2020 Temperature & Precipitation Patterns

Historic vs 2020 Weather Conditions

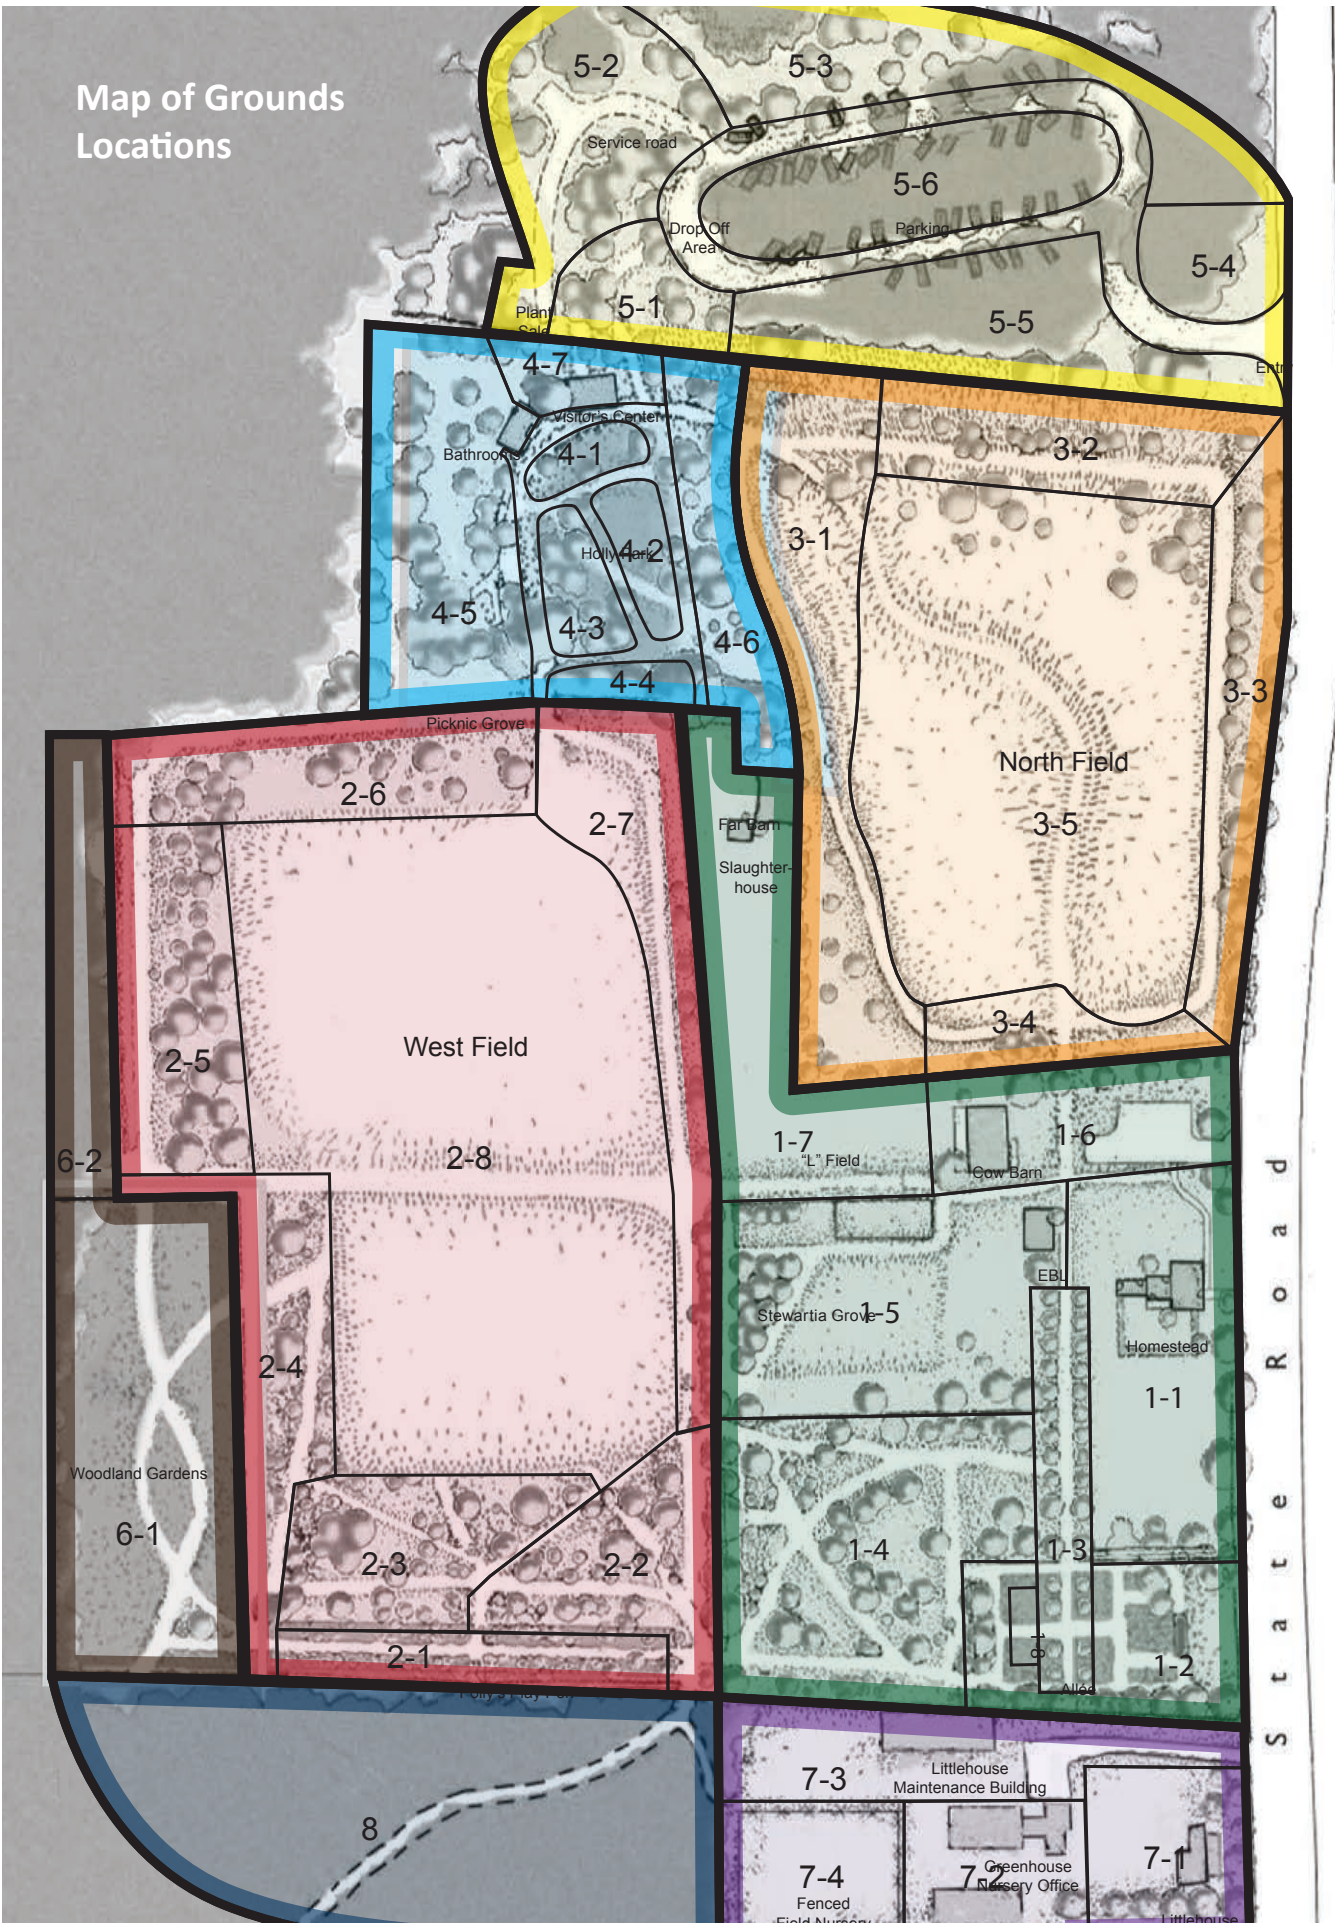

In 2020, PHA experienced a maximum high of 91°F (33°C) on July 27, and a low of 8°F (-13°C) on January 22. The year brought a wet spring followed by an exceptionally dry summer; the Massachusetts Drought Management Task Force declared a Level 2 drought (“Significant Drought”) for our region from July through September. The drought coincided with higher-than-average temperatures.
