

## *Desiderata June 2021*

Desiderata are plants that National Collection Holders are searching for to add to their collections.

Many of these plants have been in cultivation in the UK at some point, but they are not currently obtainable through the trade. Others may appear available in the trade, but doubts exist as to whether the material currently sold is correctly named.

If you know where some of these plants may be growing, whether it is in the UK or abroad, please contact us at [collections@plantheritage.org.uk](mailto:collections@plantheritage.org.uk) 01483 447540, or write to us at :
