANTWOOD'

£2.40 Campanulaceae HP

1.0-1.25

Stout spires of very large, deep violet purple bells open in spring and early summer. This is the darkest and finest form of this gorgeous flower from high in the Himalayas.

BUPLEURUM 'BRONZE BEAUTY'

£2.80 Umbelliferae HP

45-60cm

This attractive dwarf form of the totally perennial Bupleurum longifolium has lacy, divided, yellow, almost astringia-like seedheads, which transform in early summer into plates of coppery-bronze. Superb in a hot garden where it makes an ideal cut or dried flower.

CAMPANULA MAKASCHVILII

£2.75 Campanulaceae HP

45cm

A very rare plant from the Caucasus mountains. Radiating arching stems clad in smallish heart-shaped leaves, hold pink-edged, white bells along their length. Long lived and desirable.

CAMPANULA PERSICIFOLIA

£2.45 Campanulaceae HP

60-90cm

An old-fashioned cottage garden flower making mats of creeping foliage which is evergreen in all but the worst winters. From late spring to autumn appear the cup-shaped, wide-open, lilac-blue or white bell flowers which are very good for cutting.

CAMPANULA PRIMULIFOLIA

£2.75 Campanulaceae HP

60cm

Violet-eyed, open blue stars densely studding many stems. Hairy primrose-like foliage. This splendid gem flowers late in the season (July/August) and will naturalise if you are lucky, gently self-seeding.

CAMPANULA PUNCTATA 'BEETROOT'

£3.15 Campanulaceae HP

30-45cm

This real show-stopper of a plant opens very large tubular bells which are heavily washed with purple outside and liberally spotted inside with red and purple. A gorgeous specimen making a slowly-spreading carpet. "Rare and unusual." (Graham Stuart Thomas).

CARDIOCRINUM GIGANTEUM YUNNANENSE

£3.50 Liliaceae HB,HP

2.4-3.0m

This monocarpic variant of the "Giant Yunnan Lily" bears starlike white, cream and purple flowers from early Spring until late Summer. After the largest bulb has flowered it dies, leaving smaller ones to grow on each year. It prefers semi-shade and high levels of water.

CERINTE MAJOR PURPURASCENS

£3.15 Boraginaceae HHA

45-60cm (10 seeds)

"Honeywort" or "Wax-Flower". Deep blue pendulous bracts are packed onto stems densely clad with waxy blue-green leaves. This lovely plant is loved by bees, flowering throughout spring and summer.

CHAEROPHYLLUM HIRSUTUM ROSEUM

£2.95 Apiaceae

HP

60cm

Bright pink heads on short stems, with ferny, feathery foliage, make this exceptionally compact umbellifer an absolute treasure. It is very slow to spread as well as being bone hardy. "To be sought, few herbaceous plants can hold a candle to it in early May."

CHENOPODIUM GIGANTEUM

£1.95 Chenopodiaceae HA

1.0-1.5m

This very rapid-growing architectural curiosity is often grown as an attractive 'spot plant', or as a fresh vegetable, when the continuously-produced, stunning, purple-blotched leaves can be used either in salads, or as mature leaves cooked like spinach.

CODONOPSIS GREY-WILSONII

£2.95 Campanulaceae HCl

2.0-3.0m (20 seeds)

Bearing the largest flowers of all codonopsis, each sky-blue star has a central eye, pencilled in violet and growing to 2" (5 cm) wide or more. Flowering in their second or third year, these tuberous, herbaceous perennials grow to a height of at least 3m when mature.

CORYDALIS LUTEA

£2.35 Papaveraceae HP

20-30cm

Spikes of bright yellow flowers above a delicate filigree of tiny green fern-like leaves. Exceptional performance in walls or dry locations, naturalising well and producing a long season of colour from early spring to late summer.

CORYDALIS OCHROLEUCA

£2.40 Papaveraceae HP

20cm

This lovely compact plant is somewhat similar to Corydalis lutea, but has greyer foliage in spring and for most of the summer, below a long succession of striking, bicoloured, greenish-yellow and white flowers.

CORYDALIS TALIENSIS

£2.45 Papaveraceae HP

30-38cm

Why this long-lived beauty has evaded discovery until now is a mystery. Massed drooping stems of sizeable pale purple flowers are held above delicate ferny foliage. Superlative in a shady spot.

CYCLAMEN COUM

£3.85 Primulaceae HP

10-15cm (20+ seeds)

Spring flowering, unlike the more common *C. hederifolium*, it is completely hardy and easy, flowering from January onwards and is a useful compliment to snowdrops and other early spring bulbs, even thriving under trees and in short grass, where it usually self-seeds!

COSMOS ATROSANGUINEUS

£8.40 Compositae HP

30-60cm (4 seeds)

Rich-maroon-to-almost-black, chocolate-scented flowers open late in the year on this legendary plant which will vary in flower colour, size and habit. This is probably the first commercial seed offering and we are sorry but there is a limit of only one packet per customer.

CYCLAMEN HEDERIFOLIUM MIXED

£3.15 Primulaceae HP

8-15cm (20 seeds)

This valuable mixture contains many different variants of this lovely hardy plant. Colours will range from deepest pink to pure white with all variations in between.

COSMOS BIPINNATUS 'ANTIQUITY'

£2.90 Compositae HHA

30-40cm

A completely new and unique colour in cosmos. Rich burgundy flowers change to an antique bronze-salmon soon after opening creating a gorgeous two-tone effect. Very early flowering and flowers all summer long whether in containers or garden.

CYPRIPEDIUM PARVIFLORUM PUBESCENS

£2.95 Orchidaceae HP

30-45cm (50+ seeds)

In May this lovely woodland plant produces large fragrant flowers with gorgeous inflated yellow pouches and brownish petals, on contrasting dark stems above pleated apple green leaves. It is perhaps the easiest Lady's Slipper Orchid to grow in a garden.

COSMOS 'BRIGHTNESS MIXED'

£1.95 Asteraceae HHA

40-50cm (100 seeds)

Possibly the most vigorous and free-flowering cosmos of this type, dwarf bushy plants are covered with flowers in a delightful mixture of gold, lemon, orange and red from early summer through to the autumn frosts.

DACTYLORHIZA FOLIOSA

£2.95 Orchidaceae HP

40-60cm

This beautiful spectacular Madeiran Orchid is a must for any flower border as its striking flower spikes double up every year. It will grow in impoverished soil and prefers full sun, flowering in June with truly exceptionally large blooms.

CROCOSMIA LUCIFER

£2.80 Iridaceae HP

1.0-1.25

From robust clumps of sword-shaped leaves in spring, thrust up strong, branching spikes of brilliant red, flared, funnel-shaped flowers in mid-summer. This superb and reliable very long-lived performer is happy in any position.

DACTYLORHIZA FUCHSII

£2.95 Orchidaceae HP

30-60cm (100 seeds)

Rosettes of purple-spotted lance-shaped leaves arise in spring and early summer with shell-pink flowers, each of which is intricately spotted and dotted with candy pink and purple. Sow directly into a moist sunny soil, then wait till spring, sowing into pots will not work!

DACTYLORHIZA PURPLE GIANT

£3.15 | Orchidaceae | HP | 60-70cm

The most magnificent hardy hybrid orchid we have ever discovered as a seedling here bears very tall spikes of deeply coloured flowers on stems of spotted leaves. Very hardy, robust and vigorous, it is a hybrid of the old "Orchid Maderense".

**DAHLIA COCCINEA BISHOP OF DOVER**

£2.95 | Compositae | HHP | 40-65cm

Deep-bronzed chocolate-coloured leaves and stems, open to large, golden-eyed, pure white blooms providing a glorious show from July through to October. These superb plants are superb for a border. Plant tubers deeply to ensure winter protection.

**DAHLIA COCCINEA PALMERI**

£2.95 | Compositae | HHP | 60-90cm (6 seeds)

A superb form of this lovely carmine flowered dahlia species which bears deepest mahogany, almost black leaves. This plant is almost indistinguishable from the dark-leaved and highly prized Dahlia 'Bishop of Llandaff', which can only be propagated from cuttings.

**DATISCA CANNABINA**

£2.50 | Datisceae | HP | 1.8-2.4m

Quite an incredible plant for the back of the border, or as a test to baffle your friends. Tall, strong cane-like stems sprouting large, pendulous, terminal sprays of creamy-yellow flowers, are clad in palmate leaves resembling, er... cannabis.. apparently!

**DATURA 'BALLERINA PURPLE'**

£3.15 | Solanaceae | HHP | 60-90cm (8 seeds)

These "Angel's Trumpets" produce immense 6-8 inch, doubled, upwards facing, purple trumpet blooms, which are amongst the most beautiful and desirable flowers you can grow. Whether in a hot garden or a large container these plants are show-stoppers!

**DATURA INOXIA**

£2.25 | Solanaceae | HHA | 1.5m (12 seeds)

Large, floppy, night-fragrant, trumpet-shaped white flowers open in early summer to late autumn, flowers opening growing upright but inclining downwards later. Amazingly, stems and leaves are covered in peanut-butter-flavoured grey hairs!

**DAUCUS CAROTA**

£1.95 | Umbelliferae | HBi | 60-90cm

A beautiful British native with claret-coloured to pale pink umbels when in bud, then bright white when in full flower. They then produce their intriguing seed-heads which curl inwards making a closed cup holding the ripe seeds.

**DELPHINIUM COTTAGE GARDEN MIX**

£2.45 | Ranunculaceae | HP | 90cm

This generous packet contains all shades, including bicouours, blue, pink and white singles, and doubles from our cottage garden. We have also included a few unusual species so expect the odd surprise.

**DENDROSERIS LITORALIS**

£3.95 | Asteraceae | HHT | 1.0-3.0m (8 seeds)

This small, very rare member of the daisy family is a native of Robinson Crusoe Island, where it grows into a small, gnarled tree with crowns of large round leaves and beautiful bright orange flowers. It has recently been rescued from the brink of extinction

**DIANTHUS BARBATUS 'SOOTY'**

£2.30 | Caryophyllaceae | HP | 30-38cm

An astonishing addition to the previously available range. Densely packed heads of darkest chocolate - almost black, fragrant flowers, and foliage in deepest mahogany to match!

DIANTHUS CRUENTUS

£2.60 Caryophyllaceae HP

30-40cm (15 seeds)

Clusters of deepest blood-red flowers open on wiry stems above grassy foliage on this brilliant new perennial, the "Blood Carnation". It made a sensation when the Daily Telegraph garden won best in show with it at Chelsea 2011.

DIANTHUS SELECT MIXTURE

£2.80 Caryophyllaceae HP

8-30cm

Seed collected from the named varieties and scarce species in our gardens, few of which individually produce enough to list, so we offer this choice, fragrant mixture and include Dianthus 'Highland Frazer', squarosus, pindicola, piniifolius, 'Fairfolly' and many more.

DICENTRA HYBRIDS

£2.60 Papaveraceae HP

35-55cm (20+ seeds)

Seed from several well known cultivars including 'Bacchanal', 'Langtrees' and 'Boothman's Variety'. Pink or purple nodding locket flowers hover above dense clumps of finely dissected green ferny foliage.

DIERAMA 'BLACKBERRY BELLS'

£2.80 Iridaceae HP

1.0-1.3m

Seed collected from a vigorous hybrid between 'Cosmos' and Dierama robustum, and inheriting some of the darkness from the former flower, but with much larger, deep purple-maroon flared trumpets on very tall, strong springy stems.

DIERAMA 'BLACKBIRD'

£2.45 Iridaceae HP

1.0-1.3m

Seedlings from this famous and darkest of all dieramas will vary, but most plants should produce cascades of pendulous, funnel-shaped claret purple flowers on wiry stems. Seedlings occasionally produce paler flowers but there will be no rejects as all will be superb.

DIERAMA COSMOS (PULCHERRIMUM)

£2.90 Iridaceae HP

1.0-1.3m

This newly discovered plant bears the darkest flowers of any dierama we have ever seen. Pendulous trumpets of deepest burgundy contrast starkly with the white papery enclosing bracts from which they emerged. A superb new colour-break.

DIERAMA ERECTUM

£2.65 Iridaceae HP

1.0-1.3m

Stiff, not arching wands, sport close-packed clusters of brightest fluorescent pink, outward-facing, not pendant, starry bells. This extremely desirable introduction is the last, and perhaps the most unusual, of all dieramas to flower, giving colour into October.

DIERAMA GALPINII

£2.35 Iridaceae HP

1.2m

A distinctive species with dense clusters of small tubular purple flowers. One of the last dieramas to flower in the garden.

DIERAMA IGNEUM

£2.75 Iridaceae HP

60cm

Fiery bunches of flared, tomato-red flowers make an impressive display on this diminutive introduction from South Africa. This is a choice and very hardy plant which is vigorous and quick to clump up.

DIERAMA PINK FAIRIES

£2.95 Iridaceae HP

60-70cm

Our newest most spectacular dwarf hybrid for some time makes clump of thin leaves from which arise short stems carrying terminal sprays of large, pendulous, brightest pink bells in spring. This dwarf Dierama is quite stunning and exclusive to Plant World!

DIERAMA REYNOLDSII

£2.95 Iridaceae HP

1.0-1.3m

This late flowering (August) alpine dierama is one of the most stunning of this genus. On arching stems, the starkly-contrasting white bracts show off the pendulous deepest wine red flowers to perfection. The true species is rarely offered.

DIERAMA SPECIES MIXED

£2.85 Iridaceae HP

1.8m

A superb mixture of all the varieties listed here. We are also including some unusual and un-named species and hybrids from our trial grounds. All will be extremely beautiful. Expect some very pleasant surprises, colours and forms never before seen!

DIGITALIS 'APRICOT'

£2.60 Scrophulariaceae HP

90cm

This stunning introduction has a distinctive colour break bearing large, orangey-peach, flared flowers which are heavily-clustered up the tall, strong stems. If grown alone out of reach of other foxgloves the seedlings will come quite true.

DIGITALIS FERRUGINEA GIGANTEA

£2.30 Scrophulariaceae HP

1.2-1.8m

This is a spectacular towering form of this excellent perennial foxglove. Tall slender spikes in close groups bear many distinctive pale orange-brown flowers each with a protruding white lip. Completely hardy and totally perennial

DIGITALIS GRANDIFLORA

£2.30 Scrophulariaceae HP

60-90cm

Spikes of chocolate netted, large sulphur yellow flowers over rosettes of strongly veined leaves. This is the largest and most spectacular flowered of the yellow foxgloves. Perennial and long lived.

DIGITALIS LUTEA

£2.25 Scrophulariaceae HP

60-90cm

A generous packet of this attractive long lived hardy perennial which has greenish-yellow flowers freely borne on slender spikes. A most unusual plant which will naturalise in parts of the garden where other plants may struggle to grow.

DIGITALIS MERTONENSIS

£2.60 Scrophulariaceae HP

60-90cm

Shortish stout spikes of very large flattened trumpets with a distinctive squashed strawberry/coppery colour, open in early summer. This valuable plant with soft hairy leaves and a long-lived habit is one of the most magnificent hybrid foxgloves.

DIGITALIS OBSCURA

£2.60 Scrophulariaceae HP

60cm (15 seeds)

This rare and extremely lovely shrubby foxglove from Spain is one of the very best in cultivation, with striking flowers of red yellow and brown. Remember its origins and it will make a soundly perennial plant in a pot or hot, dry position.

DIGITALIS 'PAM'S CHOICE'

£2.50 Scrophulariaceae HP

1.5m

One of the best new foxgloves to be found in recent years. Stout, strong spires of creamy white flowers with their throats almost solidly painted in deepest burgundy. En masse it makes an unforgettable sight.

DIGITALIS PARVIFLORA

£2.60 Scrophulariaceae HP

90cm

Slender spikes hold numerous densely massed chocolate brown tubular flowers. This distinctive, striking and lovely completely perennial plant is appropriately also called 'Chocolate Soldier'.

DIGITALIS PURPUREA ALBA

£2.40 Scrophulariaceae HP

1.2m

An unusual tight-spiked, white form of the purple foxglove carrying pale purple freckles within the throat. Impressive drifts can be easily established in the garden. The odd purple plant may sometimes occur, but can be easily removed as soon as the coloured buds appear.

DOLICHOS LABLAB 'RUBY MOON'

£2.60 Papilionaceae HA

1.8-2.4m (8 seeds)

Purple to white fragrant bi-coloured pink flowers cluster on purple stems, followed by eye-catching velvety-purple bean pods, making an attractive fast growing screen. This tropical-looking plant is easy and fast to grow. Grows 20ft in 80 days.

DRACUNCULUS VULGARIS

£5.15 Araceae HP

1.5m (3 seeds)

In early spring beautiful patterned foliage arises, from which ascends a huge lurid purple spathe which can be more than 2 feet long and has a distinct smell. "Dragon Lily", is the most impressive of all the European aroids. Very few large fertile seeds are ever collected.

ECHINACEA PURPUREA 'BRILLIANT STAR'

£2.35 Compositae HP

90cm

Very large reddish-purple flowers with pronounced golden-brown cone-centres are produced from July until mid-autumn. Ideal for cutting, these plants will perform best on well-prepared humus-rich soil. (aka 'Ruby Star')

ECHIUUM 'BLUE DWARF'

£3.50 Boraginaceae

1.0-1.3m (15 seeds)

This new diminutive plant appeared by chance here at Plant World. Best grown under the shelter of a hedge or wall it makes a low multi-branched mound of hairy, grey-green rosettes, the stumpy, fat spikes of cobalt-blue flowers opening from April to June.

ECHIUUM PININANA 3 COLOURS

£2.80 Boraginaceae

3.0-4.8m

Colour variations are blue, pink and white. Plant young plants out early in the season so plants grow large enough to survive the winter in the open ground. To identify them, pale stems have white flowers, darker stems blue, narrow leaf ones are pink fountain!

ECHIUUM PININANA 'BLUE STEEPLE'

£3.15 Boraginaceae HHP

3.0-4.5m (30+ seeds)

Also known as the 'Tower of Jewels'. Echiium pininana initially produces a palm tree-like rosette on a thick woody stem. A year or two later, the centre, holding thousands of flowers, shoots upwards, sometimes to 15-20 feet! Bees love this giant.

ECHIUUM PININANA 'SNOW TOWER'

£2.95 Boraginaceae HHP

3.0-4.5m (30 seeds)

A friend on Guernsey sent us some seeds of an absolutely pure white Echiium pininana she had discovered. We could barely believe such a plant existed, but were thrilled to finally see an enormous 15 foot high snowy cascade.

ECHIUUM 'PINK FOUNTAIN'

£3.15 Boraginaceae HHP

3.0-4.5m (25 seeds)

The most lusted-after plant in the gardens every June. A cross we made between the fabulous Echiium wildpretii with its four foot, fat red spike and the giant blue Echiium pininana. The result is a 15 inch wide, tapering tower of delicate pink flowers.

ECHIUUM 'RED ROCKET'

£2.95 Boraginaceae HHP

1.5-2.0m (10 seeds)

We have back-crossed E. wildpretii with "Pink Fountain" one of its bigger and tougher children, itself a cross between the relatively hardy E. pininana and E. wildpretii. The result is an incredible column of strawberry-red flowers above a rosette of grey narrow leaves.

ECHIAM WILDPRETII

£3.95 Boraginaceae HHP

1.0-1.25 (10+ seeds)

Stout, rose-pink spikes of massed flowers with bright pollen, arise from prostrate rosettes of furry grey leaves. The most sought-after of all echiums, and one of the most dramatic of all flowers. Grown near to *Echium pininana* so the rare odd hybrids may occur.

**ERODIUM PELARGONIIFLORUM**

£2.60 Geraniaceae HP

30cm

Large, violet-veined, white flowers open above fragrant crinkly leaves from the end of winter until midsummer, and spasmodically thereafter. Much admired in our gardens, this superb plant is bone hardy too, although its exotic appearance does not give this impression.

**EPILOBIUM ANGUSTIFOLIUM ALBUM**

£2.70 Onagraceae HP

1.2m

On the rarely offered and very lovely snow white "Rosebay Willowherb", even the leaves are a pale lime green. This extremely long flowering plant which is not as invasive as its pink relative, comes true from seed.

**ERYNGIUM ALPINUM 'BLUE STAR'**

£2.95 Umbelliferae HP

60-90cm (8 seeds)

Arguably the most beautiful of all eryngiums, this lovely variety produces exceptionally large, rayed, silvery, metallic blue, thistle like flowers throughout the summer which are attractive to butterflies and bees! They do well in all but the boggiest of gardens.

**ERANTHIS HYEMALIS**

£2.30 Ranunculaceae HP

8cm

The dazzling "winter aconite", competes with the snowdrop as first flower of the year, but is too seldom grown or seen. Buttercup yellow shiny flowers above tiny posies of cut leaves, sprouting from tubers which slowly multiply over the years.

**ERYNGIUM GIGANTEUM 'MISS WILMOTT'S GHOST'**

£2.60 Umbelliferae HBi

45-60cm

One of the most impressive summer plants you can grow in the UK, with unbelievable metallic silvery-blue leaves, flowers and stems. The word gigantea refers to the flowers, not the plants which are rarely more than 2 feet high.

**ERIGERON KARVINSKIANUS**

£2.35 Compositae HP

10-15cm

On a gently spreading carpet of tiny pointed leaves appear sheets of white daisies which open white, turn pink and then fade to purple. This cushion plant is very long-flowering from late spring to autumn and is one of the best wall or dry-rockery plants.

**ERYNGIUM MIXED**

£2.45 Umbelliferae HP

1.0-1.5m

A large packet taken from all of those described here, as well as some unidentified species in our trial ground. We have also included unidentified new species collected by us on our Expedition to Chile.

**ERODIUM MANESCAVII**

£2.45 Geraniaceae HP

20-35cm (10 seeds)

Deepest lilac-pink flowers are produced for many months over a cascading clump of lovely feathery leaves. A beautiful, long-flowering, very long-lived plant that will put on a superb show for year after year where others will not survive.

**ERYNGIUM VARIIFOLIUM**

£2.45 Umbelliferae HP

1.0m

Superlative evergreen, beautifully variegated and marbled, waxy green rosettes, produce branching angular sprays of spiky silvery-blue flowers. From the Atlas Mountains of Africa comes this completely hardy, loveliest of the eryngiums.

ERYSIMUM 'BOWLES BABIES'

£3.45 Cruciferae HP 30-60cm (10 seeds)

Erysimum 'Bowles Mauve' has invariably been sterile producing no seeds. We have developed a strain that DOES produce seed, so you can grow new forms for yourself, from tiny to tall, with colour variations including some bi-colours and from pale mauve to deepest purple.

**ERYSIMUM BOWLES MAUVE HYBRIDS**

£4.15 Cruciferae HP 45cm (10 seeds)

Very rarely are seeds produced by the usually sterile, legendary, 'Bowles Mauve' Erysimum. These will all produce true F1 plants with first generation hybrid vigour. Plants vary in habit, flower colour and flowering time. Unique and developed at Plant World.

**ERYSIMUM PLANTWORLD RAINBOWS**

£3.15 Cruciferae HP 30-45cm (20+ seeds)

Years ago we crossed many perennial erysimums including 'Bowles Mauve', linifolium and scoparium, with dwarf wallflowers. Many of these new plants have been marketed worldwide and these valuable hand-collected seeds will give all colours and habits.

**ESCHSCHOLZIA CALIFORNICA**

£2.45 Papaveraceae HHA 30-38cm

This is a vigorous bushy, spreading annual with finely divided blue-green leaves and showy orange, yellow or sometimes red flowers in summer. Once established in a hot garden these will self-seed, coming up reliably year after year.

**ESCHSCHOLZIA 'THAI SILK'**

£1.95 Compositae HHP 20-30cm

The "California Poppy" is best sown where it is to flower, this well-loved flower giving an endless display of double flowers with fluted petals in mixed colours over compact, grey-green glaucous foliage, from June until September.

**EUPHORBIA AMYGDALOIDES PURPUREA**

£3.15 Euphorbiaceae HP 40-50cm (5 seeds)

This hardy beauty makes beetroot-coloured spring foliage, contrasting with the golden yellow "flower heads". A slow-growing gem that spreads mainly only by seeds, and it sets very few, but which makes an elegant spring bonus in any border.

**EUPHORBIA CHARACIAS CHARACIAS**

£2.90 Euphorbiaceae HP 60-90cm (20+ seeds)

Probably the most popular and long-lived of all spurges, this old favourite produces strong stems of evergreen, blue-green leaves which terminate in extended narrow heads of bright yellow flowers. One of the easiest, long-lived and trouble-free plants you can grow.

**EUPHORBIA CHARACIAS WULFENII**

£2.70 Euphorbiaceae HP 60-90cm

This outstanding form produces imposing clumps of erect stems clad in narrow grey leaves terminating in large and almost spherical, football-sized heads of yellow-green flowers. These imposing specimen plants will perform reliably where little else will thrive.

**EUPHORBIA LATHYRIS**

£2.30 Euphorbiaceae HBi 90cm (10+ seeds)

A handsome and extremely rapid-growing plant bearing symmetrical, pointed, blue-green leaves. Umbels of tiny yellow flowers produce large bulbous seed-pods. Also known as "The Mole Plant" as it is reputed to deter moles!

**EUPHORBIA MARGINATA 'KILIMANJARO'**

£2.60 Euphorbiaceae 60-90cm (10 seeds)

This stunning annual with a bushy growth habit produces showy clusters of small, pale green and white blossoms which make awesome cut flowers whilst the foliage has spectacular white margins. Easily propagated from seeds and thrives in well-drained soil.

EUPHORBIA MELLIFERA

£2.80 Euphorbiaceae HP

1.2-1.8m

This gem has large, creamy-veined leathery leaves topped by golden, fragrant flower heads. The name 'mellifera' refers to the sweet fragrance of the honey which will drift across the garden amazing all who are nearby.

EUPHORBIA MIXED

£3.15 Euphorbiaceae HP

1.2m

A really generous bargain bag of hardy perennial euphorbias from our range, including some unnamed rarities from our trial ground. Exceptional value for money and a good way to start a collection!.

EUPHORBIA POLYCHROMA

£2.90 Euphorbiaceae HP

25-40cm (10 seeds)

Making a compact dome, this clump-forming herbaceous gem pushes up its leafy stems and dazzling terminal clusters of acid-yellow flowers, which open in late spring to early summer making it one of the very choicest and most flamboyant of this group of plants.

FRITILLARIA CAMSCHATCENSIS

£2.75 Liliaceae HB

30-45cm (10 seeds)

This excellent vigorous peat garden plant makes 20-40cm tall stems densely clothed in shiny, whorled leaves which surround stems bearing clusters of semi-pendent, deepest purple, almost black, flowers with contrasting yellow anthers.

FRITILLARIA IMPERIALIS

£4.15 Liliaceae HB,HP

60cm (10 seeds)

In early summer this fabulous plant bears a prominent whorl of bright, downward facing flowers, topped by a 'crown' of small leaves. These seeds have been collected from the deepest coloured forms in our gardens..

FRITILLARIA MELEAGRIS

£2.90 Liliaceae HB

40cm (30 seeds)

The nodding bell shaped flowers of Fritillaria meleagris are unmistakable for their nodding heads, sometimes of pure white, or more frequently marked with a delicate chequerboard pattern in shades of purple. This rare British wild flower is now protected by law.

FRITILLARIA MIXED

£3.50 Liliaceae HB

15-60cm

A good mixture of seeds from all the varieties we grow, including some rarities. Species include Fritillaria acmopetala, camtschatcensis, gracilis, graeca var. thessalica, involucrata, pallidiflora, pontica and others, but not including meleagris.

FUCHSIA ORNAMENTAL MIX

£3.15 Onagraceae HHP

1.0-1.25

These seeds have been collected from plants, some of which are sizeable bushes and which have actually overwintered outside, here in our gardens in Devon, in all shapes, colours and sizes. You will get a surprising mixture of new forms from these seeds.

GALANTHUS ELWESII

£3.15 Amaryllidaceae HB,HP

20-30cm (12 seeds)

The most noticeable and beautiful of all snowdrops, this very large-flowered species with its honey-scented blooms has two delicate green marks on the petals, and beautiful silver-grey leaves. It has amazing impact and mature bulbs double up yearly!

GENTIANA ACAULIS

£2.80 Gentianaceae HP

5-8cm

Seed saved from the darkest blue form we have ever grown, these flowers bear large upward-facing, almost midnight blue trumpets with a piercingly contrasting white throat. Makes a slowly spreading carpet which will be quite permanent if divided in late winter.

GENTIANA ASCLEPIADEA 'WHITETHROAT'

£2.60 Gentianaceae HP 45cm

Stunning late summer blooms from August until October when most other colour has gone. The choice bicoloured form. Aptly named with pure white-throated blue trumpets spaced up graceful arching stems.

**GENTIANA LUTEA**

£2.35 Gentianaceae HP 90cm

Strong, noble spires of large, golden, star-like flowers open in late spring over clumps of large basal lily-like leaves. A superb gentian and one of the most magnificent, easy-to-grow, and long lived plants you can ever wish to grow.

**GENTIANA VERNA**

£2.90 Gentianaceae HP 5-8cm

This is the classic alpine with sheets of the most brilliant blue starry flowers in spring. The small clumps of tufted leaves slowly spread to produce a solid cushion. Easy from fresh seed.

**GERANIUM PSILOSTEMON 'RED PROPELLERS'**

£2.95 Geraniaceae HP 60-75cm (10 seeds)

Hybrid geraniums are usually sterile, so we crossed two choice species producing an endlessly flowering dome, BUT, unexpectedly, a few unexpected seeds gave two forms: Quilled petals and Folded "propeller" blades, both truly new and lovely!

**GERANIUM ALBANUM**

£2.45 Geraniaceae HP 30-45cm (10+ seeds)

Large numbers of magenta-veined, shocking pink flowers on spreading stems are produced over a far longer season than most other geraniums. "A long flowering, underrated plant" ("Hardy Geraniums" - Bath & Jones).

**GERANIUM ASPHODELOIDES STARRY NIGHT**

£2.90 Geraniaceae HP 30-40cm (8 seeds)

What a superb surprise this beauty is. The normally pink form came up with a single pure white seedling. We have allowed this to spread over the rock garden where it has made several superb domes studded with hundreds of pure white stars.

**GERANIUM BOHEMICUM**

£2.60 Geraniaceae HP 30-45cm (10+ seeds)

(Syn. Geranium 'Orchid-Blue'). This new-on-the-scene plant, often confused with the very similar Geranium lanuginosum, produces flowers of a rarely seen shade of pure campanula blue, on low brittle hairy stems. Wonderful in rich damp soil.

**GERANIUM ENDRESSII 'PINK LACE'**

£2.80 Geraniaceae HP 45-60cm (10+ seeds)

The seedlings from this strikingly lined and pencilled new hybrid come quite true in a corner of our cottage garden producing a long succession of bright flowers throughout spring and early summer. A tough plant that grows well in shade too!

**GERANIUM HARDY MIXED**

£3.15 Geraniaceae HP 30-90cm (30+ seeds)

A generous selection taken from our range including items with too few seeds to list. This exceptionally good value mix always contains a few real rarities and could be the cheapest way to start a collection of these long-lasting plants.

**GERANIUM MACRORRHIZUM ALBUM**

£2.50 Geraniaceae HP 30-45cm (10+ seeds)

The pure white form, albeit with pink calyces (the bits which enclose the buds), of this fragrant-leaved hardy geranium. Perfect for that shadowy, dry spot where little else will flourish.

GERANIUM MACRORRHIZUM 'CZAKOR'

£2.85 Geraniaceae HP 45cm (10+ seeds)

Very fragrant, rounded, slightly hairy leaves (the source of oil-of-geranium) make a solid, creeping, evergreen groundcover foil for the magenta purple blooms on this easily grown, totally hardy plant.

**GERANIUM PHAEUM 'SAMOBOR'**

£2.70 Geraniaceae HP 60cm (8 seeds)

Typical, darkest midnight purple flowers open over solid mounds of large leaves which are strikingly zoned in dark chocolate brown. Certainly a candidate for the most attractive foliage of any hardy geranium and very rarely offered from seed.

**GERANIUM MACRORRHIZUM 'SNOW SPRITE'**

£2.50 Geraniaceae HP 30-40cm (10+ seeds)

This superb miniature has milky white flowers with all other parts being palest lime green. Along with its controllable diminutive stature and the aromatic perfume from its dainty leaves, this plant should have a place in every garden.

**GERANIUM PRATENSE**

£2.35 Geraniaceae HP 60cm (15 seeds)

The "Meadow Cranesbill". This perpetually popular flower bears large, sky blue flowers with white eyes and veins above clumps of deeply cleft leaves. Ever popular and will happily naturalise.

**GERANIUM MADERENSE**

£3.15 Geraniaceae HHP 90cm (10+ seeds)

This true flamboyant species grows a stout "trunk", which radiates strong stalks, much resembling a small palm tree, with huge trusses of deep pink flowers in early summer. Prefers shelter, or even a big pot, but worth any trouble to grow for the incredible finale.

**GERANIUM PRATENSE 'PINK SPLASH'**

£2.80 Geraniaceae HP 60-75cm (10+ seeds)

A Plant World introduction (Geranium 'Janet's Special'). White flowers with radiating pink streaks make this the perfect pink counterpart to the original G. 'Spish-Splash' which appeared a few years ago. (Occasionally a pure pink or white plant may occur.)

**GERANIUM MADERENSE 'GUERNSEY WHITE'**

£3.50 Geraniaceae HP 90cm (10+ seeds)

New from Plant World is this gorgeous pink-eyed white-flowered form of this spectacular plant which produces a massed head of flowers in late spring. It does of its best in a sheltered spot or very large pot, when all who see it will be amazed.

**GERANIUM PRATENSE 'PURPLE-HAZE'**

£2.90 Geraniaceae HP 60cm (10+ seeds)

Years of selecting Geranium pratense forms has given us leaf colours from mahogany to deepest darkest beetroot. Plants will vary in size from 12 to 24 inches high with flowers in shades of blue or purple.

**GERANIUM PALMATUM**

£2.95 Geraniaceae HP 60-90cm (20+ seeds)

This is perhaps the most impressive and spectacular of all hardy geraniums with sprays of deepest pink exotic flowers and large clumps of glossy divided foliage with reddish stems. It is best in a sheltered spot, but has survived minus 11 C unscathed here.

**GERANIUM PSILOSTEMON**

£3.15 Geraniaceae HP 90cm (8 seeds)

Large deeply cut leaves turn dazzling red in autumn, whilst large magenta saucers, vividly veined and centred in black, impress all who see it in its summer glory. This astonishingly spectacular geranium is inevitably the most frugal with its seeds.

GERANIUM PYRENAICUM 'BILL WALLIS'

£2.45 Geraniaceae HP 30-38cm (10+ seeds)

This is the best cultivar (coming true) of the type, with especially desirable, very deep violet-purple flowers, which are at their impressive best in the late evening. This cultivar is often wrongly spelled 'Bill Wallace'.

**GERANIUM PYRENAICUM 'SUMMER SNOW'**

£2.35 Geraniaceae HP 45-60cm (20+ seeds)

This pure white form of the usually pinkish purple flower, produces profuse quantities of white flowers with deeply notched petals. Very long flowering and ideal for a hot spot in the garden where it can self-seed when happy.

**GERANIUM SANGUINEUM**

£2.80 Geraniaceae HP 15-30cm (10+ seeds)

Collected from the best cultivars in our garden, seedlings will produce large, upward-facing, red saucer-shaped flowers above low hummocks of deeply divided leaves. Bone hardy, and very reliable in making a blazing and long-lived display each spring and summer.

**GERANIUM VERSICOLOR**

£2.75 Geraniaceae HP 38cm (10+ seeds)

Large numbers of blood red veined pink funnel-shaped flowers, from spring and throughout summer, adorn this low spreader, which stifles weeds whilst hybridising busily with other geraniums producing fascinating offspring.

**GERANIUM WALLICHIANUM 'BUXTON'S BLUE'**

£2.95 Geraniaceae HP 23cm (8 seeds)

On a compact slowly spreading carpet appears a non-stop display from June onwards of upward-facing white-eyed sky blue flowers. "A pearl beyond price" (G.S.T.), but alas a reluctant seed producer - the elusive seeds are collected individually.

**GEUM MRS BRADSHAW**

£1.95 Rosaceae HP 38-45cm

Strong stems hold frilly flowers in beautiful shades of scarlet red. This old favourite is at home in a cottage garden where it will bloom and spread colour as far as the eye can see. Placed in full sunlight at the front of a border it will thrive even in heavy clay soils.

**GLAUCIDIUM PALMATUM**

£4.15 Papaveraceae HP 38cm (4 seeds)

This fabulous and choice connoisseur's plant is very rarely seen or offered. Large and exquisite cup-shaped lavender flowers are held above soft lobed leaves. A priceless specimen for shade and rich soil. "A great treasure." (Graham Stuart Thomas)

**GUNNERA MAGELLANICA**

£2.95 Haloragidaceae HP 8cm (20 seeds)

This tiny mat-forming perennial is completely different to its giant cousin *Gunnera manicata*, which has huge rhubarb-like leaves, making a dense, slowly-spreading carpet of small, crinkle-edged shiny green leaves, and attractive, 8cm. 'red hot poker'.

**GUNNERA MANICATA**

£2.45 Haloragidaceae HP 1.5-3.0m

Certainly one of the largest hardy herbaceous plants which can be grown in the U.K. producing large, puckered and lobed leaves on spiky stems above huge statuesque spikes of tiny reddish-green flowers. Near water this plant can grow enormous.

**HALORAGIS 'WELLINGTON BRONZE'**

£2.40 Haloragidaceae HP 60cm

An attractive foliage form of this unusual New Zealand plant (*Haloragis erecta*) a relative of gunneras. Bronzed leaves and spikes of many greenish-yellow flowers add colour to the border both before and after the main flush of garden flowers.

HARDY COTTAGE SMALLER MIX

£2.35

HP

30-60cm

Many of our perennial plants produce seed in quantities too small to list. This generous packet is a mix of countless lovely old and new favourites and many others from our range. Germination will be from a few days to several months.

HARDY COTTAGE TALLER MIX

£2.40

Various

HP

60cm

A huge choice selection of literally hundreds of different taller cottage garden plants. Some of these are collected from famous gardens and stately homes so expect some surprises!

HELLEBORUS COTTAGE MIXED

£2.80

Ranunculaceae HP

30-60cm

A wide and generous selection from all of the hellebores varieties and species on our list. All colours are included from white to deepest purples and spotted and mottled forms. An inexpensive way to start a collection of these attractive favourites.

HELLEBORUS DOUBLE BALLARDS

£3.65

Ranunculaceae HP

30-45cm (6 seeds)

These seeds have been hand collected from these ravishing beauties which have heavily-doubled, brightly-speckled white flowers, which open in February, and continue this awesome display until May or June.

HELLEBORUS DOUBLE RED FRILLS

£3.65

Ranunculaceae

25-35cm (10 seeds)

Just one unusually-flowered plant appeared in our trial beds with frilled, split red petals. Looking very much like an anemone, to which it is of course related, it evoked many praiseworthy comments before it finally set these seeds.

HELLEBORUS 'DOUBLE ROSES'

£3.65

Ranunculaceae HP

45cm (10+ seeds)

These absolutely superb, fully double hellebores, do indeed bear an amazing resemblance to roses and come in all shades from palest pink to red. The long stems are perfect for cutting too.

HELLEBORUS FOETIDUS MISS JEKYLL'S SCENTED

£2.70

Ranunculaceae HP

60-75cm

The overpowering fragrance, similar to mahonia, from the pendulous purple-lipped flowers, fills our cottage garden in earliest spring. This is the rare, sweetly-perfumed form. (Its botanical name simply explains that the thick, shiny leaves smell if bruised!).

HELLEBORUS 'GOLD BULLION'

£3.65

Ranunculaceae HP

45-60cm (10 seeds)

Dazzling shining fingers of purest gold form the leaves of this fabulous new variety of Helleborus foetidus, which we developed here. Strong and vigorous even in the brightest sunny spot, the normally green flowers being a pale sulphur yellow.

HELLEBORUS 'HELEN BALLARD'S'

£3.15

Ranunculaceae HP

38cm (20 seeds)

Seed from the most beautiful plants we have ever grown. Large, waxy, extravagantly marked flowers produce gasps of awe from all who see them. These plants are descendants of many of Helen Ballard's famous named forms.

HELLEBORUS ORIENTALIS 'BEST COLOURS'

£2.90

Ranunculaceae HP

30-45cm (10 seeds)

A selection from some of our best Helleborus orientalis plants which are guaranteed to brighten up your garden with a splash of colour. All the very best forms have been selected by hand and concentrated in this selection.

HELLEBORUS PLANTWORLD DOUBLES

£3.85 Ranunculaceae HP 38-45cm (10+ seeds)

These superb, fully double hellebores bear an amazing resemblance to roses and come in all shades from pure white to red, and including greens and yellows and often heavily marked and shaded. The long stems are perfect for cutting too.

HELLEBORUS PRIZE WINNERS

£2.80 Ranunculaceae HP 30-45cm (10 seeds)

Seed from the very best forms of *Helleborus orientalis* that we grow in our gardens, including pinks, maroons and mottled and patterned heads. This selection will impress all who are fortunate enough to discover these emerging from March to June each year.

HESPERIS MATRONALIS

£1.95 Cruciferae HP 60-90cm

The "Dame's Violet" is one of the indispensable cottage garden flowers. Very fragrant lilac mauve stock-like flowers on tall branching stems, which are produced throughout spring and early summer. Superb perfumed cut flowers from seed the first year.

HEUCHERA AMERICANA 'BLOOD-VEIN'

£2.60 Saxifragaceae HP 38-45cm

A selected form of the rare *Heuchera americana* with thick rounded and lobed leaves, and producing sprays of greenish-pink flowers. Many plants though will have leaves brightly decorated with deep crimson veins

HEUCHERA 'EMPEROR'S CLOAK' (AMERICANA)

£2.75 Saxifragaceae HP 30-45cm

Puckered, folded and pleated leaves, from beetroot red to deep purple and which appear to be transparent in the sun, produce a mound from which arise thin stems carrying fluffy white, superbly contrasting flowers.

HEUCHERA JET BLACK (AMERICANA)

£3.50 Saxifragaceae HP 30-60cm (50+ seeds)

Startling, almost black, rounded foliage, some leaves having silvery metallic stripes, makes compact clumps from spring until winter. This seed is from the darkest-leaved heucheras we have grown, but variation in leaf colours may arise from these seeds.

HEUCHERA 'METALLICA' (AMERICANA)

£2.60 Saxifragaceae HP 38-45cm

These plants have been selected for the most attractive marbled and veined leaves. The colours and shades of mahogany, bronze, aluminium and silver are most distinctive on young spring foliage. Flower sprays in shades of pink and white.

HEUCHERA 'PALACE PURPLE' (AMERICANA)

£2.65 Saxifragaceae HP 35-45cm

One of the most popular introductions in recent years and popular in parks and gardens, a cascade of small white flowers open on thin stems above solid clumps of beetroot coloured foliage. Bone hardy, long-lived and perfect for formal beds or edging.

HIERACIUM AURANTIACUM

£2.35 Compositae HP 15-23cm

This favourite old cottage garden plant has brilliant, coppery, orange-red flowers with black tips which appear on short stems for a long period in spring and summer. It will run slowly and is perfect for a wild garden or a rockery.

HOLLYHOCK 'BLACK BEAUTY'

£2.45 Malvaceae HP 1.8m

Tall spires hold numerous large, silky, glistening, almost black trumpets. In addition, this herb can be used in the same manner as marshmallow; the flowers, with the calyx removed, are commonly used to treat colds as they are a demulcent.

HOLLYHOCK 'BURGUNDY TOWERS'

£2.35 Malvaceae HP 1.5-2.1m

This unusual form occurred here some time ago with strong stems carrying large, deepest crimson flowers and fig-shaped leaves. In common with other fig-leaved hollyhocks, these have proven to be very resistant to rust.

**IRIS 'CLOTTED CREAM'**

£2.60 Iridaceae HP 60-90cm

This lovely palest buttermilk form of *Iris pseudacorus*, coming true from seed, has exquisitely marked and veined petals. Will grow very large in a damp or wet spot, but does perfectly well in a dry garden.

**IMPATIENS GLANDULIFERA 'RED WINE'**

£1.95 Balsaminaceae HA 1.2m

We have selected a colony of the darkest burgundy coloured form of this vigorous and rapid growing plant. Large red "snapdragons", with exploding seed-cases, cluster on thick, succulent stems. Can self-seed and spread if near water so take care!

**IRIS SPECIES MIXED**

£2.60 Iridaceae HP 23-90cm

A generous packet of all our irises, including some collected in quantities too small to list, some very rare, in all sizes and colours. More than twenty varieties, but a few examples are: *Iris chrysographes*, *forrestii*, *innominata*, *shrevei* and many more.

**IMPATIENS GLANDULIFERA 'WHITE FACES'**

£2.35 Balsaminaceae HP 90cm-1.

This pure white form of "Himalayan Balsam" can make an impressive statement in an isolated bog garden or pond margin. White "faces" grow atop stout hollow stems, later producing exploding seed pods which can propel seed for some distance. Can become invasive.

**KIRENGESHOMA PALMATA**

£3.15 Hydrangeaceae HP 60-75cm

Arching stems clad in angled opposite leaves terminate in sprays of yellow, crystalline, two inch shuttlecock flowers which open late in summer. Grown well, this is a certain crowd-puller as it springs from the ground each spring. (RHS AGM)

**IMPATIENS NAMCHABARWENSIS BLUE DIAMOND**

£3.15 Balsaminaceae HHP 45-60cm (10 seeds)

Discovered only in 2003 in the remote Namcha Barwa Canyon in Tibet, this is the rare, first ever, deepest sapphire-blue impatiens, with leaves like polished jade. Bedding impatiens have flat flowers but these conservatory-perennials resemble elegant cranes in flight.

**KNIPHOFIA CAULESCENS**

£2.35 Asphodelaceae HP 90cm

In September, later than all other pokers, arise massive heads of red, later changing to greenish-lemon, above very broad grey leaves and elephant-trunk-like stems. "Very valuable and perhaps the only truly hardy large poker" (G.S.T.).

**IRIS CHRYSOGRAPHES 'BLACK GOLD'**

£2.70 Iridaceae HP 60-90cm

The flowers are certainly not oil-coloured, but its name alludes to the Greek, *chrysographes* or 'gold writing'. Tall strong stems hold sprays of darkest blue to almost black velvety flowers which are delicately marked with golden lines.

**KNIPHOFIA NORTHIAE**

£2.80 Asphodelaceae HP 60-90cm

Probably the most impressive of all red-hot-pokers. Massive, wide, heavy leaves make a solid, agave-like rosette from which arise very thick-stemmed flower-spikes of yellow and orange. A stunning plant which improves with age.

LAKE NASSER SOLANUM (HYOSCYAMUS MUTICUS)

£2.60 Solanaceae HHA 30-60cm

This unusual fleshy-leaved plant, bearing purple and yellow flowers, was discovered on the shoreline of Egypt's Lake Nasser. All parts of this plant contain the powerful alkaloid hyoscine.

LAVATERA ARBorea VARIEGATA

£2.45 Malvaceae HP 1.2m

This unique plant often stands pride of place amongst the winter foliage plants, where it shines like a lantern in the garden. As a bonus, purple flowers smother the plant in early summer. Either in a very large pot or in the garden it is an arresting sight.

LATHYRUS VERNUS

£2.50 Leguminosae HCl 23-30cm (10+ seeds)

Very valuable spring colour is produced by one of the most lovely dwarf perennial peas, with masses of violet blue flowers in April and May. Some *L. vernus* var. *albus* (white) are also included in here.

LEWISIA COTYLEDON 'BRIGHT-EYES'

£2.60 Portulacaceae HP 15-20cm

Sprays of dark-coloured flowers in all shades open with a distinctive pale eye. These have been selected over many years by a top UK grower.

LATHYRUS VERNUS ALBO ROSEUS

£2.90 Leguminosae HCl 30-38cm (10 seeds)

One of the most beautiful spring flowers, this totally non-invasive plant produces a solid dome of foliage which is smothered with two-tone pink and white flowers in earliest spring.

LEWISIA COTYLEDON 'SUNSET DOUBLES'

£2.95 Portulacaceae HP 15-23cm (20+ seeds)

Handsome rosette of broad fleshy leaves. A professional grower has selected from the very best forms to produce this superb mix. Bright sprays of double flowers in shades of pink, yellow, red and white.

LAVANDULA ANGUSTIFOLIA

£2.50 Labiatae HP 60-75cm

The common lavender will produce long-stemmed, bright blue flowers which are ideal for cutting, drying or to perfume linen. Long-lived and easy-to-grow, it benefits from a close haircut early each spring to encourage fresh growth.

LEWISIA COTYLEDON 'SUNSET STRAIN'

£2.80 Portulacaceae HP 15-25cm (20+ seeds)

From evergreen rosettes of succulent leaves, arise repeating sprays of flowers from white and yellow to deep pink and orange. Dead heading produces almost constant flowering. These tender-looking plants are hardy and ideal for the rockery or a container on the patio.

LAVANDULA SPICATA 'MUFFET'S CHILDREN'

£2.60 Labiatae HP 20-25cm

This amazingly dwarf lavender has short-stemmed fragrant blue flowers studding a football-sized, silver-grey bush. Ideal for a small rock garden or even for formal edging, the odd seedling may vary but most will be very compact indeed.

LEWISIA REDIVIVA PINK FORM

£2.95 Portulacaceae HP 5-8cm (20 seeds)

Flowers resembling diminutive frilly water lilies appear before the leaves, over an extended period in the spring, before the plant retreats underground for the autumn and winter as a hardy tuber. A rare, pink form of this extremely beautiful herbaceous lewisia.

LEWISIA TWEEDYI ROSEA

£3.65 Portulacaceae HP 6-10cm (10 seeds)

An exquisite alpine plant, these gorgeous specimens open large deep rose flowers, yellowing in the centre of each petal, in Apr-May above fleshy evergreen leaves. Young plants can flower at any time right into the autumn. They are bone-hardy, but prefer to be kept in a pot.

**LIBERTIA SUNSET STRAIN**

£2.80 Iridaceae HP 30-45cm

Offering year-round allure, these superb, compact upright clumps bear narrow fans of stiff leathery blades, uniquely painted with green, yellow, orange, purple-red and bronze stripes. Saucer shaped white flowers in spring and attractive orange seed heads in autumn.

**LIGULARIA CLIVORUM 'DESDEMONA'**

£2.60 Asteraceae HP 1.2m

Three inch wide, bright orange flowers on branching purple stems, stand above glossy, beetroot-coloured, heart-shaped leaves. This exceptional back-of-border or even bog plant attracts countless butterflies and moths, such as the Jersey Tiger-Moth shown here.

**LIGULARIA VOROBIEVII**

£2.60 Asteraceae HP 1.2m

A superb ligularia with darkest purple, almost black stems, carrying impressive spikes of short stemmed orange-yellow flowers in early summer, above basal rosettes of thick, leathery coltsfoot-like leaves.

**LILIUM MACKLINIAE**

£3.50 Liliaceae HB 45-60cm (10 seeds)

Each stem of this rare and outstandingly beautiful small lily carries a few flowers. Ivory coloured open bowls hang slightly downwards and are white or very pale pink inside, and flushed reddish purple outside. Quite a newly discovered flower.

**LILIUM MARTAGON (PINK)**

£2.70 Liliaceae HB,HP 60cm

This strong-growing lily bears whorls of narrow leaves with large racemes of nodding, glossy, purplish-pink flowers with recurved petals in early summer, with the occasional odd plant flowering white. Hardy and long-lived it is a valuable addition to any garden.

**LILIUM MARTAGON ALBUM**

£2.70 Liliaceae HB 60-90cm

This is the lovely white form of this excellent plant, bearing pendent flowers with waxy, reflexed petals. It is an exceptionally easy, long-lived plant for the garden, multiplying up over the years. The occasional seedling may produce pink flowers.

**LINARIA PURPUREA**

£1.85 Scrophulariaceae HP 60-90cm

The "Purple Toadflax" is an old and popular cottage garden flower with tall, slender spikes of violet-purple flowers, which appear right into the frosts of autumn. It will gently self-seed into places it likes but never becomes a nuisance!

**LINARIA PURPUREA BROWN'S WHITE**

£2.80 Scrophulariaceae HP 50-80cm

This lovely plant opens its pristine, tiny, pure white "snapdragons" atop long slender spikes of delicate, fine, greyish-green foliage. This lovely new form is bone hardy, long-lived and drought-resistant and was selected by Ray Brown, Plant Worlds owner.

**LOBELIA 'BLUE CARDINAL'**

£2.70 Campanulaceae HP 60cm

Spires of clear blue, snapdragon-like flowers open in succession on strong stems bearing thick, crinkly leaves. These lovely flowers will grow equally well in dry or wet conditions and are very hardy and soundly perennial.

LOBELIA BRIDGESII

£2.60 Campanulaceae HP

1.8m

This rare, semi-shrubby plant from the foothills of the Chilean Andes bears spectacular, bright pink, trumpet-shaped flowers on thick stems which carry toothed and pointed leaves. It will grow huge in a sheltered spot, although it dies back underground in severe winters.

LOBELIA TUPA

£2.95 Campanulaceae HP

1.2-2.4m

An incredible giant hardy lobelia from Chile. From a large rosette of thick leathery felted leaves arise thick stems carrying tropical orchid-like deepest carmine flowers. A valuable late season display from July until the autumn frosts.

LUNARIA ANNUA ALBA VARIEGATA

£1.95 Cruciferae HBi

60-90cm

This lovely spring-flowering plant is the much sought after, but seldom offered, white flowered and white-splashed foliage form of "Honesty". When established it will self-seed gently each year, seedlings will be all green when young but variegate later.

LYCHNIS CHALCEDONICA ALBA

£2.40 Caryophyllaceae HP

60-90cm

This is the albino form of the famous "Maltese Cross" flower, having congested heads of ivory-white blooms. Very long-lived and hardy, it can make a truly dazzling splash of light in the mid-border, and especially in any dark area needing to be brightened up!

LYCHNIS CHALCEDONICA THE FLASHER

£2.80 Caryophyllaceae HP

60-90cm (20+ seeds)

A novelty form of the well-known "Maltese Cross". Deep scarlet flowers open in compact bunches on stems clad in white-splashed leaves. White flashes sometimes only appear when mature. This unique mutation is at times unstable. Remove any pure green material.

LYCHNIS CORONARIA

£2.45 Caryophyllaceae HP

45-60cm

Large flowers of deepest rose-crimson are carried on branching stems bearing attractive grey woolly leaves. This must-have plant for the classic cottage garden will gently self-seed into cracks and shady corners but rarely becomes a nuisance.

LYCHNIS CORONARIA 'ANGEL'S BLUSH'

£2.25 Caryophyllaceae HP

60-90cm

The pink-eyed white-flowered form of the woolly, grey-leaved Lychnis coronaria comes quite true from seed but the pink eye varies quite bizarrely with the season and weather conditions. A lovely long-lived cottage garden plant.

LYCHNIS FLOS-JOVIS NANA

£2.60 Caryophyllaceae HP

23-30cm

The scarce dwarf form of this lovely garden plant has woolly leaves and stems, and generous heads of crimson flowers in early summer.

LYSICHITON AMERICANUS

£2.80 Araceae HP

60cm

A splendid architectural plant for the water's edge or a damp garden, where it will assume giant-like proportions. Bright, banana-coloured spathes shoot out of the ground in spring followed by enormous banana-like leaves. (Not a banana relative!)

LYSIMACHIA CLETHROIDES 'LADY JANE'

£2.70 Primulaceae HP

60-75cm

This form of *L. clethroides* has spikes of pure creamy-white flowers, which are held in closed ranks in midsummer and are all turned over at the top like walking sticks. A rarely seen but quite spectacular flower albeit a very infrequent seed-producer.

MAGNOLIA CHAMPACA

£3.95 Magnoliaceae HHT

3.0-5.0m (8 seeds)

This evergreen, semi tropical large shrub has large mid-green leaves and sweetly fragrant orange flowers in spring. The strongly fragrant flowers from this fabulous, exotic tree are used to make the expensive perfume 'Joy'.

MECONOPSIS CAMBRICA AURANTIACA

£2.70 Papaveraceae HP

30-45cm

This is the orange form of the normally yellow "Welsh Poppy" with delicate orange petals. It may slowly self seed in the garden, seeds usually only germinating in the spring.

MALVA 'GIBBORTELLO'

£2.70 Malvaceae HP

1.0-1.2m

One of the most sensationally showy newcomers of recent years, this compact, shrubby plant opens its large, crumpled, floppy, dark-veined purple flowers on numerous spikes over a prolonged period in spring and summer. If you are lucky it may gently self-seed.

MECONOPSIS CAMBRICA 'FRANCES PERRY'

£2.70 Papaveraceae HP

30-45cm

The rare red form of the perpetual flowering perennial Welsh poppy comes true from seed as long as there are none of the common yellow ones to cross with it. Drifts of this very hardy and long-lived beauty are glorious, as it flowers all summer long.

MECONOPSIS BAILEYI

£2.95 Papaveraceae HP

90cm

(Syn. Meconopsis betonicifolia). The fabulous "Himalayan Blue Poppy" forms clumps of hairy leaves from which arise strong stems carrying heads of silky, kingfisher-blue, almost transparent petals with golden eyes. This is one of the most beautiful garden plants.

MECONOPSIS CAMBRICA 'MURIEL BROWN'

£2.95 Papaveraceae HP

30-45cm

In 1994 the first ever double red Welsh poppy appeared here and was featured on Gardeners' World after a bed of single red "Welsh Poppies" crossed with the double orange form. This lovely flower was named after Muriel Brown, the mother of Plant World's owner.

MECONOPSIS BAILEYI ALBA

£2.80 Papaveraceae HP

90cm

Pure white silky petals surround a boss of golden stamens on this rarely seen form of the "Himalayan Blue Poppy" which makes an outstanding picture in a shady damp corner, hopefully growing in rich, moist, organic soil.

MECONOPSIS CAMBRICA YELLOW

£2.45 Papaveraceae HP

30-45cm

Meconopsis cambrica is perfect for anyone wanting to create a woodland garden and with its gorgeous yellow flowers and fine, fern-like foliage, the Welsh Poppy is ideal. It spreads easily and is well adapted to colonising gaps and crevices in rocks and stones.

MECONOPSIS BAILEYI 'HENSO VIOLET'

£2.95 Papaveraceae HP

60-90cm (40+ seeds)

Bright violet-purple flowers, with the merest hint of red adorn this quite exquisite variant of the "Himalayan Blue Poppy". Coming quite true from seed, it surprises countless poppy-lovers who have never before seen this unusual plant which originated from Hensol Castle.

MECONOPSIS GRANDIS

£2.95 Papaveraceae HP

60-90cm

This seed has been collected from the true form of this rare blue poppy from garden-grown plants. Large saucer flowers in deepest blue arise on thick, strong stems. Quite perennial when it is happy in slightly acidic, organic soil, it is one of the classic blue flowers.

MECONOPSIS HORRIDULA

£2.95 Papaveraceae HBi,HP 45cm

Gorgeous, striking cobalt-blue, ivory-eyed, floppy, tissue-paper flowers suggest that the "horrid" obviously only applies to the spiny looking stems. It is one of the only drought-resistant Asiatic meconopsis, dying down to a tuber if too hot in its first year!

MECONOPSIS 'LINGHOLM' (EX M. GRANDIS)

£3.15 Papaveraceae HP 1.0-1.2m

The true Meconopsis grandis is rare in cultivation, but this fertile hybrid, which is a quite reliable perennial, has enormous deep cobalt blue flowers, up to four inches across, and is certainly the best available anywhere.

MECONOPSIS NAPAULENSIS

£2.95 Papaveraceae HBi,HP 1.2-1.5m

Deeply lobed leaves felted with silvery hairs, form a large and most sumptuous winter rosette. In early spring the thick, strong, main stem of this absolutely magnificent specimen arises, with branching spurs carrying golden-eyed, cherry red flowers in midsummer.

MECONOPSIS PANICULATA

£2.95 Papaveraceae HP 1.2-1.8m

Perhaps the most magnificent of all winter rosettes is this enormous beast composed of massive, felted, golden bear's-ear-like leaves. In early spring arises the thick stem holding a succession of refined golden silky flowers.

MECONOPSIS PUNICEA

£3.95 Papaveraceae HBi,HA 23-38cm (10 seeds)

This seldom offered, brilliant lipstick-red Meconopsis from China is one of the rarest and most desirable garden plants. Numerous, solitary, pendulous flowers arise from a basal rosette of hairy leaves. The seeds should be sown immediately in a cool position.

MECONOPSIS SUPERBA 'PINK EYE'

£2.80 Papaveraceae HP,HBi 1.0-1.5m

This lovely hybrid of the rare, normally white Meconopsis superba opens trusses of distinctive, pink-centred white flowers above an impressive overwintering rosette of thick, silvery-grey hairy leaves. Flower shades may vary but all will be attractive.

MECONOPSIS WALLICHII

£2.80 Papaveraceae HP 1.2-2.1m

An enormous giant of a poppy if grown in rich, peaty moist soil and hopefully a bit of shade. A stout, bristly-leaved stem, almost a trunk, holds repeatedly branching arms each holding a delicate, pale blue tissue-paper flower. Flowers often until October or later.

MECONOPSIS WILSONII

£3.50 Papaveraceae HP,HBi 1.2-1.5m (20+ seeds)

Newly-described, this rare, exciting and unbelievably exquisite flower bears spectacular heads of closely-packed, golden-eyed, blue-purple flowers, which open over an extended period in late spring on stout hairy stems, and is worth any trouble to grow.

MEGACODON STYLOPHORUS

£3.95 Gentianaceae HP 50-75cm (5 seeds)

This very rare plant the "Dinosaur Gentian" from the foothills of Everest has big, waxy, creamy-yellow flowers, delicately spotted inside with purple markings. Held on tall, iris-like stems, they bear some resemblance to those of the Kirengeshoma.

MELANOSELINUM DECIPIENS

£2.60 Apiaceae HP 1.2m (40 seeds)

This new umbellifer is certainly one of the finds of recent years. In its second year a thick strong stem sprouts a broad crown of several branches carrying finely divided bronzed leaves, beneath very large umbels of bright pink flowers. An unforgettable picture.

MORINA LONGIFOLIA

£2.80 Morinaceae HP

60cm

A rare and long-lived Nepalese plant with thistle-like foliage (but no relation). From the main stem leaf axils appear exotic, flared white flowers, which turn to pink inside after pollination. Repeat flowering from early summer until the frost, especially if dead-headed.

**MYOSOTIS ARVENSIS**

£1.90 Boraginaceae HBi,HA 15-25cm

This beautiful British native flower displays its sprays of bright blue flowers over a very long period all spring and summer long. Once established it will gently self-seed, moving into places where it does best without being overwhelming.

**NEPETA PARNASSICA**

£2.50 Lamiaceae HP 1.8m

A huge catmint, dwarfing "Six Hills Giant". Thick strong stems with fragrant leaves and long spikes of purple-blue flowers in summer and autumn. For the back of a hot border or fill the corner of the courtyard to impress your visitors.

**NICOTIANA SYLVESTRIS**

£2.45 Solanaceae HHA 1.2m

This lovely plant is actually a species of wild tobacco (Woodland Tobacco). Grown in gardens for its scented flowers, which are overpowering at night, it attracts pollinating moths. This is one of the plants from which the leaves can be dried.

**NIGELLA DAMASCENA**

£1.95 Ranunculaceae HA 45cm

Large showy blue flowers open over finely-cut, feathery, almost fern-like foliage and are perfect for cutting, whilst the inflated seed-pods are also popular with flower arrangers. They may gently self-seed but very rarely become a nuisance!

**OENOTHERA BLOOD ORANGE**

£2.35 Onagraceae HP 8-10cm

This new and lovely dwarf plant with the same cushion-forming habit as aubretia, produces an extremely long succession of yellow-rimmed, red-eyed flowers all season long on prostrate stems.

**OMPHALODES CAPPADOCICA**

£2.85 Boraginaceae HP 15-20cm (8 seeds)

"Blue-eyed Mary". One of the most desirable spring plants (R.H.S. Award of Garden Merit). Sprays of bright blue flowers from early spring to midsummer over a slowly creeping carpet of shiny leaves. Viable seed is very rarely offered as little is produced.

**ONOPORDUM ACANTHIUM**

£2.45 Asteraceae HBi 1.8-2.7m

This is truly one of the most impressive plants you can grow in the UK if you can give it room. Candelabras of large mauve flowers open on much-branched white woolly stems which arise from a huge grey spiky rosette in spring.

**PAEONIA DELAVAYI**

£3.15 Paeoniaceae HSh 1.8m (10 seeds)

"Victorian Tree Peony". Single bowl-shaped yellow-eyed flowers from red to deepest burgundy. In time, this peony makes an imposing, many branched, deciduous tree. Well worth waiting for.

**PAEONIA MLOKOWITSCHII (MOLLY THE WITCH)**

£3.65 Ranunculaceae HP 45-60cm (8 seeds)

A truly fabulous hardy herbaceous plant with huge pale lemon-yellow flowers in spring. In autumn follows an equally impressive show as the large pods open like mouths, revealing the good, fertile black shiny seeds, and brightest crimson decorative hollow ones.

PAEONIA OBOVATA (ALBA)

£5.15 Ranunculaceae HP

60-75cm (4 seeds)

A rare and lovely plant, attractive from spring until autumn. It produces red shoots with a crystalline dusting in early April followed by long, egg-shaped leaves. Each stem bears a chalice like, pure white flower with yellow anthers and purple filaments.

PAPAVER ATLANTICUM

£2.75 Papaveraceae HP

45cm

Apricot-orange, single or semi-double blooms appear on long upright stems above a flat rosette of blue-green, hairy leaves. It is almost never out of bloom. You can forget to water it for weeks and it will still bloom!

PAPAVER LASIOTHRIX

£2.85 Papaveraceae HP

30-40cm

This tough, rare variant of Papaver orientale has smaller, blood-red, black-eyed flowers atop short, thick, hairy stems, which are erect rather than floppy. A beautiful, rarely offered flower, it is native to the mountains of eastern Turkey and northern Iran.

PAPAVER RHOEAS

£1.95 Papaveraceae HA

38-45cm

This is the fast-growing poppy which, after the battles, rapidly produced flowers amongst the trenches in the world wars and which is used to commemorate the soldiers who fell. Also known as Flanders Poppy, Corn Poppy, Field Poppy and Red Poppy.

PAPAVER RUPIFRAGUM 'ORANGE FEATHERS'

£2.70 Papaveraceae HP

45-60cm

This sumptuous, many-stemmed, double-flowered perennial, bears an endless succession of frilly, many-petaled terracotta-orange flowers. Botanically this is Papaver rupifragum 'Flore Pleno', but we feel "Orange Feathers" is less of a mouthful!

PAPAVER SOMNIFERUM 'BLACK BEAUTY'

£2.60 Papaveraceae HA

60-90cm

The almost-black, fully double blooms of this spectacular flower caused a stampede for the seed being sold at a recent Hampton Court Flower Show. You will understand why when you grow a bed of these to perfection!

PAPAVER SOMNIFERUM DOUBLE FRINGED PINK

£2.45 Papaveraceae HA

60-90cm

A very popular old favourite producing a summer-long succession of heavily doubled, deep-pink flowers. Multi-petaled paeony-flowered forms hold on to their petals much longer than single forms too! Performs best if sown thinly where you need it.

PAPAVER SOMNIFERUM 'LADYBIRD'

£2.35 Papaveraceae HA

60-90cm

A bright and simple colour. Deepest red flowers with a distinctive black blotch at the base of each petal. All of these poppies will seed quite true to type if grown well away from the other varieties.

PAPAVER SOMNIFERUM 'LAUREN'S GRAPE'

£2.50 Papaveraceae HA

1.2m

This more recent variety of Opium Poppy has big single flowers in attractive plum-purple colours which open in succession from June to August. They are excellent border plants with most attractive ornamental seed pods which are very ornamental in winter.

PAPAVER SOMNIFERUM 'MIDNIGHT'

£2.25 Papaveraceae HA

60-90cm

A bed of these unusually dark, almost black flowers, with an eye of distinctive white stamens makes a striking, mid-border clump.

PAPAVER SOMNIFERUM 'RYE BEANER'

£1.95 Papaveraceae HA 60-90cm

The colour of the large single flowers does indeed resemble a diluted glass of the famous blackcurrant drink. And every flower has a black centre to guide the bees and butterflies to the nectar!

PENSTEMON WHIPPLEANUS

£3.15 Scrophulariaceae HP 30-40cm

This upright penstemon has striking, deep burgundy-purple, to purple and black flowers on stems which bear lance shaped leaves, with spoon-shaped basal leaves below. It is a drought-resistant plant coming from Montana, the Rocky Mountains, Arizona and New Mexico.

PAPAVER SOMNIFERUM ULTIMATE MIXTURE

£2.45 Papaveraceae HA 60-75cm

A very generous packet of seeds, ideal for just sprinkling where needed in the garden, holding probably every known cultivar of opium poppy including: 'Danish Flag', peony flowered forms, 'Hen and Chickens' and every known colour to nearly black.

PETUNIA 'LIMONCELLO' F1

£2.75 Solanaceae HHA 15-25cm (60+ seeds)

This spectacular, best-ever yellow petunia makes a bushy compact clump with large wavy blooms in an attractive two tone creamy-yellow. Resembling the delicious Italian liqueur and adds a zest of lemon to borders or containers. Prefers light, well drained soil in full sun.

PENSTEMON CONFERTUS

£3.50 Scrophulariaceae HP 20-50cm (20 seeds)

This rare but easy-to-grow species bears densely crowded spikes of a true lemon-yellow, making it the only genuinely yellow Penstemon. In the wild it grows locally in moist open or wooded places, sometimes in meadows or by streams. Very few seeds collected.

PETUNIA 'SALMON VELVET' F1

£3.15 Solanaceae HHA 15-20cm (10 seeds)

This trailing petunia seed can outperform cutting-raised Surfinia Petunias, producing trailing stems up to 1m in length continuously smothered in bright salmon-pink blooms all summer long. It is ideal for use in borders for dazzling ground cover.

PENSTEMON CYANEUS

£3.85 Scrophulariaceae HP 50-70cm (20 seeds)

Robert Nold, author of 'Penstemons' wrote: "A stunning plant in impact, equal to any meconopsis". This plant is very frost hardy, but being a native of sagebrush communities, demands a well-drained, meagre soil, and not soaking in winter, to amaze your visitors.

PHACELIA BOLANDERI

£2.80 Hydrophyllaceae HP 12-20cm

Flared, lavender-blue trumpets with bright blue pollen on low hairy-leaved stems, open until late in the season, May-August. This astonishing, new, rare, hardy perennial phacelia makes an amazing display in any open spot and why it has only just been discovered amazes us.

PENSTEMON DIGITALIS 'GOLD FOIL'

£3.15 Scrophulariaceae HP 35-45cm

Sprays of lilac-pink tubular flowers open on shortish stems clad in golden yellow, non-scorching leaves, which age to burnished bronze in bright sunshine. This new plant was discovered here as a sport some years ago and is a perfect addition to P. Husker's Red.

PHLOMIS RUSSELLIANA

£2.45 Lamiaceae HP 90cm

Although it looks tender, this Syrian plant is actually bone-hardy, stout stems bearing tiered whorls of hooded, butter yellow flowers in summer, above rough heart-shaped basal leaves. A valuable and easy plant that thrives in poor dry soil.

PHORMIUM MIXED

£2.45 Xanthorrhoeaceae HP

1.8m

Bold spires of lanceolate leaves produce architectural clumps. Sprays of tubular orange-red flowers are carried on strong stems into late autumn. An inexpensive way to grow a wide selection, including dwarf, purple, green, and variegated leaved forms.

PLANTAGO MAJOR RUBRIFOLIA

£2.45 Plantaginaceae HP

30-45cm

A deep purple form of the "Giant Plantain" coming completely true from seed. Large shiny purple leaves produce a most impressive rosette from which arise long thin poker-like seed heads. A superb plant where foliage and form are required.

POTENTILLA MIXED

£2.25 Rosaceae HP

30-60cm

A wide selection of many showy herbaceous forms in white, yellow, orange and red, e.g. *Potentilla argentea*, *atrosanguinea*, *grandiflora*, *hyparctica*, *megalantha*, *nepalensis*, *rupestris nana* and several more.

PRIMULA BULLEYANA

£2.45 Primulaceae HP

45cm

This extremely vigorous and hardy candelabra primula thrusts up numerous strong stems bearing bright orange flowers with darker eyes. It does especially well in waterside environments where it will self-seed generously!

PRIMULA CANDELABRA 'HARLOW CAR'

£2.90 Primulaceae HP

30-45cm

This is one of the brightest selections available, with tall stems holding tiered whorls of large bright orange, red or scarlet flowers which appear in April, May and June. In almost any type of soil they will make a dramatic statement to all who see them.

PRIMULA CANDELABRA RAINBOWS

£2.60 Primulaceae HP

60cm

Strong stems hold heavy heads of bright flowers arranged in whorls. These plants are easy to germinate, grow and keep, especially on moist, well-manured ground. These are collected from our best candelabra colours including scarlet, yellow, pink and purple.

PRIMULA DENTICULATA BEST BLEND

£2.60 Primulaceae HP

30-45cm

The universally popular "Drumstick Primula" spring flower, which has dense globular heads of flowers in early spring. Seed collected from the many different coloured beds in our gardens, including white, lilac, lavender, blue and ruby.

PRIMULA FLORINDAE

£2.70 Primulaceae HP

60-90cm

A generous packet of the "Giant Himalayan Cowslip". Large round leaves and stout stems carry immense heads of fragrant flowers which are usually yellow but very occasionally red or orange. This is almost certainly the biggest primula there is!

PRIMULA 'GOLD LACED' (veris)

£2.90 Primulaceae HP

15-20cm (10 seeds)

These very few seeds have been collected from the best show-quality plants, which all have darkest chocolate brown centres edged with delicate golden yellow. These plants will improve over the years and make an impressive statement each spring.

PRIMULA JAPONICA 'MILLAR'S CRIMSON'

£2.40 Primulaceae HP

40-60cm

These lovely candelabra-type plants make numerous strong stems bearing deepest crimson tiers. The basal rosettes make the most spectacular cabbage-like giants when well fed, increasing in size yearly, and even self-seeding but never being a problem.

PRIMULA JAPONICA MIX 5X pkt

£2.70 Primulaceae HP

30-50cm

These lovely candelabra-type plants shoot up numerous strong stems bearing tiers of blossoms in all colours from white to red. The basal rosettes make the most spectacular, cabbage-like giants when well-fed or in moist soil.

**PRIMULA PULVERULENTA 'BARTLEY'S STRAIN'**

£3.15 Primulaceae HP

45-60cm

This is possibly the most desirable and sought after of all of the large primulas. (So valuable in fact that much of a sizeable bed was dug up and stolen, from our gardens!) This selected form bears tiered whorls of large, yellow-eyed sugar pink flowers.

**PRIMULA JAPONICA 'POSTFORD WHITE'**

£2.50 Primulaceae HP

60cm

This hardy, long-lived plant will become enormous in rich moist soil, producing yellow-eyed ivory white flowers on thick, strong stems, and is almost certainly the most impressive of all of the tall white primulas.

**PRIMULA SCOTICA**

£2.95 Primulaceae HP

Yellow-eyed, blueish purple flowers open in small bunches, on short stems sprouting from minute rosettes of grey leaves in May. Sometimes there is a second flowering in July.

**PRIMULA 'ORANGE SPLASH'**

£3.15 Primulaceae HP

15-23cm (15 seeds)

This new "hose-in-hose" primula was produced here at Plant World. The busy bees here have crossed our new hose-in-hose cowslip with an old fashioned polyanthus. The result is a new type of primula. Seedlings from these plants produce more unusual and bizarre oddities!

**PRIMULA SECUNDIFLORA**

£2.95 Primulaceae HP

30-45cm

One-sided clusters of deepest, darkest ruby red are carried on strong stems above vigorous clumps of shiny, jagged-toothed leaves. This lovely plant comes from very high up, sometimes over 12,000 feet, in the mountains of Szechwan and Yunnan in China.

**PRIMULA POISSONII**

£2.80 Primulaceae HP

Rosettes of darkest green, shiny leaves, push up 18 inch stems which carry from two to six whorls of yellow-eyed, deep purplish-crimson flowers, each about an inch across. This stately primula lives high on the mountains of Szechwan and Yunnan in China.

**PRIMULA VIALII**

£2.80 Primulaceae HP

38cm

The "Red-Hot-Poker Primula" has long crinkly leaves, from which erupt dense spikes of violet blue flowers topped by a blood red cone of unopened buds. When in flower in the garden this is our best selling alpine primula and surely one of the most desirable.

**PRIMULA PULVERULENTA**

£2.30 Primulaceae HP

45-60cm

Strong stems holding tiered whorls of deep red flowers arise from vigorous rosettes of tooth-edged leaves. A small proportion will be of the lovely shell-pink 'Bartley's Strain'. This lovely plant from China should be long-lived in most gardens.

**PRIMULA VULGARIS**

£2.45 Primulaceae HP

15cm

The true "Devon Primrose" collected from a bank on our nursery. Sheets of delicately perfumed, pale lemon yellow blossoms appear in sheets of colour in earliest spring (sometimes at Christmas in Devon!).

RANUNCULUS FICARIA

£2.70 Ranunculaceae HP

5-8cm

One of our earliest spring flowers, just after the snowdrops, it can appear as early as the latter part of February when it makes carpets of golden stars on the banks of streams and rivers, or else in the more shaded areas under hedgerows.

RHEUM NOBILE BVH 57

£3.65 Polygonaceae

1.2m (6 seeds)

This legendary giant herbaceous plant erupts with an amazing tapering spire of bright, creamy coloured bracts which are held on strong stems. These extend out even further as soon as the seed ripens. It grows high in the Himalayas. One of the world's most desirable plants!

RICINUS COMMUNIS 'RED GIANT'

£3.65 Euphorbiaceae HSH

1.8m (6 seeds)

This selected form of the "Castor Oil Plant", has brighter red leaves and seed heads than many others; the deep red/bronze shiny leaves only producing their strongest leaf colour when in full sun and as it matures.

RUDBECKIA LACINIATA

£2.40 Compositae HP

1.2-1.8m

Strong tall stems bear many golden flowers with large, black, protruding centre cones appearing from midsummer right into late autumn. An impressive and valuable flower for late colour.

SALVIA AZUREA

£2.30 Lamiaceae HP

45-60cm

This easy, long lived and popular plant carries many divided short spikes of deep purple-blue flowers, with low, sage-like basal leaves.

SALVIA BARRELIERI

£2.75 Lamiaceae HP

1.0m

This stunning herbaceous perennial has sky blue flowers on showy, tall branched spikes with large, wavy, gray-green leaves. In the wild it is found in northern Africa, Morocco, Tunisia, Algeria, and southwestern Spain, usually between 500-1200 meters.

SALVIA CANDELABRUM

£2.75 Lamiaceae HP

1.2m (8 seeds)

Sprays of large violet and white orchid-like flowers on long thin branching stems are held well above the insignificant clump of fragrant, wrinkled hairy leaves. This is one of the most beautiful of all salvias, and is apparently very hardy in a dry place!

SALVIA FORSKAÖHLEI

£2.60 Lamiaceae HP

70-90cm

Enormous hairy basal leaves form a base for an immense display of white-tongued vivid purple-blue flowers on long, strong branching stems. This spectacular plant is bone hardy, long-lived and makes a stupendous display all summer long!

SALVIA PRATENSE ROSE RHAPSODY

£2.95 Labiatae HP

40-60cm

Enchanting, rose-pink hooded blooms open on densely-packed flower heads on long stems, over dark green, aromatic foliage. Perfect for a mixed border display, they are most attractive to butterflies and bees, whilst dead-heading gives colour into autumn.

SALVIA PRZEWALSKII

£2.90 Lamiaceae HP

60-80cm

Large deep purple flowers with blackish bracts are produced in branching racemes from July to August on strong, thick square section stems, carrying hairy leaves felted beige beneath. This rare, tender-looking plant seems to be bone-hardy on our north-facing hill.

SALVIA SCLAREA

£2.85 Lamiaceae HP

1.2m

Possibly the easiest and most impressive of all hardy salvias. From large furry rosettes arise superb branching spikes of large pink-bracted blue and white flowers. An unforgettable sight.

SCLERANTHUS UNIFLORUS

£2.40 Caryophyllaceae HP

3cm

Probably the most diminutive, slow-growing and intriguing, ground covering alpine plant one can grow. In early summer, the prostrate cushion makes tiny half inch stems which carry one golden seed each, whilst any weeds in its path are stifled.

SAUROMATUM VENOSUM

£4.15 Araceae HP

40-70cm (3 seeds)

Also known as Voodoo Lily, this exotic and tropical looking plant will do well in most sunny British gardens. In late spring alien looking green stems appear covered in black spots, then large fleshy leaves appear before the flowers later in the year. Sow April-May.

SEDUM ROY LANCASTER

£2.70 Crassulaceae HP

25-35cm

Making a compact, non-invasive clump, this rare and lovely bone hardy plant makes strong stems with succulent blue-grey notched leaves beneath crimson-red flowers in early summer. Collected by famous plantsman Roy Lancaster in the Himalayas.

SCABIOSA RUMELICA

£2.85 Dipsacaceae HP

60cm

A gorgeous slowly-spreading plant producing pure crimson 'pincushion' flowers on many branching stems over a very, very long flowering season. This rarely seen colour makes a bright splash even in the darkest corner.

SENECIO POLYODON

£2.35 Compositae HP

30-60cm

A long-flowering dazzler discovered on the mountains of South Africa. Numerous erect stems produce an everlasting display of carmine rose flowers from early spring until the autumn frosts.

SCHIZOSTYLIS MIXED COLOURS

£2.70 Iridaceae HP

50-60cm

From clumps of sword-shaped leaves arise stems of cup-shaped flowers from white, through pinks to deepest vermilion. This South African gladiolus relative provides valuable colour from August right through autumn and into winter if it remains mild.

SILENE ASTERIAS

£2.70 Caryophyllaceae HP

30-45cm

This rare Bulgarian species, unlike other silenes, has tidy grey-green rosettes of shiny leaves and scented globular heads of tubular, intensely crimson flowers, blue anthers and dark wine red bracts, making an amazing colour combination.

SCLERANTHUS BIFLORUS

£2.25 Caryophyllaceae HP

5cm

This truly amazing plant, slowly creeping along like a dense and solid green rippling carpet, produces wonderful shapes and forms. Although related to our pinks, it is reputed to be the only Australian alpine totally hardy in the UK.

STRELITZIA NICOLAI 'WHITE BIRD OF PARADISE'

£3.85 Musaceae HHP

1.2-3.0m (6 seeds)

"Giant White Bird of Paradise". Huge black and white flowers on this rare member of the banana family are often seen abroad whilst in the UK it makes an impressive large-leaved plant for a pot in the conservatory. Large seeds resemble little puppets heads with yellow hair!

STRELITZIA REGINAE

£3.85 Musaceae HHP

60-90cm (6 seeds)

Spectacular orange and dark blue flowers are held on very thick stems above most attractive, leathery, banana-like leaves. In cold countries it does best in a large pot when it should be re-potted annually, in warmer climes it can make huge evergreen clumps in the garden.

SUNFLOWER MONGOLIAN GIANT

£1.95 Compositae HHA

3.6-4.2m (10 seeds)

These plants really are monsters. Not only do they grow up to 14 feet tall, they also produce the most amazingly enormous flower heads up to 18" in diameter. If you want to impress your neighbours just grow some of these against your house wall!

TACCA CHANTRIERI

£2.75 Taccaceae GP

45-60cm (10 seeds)

The 'Bat Plant'. A bizarre but quite beautiful plant with aspidistra-like foliage and large, darkest purple, almost black flowers which resemble Batman's cape. The most intriguing features though are the bunches of long 'whiskers' protruding from the centre.

TACCA CHANTRIERI 'GREEN ISLE'

£2.70 Taccaceae GP

38-45cm (10 seeds)

An unusual and rarely offered variety that has intriguing dusky green blooms with bat-like, long green tentacles. In colder climates they make excellent pot plants if planted indoors in well-drained loam. The long lasting inflorescence are also good as cut flowers.

TACCA INTEGRIFOLIA

£2.85 Taccaceae GP

60-90cm (10 seeds)

Another incredible flowering oddity with large, green veined white flowers, resembling triangular cloaks, sprouting long trailing whiskers from their purple centres. Most definitely one of the most profoundly interesting talking points you will ever grow.

TANACETUM PARTHENIUM 'MALMESBURY'

£2.50 Compositae HP

45-60cm

A rare plant with curious propeller-like flowers, which hold stubby white tubular petals surrounding the yellow disc on this new form. The name comes from Malmesbury, Wilts. where it was found by Martin Cragg-Barber of the Natural Selection nursery.

TANACETUM PARTHENIUM 'VIRGO'

£2.95 Compositae HP

45-60cm (20 seeds)

This exclusive, new, rare and shorter form of "Feverfew" has pure white, tight, button-like flowers, like diminutive pom-pom dahlias, on bolt-upright stems with little branching. Yet another absolute gem from the UK's top "Feverfew" expert!

TANACETUM PARTHENIUM 'WHITE BONNET'

£2.70 Compositae HP, HBI

45-60cm

This rarely grown variant has anemone-centred white flowers and quilled ray petals from May-Aug. It comes true from seed and has been preserved by a customer and keen "Feverfew" collector of these old gems who has asked us to re-introduce it before it becomes extinct!

TARAXACUM PSEUDOROSEUM

£2.40 Compositae HP

10-15cm (10 seeds)

A pink dandelion with a yellow eye? Whatever next? This newly-discovered little charmer will capture your heart though. A leafy rosette, just like a dandelion, pushes forth a never-ending succession of gorgeous bicoloured flowers.

TARAXACUM RUBRIFOLIUM (FAEROENSE)

£2.45 Compositae HP

5-10cm (10 seeds)

This most unusual dwarf "dandelion" makes a tiny rosette of beetroot-red, almost black leaves, with short-stemmed yellow flowers. An attractive little gem which could certainly never become a weed, it sets very few seeds for a start!!

THALICTRUM AQUILEGIFOLIUM

£2.45 Ranunculaceae HP

75-90cm

Branching stems hold large heads of countless, fluffy, rich rosy lilac flowers, just like tiny powder-puffs, over delicate sprays of maidenhair, columbine-like foliage. This is a choice and exceptionally lovely plant that should be in every garden.

THALICTRUM 'BLIZZARD'

£2.90 Ranunculaceae HP

60-90cm (20 seeds)

An absolutely exquisite pure white variety of Thalictrum delavayi. This is more compact than the pink variety and produces thousands of small, shimmering, umbrella-like flowers, amongst delicate, gossamer-like, ferny foliage, right into late autumn.

THALICTRUM ROCHEBRUNEANUM

£2.95 Ranunculaceae HP

1.2-1.8m

Native to Japan, this clump-forming perennial has lacy, fine-textured, bluish-green, columbine-like foliage. Sprays of pendulous, lavender-purple flowers with contrasting yellow stamens appear in late summer in loose, airy clusters, on purple flower stems, 8 feet tall.

TORTOISE FOOD FLOWER MIXTURE

£3.15 Various HP, HBI

A specially formulated mix of seeds to provide plants for a healthy diet for tortoises. Including Great Plantain, Common Mallow, Creeping Bellflower, Evening Primrose, Mixed Geraniums, Musk Mallow, Globe Thistle, Flowering Maple and Salsify.

TRACHELIUM CAERULEUM 'BLACK KNIGHT'

£2.90 Campanulaceae HHP 45-60cm (50+ seeds)

This new spectacular flower has dark foliage with purple veins, above which open large, dense, cloudy sprays of thousands of small, fragrant, intensely violet flowers, which appear in early summer and are magnets for bees. A superb and exceptional introduction.

TRILLIUM CAMSCHATCENSE

£3.15 Trilliaceae HP

45-60cm

Originally collected on our 2002 trip to Sakhalin (RBS0281), these gorgeous specimens bear large, white, three-petalled flowers in spring, which slowly age to purple. These always grow best in shade in deciduous woodland.

TRILLIUM CHLOROPETALUM

£3.15 Trilliaceae HP

25-30cm (10 seeds)

One of the aristocrats of the garden with three leaves, petals and calyces, leaves being wonderfully marbled and mottled in grey in spring, the three mahogany to rich crimson-maroon petals appearing shortly afterwards. Very rarely offered but long lived when established.

TRILLIUM RIVALE

£3.95 Trilliaceae HP

6-10cm (8 seeds)

Very early in the year, upright-facing flowers of white or pale pink are dotted deeper pink and violet, the spotting towards the throat is filled with bright yellow anthers early in the year making short stems and silvery-veined leaves. Probably the rarest of all trilliums.

TULIPA SPRENGERI

£2.70 Liliaceae HB, HP 30-38cm (15 seeds)

Strong clumps of glossy bright green leaves stand below goblet-shaped bright red flowers which are 5-6cm in length in early summer. This is the latest of all of the tulips to open its flowers and will self seed to make remarkable colonies in time.

UROSPERMUM DALECHAMPII

£2.95 Asteraceae HP 25-35cm

This lovely flower forms a neat rosette of wavy-edged leaves slowly spreading into compact clumps and stunning, black-eyed, soft lemon-yellow flowers all summer long. A rarely-seen alpine plant, it makes a superb rockery or border specimen.

VERATRUM CALIFORNICUM

£2.95 Liliaceae HP

1.2-1.8m

Growing up to 6 feet tall, each spring this magnificent plant pushes up a strong leafy stem, which is heavily-branched at the top. Masses of buds, held as tight green spheres, open into delicate purple-eyed flowers.

**VERBENA HASTATA ROSEA**

£2.35 Verbenaceae HP

60-90cm

A super, long flowering (June-Sept), plant from Nova Scotia. This is the more unusual shocking pink form (usually blue), with multi-branching candelabra-heads, flowers slowly expand as they ascend the stems like burning sparklers (in reverse).

**VERBASCUM CHAIXII ALBUM**

£2.35 Scrophulariaceae HP

60-90cm

This is one of the perennial verbascums bearing spires of purple-eyed white flowers on hairy stems and over compact rosettes of hairy, jagged-edged leaves. This is one of the better behaved Mulleins that may gently self-seed but rarely becomes a nuisance!

**VERONICASTRUM VIRGINICUM 'LILAC CARINA'**

£2.80 Scrophulariaceae HP

1.0-2.0m

Deserving of a special spot in any sunny border, these outstanding plants form a tall, bushy clump of dark-green leaves, bearing massive branching spikes of lavender-mauve flowers, from late summer into autumn. Most attractive to butterflies.

**VERBASCUM PHOENICUM 'PINK DOMINO'**

£2.45 Scrophulariaceae HP

45-60cm

Soundly perennial, this lovely quite diminutive plant may appear in every shade from palest pink to almost red. This is one of the truly perennial mulleins in a range of most desired colours, and in a well-drained spot will perform excellently for many years.

**VINCA ROSEA**

£2.80 Apocynaceae HHP

1.0m (50+ seeds)

This lovely perennial can be easily-grown as an annual, flowering in hot, dry climates and relatively infertile soils. The glossy green leaves provide a background for attractive, five-petaled flowers, which range from pink, red, purple to white and bi-colored flowers.

**VERBENA BONARIENSIS**

£2.60 Verbenaceae HP

1.0-1.4m

Every garden should have this long flowering beauty which flaunts its sprays of fragrant purple flowers, on wiry angular branching stems, from June until the frost. Acts as a magnet for butterflies.

**VIOLA BLUEBERRY CREAM**

£2.45 Violaceae HP

8-15cm

This gorgeous new viola has been produced using some of the very best dwarf violas on the market as parents. The flowers will vary from plant to plant, as ornamental violas do, but almost all of them will have a cream or white face with a distinctive blue or purple edging.

**VERBENA HASTATA BLUE**

£2.70 Verbenaceae HP

1.0-1.3m

This bone hardy, long flowering plant from Nova Scotia has many-branching candelabra type flower-heads, each spike of azure flowers slowly expands as it ascends the stems, just like a sparkler burning but in reverse. A valuable addition in that rarely seen true-blue colour.

**VIOLA 'BOWLES BLACK'**

£2.35 Violaceae HP

10cm

Very reliable from seed. Compact plants carry many small velvety flowers varying from deepest midnight blue to almost black. Will self-sow, and eventually hybridise with other violas, so keep it apart from lesser varieties.

VIOLA 'FUJI DAWN'

£2.95 Violaaceae HP 10-15cm

Deep purple, early spring flowers above sprays of attractively marbled pink and cream foliage. A completely new colour-break in viola variegation. Developed and named here at Plant World and now grown and copied worldwide!

VIOLA HYBRIDA 'ROSE SHADES'

£2.95 Violaaceae HP 15-25cm (30+ seeds)

A bushy, compact, free flowering variety in delicious rose shades, each bloom having an attractive yellow eye and dark whiskers. There is the bonus of a delicious sweet fragrance, and it is ideal for planting in spring in summer borders or containers.

VIOLA ODORATA

£2.35 Violaaceae HP 15cm (12 seeds)

The "Devon Violet" or "Sweet Violet" must be too well know to need a description..... but for the record, makes a creeping carpet of fragrant leaves (yes!), and long-stemmed, perfumed blue flowers opening with the snowdrops in February, and on into spring.

VIOLA TRICOLOR

£1.95 Violaaceae HBi,HA 10-15cm

These delightful flowers, with sprays of purple, blue, yellow or white blooms, patterned with purple, lavender and yellow, flower over the whole summer self-seeding freely, charming when allowed to grow in a border or wild garden and are self-fertile, pollinated by bees.

VISCARIA 'BLUE ANGEL'

£2.95 Caryophyllaceae HA 25-35cm (20+ seeds)

The "Blue Champion" a rare and fantastic dwarf cottage garden plant, has a unique colour among this group of flowers, with masses of wide-open, large, two-tone mid blue flowers smothering it. These appear around six to eight weeks after sowing and then all season long.

VITEX AGNUS CASTUS 'TEXAS LILAC'

£2.70 Verbenaceae HT 1.8-2.4m

Attractive clusters of fragrant blue-mauve flowers open amidst fragrant leaves. Also called Chaste Tree, Chasteberry or Monk's Pepper, these berries were once used to flavour stews in monasteries. (But not recommended for honeymooners)

WILD FLOWER MIXES

£1.85 Various

Please order any of these mixes of wild flower seeds for various habitats and purposes, all are priced at 1.75 per packet. Butterfly Meadow Collection. Honey Bee mix. Wetland mix. Shaded mix. Late-flowering mix. Early-flowering mix. Cornfield mix. Meadow mix.

XERONEMA CALLISTEMON

£3.75 Xeronemataceae HHP 35-45cm (20+ seeds)

This rare plant lives in the Taranga Islands in New Zealand. This fabulous plant is very rarely offered as plants or seeds. The stalks grow vertically then sideways displaying dazzling red flowers tipped with orange pollen. These fabulous plants can reach 40cm in height.

"I have never bought seeds from overseas before, but a friend at a large garden nursery assured me your company was one of the best in the world." Bonnie Gallot, New Zealand

"Thank you for the fast service. I received my seeds today in New Jersey with no problems and will order from you in the future." Jim Briggs, USA

"Hello to the team of Plant World Seeds, the seeds arrived today very fast. Thank you very much, especially for the generous amount of seeds." Barbara Dussler, Germany

"I received my order much quicker than expected and am very pleased with the service you provide. One happy gardener." Pat Griffiths, Walsall

Climbers

ARISTOLOCHIA ELEGANS

£2.90 Aristolochiaceae HHCI 5.4-6.0m (15 seeds)

An evergreen vine with most intriguing flowers and bright green, heart shaped leaves which create a dense mass of foliage. In summer the vine produces 3" flowers resembling a 19th century Dutchman's pipe. A favourite of butterflies. (RHS Award Winner)

ARISTOLOCHIA FIMBRIATA

£2.95 Aristolochiaceae HHCI 60-90cm (8 seeds)

Quite amazing flowers surrounded by most attractive, silver-veined leaves, festoon this very unusual, drought-resistant, trailing and climbing plant, which is native to Argentina, Paraguay and southern Brazil. It also makes an excellent hanging basket plant!

BILLARDIERA LONGIFLORA

£2.40 Pittosporaceae HCI

A choice Tasmanian climber grown outside for twenty years here. Thin twining stems produce creamy-yellow purple-tipped waxy flowers in spring. In autumn, outstandingly lovely clusters of deepest violet grape-sized berries appear.

BOMAREA HIRTELLA

£3.75 Alstroemeriaceae HCI 2.0-3.6m (8 seeds)

This "climbing alstroemeria" makes a deep hardy tuber and gives fabulous value each spring when strong-climbing stems wind upwards, each terminating in a compact bunch of gorgeous, speckled, yellow-throated, orange and green alstroemeria-like flowers.

BOMAREA SALSILLA

£3.15 Alstroemeriaceae HHCI 3.6m (10+ seeds)

Bunches of magnificent, delicately marked, flared, dark pink trumpets hang from twining vines decked with fleshy green leaves. Fabulous either climbing another shrub or on a support and it weaves through a conifer here. Plant out when still small.

CLEMATIS INTEGRIFOLIA

£2.80 Ranunculaceae HCI 1.0-1.2m

This gorgeous, sweetly scented, clump-forming clematis bears very attractive, indigo-blue nodding flowers with recurring tepals. An exceptionally lovely species, it was introduced from southern Europe in 1573 and has always been one of the staple cottage garden plants.

CLEMATIS MONTANA ALBA

£2.70 Ranunculaceae HCI

One of the most rewarding and also easy-to-grow of all clematis, pure white flowers open in early spring all having the most delicious perfumed scent of sweet marshmallows. This seed was collected from all the white-flowered cultivars throughout our gardens.

CLEMATIS MONTANA PINK

£2.80 Ranunculaceae HCI

One of the easiest to grow of all clematis; these flowers open in early spring in colours ranging from pinks to red, all having the most delicious perfumed scent of sweet marshmallows. Seed is collected from all the different cultivars throughout our gardens.

CLEMATIS SERRATIFOLIA

£2.80 Ranunculaceae HCl

This delicate, late flowering climber produces an endless succession of blooms from July until October, when the frost sends it to sleep again. The fragrant brown-eyed yellow flowers give an unseasonal supply of delicate lemon perfume.

CLEMATIS VIORNA

£3.95 Ranunculaceae HCl

(6 seeds)

This rare and beautiful climber is seldom seen. It has vase-shaped flowers, consisting of four thick, leathery petals, which open in early summer and continue into autumn. This vigorous plant is good for covering less attractive shrubs and fences.

CODONOPSIS BHUTANICA

£2.80 Campanulaceae HP

90cm

An easy-to-grow low climber or scrambler, that from June until August will twine around less interesting shrubs bearing longish, downwards-facing flowers, which are slightly flared open and delicately marked, deep in the throat in purple and black.

CODONOPSIS CONVULVULACEA

£2.95 Campanulaceae HCl,HP 1.2-1.8m

From the Himalayas and China, this deciduous climber produces delicate pale blue to violet (sometimes white) flowers, which can be up to 5cm across. With these opening in mid-summer it happily scrambles through shrubs and woody plants in the mixed border.

CODONOPSIS FORRESTII

£3.45 Campanulaceae HCl,HP 70-90cm

This is the most attractive climbing perennial you could wish to see. Broad fleshy leaves grow on twining stems and carry large, fabulous, flared starry flowers of deepest sky blue which stare upwards. Similar to a dwarf clematis, this gem is rare in cultivation.

ECCREMOCARPUS SCABER FLAME COLOURS

£1.95 Bignoniaceae HCl

A vigorous scrambler, perfect for covering an evergreen shrub, with red, orange or yellow tubular flowers, produced freely from June to October in multi-flowered trusses. Makes a hardy overwintering tuber, but flowers first year from seed.

GLORIOSA LUTEA

£2.45 Liliaceae GCl

(10 seeds)

A new, rare and very lovely variation on the normally red-flowered climber. Large, golden flowers with reflexed petals adorn the numerous vigorous multi-branching stems in midsummer. A truly spectacular conservatory plant.

GLORIOSA ROTHSCHILDIANA

£3.15 Liliaceae GCl

(10 seeds)

This easily grown and superlative climbing lily bears very large, reflexed, frilled yellow and crimson flowers. Twining stems carry thin leaves which terminate in a clinging tendrils. This is an ideal plant for a sheltered garden or conservatory.

IPOMOEA ALBA

£2.80 Convolvulaceae HHCl 3.0-4.5m (6 seeds)

Enormous, white waxy blossoms open at night, perfuming your garden all night long before closing at dawn. If patient you can watch these magical flowers unfurl right before your eyes. They can even be grown indoors to fill your house with fragrance.

IPOMOEA 'CLARKE'S HEAVENLY BLUE'

£1.95 Convolvulaceae HHCl 4.5m

This showy climber produces a seemingly endless succession of huge, 4-5 inch, white-throated blue trumpets. Plants climb to more than 15 feet, producing flowers which open in the morning before fading in the afternoon, from July until October.

LAPAGERIA ROSEA

£3.85 Philesiaceae HCl

(8 seeds)

Chile's national flower is a rightful candidate for the world's most beautiful climber. Huge, wax-like bell flowers, three-inches or more of lipstick red, decorate the twining stems. Grows outside with shelter, but is much better displayed in a conservatory or greenhouse.

LATHYRUS LATIFOLIUS 'RED PEARL'

£1.95 Leguminosae HCl

Heavy trusses of bright red, fleshy, substantial flowers, on long, strong stems grow for an long time in spring and midsummer on this perpetual, bone hardy, very perennial old favourite. If possible try to plant where it has good strong climbing support.

LATHYRUS MAGELLANICUS

£3.95 Leguminosae, HCl

1.5m (5 seeds)

Exquisite violet-blue and white pea flowers on short stems adorn this very rare plant which is probably not in cultivation and is one of the world's most unobtainable hardy ornamental climbing peas. An outstandingly pretty climber.

MAURANDYA BARCLAIANA

£2.60 Scrophulariaceae HHCl

A spectacular constant flowering twiner. Flamboyant bright cobalt blue, flared "snapdragons" in an endless succession. Impressive indoors in a large pot or in a sheltered place outside.

MAURANDYA 'MAGIC DRAGON' (ERUBESCENS)

£2.90 Scrophulariaceae HHCl

In the early 1990's we bred what is probably the first hybrid climbing maurandya ever produced. These incredibly fast growing plants, which possess explosive hybrid vigour, produce a wide range of large flower shapes and sizes in all shades of pink and red.

PASSIFLORA CAERULEA

£2.80 Passifloraceae HCl

2.0-4.0m (10 seeds)

This lovely exotic-looking climber is quite hardy in sheltered positions where it displays its fragrant, intricately-marked, pale blue flowers in summer. In Autumn plum-sized orange fruits appear filled with edible crunchy pips and sweet, tasty pulp. RHS Award winner.

PASSIFLORA EDULIS

£2.60 Passifloraceae HCl

6.0-9.0m (10 seeds)

This vigorous climber has deeply 3-lobed leaves, climbing tendrils and purple-centred frilly white flowers, followed by a crop of purple, edible fruit. Although it is half hardy, it may be killed off down to the ground in hard winters, but often re-grows from the roots.

PASSIFLORA QUADRANGULARIS

£2.90 Passifloraceae HCl

15.0m (8 seeds)

One of the most beautiful passion flowers, this beauty has large fragrant flowers with deep red petals and a centre crown that has five rows of white and purple rays. Large leaves hang from quadrangular stems. It has the most enormous of all the passion fruits.

RHODOCHITON ATROSANGUINEUM

£3.15 Scrophulariaceae HHCl

(10 seeds)

Always one of the most sought-after climbing plants here, deepest purple, almost black, flared tubular flowers open with deep pink bracts and hang amongst the heart-shaped leaves. An exceptional container plant which will flower continuously for months on end.

SWEET PEA 'BLACK KNIGHT'

£1.50 Leguminosae HA

(25 seeds)

One of the 'more modern' heirloom varieties from 1898. Sprays of heavily perfumed, bicolored deep maroon/violet flowers.

SWEET PEA 'HENRY ECKFORD'

£1.50 Leguminosae HA

(25 seeds)

This dazzling fragrant flower was the first uniquely coloured, really bright orange sweet pea bred by the famous sweet pea breeder Henry Eckford in 1906.

TROPAEOLUM AZUREUM

£3.65 Tropaeolaceae HHCI

(20 seeds)

The fabulous blue climbing perennial nasturtium! Thin twining stems produce many dazzling cobalt blue flowers from the leaf axils of delicate, attractively lobed leaves. Dying down to deep resting tubers, this is one of the ultimate alpine house plants.

SWEET PEA MATUCANA

£1.95 Leguminosae HA

(25 seeds)

This famous old heirloom is a striking, very strongly scented, bi-coloured Peruvian sweet pea. It is best grown alone as its gorgeous, velvety, deep colours, which appear until late in the season cannot compete with some of the bright modern forms.

TROPAEOLUM SPECIOSUM

£3.50 Tropaeolaceae HHCI

(8 seeds)

Sheets of dazzling scarlet flowers cascading amidst pretty, delicate, divided leaves adorn this gorgeous plant throughout midsummer. This fabulous Chilean native prefers peat to be incorporated into the soil, when it will make countless, long-lived hardy tubers.

SWEET PEA 'PAINTED LADY'

£1.50 Leguminosae HA

(25 seeds)

A lovely old-fashioned heirloom variety dating back to 1737. A profusion of rose/white bicolor flowers which are smaller than those of modern forms, but this is more than compensated for by their entrancing perfume.

"You sent Tuesday, I received today, in Friday, in Latvia. Envelope and seeds in very good condition, and you present me 1 seeds package for free. Good luck in growing your beautiful flowers and trees." Armands Dreimanis, Latvia

"Thank you for the amazing service. The seeds arrived today with an extra free packet. I'm really grateful." Mrs Megan Armour, New Zealand

SWEET PEA 'PASTEL SUNSET'

£1.50 Leguminosae HA

(25 seeds)

A deliciously perfumed mixture of Spencer types. These pastel shades include cream, almond, pink, lavender and white.

"I have received your shipment well packed. Thanks a lot for the prompt delivery and the complimentary seeds. Hope to do business with you guys in the near future." Amit Jose, India

"Received with thanks. Impressed with the speed with which my order arrived. Thank you!" Chris Newbold, Belper, Derbys

SWEET PEA 'ROYAL WEDDING'

£1.50 Leguminosae HA

(25 seeds)

The best long-stemmed, fragrant pure white sweet pea available today. Awarded Certificate of Merit by the Scottish National Sweet Pea Society. Ideal for exhibition or garden use.

"Great service from this company. Seeds were shipped quickly and arrived quickly. Prices and shipping costs are very reasonable. They had several varieties I was having trouble finding, so I was very happy to find them here."

Michel Levesque, Quebec, Canada

Trees & Shrubs

ACACIA DEALBATA

£2.70 Leguminosae HHT 10.0-30.0m (20+ seeds)

This beautiful fast-growing, small evergreen tree from Australia is smothered with masses of exceptionally fine silver-grey, delicate foliage which is topped with fluffy, pale lemon, sweetly scented flowers in late winter and early spring. An RHS award-winning plant.

AZALEA EXBURY HYBRIDS

£2.90 Ericaceae HSh 90cm-1.8m

Seed collected from our own twenty year old plants which were originally grown from seed collected from the famous Exbury Gardens. Colours in all shades from pale lemon to deepest red and every one dripping with heady perfume in spring and early summer.

BAOBAB TREE (ADANSONIA DIGITATA)

£3.15 Bombaceae GP 15.0m (4 seeds)

The legendary 'Upside-Down-Tree' (*Adansonia digitata*) makes an intriguing, long-lived bonsai or conservatory plant and is easily grown from seed. In the wild this tree is a valuable food commodity, the huge sausage fruits being the source of cream of tartar.

BRUGMANSIA VERSICOLOR

£4.15 Solanaceae HSHS 3.0-4.5m (6 seeds)

Enormous trumpet-flowers open white before ageing to pink, peach or apricot and pouring out a rich daffodil perfume. They can withstand a wide range of temperatures but a moderate frost will damage the plant in colder climates. Suitable for conservatories.

CALLICARPA BODINIERI

£2.80 Verbenaceae HSh 1.2-1.8m

Spindly, much-dividing branches produce relatively insignificant starry lilac flowers in spring, but after the leaves have fallen in autumn the extremely attractive bunches of bright violet berries persist through into winter.

CAMELLIA SINENSIS

£2.95 Theaceae HSh 2.0-6.0m (6 seeds)

The "tea tree" has bright green, shiny leaf clad stems holding yellowish-white flowers. These shrubs do best if kept pruned below 2 m high. Tea is the most important non-alcoholic beverage in the world, so grow your own!

CLIANTHUS PUNICEUS PINK FLAMINGO

£3.95 Leguminosae HSHS 90cm-1.2m (8 seeds)

"Lobster Claw" or "Parrot's Beak". In a sheltered garden or large pot this absolutely magnificent shrub displays hanging groups of very large curved flowers in the most attractive shade of pink. There are red and white forms but this is by far the best!

CORDYLINAE AUSTRALIS

£2.70 Agavaceae HT,HP 90cm-3.0m

A long lived 'palm' carrying at the top a rosette of strap-shaped long leaves. Older plants grow enormous panicles of deeply scented white flowers in early summer, producing white berries in autumn. After severe winters the trunk usually sprouts several heads.

CORNUS CAPITATA

£2.60 Cornaceae HSh

1.5-3.5m

This outstanding shrub or small tree bears long-lived heads of enormous, impressive, buttercup-shaped flowers, consisting of waxy, creamy buttercup-shaped flowers, followed by red, strawberry-like fruits. This is certainly the best one growable from seed.

FUCHSIA MAGELLANICA

£3.65 Onagraceae HSh

90cm-1.8m

We collected this most beautiful and bone-hardy plant, which can flower just four months after sowing, on our Chilean Expedition of 1994. Scarlet and purple 'ballerina' flowers open throughout summer and autumn and into winter in mild places.

CRINODENDRON HOOKERIANUM

£2.90 Elaeocarpaceae HSh

1.8m (6 seeds)

The "Chilean Lantern Tree" is one of the world's most attractive shrubs. Garden visitors seeing the attractive, crimson, waxy urn-shaped pendent flowers in early summer just cannot wait to rush into our plant nursery to buy one for themselves.

JOVELLANA VIOLACEA

£2.90 Scrophulariaceae HSH,

60cm-1.2m (20 seeds)

A rare and beautiful plant from Chile and New Zealand. Thin branching stems with attractive waxy-edged leaves produce clusters of countless delicate orchid-like cream flowers gently marked with yellow and purple, which appear throughout spring and early summer.

DAPHNE TANGUTICA

£3.15 Thymelaeaceae HSH

60-90cm (6 seeds)

A rare hardy evergreen shrub bearing clusters of very fragrant, white flushed, purple-pink flowers from mid spring to early summer. Bunches of red berries appear later and persist into late autumn.

LEYCESTERIA FORMOSA

£1.95 Caprifoliaceae HSh

1.8m

A multi-valve plant. Bright green bamboo-like stems in winter. Delicate white pendent flowers amidst tasselled, ruby-coloured bracts in summer. Soft bunches of purple-brown caramel flavoured berries (loved by birds) in autumn.

EMBOTHRIUM COCCINEUM

£2.80 Proteaceae HSh

1.8-3.6m (10+ seeds)

An unusually large flowered form of the "Chilean Firebush" originally collected on the banks of Lago Cucao during our 1994 Chile Expedition. This seed has wild diversity so you will find that in early summer the clusters of tubular flowers vary from crimson to bright red.

LEYCESTERIA FORMOSA 'GOLD LEAF'

£2.95 Caprifoliaceae HSh

1.2-1.8m

A gorgeous form of this already multi-valve plant bearing purple-bracted white flowers amongst crimson-tinged, bright golden leaves. Coming completely true from seed this exciting new plant is perfect to brighten up a shady corner.

FUCHSIA BOLIVIANA

£2.80 Onagraceae HSH,

90cm-1.8m

A stunning, showy species, producing exotic, hanging clusters of four inch flowers in a stunning combination of pure white and fluorescent red. The long trumpet-shaped blooms open progressively down the cluster for several months, followed by tasty green fruits!

LUPINUS ARBOREUS (BLUE)

£2.40 Papilionaceae HSh

1.8m (20 seeds)

The outstanding blue tree lupin produces branching stems from a stout trunk. Fragrant bi-coloured blue flowers, much loved by bees and butterflies are produced throughout the summer.

LUPINUS ARBOREUS (YELLOW)

£2.25 Papilionaceae HSh 1.8m

Fragrant creamy yellow racemes cover what can become a long lived, long flowering small tree, complete with thick knobbly trunk. A haven for bees and butterflies throughout summer and autumn.

LUPINUS ARBOREUS SNOW QUEEN

£2.40 Papilionaceae HSh 90cm-1.2m (20+ seeds)

This lovely form has fragrant, pure white flower spikes which appear in early summer. If pruned back after flowering, tree lupins will last for many years and they may, with care, be made into impressive, single-trunked standards.

MACADAMIA INTEGRIFOLIA

£2.95 Proteaceae HHT,G 4.5-9.0m (3 seeds)

An attractive landscape tree bearing long sprays of creamy-yellow "bottlebrush" flowers. These later produce very large seeds, each containing a sizeable, tasty white nut. This quite unique, sub tropical member of the protea family is native to Queensland.

MELIANTHUS MAJOR

£2.85 Melianthaceae HSH 1.2-1.8m (10 seeds)

The giant with deeply-cut grey leaves. Bizarre, brownish flowers produce inflated seed-pods in late summer. "Melianthus has probably the most beautiful large foliage of any plant that can be grown out of doors in these islands". (Graham Stuart Thomas).

METROSIDEROS EXCELSA

£2.70 Myrtaceae HHT,H 1.8-6.0m

A beautiful member of the myrtle family, this lovely shrub/tree has oblong, leathery leaves which are covered in dense white hairs underneath. The vivid, paintbrush-like, crimson-red blossoms appear around December. These plants are extremely tough.

PAULOWNIA TOMENTOSA

£2.60 Scrophulariaceae HT 1.8-3.6m (50+ seeds)

This truly spectacular tree produces large, pale mauve "foxglove" flowers on naked branches in early spring, the large, dinner-plate-sized, soft furry leaves appearing later. If cut to the ground in spring, enormous leaves develop on the shoots sprouting from the soil.

RUBUS SPECTABILIS

£2.70 Rosacea HSh 90cm-1.2m

This attractive hardy shrub is grown both for its attractive, dazzling-red flowers and also its juicy fruits which mature in late summer to early autumn. These resemble large orange-red raspberries. In their North American home they are used to make jams and pies.

SAMBUCUS NIGRA

£2.60 Caprifoliaceae HT,HS 1.8-3.0m

Fragrant, flat topped, cream flower heads appear in May and June followed by the purple-black berries in September. The flowers are used to make the delicately-perfumed elder flower champagne, whilst the berries are used for wine!

TAXUS BACCATA FASTIGIATA

£2.40 Taxaceae HT 1.8-3.0m

This well-known evergreen tree bears masses of attractive red berries in summer. (Edible fruit but poisonous seed!) Seeds collected from the compact, columnar, fastigiate form of the longest growing of all of our native trees (even oak!). Plants may vary in stature.

ZANTHOXYLUM SIMULANS

£1.95 Rutaceae HSh 1.8-2.4m

A curious and attractive shrub in the rue family. Sprays of greeny-yellow flowers in spring later produce bright red berries amidst shiny aromatic leaves. Enormous thorns are produced on the old wood.

Grasses

BRIZA MAXIMA

£1.60 Gramineae HA 30-45cm

"Quaking Grass". An attractive and lovely annual grass bearing large trembling lockets on many stems. Gently self-seeds, moving around the garden until it finds a place where it is happy, but is shallow rooted and very easy to pull out should the need arise.

BRIZA MEDIA LIMOUZI

£2.60 Poaceae HP 60cm

This new and quite distinctive taller form of the normal "perennial quaking grass" (*Briza media*) has stems which are almost double the usual length, whilst the most attractive clump retains the usual compact width.

BRIZA SUBARISTATA

£1.95 Poaceae HP 30cm

"Chilean Quaking Grass". We collected this new grass from the foothills of Volcano Antuco on our Chilean Seed Expedition in 1994 (RB94154). Nodding panicles of seedheads appear, some plants even producing darker plum coloured forms.

CAREX BUCHANANII

£2.35 Cyperaceae HP 45-60cm

Dense, erect tussocks of copper-bronze make this one of the most sought after and grown architectural plants. When grown as a solitary specimen it makes a stunning effect with contrasting flowers or silver foliage plants.

CHIONOCHLOA CONSPICUA

£2.35 Poaceae HP 1.5-2.1m

From New Zealand comes the amazing legendary "Hunangemoho Grass". Low, tidy clumps of sharp green blades erupt into thick, strong, arching stems, supporting massive 18 inch divided golden sprays. Impresses all our visitors here.

CHIONOCHLOA FLAVESCENS

£2.30 Poaceae HP 1.2-1.8m

"Broad-leaved Snow Tussock". A fabulously impressive New Zealand grass. Long, stout wands carry twelve inch long heads of golden tassels towering above stiff compact tussocks. One of the three very best grasses we have grown.

DENDROCALAMUS STRICTUS

£2.90 Poaceae HHP 3.0-10.0m

This giant grass, an attractive pale blue when young, turns greenish grey or yellow as it ages. It bears small green furry leaves. When fully-grown the diameter of the stems is around 13-16cm. This sturdy tropical/subtropical non-invasive species is drought tolerant.

ELYMUS MAGELLANICUS

£4.15 Poaceae HP 30-40cm (6 seeds)

The bluest leaf of any plant we grow, this outstanding grass is native to the mountains of Southern Chile and Argentina where it forms a slow-growing, positively non-invasive, well-behaved clump of beautiful silvery, chalky, metallic-blue leaves. Well drained soil is best.

FESTUCA GAUTIERI

£2.40 Poaceae HP

15cm

A new, dwarf, and very distinctive grass forming tight domes of thin, bright green leaves, very much like a green hedgehog. Later, numerous short stems of brown seedheads appear. A little beauty for a rockery or small garden.

STIPA ELEGANTISSIMA

£2.80 Poaceae HP

50-75cm

'Elegant' describes this delicate grass perfectly. The compact sheaf consists of countless thin stems surmounted by clouds of nebulous golden smoke which whispers and hisses gently as it waves in the wind. Absolutely unbeatable growing on its own.

MILIUM EFFUSUM 'AUREUM'

£2.95 Poaceae HP

30-45cm

The best golden grass growable from seed has dazzlingly bright, canary-yellow leaves. Of its best in spring and especially in a shady spot. In commerce "Bowles' Golden Grass" is often the most expensive grass seed in the world!

STIPA GIGANTEA

£2.95 Poaceae HP

1.5-2.4m (15 seeds)

The largest of all feather grasses, and certainly one of the most elegant and stately ornamental grasses, forming relatively insignificant basal clumps from which arise long, strong stems holding huge, loose panicles of golden spikelets with dangling awns.

PENNISETUM THUNBERGII 'RED BUTTONS'

£2.40 Poaceae HP

38-50cm

Pennisetum 'Red Buttons' or "Fountain Grass" produces deep reddish-black flowers that resemble rabbits' tails which persist throughout the season, the whole plant forming an attractive evergreen clump of green foliage with burgundy highlights.

STIPA PULCHERRIMA

£2.90 Gramineae HP

60-90cm (4 seeds)

"Golden Feather Grass" is disputably the most beautiful grass in the world. In midsummer seedheads expand up to nearly two feet long resembling bunches of ostrich feathers, waving and billowing like wispy smoke in the slightest breeze.

SETARIA MACROSTACHYA 'WILL SCARLET'

£2.50 Gramineae HA

45-60cm

Thick clumps of attractive foxtail-like flower heads, perfect for cutting, grow on long stems clad in broad leaves. If planted in a hot, dry spot, or in a container on a warm patio, the leaves and stems of this lovely plant will turn bright crimson.

UNCINIA EGMONTIANA

£2.75 Cyperaceae HP

20-30cm

From Mount Egmont in New Zealand comes the prettiest hardy red grass growable from seed. Tight compact erect clumps of stiff arching crimson-bronze blades, from which arise narrow spikes of small, sharply pointed black seeds.

STIPA ARUNDINACEA

£2.50 Gramineae HP

60-90cm

"Pheasant Tail Grass". Arching sprays of purple feathery plumes consist of golden brown fine leaves in compact clumps, this is an absolute beauty set on its own in gravel.

"I received the missing Early Nantes carrots today with a bonus of an extra pack. Thanks you very much for rectifying the mistake. Your customer service is second to none." Margaret Gilbert, Edinburgh

"Plant-World-Seeds.com is the BEST website I have ever used!" Charles Johnson, USA

Tomatoes

BANANA LEGS

£1.95 TOMATO

(20 seeds minimum)

A productive plant giving long, thick-fleshed juicy fruits with a clean and refreshing taste. Fruits are green-striped when growing before turning a distinctive banana yellow colour when ripe. (Cordon)

BRANDYWINE YELLOW

£1.95 TOMATO

(10 seeds minimum)

Beautiful, smooth, large, meaty, yellow/gold fruit of exceptional quality with a creamy texture and delicious rich flavour. The tall vines have healthy, potato-leaved foliage. Surprisingly this is not actually closely related to other Brandywine varieties (Cordon)

BLACK CHERRY

£1.95 TOMATO

(15 seeds minimum)

This heavy cropping variety is everyone's favourite, producing seemingly endless bunches of smallish, ultra-sweet fruits, which resemble dark cherries and which have a very rich flavour. A current favourite in up-market shops. (Cordon)

BROWN BERRY

£1.95 TOMATO

(20 seeds minimum)

A new and exceptional plant with long herringbone trusses of identical-sized, chocolate-coloured, sweet and juicy fruits which simply refuse to split. Our panel remarked that, when picked, they looked just like a box of maltasers! (Cordon)

BLACK FROM TULA

£1.95 TOMATO

(15 seeds minimum)

Whilst this deep reddish-brown Russian beefsteak variety is not as dark as some other "black" tomatoes, where it really scores is on taste which is strong, rich and sweetly-sharp (!!) with a hint of smokiness. (Cordon)

CREAM SAUSAGE

£1.95 TOMATO

(30 seeds minimum)

Bushy, productive plants produce crisp-fleshed, creamy coloured, elongated sausage-like fruits. The sweet, juicy, golden flesh, with a hint of lemon flavour, makes them an ideal choice for creating unusual sauces. (Bush)

BRANDYWINE RED

£1.70 TOMATO

(15 seeds minimum)

A very famous potato-leaved heirloom plant with a complex history, giving consistently high yields of medium to large, very juicy, fairly crack-tolerant, slightly flattened red fruits. Gosh, what a mouthful! (Cordon)

DELICIOUS

£1.95 TOMATO

(10 seeds minimum)

A really huge red beefsteak fruit which is smooth, nearly solid and often weighs more than 2 lbs. This variety holds the world record for the largest tomato ever grown and has excellent flavour, few and tiny seeds, and very little cracking. (Cordon)

DRUZBA

£1.90 TOMATO

(20 seeds minimum)

This mid-season Bulgarian heirloom is more resistant to disease, pests and adverse weather conditions than most other varieties making it an ideal choice for the novice tomato grower. It produces heavy crops of uniform 8-10 oz salad tomatoes. (Cordon)

GERMAN RED STRAWBERRY

£2.35 TOMATO

(10 seeds minimum)

Produces large beautiful red strawberry-shaped fruits. The solid-fleshed interior has a delicious, sweet flavour with little seed and juice, so is ideal in salads. One of our top big croppers and best-selling tomatoes. (Cordon)

FERLINE F1

£2.70 TOMATO

(20 seeds minimum)

A valuable F1 giving heavy crops of tasty, strong-flavoured, middle-sized, deep red fruits, with impressive tolerance to blight, fusarium and verticillium wilt, both in the garden or under glass. Is this the answer to many gardeners' prayers? (Cordon)

GOLD NUGGET

£1.95 TOMATO

(20 seeds minimum)

With a high yield of small, golden-yellow, oval shaped cherry fruit, which is juicy and seedy, with a mild sweet flavour, these early fruits are also almost seedless. It is perfect for growing in containers and is one of the first to ripen here. (Bush)

FIRST IN THE FIELD

£1.90 TOMATO

(20 seeds minimum)

As the name implies, a very early bush variety which will do well outdoors. This very popular compact plant produces a heavy, long-season crop of small to medium bright red juicy fruits with a strong and distinctive wine-like flavour. (Bush)

GOLDEN GRAPE

£1.95 TOMATO

(30 seeds minimum)

One of the heaviest cropping tomatoes we've ever seen or grown, this cherry tomato bears hundreds and hundreds of golden grape-shaped fruit. The skin is thin while the flesh tastes sharp and refreshing. (Cordon)

GARDENER'S DELIGHT

£1.70 TOMATO

(30 seeds minimum)

Often existing under different name (Sugar Lump, Sugar Cherry) this very well-known and tidy plant reliably produces 1" diameter, uniform, cherry fruits with an incredibly delicious sharp flavour. (Cordon)

GOLDEN SUNRISE

£1.65 TOMATO

(20 seeds minimum)

A versatile mid-sized early variety which produces good yields of golden-yellow, medium-sized, uniform fruit. Cultivated outdoors or under glass. Distinctive sweet taste. RHS AGM winner (Cordon)

GARTENPERLE

£1.90 TOMATO

(20 seeds minimum)

A compact bush variety which will tolerate cooler temperatures and does well in tubs, window boxes and hanging baskets. Produces heavy bunches of small red firm-fleshed fruits with a strong, unusual, and slightly sharp taste. (Bush)

GREEN SAUSAGE

£1.95 TOMATO

(30 seeds minimum)

These "must have" long sausage shaped fruit are a striking lime-green colour with yellow stripes. The high-yielding tomatoes are thick-fleshed and cavity-free with a sweet cucumber-like flavour. Excellent for cooking. (Bush)

GREEN ZEBRA

£1.90 TOMATO

(15 seeds minimum)

A good cropping early plant with bright amber-gold, two inch fruits. Striped in deep lime-green they make a colourful statement when sliced in salads. The bright green flesh is soft, with a strong and tangy flavour. (Cordon)

JAPANESE BLACK TRIFELE

£1.90 TOMATO

(15 seeds minimum)

A late season potato-leaved plant (originally "Russian Truffler"!), with large pear shaped purple-black fruits with dark green shoulders, resistance to cracking, and a strikingly rich flavour with a hint of chocolate. (Cordon)

ILDI

£1.95 TOMATO

(30 seeds minimum)

One of the very highest yielding tomato plants we have ever seen. Huge trusses contain dozens and dozens of sweet, grape sized, thin skinned, non-splitting yellow fruit, the whole plant resembling a Christmas tree weighed down with baubles. (Cordon)

KELLOG'S BREAKFAST

£2.30 TOMATO

(10 seeds minimum)

A superb, non-splitting, pale to deep orange beefsteak, with few seeds and a fantastic sweet, tangy flavour. The juice and flesh have the same bright colour as orange juice. Our trial plants were loaded with fruits and were unusually strong and healthy-looking. (Cordon)

INDIGO APPLE

£2.60 TOMATO

(10 seeds minimum)

With supreme shock value as well as a good sweet tomato flavour, disease tolerance and a really good shelf-life, this new 'true-black' variety will eventually turn almost jet black, caused by anthocyanins - antioxidants found in blueberries. (Cordon)

KORALIK

£1.95 TOMATO

(20 seeds minimum)

This early Polish bush variety makes widely held branches rather like a small oak tree, enabling it to produce abundant sweet isolated fruit. It has a good tolerance to blight it is perfect for areas where the growing season is short and wetter than normal. (Bush)

INDIGO BLUE BERRIES

£2.75 TOMATO

(10 seeds minimum)

A new and most unusual deep purple skinned cherry variety. Ripening to almost black, with delectable juicy pink flesh and delicious plum-like flavour, it contains high levels of the antioxidant anthocyanin. Taste testers describe the flavour as sparkling. (Cordon)

LEMON TREE

£1.95 TOMATO

(15 seeds minimum)

A quite incredible and distinctive tomato with an almost perfect resemblance to a real lemon, more so than other "lemon" tomatoes. When sliced, the similarity even extends to the sharp, strong taste, which is useful for salads. (Cordon)

INDIGO ROSE

£2.95 TOMATO

(10 seeds minimum)

Wow! No trick photography needed with this new first-ever jet-black tomato, developed by Oregon State University. Disease-resistant, fruity, antioxidant filled, large-plum-sized fruits ripen in late summer to deepest purple, with flesh resembling ripe plums. (Cordon)

MASKOTKA

£1.90 TOMATO

(10 seeds minimum)

This compact bush variety (which means 'mascoot' in Polish) is ideal for growing in hanging baskets or patio containers. The plant produces an early and very heavy crop of vivid red, attractive, sweet cherry fruit which show a good tolerance to cracking. (Bush)

MERVELLE DES MARCHES

£1.95 TOMATO

(20 seeds minimum)

This vigorous, 19th century French variety ("Market Wonder") is easy to grow, showing good resistance to disease. The medium sized fruit grow in attractive clusters, their sweet taste and small number of seeds making them ideal for use in sauces. (Cordon)

PURPLE RUSSIAN

£1.90 TOMATO

(20 seeds minimum)

With a chart-topping smooth flavour and a famous name, these plump, egg-shaped, non-cracking purple fruits from the Ukraine have very good cold tolerance, and are probably the best of all the 'black' tomatoes for keeping. (Cordon)

MICRO

£1.95 TOMATO

(10 seeds minimum)

Probably the smallest tomato plant ever! Micro can be grown in a 6" pot or window box, growing only 4-5" high, but still managing to produce dozens of tiny fruit. Suitable for people with no growing space, and an astonishing conversation piece. (Bush)

RAVELLO F1

£2.50 TOMATO

(10 seeds minimum)

Ravello is a mini San Marzano plum tomato which are perfect for cooking or making into sauces. The fruit produced are uniform, weighing 3-4 oz, and grow in clusters of 12-15 tomatoes. The fruit are very crack resistant and are tolerant to Blossom End rot. (Cordon)

MIEL DU MEXIQUE

£1.95 TOMATO

(10 seeds minimum)

This round cherry tomato of Mexican origin produces a large crop of small to medium, very sweet fruits and indeed was originally called Mexican Honey. This vigorous plant is very productive and does well under drought conditions. (Semi-Bush)

RED ZEBRA

£1.75 TOMATO

(15 seeds minimum)

Bright red fleshy fruits are overlaid with green-gold stripes which deepen to orange when the fruits become really ripe. The fruit, which is probably the best flavoured of the striped varieties, can grow to the size of a tennis ball. (Cordon)

ORANGE OXHEART

£1.80 TOMATO

(20 seeds minimum)

This regular leaf plant yields a good sized crop of fruits that have a superlative flavour, and which are excellent for sauces as they are very meaty with few seeds. The tomatoes are attractive in salads too because of their heart-like shape. (Cordon)

SAN MARZANO

£1.95 TOMATO

(10 seeds minimum)

One of the world's finest paste tomatoes. Compared to Roma types the fruit are thinner and pointier, the flesh being much thicker with fewer seeds, and the taste stronger, sweeter and less acidic. Many people describe the flavour as bitter-sweet. (Cordon)

PRUDEN'S PURPLE

£2.25 TOMATO

(10 seeds minimum)

Strong potato-leaved plants produce a large crop of huge, slightly flattened, crack-resistant fruits with vivid, dark pink skin and crimson flesh with an excellent flavour. This one ranks very highly in American taste trials. (Cordon)

ST PIERRE

£1.95 TOMATO

(10 seeds minimum)

This traditional French tomato variety produces hardy, regular-leaf plants bearing good yields of medium-sized, red, round, fruit with soft, thick, meaty flesh. This tomato has a great flavour producing well in cooler growing regions right up to the frost. (Cordon)

STUPICE

£1.85 TOMATO

(20 seeds minimum)

The first non-cherry to ripen, with a very high-yielding abundance of sweet, luscious, deep-red fruit. Reliably early, fruiting constantly over a long season into late September, setting well even at very low temperatures. Very disease resistant. (Cordon)

TUMBLING TOM RED

£1.95 TOMATO

(20 seeds minimum)

Bred to cascade over hanging baskets although remaining quite compact, this plant produces sweet and tangy fruits of medium strength with firm flesh, and is the perfect tomato plant for novice growers or people short on space. (Bush)

SUB-ARCTIC PLENTY

£1.70 TOMATO

(20 seeds minimum)

Thick-skinned, slightly-flattened, small to medium-sized scarlet fruits which have fascinating, strangely divided internal cavities, are produced by this compact bush plant specially developed at Greenland USAAF base. (Bush)

TUMBLING TOM YELLOW

£1.95 TOMATO

(20 seeds minimum)

An exciting plant with rich, golden, apricot-coloured fruit growing on compact pendulous trusses. It is best grown in a hanging basket or tall container when its cascading fruit can be ornamental as well as being sweet and tasty to eat. (Bush)

SUPER MARMANDE

£1.85 TOMATO

(20 seeds minimum)

This large, juicy, well-flavoured tomato is a great improvement over an already excellent variety, being distinguished by its irregular cushion shape and touch of pink on the shoulder. The huge, meaty fruits have a superb super-sweet flavour. (Semi-Bush)

VINTAGE WINE

£1.80 TOMATO

(20 seeds minimum)

A favourite of gourmet grocers, this sensational, potato-leaved plant has fruit which is a gorgeous deep pink with golden streaks, whilst the firm flesh has a strong, unusually fruity flavour. (Cordon)

TIGERELLA

£1.55 TOMATO

(20 seeds minimum)

Amongst the finest medium-sized tomatoes we've grown. Tigerella (aka Mr Stripey) are completely greenback free, have a unique rich flavour, crop heavily indoors or out and ripen more than three weeks earlier than varieties such as Moneymaker. (Cordon)

ZANZIBAR F1

£2.65 Tomato

(10 seeds minimum)

An early plum cherry tomato with a deep orange colour. The fruits weigh about 1/2 ounce and have a sharp taste with a thin skin unlike some other cherry tomatoes. The plants are vigorous and the fruit has good resistance against cracking. (Cordon)

TOMATOBERRY F1

£2.95 TOMATO

(8 seeds minimum)

Tomatoberry is a popular new F1 tomato variety with long cascading trusses of glossy red strawberry-shaped fruit. The early-ripening fruit are very sweet with a thin skin and make delicious salad or snacking tomatoes. (Cordon)

ZAPOTEC PLEATED

£1.90 TOMATO

(10 seeds minimum)

The large, mild-tasting, deep pink fruits are very attractive indeed, especially when sliced, with pronounced pleats and hollows within the flesh. They were named after the Zapotec people of Oaxaca, Mexico, who developed this rare gourmet tomato. (Cordon)

Other vegetables

CONNOVER'S COLOSSAL

£1.85 ASPARAGUS

(100 seeds minimum)

These bright green spears with succulent, deep purple tips and a huge yield are one of the most sought-after vegetables, and are not difficult to grow if kept well-fed and weed-free, plants remaining productive for at least 15 to 20 years. RHS AGM winner.

BLACK BEAUTY

£1.80 AUBERGINE/EGGPLANT

(40 seeds minimum)

Popular and reliable with gardeners since Edwardian times, Black Beauty is an early-medium variety of aubergine. The sturdy plants grow to about 4 feet tall and produce good crops of 4" to 6" long glossy, purple-black, oval fruit.

BRAZILIAN OVAL ORANGE

£1.95 AUBERGINE/EGGPLANT

(10 seeds minimum)

The attractive oval aubergine fruit of this rare variety are borne in heavy clusters on bushy habit plants with dark green foliage that provides plenty of cover from the sun. Despite the name, the fruit changes colour from green through orange to scarlet.

JAPANESE WHITE EGG

£1.95 AUBERGINE/EGGPLANT

(20 seeds minimum)

The Japanese White Egg produces large quantities of very attractive 2-3" oval creamy white fruit all season long. The fruit have a delicate flavour with little trace of bitterness. Perfect for use in stir frying.

BOLTARDY

£1.75 BEETROOT

(200 seeds minimum)

Boltardy can be sown earlier in the year than all others, then right through to mid summer and is slow to run to seed. Yielding perfect, globe-shaped beets of superb flavour and colour. Young leaves can be used for baby leaf production. RHS award winner.

BULL'S BLOOD

£1.75 BEETROOT

(200 seeds minimum)

A Victorian heirloom, which is often grown as an ornamental, on account of its dark crimson, almost black leaves which taste sweet if picked young. The globe-shaped roots have a good flavour and on being cut open reveal attractive pink rings.

CHELTENHAM GREEN TOP

£1.65 BEETROOT

(250 seeds minimum)

This very heavy cropping old show bench variety has been around since well before the 1880s in England. It has long red parsnip-like roots and an excellent, delicate flavour, and is paler red in colour when cooked than most modern globe beetroots.

CHIOGGIA

£1.85 BEETROOT

(200 seeds minimum)

The ball-shaped, mild and sweet roots of this Italian (1840's) heirloom are resistant to bolting and have light red skin. Cutting open reveals attractive alternating dark pink and white rings (another name is Candy Stripe Beet).

DETROIT RED GLOBE

£1.75 BEETROOT

(250 seeds minimum)

A 19th century US heirloom beetroot producing fantastic, smooth, uniform, ox-blood globular beet with luxuriant red-veined leaves. This variety is resistant to downy mildew and does well in all kinds of soils.

GOLDEN BEET

£1.95 BEETROOT

(200 seeds minimum)

A globe-rooted, 19th century, USA heirloom beet with golden-orange skin, sweet golden-yellow flesh and bright green leaves which are tasty when cooked. It is resistant to bolting and if harvested young retains its flavour well.

WHITE DETROIT

£1.80 BEETROOT

(200 seeds minimum)

This high yielding white beetroot, has a mild sweet flavour that perfectly complements fish and poultry dishes whilst retaining its flavour through cooking and is perfect for dishes where you do not wish the normal purple beetroot stain.

BLUEBERRY

£2.50 BERRY

(30 seeds minimum)

Blueberries (*Vaccinium corymbosum*) are high in vitamin C and anti-oxidants which can defeat bladder and cystitis problems. These are very heavy-cropping plants with a diversity of different habits and include early and late fruiting varieties.

CRANBERRY

£2.45 BERRY

(10 seeds minimum)

Large, red, vitamin-filled berries are produced on evergreen plants in mid to late summer. The wild cranberry (*Vaccinium macrocarpon*) is an evergreen, ground-cover plant native to North America which flourishes in boggy conditions and contains very few seeds indeed.

GOJI BERRY

£2.60 BERRY

(100 seeds minimum)

(*Lycium barbarum*) Compact long-lived bushes bear small purple and white flowers in early summer followed by plump, juicy, sweet red 'superfruits' bursting with vitamins and minerals, which are produced all summer long, right up to the first frosts.

GOLDEN BERRY 'GIGANTE'

£2.25 BERRY

(25 seeds minimum)

Tall, erect, sticky-haired stems carry sizeable 'paper lanterns' which contain the largest and juiciest fruits of all the golden berries. This is the physalis variety sold at inflated prices in supermarkets and used to adorn expensive desserts in restaurants.

GOLDEN PEARLS

£2.45 BERRY

(50 seeds minimum)

This brand new sweet golden form of the Wonderberry (*Solanum villosum*) grows in bunches resembling yellow currants, which appear soon after being grown, either in a pot or open ground. In Africa the leaves are apparently eaten like spinach.

BLACKBERRY TUPI

£2.65 BERRY

(30+ seeds minimum)

These seeds, which have been stratified ready to sow, have been collected from Tupi, one of the best cultivars sold for sweet snacking. They produce thorny upright plants bearing really large, black, sweetest and most succulent luscious fruits quite late in the season.

WONDERBERRY

£2.45 BERRY

(50 seeds minimum)

A superb new-come, resembling the garden huckleberry, but with a far superior taste, especially when cooked. Quick and easy to grow in a container, garden or greenhouse, producing thousands of small, unusual-flavoured, sweet blackcurrant-like fruits.

MASTERPIECE GREEN LONGPOD

£1.85 BROAD BEAN

(25 seeds minimum)

Arguably the best green-seeded variety, growing well in most conditions, and producing good pod lengths with up to 7 beans per pod, with superb flavour and table qualities. This top RHS AGM variety grows to about three feet high and is excellent for freezing.

STEREO

£1.85 BROAD BEAN

(25 seeds minimum)

Stereo is one of the smaller, slender podded broad bean varieties, which recently have become popular due to the capability of the young pods to be cooked and eaten whole, just like mange-tout peas. If grown to maturity the pods produce five delicious beans.

THE SUTTON

£1.85 BROAD BEAN

(25 seeds minimum)

A dwarf (18"-24") self-supporting, bushy broad bean which can be spring-sown, or overwintered if protected using cloches. It produces compact plants with multi-heads of beans with around 5 beans per pod. A heavy yielding plant.

RED ARROW

£1.85 BROCCOLI

(150 seeds minimum)

Red Arrow is an improved variety of purple sprouting broccoli which produces high quality medium-sized spears from mid-February to mid-April and yields up to 20% more than previous types. Easy to grow giving vigorous vitamin-rich plants.

GREEN SPROUTING CALABRESE

£1.65 BROCCOLI

(250 seeds minimum)

Producing a long succession of bluish-green heads averaging 3 to 5 inches across, these tall, erect plants with an excellent flavour and long cropping season are the original forms, which are still firm favourites in spite of the appearance of modern F1 hybrids

ROMANESCO

£1.90 BROCCOLI

(150 seeds minimum)

This celebrated Italian heirloom produces attractive lime green heads made up of a mass of small conical florets. It has a superb flavour and a more tender texture than regular broccoli and grows exceptionally well in cool Northern areas.

DARKMAR 21

£1.70 BRUSSELS SPROUTS

(150 seeds minimum)

A high quality Bedfordshire variety of mid-late main crop Brussels Sprouts which produces a heavy yield of large, fine-flavoured, deep green sprouts from late November and on through the winter, even in the harshest weather.

GOLDEN ACRE

£1.75 CABBAGE

(400 seeds minimum)

An excellent summer ball head cabbage with solid heads which are more uniformly round than other summer varieties with fewer outer leaves. This variety is easy to grow and does very well indeed in cool weather.

RED DRUMHEAD

£1.75 CABBAGE

(300 seeds minimum)

This popular heirloom variety produces a round solid heart in stunning red with dense leafy heads in a variety of red/purple shades. This versatile cabbage is adaptable to heat, whilst also producing crops between mid summer and winter.

ATOMIC RED

£1.90 CARROT

(400 seeds minimum)

A long red carrot, rich in vitamins and minerals - especially high in the anti-oxidant lycopene. When peeled and cooked the carrots turn deeper blood red in colour and are particularly suitable for stir frying.

CHANTENAY ROYAL

£1.80 CARROT

(400 seeds minimum)

A short, stump-shaped carrot which gives heavy yields, the roots having golden-orange flesh with a sweet taste and retaining their flavour even when large. These carrots, which rarely split, are the ones to choose if your soil is heavy.

ROMANCE F1

£1.95 CARROT

(200 seeds minimum)

A strong-tasting carrot with excellent uniformity, good skin finish and bright colour. For the second time in a row, Romance was awarded the 'Best tasting carrot' at the yearly field day of the British Carrot Grower Association.

FLYAWAY F1

£1.95 CARROT

(200 seeds minimum)

Naturally succulent and sweet, with good skin and flesh colour, and high levels of antioxidant beta-carotene. These are possibly the most carrot-fly-resistant variety ever produced coming out top when grown in trials against over 20 other 'resistant' varieties.

SOLAR YELLOW

£1.95 CARROT

(400 seeds minimum)

Solar Yellow carrots have a unique juicy buttery flavour and characteristic crunch. The 6"-7" roots are broad at the top and through most of their length. Harvest young finger-sized carrots if eating them raw.

NIGHT BIRD F1

£1.95 CARROT

(200 seeds minimum)

Probably the darkest carrot we've ever seen with deep purple flesh, appearing almost black, and a small white core. This very vigorous Emperor hybrid carrot grows 6 to 10 inches long and reaches maturity in ten weeks.

ALL YEAR ROUND

£1.65 CAULIFLOWER

(100 seeds minimum)

A popular, versatile variety, ideal for successional sowing, which produces large velvety-white, well protected heads with an exceptional flavour. These are great for shows, freezing or eating fresh from the garden as they retain their flavour when boiled or steamed.

PARIS MARKET BARON

£1.60 CARROT

(400 seeds minimum)

A 19th century French heirloom, Paris Market Baron are deliciously tender, bite-sized, round carrots, with a very smooth skin. Early maturing and uniform, even in a window box, they are ideal for growing in shallow or stony soil.

SNOWBALL

£1.55 CAULIFLOWER

(100 seeds minimum)

A versatile early cauliflower which can be used all season. Introduced in 1888, the compact plants form 6" wide snow white heads with crisp, tender curds which are well-protected by the outer leaves. The variety is downy mildew resistant.

RED SAMURAI

£1.95 CARROT

(400 seeds minimum)

A slender tapering red-skinned Japanese carrot with lovely pink flesh which holds its colour even after steaming. This main-crop carrot can also be used raw to enliven a salad.

GOLDEN SELF-BLANCHING

£1.65 CELERY

(500 seeds minimum)

This favourite heirloom (1884) variety produces creamy white stalks which are tender, high quality and plentiful with a deliciously sweet taste. They are easy to grow and self blanching, making them a lot easier than other varieties which require constant of attention.

GREEN UTAH

£1.75 CELERY

(500 seeds minimum)

Green Utah is a very popular American celery producing tall, delicious, string-less, well-rounded solid stalks which are easily blanched and have a distinctive nutty flavour. This compact variety has excellent disease resistance.

OKAHIJIKI

£1.75 CHINESE LEAVES

(150 seeds minimum)

Similar to the expensive samphire found in seaside areas of Britain especially in Cornwall and East Anglia, the long succulent leaves have a mild, peppery, rocket-like salty taste with a crunchy texture and are rich in vitamins and minerals. A new cut-and-come-again veg!

RAINBOW CHARD

£1.90 CHARD

(150 seeds minimum)

This RHS Award winner has pale green and bronze succulent-stemmed, mild tasting leaves, each stem coming in a different colour of the rainbow, ranging from pink to gold to purple and red. A winner whether used in cooking or as an ornamental border plant.

WHITE PAK CHOI

£1.85 CHINESE LEAVES

(250 seeds minimum)

A popular Chinese variety producing striking, clean white stalks holding fabulous, rich, dark green leaves which can be eaten raw when young in salads, or left to mature and then cooked. The compact plants are resistant to weather changes and are slow to bolt.

RHUBARB CHARD

£1.80 CHARD

(150 seeds minimum)

A colourful and tasty form of Swiss Chard with rich ruby-red leaf stalks and dark waxy green-purple leaves. The succulent mid-ribs can be cooked like asparagus and can also be harvested at the baby leaf stage for micro greens. Absolutely delicious!

TATSOI

£1.60 CHINESE LEAVES

(150 seeds minimum)

This attractive, easy-to-grow, hardy Asian variety produces a thick rosette of dark green nutritious oval leaves which have a creamy texture and a mild but distinctive flavour that makes them perfect for eating raw or cooked whether in salads, stir fries or in soups.

SWISS CHARD SILVER WHITE

£1.65 CHARD

(150 seeds minimum)

Actually native to the Mediterranean, this is one of the easiest varieties to grow and is an excellent source of vitamins and iron. The beautiful, emerald green leaves have a strong agreeable flavour making it perfect for eating raw or cooked.

WONG BOK

£1.80 CHINESE LEAVES

(250 seeds minimum)

Large barrel shaped heads, with crisp light green leaves grow typically up to 2.5kg. Fast growing and ready for harvest in 10 weeks, this versatile vegetable adds crunch to salads, coleslaws and flavour to stir fries, and is a useful steamed veg.

STRAWBERRY SPINACH

£1.95 CHENOPODIACEAE

(50 seeds minimum)

Confound your friends at dinner parties with "fruit" in the salad bowl! And you can eat the leaves of the same plant like spinach. This very quick growing and amusing plant produces little red "strawberries" all the way along its stems.

BARLOTTA LINGUA DI FUOCO

£1.90 CLIMBING FRENCH BEAN (50 seeds minimum)

"Tongues of fire" is an Italian climbing French bean, with attractive red-purple and green speckled pods. This versatile bean can be cropped young and the pods eaten as flageolets or allowed to mature when the ripe beans can be eaten as haricots.

BLUE LAKE

£1.85 CLIMBING FRENCH BEAN (50 seeds minimum)

This drought-resistant gardeners' favourite produces a high yield of string-less full flavoured beans which retain their sweet taste and tender texture when cooked. If left on the plant their dried white seeds can be used as haricot beans.

ZUCCHINI GOLD

£2.70 COURGETTE (20 seeds minimum)

A beautiful golden-sunshine coloured, 'less watery' courgette, containing fewer seeds than other yellow varieties. The easy-to-grow compact plants are resistant to many garden pests and produce a high number of full-textured fruits.

ZUCCHINI GREY

£1.95 COURGETTE (20 seeds minimum)

This heirloom American courgette has fruits with a beautiful speckled silvery-green skin. Zucchini Grey is one of the very best yielding open-pollinated courgettes producing many fruit in the course of a season if picked when young.

MARKETMORE

£1.80 CUCUMBER (20 seeds minimum)

A very reliable English heirloom outdoor ridge variety of cucumber with good resistance to Mosaic Virus and mildew, which also tolerate dry conditions, making them easy to grow. They produce rich, prickly, emerald green cylindrical fruits.

MASTERPIECE

£1.75 CUCUMBER (20 seeds minimum)

An early outdoor British ridge cucumber. This reliable cultivar produces heavy yields of 8 inch long, plump, dark green-skinned cucumbers. The flesh is crisp and white and perfect when sliced up in summer salads.

CUCAMELON

£2.35 CUCURBITACEAE (20 seeds minimum)

These small Central American fruits look like tiny watermelons but taste of cucumber with a hint of citrus fruit. They can be grown like regular cucumbers and trained up canes or wires. They are hardy enough to grow well outside and are drought resistant.

NASSAU

£1.75 DWARF FRENCH BEAN (50 seeds minimum)

This flat podded vigorous variety produces long straight pods which are renowned for their flavour. They are resistant to Halo Blight and Bean Common Mosaic virus. They have a high production rate and the high-growing pods make them easy to pick.

ORINOCO

£1.75 DWARF FRENCH BEAN (50 seeds minimum)

This RHS award winning dwarf French bean produces attractive, golden-yellow, straight pods which grow to about 5" in size and are easy to pick. This variety is quite disease resistant and is particularly suited to heavier soils.

ROYALTY PURPLE

£1.70 DWARF FRENCH BEAN (50 seeds minimum)

A sprawling bush habit plant producing vivid purple, 5 inch long, slightly curved pods with beige seed. Pods contain a natural blanching indicator causing them to change to green on boiling.

BORAGE

£1.95 HERB (150 seeds minimum)

This popular herb has attractive white edged hairy leaves which are tender and juicy and can be used in salads and drinks. Delicate star-shaped blue flowers (perfect in cold drinks!) appear all summer long. An intriguing talking point whether in the herb or flower garden.

CHAMOMILE

£1.95 HERB

(500 seeds minimum)

This attractive herb produces pretty white flowers with yellow cone-shaped centres and light green feathery foliage. The flowers give off an apple-like fragrance when crushed. It is widely used in herbal medicine, often as an aid to sleep and digestive problems.

GOLDEN PURSLANE

£1.95 HERB

(1000 seeds minimum)

The succulent leaves have a more subtle golden hue compared to Garden Purslane and are more tender although with a superior flavour and very popular in French cuisine. Raw the leaves have a peppery tang which gives them a nice contrast to other salad leaves.

CHIVES

£1.85 HERB

(750 seeds minimum)

An indispensable grass-like herb with a hollow centre that produces beautiful purple flowers, chives have a tasty, gentle onion flavour that complements a huge range of foods whilst the attractive flowers can also be used in salads.

ITALIAN GIANT PARSLEY

£1.80 HERB

(300 seeds minimum)

This hardy flat-leaved parsley with high pest and disease resistance is extremely easy to grow producing large, dark green and smooth leaves with an intense flavour that makes it perfect for cooking. The versatile leaves can be used fresh, dried or frozen.

CORIANDER

£1.85 HERB

(90 seeds minimum)

This highly fragrant herb, originates from the Mediterranean and Asia where the leaves (Cilantro) are grown to be used raw in salads and salsa, or cooked into breads or curries. The seeds (Coriander) are also often used to add flavour and dimension to dishes

SPEARMINT

£1.75 HERB

(500 seeds minimum)

This common, attractive variety of mint has aromatic forest green, serrated leaves and violet-blue flowers. Easy to grow and surviving well in nearly all climates spearmint can be used dried or fresh to complement potatoes and peas and add flavour to sauces.

DILL

£1.85 HERB

(300 seeds minimum)

Giving a tangy addition to pickles, salad dressing and fish dishes, fresh dill is easy-to-grow during summer/early autumn and it is easy to dry to make it available throughout the year. Its green leaves are wispy and fern-like with a soft, sweet taste.

OREGANO

£1.90 HERB

(500 seeds minimum)

This sweetly-smelling, aromatic foliage is commonly used in Mediterranean cuisine and is perfect sprinkled on lamb or pork before cooking and with rich meat dishes, grilled fish and for flavouring oils. The dried flowers are used for flavouring.

GARLIC CHIVES

£1.75 HERB

(200 seeds minimum)

This versatile herb can be either a house plant or a herb, with broad, flat leaves which are perfect to use as ordinary chives and bulbs which can be fried like an onion. The fragrant white flowers capable of perfuming a whole room can be used in salads.

RED RUBIN BASIL

£1.70 HERB

(300 seeds minimum)

This fragrant basil with vibrant purple leaves and a strong taste blended with a hint of the sharpness of cloves also produces pink flowers making it a superb ornamental plant. It is perfect when used fresh for making vinegar and oils as well as adding colour to salads.

ROSEMARY

£1.75 HERB

(100 seeds minimum)

This hardy herb withstands droughts well and can survive for many years with only the most basic of tending making it an excellent addition to any herb garden. The fragrant leaves, ideal for drying, are perfect for meat, fish, soups and stews.

NERO DI TOSCANA

£1.80 KALE

(150 seeds minimum)

This very resilient, easy to grow kale is resistant to heat and aphids. The dark, deliciously flavoured, emerald-green loose leaves, which appear an eye-catching black at a distance, are perfect in many cooked dishes, or when small in salads.

RUSSIAN TARRAGON

£1.80 HERB

(500 seeds minimum)

A vigorous and easy to grow variety of tarragon, this plant produces branching stems of narrow pointed, aromatic emerald green leaves which have a milder flavour than other varieties making them perfect for fish, poultry, sauces and tarragon vinegar.

SCARLET KALE

£1.95 KALE

(150 seeds minimum)

This attractive hardy variety sports curly, dark-green/purple leaves streaked with red veins which intensify in colour after the first frost. The vitamin-rich leaves can be harvested young as salad leaves or harvested later as winter greens.

SWEET GENOVESE BASIL

£1.80 HERB

(750 seeds minimum)

Often known as the best variety of basil for home-made pesto, this variety produces oval aromatic leaves which are curved inwards and are perfect in salads or tomato dishes. Easy to grow, this basil is the perfect companion to home grown tomatoes.

SIBERIAN IMPROVED KALE

£1.75 KALE

(150 seeds minimum)

This extremely cold-hardy Siberian Kale, which originated in Russia, has flat, broad, deeply-cut and ruffled blue green leaves which grow on long, succulent, sweet stalks. A heavy frost just improves the flavour of the leaves.

THYME

£1.75 HERB

(500 seeds minimum)

This hardy perennial can be picked and used all year round. With attractive, small green, clustered leaves and pastel pink flowers it is an attractive addition to any herb garden and is perfect for stuffings, poultry dishes and stews.

BLUE SOLAISE

£1.75 LEEK

(200 seeds minimum)

A traditional French winter heirloom that is hardy and cold-resistant as well as being an attractive addition to the cottage garden. The flags are blue-green which turn violet after a cold spell whilst the shanks are thick/medium length.

TRIPLE CURLED PARSLEY

£1.65 HERB

(750 seeds minimum)

A large and bushy vigorous variety of parsley with closely curled dark green leaves. It is fast growing and holds for a long time when mature, making harvesting easy. Excellent taste.

MUSSELBURGH

£1.80 LEEK

(200 seeds minimum)

This famous and delicious Scottish 19th century heirloom variety of winter leek has large, very thick stems which have a fantastic sweet yet mild flavour. This variety is winter hardy and is slow to bolt.

CONSUL

£1.65 LETTUCE

(300 seeds minimum)

This Iceberg lettuce is very versatile and quickly reaches maturity producing lovely, uniform, well-rounded heads. The leaves are deep green in colour and the mature lettuce features a well closed base. This variety is suitable for succession sowing from spring to autumn.

REINE DES GLACES

£1.85 LETTUCE

(250 seeds minimum)

Supreme among crispheads, the 'Queen of the Ice', is ideal for early spring sowing, remaining crisp and resisting bolting later. The lighter green, sweet, succulent heart has a crunchy texture and distinctive mild bitter taste, making it a favourite amongst chefs.

FORELLENSCHLUSS

£1.95 LETTUCE

(200 seeds minimum)

An Austrian romaine lettuce, with the excellent taste and texture of a butterhead. The name means "speckled like a trout" and comes from the leaves' distinctive appearance with large splashes of deep red on green.

TOM THUMB

£1.75 LETTUCE

(250 seeds minimum)

Tom Thumb, a still very popular Victorian English heirloom lettuce, is a very compact, early butterhead with a small tightly bunched head. The ruffled outer leaves are light medium green while the centres are creamy white with a pleasant buttery taste.

LITTLE LEPRECHAUN

£1.80 LETTUCE

(250 seeds minimum)

This 8 inch award-winning baby red Romaine lettuce has a sweet and crunchy centre and stunning leaves which fade to deep red-purple at the tips. It survives in almost any climate with the leaves kept well away from the ground and is larger than its name suggests.

YUGOSLAVIAN RED

£1.85 LETTUCE

(250 seeds minimum)

One of the most beautiful butterhead lettuces you can grow with bright green cupped leaves splashed with rosy-red. The succulent leaves are superb, buttery and mild, the loose heads grow to around 30cm across and can be harvested in about 55 days.

LOLLO BIONDA

£1.90 LETTUCE

(250 seeds minimum)

This attractive Italian lettuce produces an emerald mound of frilly leaves with a loose heart making it less appealing to slugs than Butterhead varieties. An eye-catching lettuce producing leaves for more than 3 months if they are taken from the outside.

EARLY SILVERLINE

£1.75 MELON

(10 seeds minimum)

A unique, elongated oriental early melon with white, crisp, sweet and fragrant flesh. This tiny, delicious, gourmet melon is rarely found in markets. The yellow skin is lined with silvery furrows, and is so thin it can be peeled like an apple.

LOLLO ROSSO

£1.85 LETTUCE

(200 seeds minimum)

Lollo Rossa is a pretty Italian loose-leaf lettuce with frilly bordeaux red leaves that taper to green hearts. The crisp texture, mild taste and attractive appearance make them an essential addition to salads.

EDEN'S GEM

£1.85 MELON

(10 seeds minimum)

This early variety has small, cricket-ball-sized fruits of a pound or more, with a complex spicy flavour, green flesh, and a heavily netted skin. Amy Goldman, author of 'Melons for the Passionate Grower', says this variety 'may cause drooling!'

PETIT GRIS DE RENNES

£1.95 MELON

(10 seeds minimum)

A 17th century French strain originally from the garden of the Bishop of Rennes. An early variety which is well adapted to cooler climates. The fruit are smooth-skinned with slight ribbing and weigh about 2 lbs. The orange flesh has a superb flavour and delightful scent.

PLUM GRANNY

£1.90 MELON

(10 seeds minimum)

Sometimes also known as Queen Anne's Pocket Melon, this very fragrant white-fleshed, long-established heirloom variety has quite small apple-sized fruits with an attractive yellow and orange-red striped skin.

TIGGER

£1.90 MELON

(10 seeds minimum)

The most amazing looking melon you can grow with fruits that are vibrant yellow with brilliant fire-red, zigzag stripes. Heavy yielding, they are also the most fragrant melons you can taste, with a rich, sweet, intoxicating aroma that will fill a room.

AILSA CRAIG

£1.75 ONION

(300 seeds minimum)

This traditional favourite, named after a small island off the Scottish coast, has a distinctive globe shape with straw coloured skin and white flesh. The bulbs can grow very large and be used for exhibition, while their tolerance to cool weather makes them very reliable.

LONG RED FLORENCE

£1.65 ONION

(300 seeds minimum)

This Tuscany heirloom has long red bottle-shaped bulbs with an excellent mild-sweet flavour, so is particularly suited for use raw in salads. Can either be pulled young as spring onions or allowed to mature for August cropping.

RED BRUNSWICK

£1.70 ONION

(300 seeds minimum)

A medium to large German variety of dark red onion with blood-red skin and white, spicy flesh with a flattened top that stores very well. It is best planted in spring, harvested in autumn and doesn't mind being planted closely together.

TENDER AND TRUE

£1.75 PARSNIP

(500 seeds minimum)

First introduced in 1897 this parsnip, with a good resistance to canker, has long, tapered, smooth-skinned roots from a broad 3" shoulder. The flesh is fine-grained and sweet-tasting with very little core.

WHITE KING

£1.75 PARSNIP

(500 seeds minimum)

White King is a fine flavoured, intermediate length, stump-ended parsnip. As its name suggests it has smooth creamy white skin and flesh and is a very reliable and high yielding variety.

GREENSHAFT (HURST)

£1.75 PEA

(200 seeds minimum)

If you're going to sow only one pea, it should be 'Hurst Green Shaft'. A sweet-tasting, wrinkle-seeded, tall, super heavy-yielding variety, with long, 4-5 inch pods, with 9-11 peas in a pod, and double podded too, and it even resists downy mildew and fusarium wilt.

LINCOLN

£1.70 PEA

(250 seeds minimum)

A compact, heavy-yielding main-crop which stands the heat better than most and also resists wilt. The plants produce 6-9 sweetly flavoured peas in dark green curved pods and are great for follow-on sowings, producing peas until September.

OREGON SUGAR POD

£1.95 PEA

(150 seeds minimum)

An award-winning mange-tout sugar pea which produces pods in clusters of two rather than the usual one. Consequently, a very heavy yielding variety with good disease resistance. The sweet, crunchy pods are ideal for use in stir-fries.

SWEET CHOCOLATE

£1.95 PEPPER

(25 seeds minimum)

This uniquely-coloured, early-fruiting, sweet and delicious mild-flavoured pepper has thick-walled red flesh, and when ripe turns a gorgeous chocolate-brown on the outside. Ideal for Northern gardeners. (Heat-0)

JIMMY NARDELLO'S

£2.35 PEPPER

(10 seeds minimum)

Producing 25-35cm fruits, which are sweet and light when eaten raw, this lovely variety is also considered one of the very best sweet peppers for frying, and is still registered as 'endangered' on the USA Slow Food Ark of Tastes. (Heat-0)

WISCONSIN LAKES

£2.35 PEPPER

(20 seeds minimum)

This reliable and heavy yielding sweet red pepper, bred especially for northern gardens, has thick, meaty, juicy sweet walls. A heavy producer. Our trial plants at Plant World had so many fruits they had to be caned to stop them falling over! (Heat-0)

ALMA PAPRIKA

£1.95 PEPPER

(25 seeds minimum)

Extremely productive plants are loaded with small, rounded, thick-walled peppers, ripening from creamy-white to red, and with a mild flavour that is a wonderful combination of slightly warm but sweet and tangy. (Heat-1)

ATLANTIC GIANT

£1.65 PUMPKIN

(10 seeds minimum)

Giant pinky-yellow pumpkins which have been developed over the years to grow to produce the maximum sized fruit of any plant. Although grown primarily for competition, the dark flesh of the mature pumpkin is tasty enough when used as pie filling.

RED PADRON

£2.35 PEPPER

(20 seeds minimum)

Pick these small conical fruits, with a long curled pedicle, small and green for low levels of heat, as the heat increases as the fruits get larger and redder. Play Spanish Roulette! Every batch of 10 or so peppers contains a hot one! (Heat-3) (but watch the odd one!)

KING OF MAMMOTH

£1.70 PUMPKIN

(10 seeds minimum)

As its name suggests these heirloom pumpkins are very large. They often grow to between 40-100lbs although prize specimens have topped 200lb. Excellent in pies due to great yield. Skin is yellow with mottled patches of pink-orange.

SCOTCH BONNET - RED

£1.95 PEPPER

(20 seeds minimum)

Named for its resemblance to the Scottish Tam o'Shanter hat, this one is really very, very hot and tastes best fresh, but can also be frozen or pickled or even put in olive oil very successfully. They are especially useful in hot sauces and condiments. (Heat-4)

WEE BEE LITTLE F1

£1.95 PUMPKIN

(10 seeds minimum)

This sweet-fleshed, new, incredibly diminutive pumpkin, was specially bred to be ideal for individual servings. You can also make lots and lots of mini Halloween heads with these!

BLACK SPANISH ROUND

£1.70 RADISH

(250 seeds minimum)

A sweet and mild, very hardy winter radish with snowy-white succulent flesh and a near black skin which lacks the firmness found so often in summer varieties. It has probably been grown since at least the 16th Century.

STRAWBERRY 'TEMPTATION' F1

£2.70 ROSACEAE

(30 seeds minimum)

An excellent 'sweetheart' variety producing dark red sweet-tasting fruit on compact dark green plants. This variety is almost runner-less so is ideal for use in hanging baskets, grow bags or patio containers.

PINK SLIPPER

£1.80 RADISH

(250 seeds minimum)

This variety produces very pretty, blush-pink, oval-shaped radishes, which when cut open reveal white crunchy flesh. The mild taste is far less peppery than some other varieties, making them a perfect addition to all salads.

DESIREE

£1.85 RUNNER BEAN

(25 seeds minimum)

This favourite, white flowered, few white-seeded, totally stringless runner bean has long, tender, broad pods up to 30cm long, and will bear very heavy crops, even from a small area, and especially in dry conditions. A superb vegetable!

TOPSI

£1.65 RADISH

(300 seeds minimum)

Topsi produces a scarlet round radish with fine roots, thin skin and firm crunchy white flesh, and can be grown as a "catch crop" between other slow growing vegetables. As its name suggests this is a fast-growing and early radish.

LADY DI

£1.80 RUNNER BEAN

(25 seeds minimum)

These superb long, slim and fleshy runner beans tolerates heat well and are completely string-less. They give a heavy crop of tender delicious dark green pods over a very long season and received the RHS 1999 Award of Garden Merit.

WHITE HAILSTONE

£1.60 RADISH

(150 seeds minimum)

An excellent early (3-4 weeks) white spring radish. Very mild taste and maintains its crisp texture for a long time. The radish itself is slightly larger than similar early globe types.

PAINTED LADY

£1.75 RUNNER BEAN

(25 seeds minimum)

An ancient Heirloom English variety of runner bean dating back to the 17th century with attractive bi-coloured red and white flowers. Compact plants produce tender pods best picked young for fresh flavour.

VICTORIA

£1.95 RHUBARB

(50 seeds minimum)

The gold standard, best rhubarb, with large, fat stems, bright red skin, lack of stringiness, and an apple- gooseberry flavor with a hint of lemon or grapefruit. This famous heirloom was bred in the 1830's by Joseph Myatt in Deptford, England.

RILEY

£1.75 RUNNER BEAN

(25 seeds minimum)

A fine British runner bean cultivar with distinctive and most attractive bright pink flowers. This variety produces heavy yields of long (up to 10") straight, fleshy pods.

SCARLET EMPEROR

£1.85 RUNNER BEAN

(25 seeds minimum)

A popular, good-yielding, old favourite English runner bean with striking red blossom and large pods which contain deep purple beans speckled with red or lavender when mature.

WHITE LISBON WINTER HARDY

£1.70 SPRING ONION

(500 seeds minimum)

This quick-growing, award-winning salad onion produces crisp succulent stems with a characteristic 'bite' to them. Seed can be sown in succession for a continuous crop all spring, summer and autumn.

SALAD ROCKET

£1.60 SALAD LEAF

(1000 seeds minimum)

This quick-growing, deeply-notched leaf (also called Cultivated Rocket) is becoming a firm favourite either for salad use or cooked, when it makes a good spinach substitute. With a delicious nutty, peppery taste it is ideal for window-sill or garden.

BLACK FUTSU

£1.95 SQUASH

(10 seeds minimum)

A rare black Japanese squash. The fruit are round with a flattened top and have heavy ribbing. The black of the mature fruit turns a rich chestnut colour while in storage. The flesh is golden and has the rich taste of hazelnuts.

WILD ROCKET

£1.60 SALAD LEAF

(1000 seeds minimum)

Spice up your salads with wild rocket, with deep green, serrated foliage which has the same distinctive flavour as its standard namesake but is more intense. Wild Rocket is perfect for 'cut and come again', growing right through the year with protection.

WALTHAM BUTTERNUT

£1.95 SQUASH

(10 seeds minimum)

'Waltham' is an improved earlier version of the common Butternut squash with very little seed cavity which stores very well too. The rich nutty-flavoured, orange flesh stays firm when cooked. Nothing beats the rich, sweet flavour of winter squash.

PEPINO (MELON PEAR)

£2.70 SOLANACEAE

(10 seeds minimum)

The gorgeous round fruits of the Melon Pear are cream skinned with purple streaks and have deliciously sweet and juicy flesh which is a succulent mixture of honeydew melon and cucumber. It is grown in a manner similar to its relatives such as the bush habit tomato.

CORNELL'S DELICATA

£1.80 SQUASH

(10 seeds minimum)

These very pretty, elongated white and green striped, dwarf fruit contain yellow flesh with a delicate and sumptuously nutty flavour, rich in vitamin A. This award winning compact Cornell strain gives excellent yields and has good disease resistance.

NEW ZEALAND SPINACH

£1.90 SPINACH

(50 seeds minimum)

Vitamin-filled New Zealand spinach is milder tasting than its distant relation 'true spinach' and does not bolt in dry soils, making a triangular-leaved bush spreading 2-3 feet in all directions. (Discovered by Captain Cook in the 18th century!)

POTIMARRON

£1.95 SQUASH

(10 seeds minimum)

A French Heirloom winter squash with a delicate chestnut flavour. Its French name in fact derives from potiron (pumpkin) and marron (chestnut). Apparently, the longer it is stored the higher its sugar and vitamins increase. (AKA Hokkaido Squash).

QUEENSLAND BLUE

£1.85 SQUASH

(10 seeds minimum)

A good-keeping, turban-shaped Australian gunmetal-grey winter squash with a fine deep golden flesh that is both sweet and fine flavoured and packed with vitamin A. The high sugar content of the flesh makes it ideal for pumpkin pie.

TRIANGLE

£1.95 SQUASH

(10 seeds minimum)

This distinctive grey-green squash from Australia is easy to grow sending out long vines on which 3-4 fruit grow. The skin is hard and difficult to cut but gives the harvested fruit a long shelf-life. The orange flesh is sweet and suits baking. (AKA Shamrock or Triangle).

VEGETABLE SPAGHETTI

£1.85 SQUASH

(10 seeds minimum)

When cooked, the flesh of this Chinese vegetable, (actually a winter squash), falls away from the fruit in ribbons and strands, just like spaghetti for which it makes a perfect substitute in countless cooking roles. It contains folic acid, vitamin A and beta carotene.

WHITE SCALLOP

£1.80 SQUASH

(10 seeds minimum)

A Patty Pan heirloom summer squash. First grown by the native Americans and depicted by European settlers as far back as 1591. It remains one of the best tasting and yielding varieties around today! Great fried and baked. Very attractive flat fruit with scalloped edges.

YELLOW SCALLOP

£1.85 SQUASH

(10 seeds minimum)

Yellow Bush Scallop Squash is an extremely hardy, old summer squash variety that was introduced prior to 1860. It produces an abundance of golden-yellow squash on compact plants over a longer season than other varieties. (AKA Golden Custard).

EARLBIRD F1

£1.95 SWEETCORN

(40 seeds minimum)

Earlibird is an excellent, early-maturing, super-sweet hybrid, early variety producing 3 or more high-quality cobs, typically 8" in length. Along with Swift, this is probably the best variety to grow in most UK situations.

INDIAN SUMMER F1

£1.95 SWEETCORN

(40 seeds minimum)

'Indian Summer' is a modern supersweet variety of an old favourite. As the season progresses and the ear matures, the cob turns into a kaleidoscope of white, red, brown, yellow and purple kernels, which slowly deepen in colour.

GOLDEN BALL

£1.75 TURNIP

(300 seeds minimum)

Very hardy, dwarf, compact plants produce round roots with tender, yellow, mild-flavoured flesh and with outstanding keeping and exhibition qualities. This is the best of the main crops, and is recommended by the National Institute of Agricultural Botany.

PURPLE TOP MILAN

£1.60 TURNIP

(300 seeds minimum)

A 19th century Italian heirloom which is quick maturing and well suited for cooler climes. The medium-sized roots, with a sweet and mild flavour are very flat with a bright purple top and a white base below soil level, and store well.

RED STAR F1

£1.95 WATERMELON

(10 seeds minimum)

This hybrid variety has been developed to grow well under cooler conditions than those favoured by most watermelons. This vigorous plant has a long harvesting period producing large round fruit with a uniform dark green skin colour and sweet, intense red flesh.

Terms of Business

PLEASE READ CAREFULLY

- ❖ We believe all seeds are correctly named, but because many are open-pollinated, occasional variations may occur and we cannot be held responsible other than for replacement of the seeds.
- ❖ Quantity per packet varies greatly with rarity and amount collected from our plants.
- ❖ ALL orders MUST be accompanied by either Credit Card details, International Giro, Bank Draft (in Pounds Sterling), Personal Cheque in UK Pounds, or Cash (UK Pounds, US Dollars or Euros). Please note that it is advisable to register cash.
- ❖ All orders of 10 packets or more will receive a surprise FREE packet extra.
- ❖ **Three packets of the same variety of seed in our catalogue may be purchased for the price of two. e.g. if one packet is £2.00, pay £4.00 and get the THIRD packet FREE. Simply write 3T in the quantity column.**
- ❖ IMPORTANT: Don't forget that some seeds may run out. When ordering by mail YOU MUST enclose EITHER a list of substitute seeds OR a limited amount cheque (see below) and we will fill in the correct amount. Failure to do this may delay your order and you may receive a credit note.
- ❖ Commercial growers: please see trade terms on the web site.
- ❖ PLEASE NOTE: Only customers ORDERING seed this year will automatically receive next year's seed list, which is sent out in October.
- ❖ You may send in orders by fax on 01803 875018 (24 hour line) but ONLY if you pay by CREDIT CARD.
- ❖ Further orders are welcome on plain paper.
- ❖ If you move please tell us your NEW address and also your OLD one.
- ❖ GIFTS: Please send us a list of seeds with payment (minimum of £10.00), recipient's name and address and the date they are required. We will despatch them with a greeting card and also a message if required.
- ❖ TOKENS: Order these from us with payment of any value desired (minimum of £10.00). A token to this value will be sent to the recipient with a copy of our seed catalogue and also a card or message if requested.
- ❖ Heirloom and Heritage Vegetable seeds are strictly for private use and not for commercial fruit production. By their very nature you may get the odd variant plant.
- ❖ All images and text within the catalogue are the copyright of Plant World Devon Limited.
- ❖ The images from our extensive library are available for purchase. Please contact us for details.
- ❖ **POSTAGE: UK customers please add £1.90 postage and packaging for ALL orders.**
- ❖ **Overseas customers please add £3.50 towards postage.**

HOW TO FIND US

FROM NEWTON ABBOT:

Follow Torquay signs to Penn Inn Roundabout (Traffic light

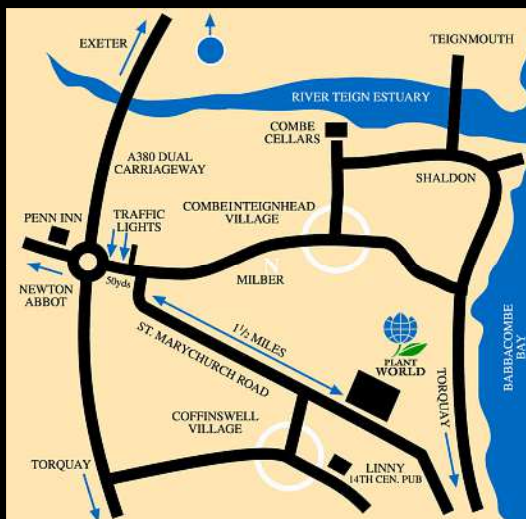

FROM EXETER:

Follow A380 dual carriageway (signed to Torquay) until it ends at the traffic light controlled Penn Inn Roundabout. Plant World has brown signs from here.

FROM THE PENN INN ROUNDABOUT:

Follow signs to Milber and Combeinteignhead up the hill for only a few metres, then take a sharp right at the traffic lights. This road is signed to Plant World and leads slowly uphill, initially through housing then through mature woodland. Plant World is about one and a half miles out in the rolling countryside, at the very top of the long hill, on the left hand side past the aquatic nursery.
