

2020 Recipe Guide

FOR PROFESSIONAL GROWERS

RECIPE
OF THE YEAR

RECIPE
OF THE YEAR

Go Beyond the Basics

You've watched your most creative, dynamic container recipes fly out of inventory each year – they're often the first to sell. To support those profit-builders, our talented group of designers develops fresh new recipes each year that incorporate the latest and greatest from the Proven Winners lineup. You'll find this season's best new ideas for hanging baskets and upright containers for sun and shade in this guide.

We want to make it easier for your staff to select and produce premium quality container recipes. Starting with important design considerations and production tips from our own growers, we'll walk you through everything you'll need to know to create gorgeous container gardens. Mix and match your favorite recipes to build a comprehensive program for the upcoming season, keeping in mind seasonal preferences for color and cold/heat tolerance.

Don't miss the debut of Michael Carr Designs™ Pottery and the revolutionary new AquaPots™ line of luxury grade, self-watering, glazed ceramic containers. Developed by award winning landscape architect Jack Barnwell, these gorgeous containers offer all the conveniences of a self-watering container combined with the artisan elegance of handcrafted pottery.

It's time to unlock the profit potential of premium quality container gardens.

How to Design and Grow Premium Recipes that Sell

Container recipes are popular with home gardeners because they offer instant beauty and color in a convenient take-home package. So how do growers create the combinations customers love, and produce them as efficiently as possible? Here are seven tips from Brian Bourdon, Four Star Greenhouse's offsite and product line manager, who has created hundreds of our most popular recipes.

Pair Plants with Similar Vigor

One of the biggest mistakes people make when designing container recipes is not matching plants with comparable vigor ratings. When a high vigor plant like Supertunia Vista® Bubblegum® is paired with plants that are less aggressive, it quickly overtakes the other plants and sets the combination off balance. But when it is grown with other high vigor plants, the recipe grows perfectly together.

We've tested and rated all of our annual plants for vigor using a scale of 1 to 4. Pay close attention to these ratings when designing your own recipes. If you are following one of our named recipes, we've already factored vigor into account.

Since all three Supertunia Vista® petunias share a vigor 4 rating, they are equally compatible in this Above and Beyond recipe.

Match Cultural Needs

Growers are savvy at pairing plants with similar needs together in production to increase efficiency. The same rule applies when matching up plants in container recipes. Factors to consider include: lighting and shade requirements, moisture, nutrients, growing temperature and heat tolerance. Most annuals will perform well at a pH of 5.8-6.2, so this detail is less critical to examine.

This Blown Away recipe works well because both Blue My Mind® Evolvulus and Luscious® Royale Pina Colada Lantana share similar high light, low water and warm temperature requirements.

Stretch the Imagination

Once your top-selling recipes are established, let's think beyond the standard 3-variety thriller-filler-spiller formula and create premium complex container recipes with higher price points. These can be sold in much larger, high quality decorative containers as cash and carry items. Watch how quickly they fly out the door when it's time for people to decorate for graduation parties and other special occasions.

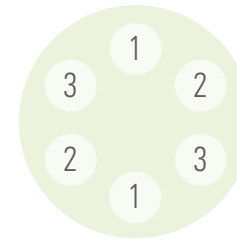

Container recipes are trending larger and more complex as people look to create fewer plantings with higher impact for their decks and porches. Choose an unconventional thriller like Toucan cannas to create a lush look, then surround it with larger fillers and spillers to create a stunning mosaic of color and texture.

In addition to your standard top-selling recipes, grow a few complex recipes at higher price points for premium container sales. Here, we paired Toucan® cannas with hummingbird magnet Vermillionaire® Cuphea and Lady Godiva™ Orange Calendula in our recipe named The Wild Bunch.

Follow the Diagram

We provide planting diagrams for all our hanging basket and upright container recipes found in this guide and online. It's important to train your production department to follow these diagrams when transplanting liners into new hanging baskets and upright containers. This will ensure enough liners are used and that they are positioned to achieve the most attractive mix of colors and textures.

Following the planting diagram will ensure the container grows full and balanced.

Easy Design Formulas

If you're looking for an easy way to combine plants in premium quality hanging baskets and upright containers, the thriller-filler-spiller method continues to be a success. Consumers have come to know and love this formula, too.

There are countless varieties that will work in these types of recipes – the hardest part is narrowing down your choices. Instead of a typical spike or grass, try something different this year and use a Toucan® canna, Meteor Shower® verbena or Pegasus® begonia as your thriller for a more premium finished product.

This Looking Sharp recipe follows the classic thriller-filler-spiller formula.

Color Schematics

We all know that color sells. While pink and purple rank consistently as consumers' favorite colors, bicolors also rank near the top of that list. Color preferences tend to shift through the seasons too. While pastel pink is often sought after for spring recipes, bold magenta pink plays prominently in warm season combinations.

To accommodate the color preferences of a broad array of consumers, we've created container recipes in 15 different color schemes. From pastel to patriotic, vibrant mixes to earth tones and more, you'll find over 1,100 container recipe ideas at www.provenwinners.com.

Our Belle Ambition recipe combines consumers' favorite colors for spring including bicolor Supertunia® Lovie Dovie™ petunias and Superbena® Stormburst verbena.

Classic v. Unconventional Pairings

Your design and production staff surely has a list of favorite container recipes they grow beautifully every year. Don't be afraid to substitute in a new color or variety from time to time. We're constantly working to improve even our most popular varieties and significant advancements have come in foundational plants like Superbells Dreamsicle and Supertunia Royal Magenta.

Alongside the standard recipes you produce every year, try a few unconventional pairings, too. Many younger gardeners relish growing unusual plants and will quickly snap up a recipe featuring our funky Truffula™ Pink Gomphrena or Rockin'® Fuchsia Salvia, for example. Mixing edible plants like Berried Treasure® Red strawberries and Amazel Basil™ with ornamentals in large containers is also trending as consumers downsize their gardens.

Mixing plants you can eat with ornamental flowers in large containers is especially popular with younger gardeners who have limited space.

6 Critical Production Tips

Want to produce lush, flower-covered container recipes like those you see in this guide? Lead growers Aleksi Yosifov and Noah Derohanian of Pleasant View Gardens share their top tips.

1 The Key to Success

Starting with exceptional quality liners is the most important thing you can do to get your container recipes off to a great start. Even if you encounter issues along the way as you produce your crop, they will be far easier to navigate if you start with quality liners. Your propagator will be happy to work with you to determine the best liner size and delivery date to fit your production model.

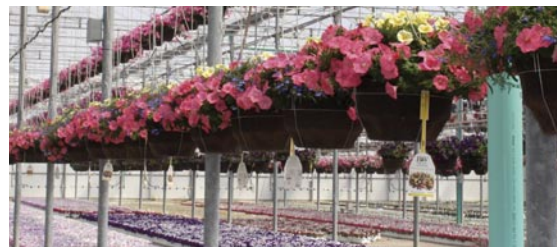

Starting with robust liners is the key to success in growing premium quality container recipes. Work with your propagator to determine the best liner size to fit your needs.

2 Start Your Liners Off Right

Minimizing stress on newly planted liners will avoid complications down the road. As a standard practice, we apply a preventative broad spectrum fungicide drench one week after transplant to all newly transplanted liners. This protects their roots from potential attacks.

3 Moderate Your Watering

It is very easy to overwater newly transplanted liners, so take care not to create this unnecessary stress. During the first few weeks after transplant, the root system is still small and does not yet extend down the bottom of the container. At this time, frequent but low volume water applications are required to provide the liners just the right amount of water they need without becoming overly wet.

Drip lines allow maximum control over irrigation, ensuring liners are not over- or under-watered in production.

4 Build a Strong Foundation

When your liners are young and are newly transplanted into hanging baskets, focus on developing a strong root system for the plants. Timing is key. We closely monitor the growing temperature, pH and EC of the growing media, and fertility while the plants are becoming established in the container.

5 Trimming and Shaping

As the plants are growing, a series of pinches and/or PGR applications are used to shape the plants in the containers. For many plants, we trim around the edges of the containers as needed, prior to spacing uprights and hanging the baskets. PGR rates are listed on our website for all of the plants we offer.

Trimming plants around the edges of the containers before spacing will make it easier to lay them out properly on the floor.

6 Feed Those Plants!

Premium quality hanging baskets and upright containers will fly out of inventory, so be sure you are feeding those hungry plants so they reach their full potential. We've developed four primary and four specialty professional fertilizer products that will help minimize and correct pH-related issues in your production greenhouses. We'll help you select the right product for your situation based on your water test results. All of our fertilizers contain minors and 100% EDDHA as the source of iron.

The eight professional fertilizers we offer can be used with every irrigation. The formula you will use is based on your specific water conditions or needs.

2020 National Recipes

Looking for an easy way to boost sales? Grow our National Recipes. Packed full of our top-selling, most distinctive varieties, these are recipes that have been proven in trials to work. Choose those that best suit your region and watch them move out of inventory quickly. As always, you can count on the Proven Winners expansive marketing campaign to be driving the demand.

Meet the 2020 Annual of the Year™

DIAMOND COLLECTION *Euphorbia* –
 DIAMOND FROST® *Euphorbia*
 DIAMOND MOUNTAIN® *Euphorbia*
 DIAMOND SNOW™ *Euphorbia*

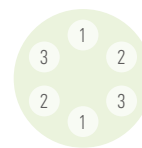

Laura Promotes the Annual of the Year™

When Laura talks, people listen! There's no better brand ambassador to promote key plants like our National Plants of the Year than Garden Answer. In videos commissioned by Proven Winners, she will help to build awareness and excitement for the 2020 Annual of the Year, the Diamond Collection of Euphorbia.

Garden Answer will be pivotal part of our comprehensive marketing campaign centered around the Annual of the Year. Look for additional promotions at home and garden shows, on billboards, in our *Gardener's Idea Book*, on social media and at www.nationalplantoftheyear.com.

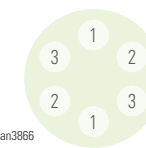

DIAMOND MOUNTAIN® *Euphorbia* *** USPPAF CanPBRAF in the landscape with VERMILLIONAIRE® *Cuphea* 'cupver', GOLDDUST® *Mecardonia* 'USMECAR205' USPP22871 CanPBRAF and ROCKIN'® PLAYIN' THE BLUES® *Salvia longispicata x farinacea* 'Balsalmispim' USPP29604

VERY LOADED

- 1 DIAMOND SNOW™ *Euphorbia* 'INCHADIACL' USPPAF CanPBRAF
- 2 SUNPATIENS® Compact Neon Pink *Impatiens* 'SAKIMP033' USPP26669
- 3 SUPERTUNIA VISTA® Silverberry *Petunia* 'USTUNI60-01M' USPP20903 Can3866

How do they compare?

Our classic **Diamond Frost** euphorbia is an airy plant that mingles well with other medium vigor companions in hanging baskets and upright containers. Its single flowers provide a subtle touch of white to break up masses of deeper colors in combinations.

The new **Diamond Snow** euphorbia also mixes well with medium vigor companions in hanging baskets and upright containers, but its double flowers and denser habit give it a stronger, brighter presence.

The super-sized **Diamond Mountain** euphorbia was selected to compete with our most vigorous annuals like Supertunia Vista® petunias. It is spectacular in extra-large hanging baskets and upright containers, and can even be used in place of a small shrub in the landscape where it will grow 2-3 feet tall.

INTRODUCING Michael Carr Designs™ Pottery and AquaPots™ by Proven Winners

Expanding into Premium Quality Pottery

Proven Winners is entering the pottery market by adding the full line of Michael Carr Designs Pottery, including the new AquaPots line of luxury grade, self-watering containers, to our brand family.

Premium quality pottery is a natural extension of our brand.

In trendsetting colors, soft raining finishes and a variety of unique styles, Michael Carr Designs Pottery is a favorite among retailers, landscape designers and home gardeners. The collection is handmade by the company's craftsmen using time tested techniques and an old-world kiln that gives each piece its own special character.

Key Benefits of AquaPots™

- The convenience of a self-watering pot with the beauty of high-quality glazed ceramics.
- No risk of overwatering. An overflow valve ensures plants cannot be overwatered.
- No unsightly plastic drip tubing. A cleaner look that can be enjoyed anywhere instead of needing to stay where plumbing is located.
- Elimination of fertilizer leaching and runoff.
- No more water ring stains on the deck or porch.
- Watering frequency is significantly decreased.
- Smaller AquaPots last at least a week between waterings; larger Professional Series pots last up to one month.
- Water savings with no waste. One quarter of the water is used with AquaPots vs. similar sized pots on drip irrigation.
- Labor savings. Plants have continuous access to fertilizer-infused water and require minimal watering.
- Frost and freeze resistant ceramic. Simply empty the pot and flip it upside down for winter (in northern gardens).

Ordering Options

There are hundreds of unique designs in multiple sizes and over a hundred color and finish options in the full Michael Carr Designs Pottery line. Smaller AquaPots sized for consumer use are included in the Home Series while larger AquaPots suitable for commercial use are sold under the Professional Series. Both series feature a variety of styles, sizes and colors which are updated annually. Customers who order full container loads direct from Vietnam will have a wider range of color options and can combine AquaPots with their standard pottery order to take advantage of discounts.

Customers are encouraged to pre-book both AquaPots and all Michael Carr Designs Pottery for Spring 2020 sales through BFG Supply Co., the exclusive distributor of Michael Carr Designs Pottery in North America.

Proven Winners will work with BFG Supply Co. and Michael Carr Designs to manage consumer marketing efforts for the line. Promotions for the line will spread across Proven Winners' social media channels, eleven consumer flower and garden shows in 2020, the *Gardener's Idea Book*, and more.

MEET THE INVENTOR OF AQUAPOTS™— Jack Barnwell

AquaPots is an exceptional new concept in self-watering containers invented and patented by Jack Barnwell, an award-winning landscape architect from Mackinac Island, Michigan. He also co-owns C3 Gardens, a landscape design firm in southern Florida which services large residential and hotel properties.

Barnwell is an avid user of Michael Carr Designs Pottery who saw the need for gorgeous, commercial grade, self-watering containers for the variety of properties he services across the country. He worked with Michael Carr to develop this stylish yet practical solution for his clients.
